Sampling

SAMPLING PROCEDURE

GYTS uses a global standardized methodology that includes a two-stage sample design with schools selected with a probability proportional to enrollment size. The classes within selected schools are chosen randomly and all students in selected classes are eligible to participate in the survey.

Ausha: A total of 1,041 students aged 13-15 in grade 6, grade 7, form 1, and form 2 completed the survey.

Dar Es Salaam: A total of 1,354 students aged 13-15 in grade 6, grade 7, form 1, and form 2 completed the survey.

Kilimanjaro: A total of 1,376 students aged 13-15 in grade 6, grade 7, form 1, and form 2 completed the survey.

RESPONSE RATE

Ausha: The overall response rate was 79.3%.

Dar Es Salaam: The overall response rate was 85.0%.

Kilimanjaro: The overall response rate was 89.6%.

WEIGHTING

The weighting formula used is:

$$W=W1 * W2 * f1 * f2 * f3*f4$$

The list below shows what each variable in the formula represents.

W1 - The inverse of the probability of selecting the school

W2 - The inverse of the probability of selecting the class within the school

f1 - a school-level nonresponse adjustment factor calculated by school size category (small, medium, large)

f2 - a class adjustment factor calculated by school

f3 - a student-level nonresponse adjustment factor calculated by class
 f4 - a post stratification adjustment factor calculated by gender and grade
