ABSTRACT
The FAO has developed a monitoring system in 26 food crisis countries to better understand the impacts of various shocks on agricultural livelihoods, food security and local value chains. The Monitoring System consists of primary data collected from households on a periodic basis (more or less every four months, depending on seasonality). The FAO launched a Round 4, computer-assisted telephone interviews (CATI) survey from 29 March to 30 April 2022. Households were surveyed across all 22 governorates of Yemen. A survey targeting 2420 households was initially designed with 110 households targeted in each of the 22 governorates. The sample was representative of the population of Yemen and of the governorates (Admin 1) with a 95 percent confidence level and a 6 percent margin of error. A total of 2452 households were interviewed during this fourth round of data collection. For more information, please go to https://data-in-emergencies.fao.org/pages/monitoring

Sampling

SAMPLING PROCEDURE

A survey targeting 2 420 households was initially designed with 110 households targeted in each of the 22 governorates. The sample was representative of the population of Yemen and of the governorates (Admin 1) with a 95 percent confidence level and a 6 percent margin of error. A total of 2 452 households were interviewed during this fourth round of data collection, 66 percent of which were engaged in agricultural activities (crop, livestock and both), and 2 percent of which were engaged in fish production and sales in the 12 months preceding the survey. This fourth-round survey was the first to be representative at both the national and governorate level in Yemen.

WEIGHTING

Weights are computed. Regional strata weight, wealth weight, and educational weight are used for the calculation of final weights. For wealth weight baseline information at the country level is used. For the educational weights "religious education" is combined with "no education", while "3-Completed basic school [grades 1-9]" is combined with "2-Completed primary school [grade 1-6]"

DATA EDITING

The datasets have been edited and processed for analysis by the Needs Assessment team at the Office of Emergencies and Resilience, FAO, with some dashboards and visualizations produced. For more information, see https://data-in-emergencies.fao.org/pages/countries.

METHODOLOGY NOTES

The dataset was anonymized using Statistical Disclosure methods by the Data in Emergencies Hub team and reviewed by the Office of Chief Statistician at FAO. All direct identifiers have been removed prior to data submission.
In addition, recoding and local suppressions were applied to ensure data confidentiality. Recoding was especially applied to education, residence status and wealth variables.
