ABSTRACT
The FAO has developed a monitoring system in 26 food crisis countries to better understand the impacts of various shocks on agricultural livelihoods, food security and local value chains. The Monitoring System consists of primary data collected from households on a periodic basis (more or less every four months, depending on seasonality). The FAO launched a household survey between 25 October and 15 December 2022 to monitor agricultural livelihoods and food security in Sierra Leone. The data was collected using a mobile survey across five provinces in the following 16 districts: Bo, Bombali, Bonthe, Falaba, Kailahun, Kambia, Kenema, Kerene, Koinadugu, Kono, Moyamba, Port Loko, Pujehun, Tonkolili, Western Area Rural and Western Area Urban. A total of 2891 households were surveyed. Data collection took place during the early harvest period. For more information, please go to https://data-in-emergencies.fao.org/pages/monitoring
