TITLE
STEPwise Approach to Non-Communicable Diseases Risk Factor Surveillance 2006

SUBTITLE
Addis Ababa

COUNTRY

Name	Country code
Ethiopia	ETH

STUDY TYPE
Other Household Survey [hh/oth]

SERIES INFORMATION
This is the second STEPS conducted by Ethiopia.

ABSTRACT

STEPS is a household-based survey to obtain core data on the established risk factors that determine the major burden of NCDs.

KIND OF DATA
Sample survey data [ssd]

UNIT OF ANALYSIS
Individuals

Version

VERSION DESCRIPTION
Public-use dataset

Scope

NOTES

The following topics were included in the survey: tobacco use, alcohol consumption, diet, physical activity, history of raised blood glucose and history of raised blood pressure. Additionally, the following measures were taken: blood pressure, height, weight, waist circumference and hip circumference.

TOPICS

Topic	Vocabulary
STEPS	Survey

KEYWORDS

Keyword
noncommunicable diseases
risk factors
health surveys

tobacco use
alcohol use
diet
nutrition
physical activity
blood pressure
overweight
obesity
diabetes
hypertension

Coverage

GEOGRAPHIC COVERAGE

Subnational coverage: Addis Ababa

UNIVERSE

Adults aged 25-64 years.

Producers and sponsors

PRIMARY INVESTIGATORS

Name

School of Public Health, Addis Ababa University

Sampling

SAMPLING PROCEDURE

A multi-stage (cluster + random) sampling design was used. 10 of the 99 kebeles were randomly selected, then identified and listed for further random selection as smaller geographic units within the kebeles (known as zones or villages). 4 zones from each kebele were randomly selected, then the first household from each zone were randomly selected. Thereafter, subsequent households were selected on the basis of proximity to the first and the preceding household. The total sample size of 4001 was distributed among the 10 kebeles so that approximately 400 adults, equally divided between men and women, were included from each kebele. Adults aged 25 to 64 years who were permanent residents and available in the selected households at the time of the visit were eligible to participate.

RESPONSE RATE

The overall response rate was 98.2%.

WEIGHTING

Data were not weighted.

Access policy

CONTACTS

Name	Affiliation	Email	URL
NCD Surveillance Team	World Health Organization	ncdmonitoring@who.int	Link

ACCESS CONDITIONS

The user undertakes:

- (1) to acknowledge the data source.
- (2) to share any planned publications with WHO prior to publication.
- (3) to offer co-authorship of any reports or publications using the survey results to the coordinator of the survey.
- (4) to use the data for non-commercial, not-for-profit public health purposes only.

CITATION REQUIREMENTS

Publications based on STEPS data should cite the survey report (if available) and acknowledge the data source in the following manner:

"This paper uses data from the [country] [year] STEPS survey, implemented by [implementing agency] with the support of the World Health Organization."
