Scope

NOTES

GYTS is composed of 56 "core" questions designed to gather data on the following seven domains:

1. Knowledge and attitudes of young people towards cigarette smoking
2. Prevalence of cigarette smoking and other tobacco use among young people
3. Role of the media and advertising in young people's use of cigarettes
4. Access to cigarettes
5. Tobacco-related school curriculum
6. Environmental tobacco smoke (ETS)
7. Cessation of cigarette smoking

Countries may add additional optional questions, such as on shisha use, smokeless tobacco use or e-cigarettes, or country-specific questions.

Sampling

SAMPLING PROCEDURE

GYTS uses a global standardized methodology that includes a two-stage sample design with schools selected with a probability proportional to enrollment size. The classes within selected schools are chosen randomly and all students in selected classes are eligible to participate in the survey.

A total of 1,565 students aged 13-15 participated in the Ecuador-Guayaquil GYTS.

A total of 1,389 students aged 13-15 participated in the Ecuador-Quito GYTS.

A total of 352 students aged 13-15 participated in the Ecuador-Zamora GYTS.

RESPONSE RATE

Guayaquil: The school response rate was 100.0%, the class response rate was 100.0%, the student response rate was 89.9% and the overall response rate was 89.9%.

Quito: The school response rate was 92.0%, the class response rate was 100.0%, the student response rate was 95.1% and the overall response rate was 87.5%.

Zamora: The school response rate was 90.0%, the class response rate was 100.0%, the student response rate was 94.8% and the overall response rate was 85.3%.

WEIGHTING

The weighting formula used is:

$$W = W1 * W2 * f1 * f2 * f3 * f4$$

The list below shows what each variable in the formula represents.

W1 - The inverse of the probability of selecting the school

W2 - The inverse of the probability of selecting the class within the school

f1 - a school-level nonresponse adjustment factor calculated by school size category (small, medium, large)

f2 - a class adjustment factor calculated by school

f3 - a student-level nonresponse adjustment factor calculated by class

f4 - a post stratification adjustment factor calculated by gender and grade
