Chile	CHL

STUDY TYPE

Case study

ABSTRACT

This study examines the effect of the use of two Open Educational Resources (OER) (a Khan Academy online tutorial and an open textbook hosted on Wikibooks) on logical-mathematical outcomes for first and second-year students in higher education institutions in Chile. It also investigates perceptions of instructors and students about the use of OER, in order to understand how these resources are used and valued. Quantitative and qualitative methods were used to collect student performance data via a student survey, student focus groups, interviews with instructors, and sourcing institutional records.

Only the institutional records, focus group data and interview data are included in the final dataset. Student survey data is not made available for confidentiality reasons. Findings indicate that students in a contact-study mathematics course who used a Khan Academy online mathematics tutorial obtained better examination results than students who did not use any additional resources, or those who used the open textbook. Moreover, it was also found that instructors and students have positive perceptions about the use of Khan Academy and Wikibooks materials. This study is Sub-project 9 of the Research on Open Educational Resources for Development (ROER4D) project, hosted by the Centre for Innovation in Learning and Teaching (CILT) at the University of Cape Town, South Africa, and Wawasan Open University, Malaysia.

KIND OF DATA

Sample survey data [ssd]

UNIT OF ANALYSIS

Individuals

Version

VERSION DESCRIPTION

Version 01: Edited, anonymized dataset for public distribution.

VERSION DATE

2016

VERSION NOTES

Version 1 of the dataset was deposited with DataFirst on 5 July 2016.

Scope

NOTES

The data covers perceptions of students and instructors of the value of OER materials over traditional teaching and learning materials in Chile. This was supplemented by record data from the institution on student performance.

KEYWORDS

Keyword

Open textbooks
Open Educational Resources
Mathematics
Open Data

Coverage

GEOGRAPHIC COVERAGE

The interviews and survey data were conducted at one institution in Chile and are not representative of the country as a whole.

UNIVERSE

The survey covered students and instructors in the single institution involved in the study.

Producers and sponsors

PRIMARY INVESTIGATORS

Name	Affiliation
Research on Open Educational Resources for Development (ROER4D)	University of Cape Town

FUNDING AGENCY/SPONSOR

Data Collection

DATES OF DATA COLLECTION

Start	End
2014-07	2015-07

DATA COLLECTION MODE

Face-to-face and internet [f2f-int]

DATA COLLECTION NOTES

The interviews were conducted with two instructors and three students, and comprised 20-30 (modal average 22) questions (1-1.5 hour interviews). An online survey was also administered to measure student perceptions of the use of OE (49 responses).
