DATA COLLECTION MODE

Computer Assisted Personal Interview [capi]

SUPERVISION

The monitoring team of PACT and DGCT perform field monitoring, in order to visit enumerators and support them in the field, and check if they actually visited the administrations they should.

The DIME team runs remote supervision by daily monitoring progress in data collection, especially the number of questionnaires per enumerator, as well as the total number of questionnaires per domain.

DATA COLLECTION NOTES

The data is usually collected in July on 349 municipalities of Burkina Faso. Data is collected retrospectively, meaning that data for year T is collected in year T+1.

The process is organized by the Government, through PACT, with the technical support of DIME on questionnaires updating, data quality check and cleaning, and indicators' calculation.

Questionnaires

QUESTIONNAIRES

SUPERMUN data is collected through 5 main questionnaires: One covers data on municipal capacity; two collect education data by collecting data with school districts and school directors; two others covers health data through health districts and health facilities.
