## Identification

### SURVEY ID NUMBER

AFG\_2023\_RIMA\_v01\_M\_v01\_A\_ESS

### TITLE

Resilience Index Measurement and Analysis Survey in Afghanistan 2023

### SUBTITLE

First Round

### ABBREVIATION OR ACRONYM

RIMA 2023

### COUNTRY

Name	Country code
Afghanistan	AFG

### ABSTRACT

In line with the United Nations Strategic Framework for Afghanistan (UNSFA) for 2023-2025, the Resilience Capacity Index (RCI) from the Resilience Index Measurement and Analysis (RIMA) approach has been adopted by various United Nations agencies as an indicator for measuring progress on household resilience levels under UNSFA Outcome 2.3.c: Improvement in Rural Household Resilience). In 2023, FAO, as the custodian responsible for measuring and reporting on the UNSFA resilience indicator, conducted the first RIMA survey in Afghanistan. The primary objective of this survey is to collect multi-topic household data with a focus on analyzing resilience capacity to food insecurity.

### KIND OF DATA

Sample survey data [ssd]

### UNIT OF ANALYSIS

Households

## Scope

### NOTES

The RIMA methodology focuses on households as the primary unit of analysis, as households are where all risk management decisions related to the food system are made. The survey collect information on household characteristics as well as the four main determinants of resilience: access to basic services, assets, social safety nets, and adaptive capacity. In addition, it collects information on food security indicators, migration, displacement, and dispute.

## Coverage

### GEOGRAPHIC COVERAGE

All 34 Provinces of Afghanistan.

## Producers and sponsors

### PRIMARY INVESTIGATORS

Name
Food and Agriculture Organization (FAO)

### FUNDING AGENCY/SPONSOR

Name	Abbreviation
United States Agency for International Development	USAID
The World Bank	WB
European Union	EU

## Sampling

### SAMPLING PROCEDURE

A two-stage cluster random sampling approach will be applied to draw the sample of households to be interviewed. The first stage selects an equal number of clusters per province. The selection of cluster will be done with Probability Proportional to Size. In the second stage a fixed number of households per cluster will be randomly selected who participated in wheat cultivation package, livestock protection, cash for work, unconditional cash transfer, poultry, small farm equipment, summer crop and home gardening interventions. The resilience will be measured by statistically testing the differences in means of key outcome variables between beneficiary and non-beneficiary (control) households. Control households will be randomly selected among those households that did not receive any assistance (neither from FAO nor from other organizations) in the project period. The sampling frame of control household will include only households that comply with the targeting criteria of FAO's interventions, in order to ensure that beneficiary and control households (1) have similar socioeconomic conditions; (2) are located in the same areas. For beneficiary households, the sampling will be based on the complete lists of beneficiaries of the different projects analyzed. Using these lists, a random sample of households will be drawn. For control households, a long-list of comparably vulnerable households in the pre-selected sample provinces would be obtained, based on the eligibility criteria of the three projects. A random sample of households will be drawn from these lists, and the process will be documented. Household will be surveyed in the 34 provinces. 30 percent oversampling is considered because of the successive rounds of surveys to tracking the same households to ensure offset of attrition rate. The total household population target which will be assisted by each intervention would be used as a weight.

### WEIGHTING

No weighting has been applied.

## Data collection

### DATES OF DATA COLLECTION

Start	End
2023-01	2023-05

### DATA COLLECTION MODE

Computer Assisted Personal Interview [capi]

## Access policy

### CONTACTS

Name	Affiliation	Email
RESA - Resilience Analysis for Action	FAO	FAO-RIMA@fao.org

### CONFIDENTIALITY

The users shall not take any action with the purpose of identifying any individual entity (i.e. person, household, enterprise, etc.) in the micro dataset(s). If such a disclosure is made inadvertently, no use will be made of the information, and it will be reported immediately to FAO.

### ACCESS CONDITIONS

Micro datasets disseminated by FAO shall only be allowed for research and statistical purposes. Any user which requests access working for a commercial company will not be granted access to any micro dataset regardless of their specified purpose. Users requesting access to any datasets must agree to the following minimal conditions:

- The micro dataset will only be used for statistical and/or research purposes;
- Any results derived from the micro dataset will be used solely for reporting aggregated information, and not for any specific individual entities or data subjects;
- The users shall not take any action with the purpose of identifying any individual entity (i.e. person, household, enterprise, etc.) in the micro dataset(s). If such a disclosure is made inadvertently, no use will be made of the information, and it will be reported immediately to FAO;
- The micro dataset cannot be re-disseminated by users or shared with anyone other than the individuals that are granted access to the micro dataset by FAO.

## Disclaimer and copyrights

### DISCLAIMER

The user of the data acknowledges that the original collector of the data, the authorized distributor of the data, and the relevant funding agency bear no responsibility for use of the data or for interpretations or inferences based upon such uses.
