ABSTRACT

One of the goals of the Study on Global Ageing and Adult Health (SAGE) is to examine and measure the relationship between health and well-being. SAGE is the first study to measure and distinguish between two concepts of well-being: experiential and evaluative, in low and middle income countries. The short version WHO Quality of Life (WHOQOL) instrument was used to measure evaluative well-being. An adapted version of the Day Reconstruction Method (DRM) was used to measure emotional or experiential well-being.

However further substantiation for measuring emotional well-being and adjusting for systematic biases in self-report is required.

Objectives:

1. To compare short versus full day version of the DRM questionnaire
2. Reproducibility of the questionnaire: test-retest
3. To compare self-report to biological markers of stress and negative emotions

Methods:

The short and full day versions of the DRM questionnaires were implemented in Jodhpur, Rajasthan, India.

The target sample size was 1560 respondents, 200 respondents on Monday through Saturday and 360 respondents on Sunday.

The version of the short questionnaire was randomly assigned to each selected respondent:

- short "morning" (Set A)
- short "afternoon" (Set B)
- short "evening" (Set C)
- short "full day" (Set D).

Each set was assigned to 390 respondents.

The interviewer returned to the same household and respondent one or two weeks later on the same weekday or weekend day for a second interview. On this occasion the full day DRM questionnaire was administered. Interviewers were asked about the previous day (i.e. day prior to the interview) in each interview. Duration of the short version module of the DRM was at most 15 minutes of interview time in total.

Blood samples:

Blood samples were collected after the final interview by dry blood spot (DBS) and venepuncture (i.e. 2 blood samples per respondent - one DBS and one test tube). Protocols for the DBS and venepuncture followed procedures previously used for the SAGE pilot and full survey. The blood samples will be examined for fibrinogen, while also assessing the characteristics of DBS versus venepuncture.

Review of hospital records:

Each respondent was asked if the survey team would be allowed to review their hospital records. Two groups of subjects will be selected and their records reviewed:

1. positives: individuals with a previous diagnosis of any of the 8 conditions included in the full day questionnaire: arthritis; angina; diabetes; chronic lung disease; asthma; depression; hypertension; cataracts.
2. negatives: matched individuals free of all 8 conditions.

This would allow us to determine the accuracy, reliability and predictive values of self-reported health conditions as part of this survey.

INTERVIEWER INSTRUCTIONS

INTERVIEWER: For this module, you will ask the respondent to reconstruct her or his previous day beginning from when s/he woke up until the end of the day, typically with the respondent going to bed for the night. We want the respondent to tell you about the entire day - reconstructing and remembering the events, persons and feelings experienced yesterday.

We have provided space for up to 20 activities - however, if the respondent has less than 20 activities, you should stop after the respondent has completed her/his day and skip to Q7960. If the respondent has more than 20 activities, you should also

just proceed to Q7960. You will see that the activities are numbered 1-20, but you should NOT read the activity numbers to the respondent.

Q7014: q7014: awoke (hh:mm)

description

DEFINITION

Now I would like to ask you questions about what you did yesterday. I want you to try to remember the sequence of activities that you did starting from when you woke up until you went to sleep for the night. We'll go through this one activity at a time.

People do different activities throughout the day. Here is a list of examples: working, preparing food, doing housework, watching children, traveling to work or the market, grooming, bathing, eating, exercising, praying, resting, chatting with friends, playing cards, watching TV, listening to the radio, reading the newspaper or taking care of someone.

I would like for you to tell me about all the different things that you did yesterday. You may have done some of the things that I just mentioned. You may have done other things too.

Please keep all of your responses to just a word or two. And you don't have to mention very short activities, like washing hands, which only take one or two minutes. We'll start at the beginning.

INTERVIEWER INSTRUCTIONS

Please include people who may presently be in an institution due to their health (for example, in hospital or old people's home) for a short time.

description

DEFINITION

I would first like to know how many people live in this household/dwelling. Let me assure you that any information you provide is strictly confidential. By asking "who lives at this household?", I mean those who share meals ('eat out of the same cooking pot') and usually stay here for at least four months a year. Please include people who may presently be in an institution due to their health (for example, in hospital or old people's home) for a short time.

I would like to know the age, sex, marital status, educational level and relationship to the household head of each of the members of this household who live here.

3. No

description

DEFINITION

In the last part of this section, I will ask about the total income for the household in the last 12 months (previous to today) from paid work or other sources. I would like to know about all sources of income. I know it may be difficult to calculate that figure, but please do try to give as accurate an amount as possible. Remember that all information will be kept strictly confidential. This information is important to assess overall health and well-being of people in your household compared to other similar households.

DEFINITION

I would like to ask you questions about your health and well-being. I know some of these questions may be sensitive or difficult to answer, but please try to provide an answer. I will ask about your overall health, including both your physical and your mental health. Some of the questions may sound similar or repetitive, but I need to ask all of the questions for the sake of completeness. This information is confidential and you will not be identified individually or without your consent.

description

DEFINITION

Now I would like to review the different functions of your body. When answering these questions, I would like you to think about the last 30 days, taking both good and bad days into account. When I ask about difficulty, I would like you to consider how much difficulty you have had, on average, in the last 30 days, while doing the activity in the way that you usually do it. By difficulty I mean requiring increased effort, discomfort or pain, slowness or changes in the way you do the activity. Please answer this question taking into account any assistance you have available.

INTERVIEWER INSTRUCTIONS

INTERVIEWER: For this module, you will ask the respondent to reconstruct her or his previous day beginning from when s/he woke up. It is unlikely that you will be able to reconstruct the entire day in the 15 minutes allotted for this section. You must stop asking about activities after 15 minutes. Keep track of time elapsed by using the questions like Q7210, Q7260... After 15 minutes, skip to Q7500.

INTERVIEWER INSTRUCTIONS

INTERVIEWER: If respondent can't remember, get his or her best guess

description

DEFINITION

Now I would like to ask you questions about what you did yesterday. I want you to try to remember the sequence of activities that you did from when you woke up until later in the day. We'll go through this one activity at a time.

People do different activities throughout the day. Here is a list of examples: working, preparing food, doing housework, watching children, traveling to work or the market, grooming, bathing, eating, exercising, praying, resting, chatting with friends, playing cards, watching TV, listening to the radio, reading the newspaper or taking care of someone.

I would like for you to tell me about all the different things that you did yesterday. You may have done some of the things that I just mentioned. You may have done other things too.

Please keep all of your responses to just a word or two. And you don't have to mention very short activities, like washing hands, which only take one or two minutes. We'll start at the beginning.

INTERVIEWER INSTRUCTIONS

Please include people who may presently be in an institution due to their health (for example, in hospital or old people's home) for a short time.

description

DEFINITION

I would first like to know how many people live in this household/dwelling. Let me assure you that any information you provide is strictly confidential. By asking "who lives at this household?", I mean those who share meals ('eat out of the same cooking pot') and usually stay here for at least four months a year. Please include people who may presently be in an

institution due to their health (for example, in hospital or old people's home) for a short time.

I would like to know the age, sex, marital status, educational level and relationship to the household head of each of the members of this household who live here.

description

DEFINITION

In the last part of this section, I will ask about the total income for the household in the last 12 months (previous to today) from paid work or other sources. I would like to know about all sources of income. I know it may be difficult to calculate that figure, but please do try to give as accurate an amount as possible. Remember that all information will be kept strictly confidential. This information is important to assess overall health and well-being of people in your household compared to other similar households.

DEFINITION

Now I would like to review the different functions of your body. When answering these questions, I would like you to think about the last 30 days, taking both good and bad days into account. When I ask about difficulty, I would like you to consider how much difficulty you have had, on average, in the last 30 days, while doing the activity in the way that you usually do it. By difficulty I mean requiring increased effort, discomfort or pain, slowness or changes in the way you do the activity. Please answer this question taking into account any assistance you have available.

INTERVIEWER INSTRUCTIONS

INTERVIEWER: For this module, you will ask the respondent to reconstruct her or his previous day beginning from when s/he woke up. It is unlikely that you will be able to reconstruct the entire day in the 15 minutes allotted for this section. You must stop asking about activities after 15 minutes. Keep track of time elapsed by using the questions like Q7210, Q7260... After 15 minutes, skip to Q7500.

INTERVIEWER INSTRUCTIONS

INTERVIEWER: If respondent can't remember, get his or her best guess

description

DEFINITION

Now I would like to ask you questions about what you did yesterday. I want you to try to remember the sequence of activities that you did from when you woke up until later in the day. We'll go through this one activity at a time.

People do different activities throughout the day. Here is a list of examples: working, preparing food, doing housework, watching children, traveling to work or the market, grooming, bathing, eating, exercising, praying, resting, chatting with friends, playing cards, watching TV, listening to the radio, reading the newspaper or taking care of someone.

I would like for you to tell me about all the different things that you did yesterday. You may have done some of the things that I just mentioned. You may have done other things too.

Please keep all of your responses to just a word or two. And you don't have to mention very short activities, like washing hands, which only take one or two minutes. We'll start at the beginning.
