Acknowledgement

The Palestinian Central Bureau of Statistics (PCBS) would like to thank all owners and managers of institutions who responded to the survey instrument, for their cooperation during the fieldwork,.

The funding for the Economic Surveys Series 2009, was provided by the Palestinian National Authority (PNA), and the Core Funding Group (CFG) for 2010. CFG members include the Representative Office of Norway to the PNA and Swiss Agency for Development and Cooperation (SDC).

Moreover, PCBS very much appreciates the distinctive efforts of the Core Funding Group (CFG) for their valuable contribution to funding the project.

Part of data collection and processing of this document was funded by the European Union. The contents of this document are the sole responsibility of the PCBS.

Preface

The establishment of a comprehensive and detailed statistical database for any economic activity is a prerequisite for planning and policy making. This applies to the economic activities that are looked upon of greater interest in most modern economies the world.

The Palestinian Central Bureau of Statistics is pleased to issue the fifteenth volume of the economic surveys for the Palestinian Territory. This edition presents the findings of the surveys conducted for 2009 as the reference year. These surveys cover most of the economic activities practiced in the Palestinian Territory since 1994.

This report includes statistical tables which present the findings of the economic surveys in the Palestinian Territory

Economic surveys in their various fields constitute the basic pillar for the compilation of National Accounts for Palestine. It is hoped that they will also fulfill the various needs and expectations of users in both private and public sectors.

Executive Summary

PCBS is pleased to release the main findings of the Economic Surveys Series for the year 2009. As in the previous rounds, this release covers the main economic activities practiced in the Palestinian Territory, including: Industry, Construction, Internal trade, Transport and Communications, and Services activities.

During the year 2009, the number of enterprises in economic activities in the Palestinian Territory was 102,483 enterprises distributed as follows:

• Industrial activities	15,322
• Construction activities	508
• Internal trade activities	61,340
• Services activities	24,144
• Transport, storage and communications activities	1,169

In the year 2009, the number of employed persons in the enterprises was 292,609 workers, distributed as follows:

• Industrial activities	67,052
• Construction activities	5,200
• Internal trade activities	125,033
• Services activities	85,756
• Transport, storage and communications activities	9,568

On the other hand, the main findings of the surveys show that the value of the output was US\$ 5,717.2 million in the enterprises, distributed as follows:

• Industrial activities	2,293.6
• Construction activities	232.1
• Internal trade activities	1,513.9
• Services activities	919.3
• Transport, storage and communications activities	758.3

Regarding other economic indicators, the results of the surveys indicate that the gross value added in the enterprises amounted to US\$ 3,692.0 million, distributed as follows:

• Industrial activities	1,046.5
• Construction activities	93.3
• Internal trade activities	1,212.9
• Services activities	668.3
• Transport, storage and communications activities	671.0

Chapter One

Introduction

National statistical offices in most countries place heavy emphasis on constructing sound databases for all economic activities. PCBS initiated the economic surveys series in the reference year 1994. These series include surveys on the industry, services, internal trade, construction-contractors, and transport and storage sectors. The sampling frame for the different economic surveys was based on the findings of the Establishment Census 2007 conducted by PCBS.

1.1 Objectives

The objectives of the survey were to obtain data on:

1. Number of enterprises and employed persons in economic activities.
2. Value of output, intermediate consumption and stocks.
3. Value added components.
4. Payments and transfers.
5. Assets and capital formation.
6. Contribution of the surveyed activities to the GDP and other national accounts variables.

1.2 Report Structure

The report is divided into five chapters as follows:

- **Chapter One:** Comprises an introduction to the economic survey including surveys' program and objectives, as well as report structure.
- **Chapter Two:** Defines the main concepts and terms used in the report with a brief description for each of them.
- **Chapter Three:** Presents the main findings of the economics survey.
- **Chapter Four:** Presents the methodology of the fieldwork in terms of questionnaire, sample, fieldwork data collection activities, and office operations. In addition, the chapter discusses data processing and tabulation.
- **Chapter Five:** Addresses the quality of the data and findings through discussing the main remarks on the fieldwork as well as comments and remarks on the tables.
- **Statistical Tables:** All tables included in this report represent three levels: the Palestinian Territory, the West Bank, and Gaza Strip.

Chapter Two

Concepts and Definitions

This chapter presents the definitions of the concepts used in the preparation of the survey tools on which data collection and processing were based. These concepts and their definitions are based on international recommendations in the fields of economic statistics and national accounts while taking into consideration the particular aspects of the Palestinian Territory.

Statistical Unit:

It is an economic entity that is capable, in its own right, of owning assets, incurring liabilities and engaging in economic activities and in transactions with other entities.

Employed Persons:

Males and females working in the enterprise including owners, self-employed, unpaid family members, or waged workers who receive their compensations in cash or in kind during a specific reference period. However, this term does not include trainees or those on assignments outside the enterprises or in long unpaid leaves.

Output:

It is the value of the final products of goods and services produced by a certain establishment which is used by other units for self-consumed or for the purposes of self gross fixed capital formation. Production includes two categories: Final products and the so-called (under operating products). Production can be classified as follows: Market outputs, Outputs of private account. and other non-market outputs

Intermediate Consumption:

It is the value of the goods and services consumed as inputs, used up or transformed during the production process. It is measured during a specific period in time in a way similar to measuring production. Intermediate consumption is estimated by purchase price, which is defined as the producers' price plus transportation and wholesale and retail trade margins. The value of the gross intermediate consumption on the level of the total economy is the same whether calculated by purchase or producers' price. However, on the detailed level, the two evaluations vary.

Value Added:

Value added is a central concept of production and refers to the generated value of any unit that carries out any productive activity. Gross value added is defined as the value of gross production less the value of intermediate consumption.

Compensations of Employees:

Compensation of employees is the total remuneration, in cash or in kind, including social security contributions, payable by an enterprise to an employee in return for work done by the latter.

Taxes on Product:

Those are taxes that are compulsory cash or in kind payments payable by producers to the general government. it consist of taxes on products payable on goods and services at production, sale, or exchange and other taxes payable on production by resident producers as a result of carrying out the production process.

Assets:

It is tangible or intangible (computer software, artistic original) that comes as an output of the production process .It is used frequently or continuously in other production process for more than one year period.

Depreciation:

It is the value of the assets which can be reproduced and depreciated during the year, depreciation is calculated on the current substitutive value.

Operating surplus:

Value added minus (compensation of employees plus net taxes on production minus subsidies and custom fees plus depreciation).

Gross Fixed Capital Formation:

It is the value of what producers own less what they spend on new and used capital goods.

Main Economic Activity:

Is the main work of the enterprise based on the (ISIC, rev3) and that contribute by the large proportion of the value added, whenever more than one activity exist in the enterprise.

Calculation of Statistical Indicators:

1. Compensation per wage employee = $\frac{\text{Compensation of Employees}}{\text{wage employees}}$
2. Output per employed person = $\frac{\text{Output}}{\text{Employed Persons}}$
3. Output per wage employee = $\frac{\text{Output}}{\text{Wage Employees}}$
4. Value added per employed person = $\frac{\text{Value added}}{\text{Employed Persons}}$
5. Value added per wage employee = $\frac{\text{Value added}}{\text{Wage Employees}}$
6. Value added to output = $\frac{\text{Value added}}{\text{Output}} \times 100$
7. Compensation to value added = $\frac{\text{Compensation of employees}}{\text{Value added}} \times 100$
8. Depreciation to output = $\frac{\text{Annual depreciation}}{\text{Output}} \times 100$

Main Findings

The main findings of the Economic Surveys for 2009 in the Palestinian Territory are as follows:

3.1 Number of Enterprises

The surveys' results show that there were 102,483 enterprises during 2009 in the activities covered, in the Palestinian economy. This number was distributed as follows: industrial activities, 15.0%, construction activities, 0.5%, internal trade activities, 59.8%, services activities, 23.6%, and transport, storage and communications activities, 1.1%.

Figure (1): Percentage Distribution of Enterprises in the Palestinian Territory by Economic Activity, 2009

3.2 Number of Employed Persons

The number of employed persons in enterprises covered economic activities amounted to 292,609 workers. This number was distributed as follows: industrial activity, 22.9%; construction activities, 1.8%; internal trade activities, 42.7%; services activities, 29.3%; and transport, storage and communications activities, 3.3%.

Figure (2): Percentage Distribution of Employed Persons in the Enterprises in the Palestinian Territory by Economic Activity, 2009

3.3 Output

The results indicate that the value of output in the enterprises was US\$ 5,717.2 million. This value was distributed by economic activity as follows: industrial activities, 40.1%; construction activities, 4.1%; internal trade activities 26.5%; services activities, 16.1%; and transport, storage and communications activities, 13.2%.

Figure (3): Percentage Distribution of Output in the Enterprises in the Palestinian Territory by Economic Activity, 2009

3.4 Value Added

The surveys' results indicate that the value added in the enterprises was US\$ 3,692.0 million. This value was distributed by economic activity as follows: industrial activities, 28.3%; constructions activities ,2.5%; internal trade activities, 32.9%; services activities,18.1 %; and transport, storage and communications activities, 18.2%.

Figure (4): Percentage Distribution of Value Added in the Enterprises in the Palestinian Territory by Economic Activity, 2009

Chapter Four

Methodology

4.1 Questionnaire

All of the economic surveys series use the same questionnaire except for a few special characteristics for each survey. The design of the 2009 questionnaire takes into account the major economic variables pertaining to the examined phenomenon, and the needs of compiling the National Accounts for Palestine.

4.2 Coverage and Sampling

4.2.1 Coverage:

The fourteen round of the Economic Survey Series were executed based on the Establishment Census 2007. The economic surveys series cover activities in accordance with (ISIC-3):

- Industry: (C, D, E)
- Construction: (F)
- Internal Trade: (G)
- Services: (H, K, M, N, O)
- Transport, Storage and Communication: (I)

4.2.2 Sample Design

The sample of the economic surveys series is a single-stage stratified random-systematic sample in which the enterprise constitutes the primary sampling unit (PSU). Three levels of strata were used to draw up an efficient representative sample (i.e., economic activity, size of employment and geographical levels). The sample size in 2009 amounted to (9,191) enterprises out of the (100,964) enterprises comprising the survey frame.

4.2.3 The Implementation Stage

This phase includes fieldwork operations, data processing and tabulation:

- Fieldwork operations: These operations were initiated after the recruitment and training of qualified interviewers, who are responsible for data collection from the field.
- Data processing and tabulation: This part includes:
 - Developing a data entry program and training of data entry clerks
 - Organizing data entry processes
 - Post-data entry editing
 - Tabulation

Chapter Five

Data Quality

5.1 Accuracy of the Data

5.1.1. Statistical Errors

The findings of the surveys were affected by statistical errors due to using sampling in conducting the surveys for the units of the target population. This increases the chances of having variances from the actual values obtained from comprehensive enumeration. The variance of the key goods in the survey was computed and dissemination was carried out on the level of the Palestinian Territory for reasons related to sample design and computation of the variance of the different indicators.

Variance Account of Industry Survey in the Palestinian Territory Level, 2009

Variable	Estimate		Standard Error	CV	95% Confidence interval	
	Unit	Value			Lower	Upper
Number of Employed Persons	Number	67,052	1212.3	0.018	6,5216	69,972
Output	US\$ 1000	2,293,632.4	98,452.2	0.041	2,193,123.7	2,579,309.2
Gross Value Added	US\$ 1000	1,046,536.0	72,346.9	0.065	972,972.2	1,256,757.9
Intermediate Consumption	US\$ 1000	1,247,096.6	35,768.8	0.028	1,201,198.6	1,341,504.3

Variance Account of Internal Trade Survey in the Palestinian Territory Level, 2009

Variable	Estimate		Standard Error	CV	95% Confidence interval	
	Unit	Value			Lower	Upper
Number of Employed Persons	Number	125,033	3,247.0	0.026	118,666	131,403
Output	US\$ 1000	1,513,898.6	53,791.8	0.036	1,408,392.8	1,619,404.6
Gross Value Added	US\$ 1000	1,212,864.0	48,526.7	0.040	1,117,684.8	1,308,043.0
Intermediate Consumption	US\$ 1000	301,034.8	11,205.6	0.037	279,056.3	323,013.3

Variance Account of Services Survey in the Palestinian Territory Level, 2009

Variable	Estimate		Standard Error	CV	95% Confidence interval	
	Unit	Value			Lower	Upper
Number of Employed Persons	Number	85,756	1522.3	0.018	82,767	88,740
Output	US\$ 1000	919,295.4	40,334.5	0.044	840,172.8	998,418.5
Gross Value Added	US\$ 1000	668,321.7	35,036.4	0.052	599,592.0	737,051.6
Intermediate Consumption	US\$ 1000	250,974.0	8,759.9	0.035	233,789.9	268,157.8

The preceding table shows the variation of the most distinct variables, where it indicates institutions with activities that have been drawn from the sample for the rest of the Palestinian Territory, which is the activities of industry, internal trade and services. Construction activities and transport, storage and communications have no variation because of a comprehensive survey. These tables show the absence of a problem in the calculation of

variation at the level of the Palestinian territories, either on the published levels, there is a high variation to some of the activities, especially industry and services in the value added, output and capital formation.

5.1.2. Non-Statistical Errors

These types of errors could appear in one or in all of the survey stages that include data collection and data entry:

Response rate values:

- Sample size in 2009 was 9,299 enterprises (including economic activity change) in the Palestinian Territory:
- Non-response cases: 1663
- Over coverage cases: 766
- Net sample: $9,299 - 766 = 8,533$
- Response rate: 80.5%
- Non-response rate: 19.5%

Response errors: This type of errors is related to respondents, fieldworkers, and data entry personnel. To avoid mistakes and reduce their impact, there has been a series of actions that aimed to enhance the accuracy of the data through a process of data collection from the field and data processing.

5.2 Comparability

Published data in this report are comparable with previous reports because same survey tools are used. The data is also internationally comparable, because they rely on the recommendations system of National Accounts 1993 (SNA93), and ISIC-3 of economic activities.

5.3 Data Quality Control

5.3.1. Fieldwork

- A specialized fieldwork team with economic background was selected; the team was trained theoretically and practically on the surveys' questionnaire.
- The main fieldwork team was selected based on skills acquired from the training course.
- Field work visits were made by both fieldwork and project management staff for monitoring and following up data collection process and progress of work. There was an average of two visits for each governorate. About 95% of completed questionnaires was reviewed and corrected if needed; comments and notes were directed to the team accordingly.
- Different levels of supervision and monitoring took place according to the following division:
 - Fieldworkers
 - Fieldworkers supervisors
 - Fieldwork coordinator. (Each has responsibilities in monitoring)
- Project management received a daily progress report about completeness and response rates
- A refresher training course was conducted during the stage of data collection for emphasizing the main issues of training and answering questions of fieldworkers about issues faced in the field.

- Some institutions were visited by fieldworkers once more to confirm the accuracy of the data obtained in first interview. These institutions were selected randomly by withdrawing a random sample of 5% of the original sample of the survey, and then the data was compared with data from series surveys.

5.3.2 Data Processing

For insuring quality and consistency of data, a set of measures was taken into account for strengthening accuracy of data as follows:

- Preparing a data entry program before data collection for checking readiness of the program for data entry.
- A set of validation rules were applied on the program for checking consistency of data.
- Efficiency of the program was checked through pre-testing by entering a few questionnaires, including incorrect information, for checking its efficiency in capturing these incorrect information.
- Well-trained data keyers were selected and trained for main data entry.
- Weekly data files were received by project management for checking accuracy and consistency; notes of correction were provided for data entry management for correction.

5.4 Notes on Data

1. Differences of results of certain indicators that can be noticed are due to approximation.
 2. There are some economic activities at second ISIC (two digits) were combined with previous activity to maintain the confidentiality of data in accordance with the statistics law for year 2000.
 3. Financial data was collected by NIS, US \$ and JD, but it was converted and published in US \$.
 4. There are some zero values due to either that such values are low, or unavailable in some enterprises of the selected sample
 5. The services survey covers profit, non-profit enterprises, and output non-profit enterprises in National Accounts system 1993 (SNA 93) equal to the value of intermediate consumption, and the value of employees compensation, in addition to the value of net taxes and fees on production and value of the depreciation of fixed assets
 6. Noticeable increase in the main economic indicators related to the electricity activity in the Gaza Strip and that is due to the ability to collect data from the only electricity enterprise there.
 7. The percentage of non-response data in the Gaza Strip in 2009 was high.
 8. The number of enterprises in the economic surveys exceeded the number in the establishments register in the year 2009 because of limited update performed on the Establishments Register.
- **Exchange rates**
 US \$ / NIS = 3.9280
 US \$ / JD = 0.7028
