NOTES

GYTS is composed of 56 "core" questions designed to gather data on the following seven domains:

2. Prevalence of cigarette smoking and other tobacco use among young people
3. Role of the media and advertising in young people's use of cigarettes
4. Access to cigarettes

Sampling

SAMPLING PROCEDURE

GYTS uses a global standardized methodology that includes a two-stage sample design with schools selected with a probability proportional to enrollment size. The classes within selected schools are chosen randomly and all students in selected classes are eligible to participate in the survey.

Maputo City: A total of 1,381 students aged 13-15 in classe 5, 6, 7 and 8 completed the survey.

Central Provinces: A total of 595 students aged 13-15 in classe 5, 6, 7 and 8 completed the survey.

RESPONSE RATE

Maputo City: The overall response rate was 77.4%.

Central Provinces: The overall response rate was 53.5%.

WEIGHTING

The weighting formula used is:

$$W=W1 * W2 * f1 * f2 * f3*f4$$

The list below shows what each variable in the formula represents.

W1 - The inverse of the probability of selecting the school

W2 - The inverse of the probability of selecting the class within the school

f1 - a school-level nonresponse adjustment factor calculated by school size category (small, medium, large)

f2 - a class adjustment factor calculated by school

f3 - a student-level nonresponse adjustment factor calculated by class

f4 - a post stratification adjustment factor calculated by gender and grade
