STUDY TYPE

Agricultural Census [ag/census]

ABSTRACT

NASC is an exercise designed to fill the existing data gap in the agricultural landscape in Nigeria. It is a comprehensive enumeration of all agricultural activities in the country, including crop production, fisheries, forestry, and livestock activities. The implementation of NASC was done in two phases, the first being the Listing Phase, and the second is the Sample Survey Phase. Under the first phase, enumerators visited all the selected Enumeration Areas (EAs) across the Local Government Areas (LGAs) and listed all the farming households in the selected enumeration areas and collected the required information. The scope of information collected under this phase includes demographic details of the holders, type of agricultural activity (crop production, fishery, poultry, or livestock), the type of produce or product (for example: rice, maize, sorghum, chicken, or cow), and the details of the contact persons. The listing exercise was conducted concurrently with the administration of a Community Questionnaire, to gather information about the general views of the communities on the agricultural and non-agricultural activities through focus group discussions.

The main objective of the listing exercise is to collect information on agricultural activities at household level in order to provide a comprehensive frame for agricultural surveys. The main objective of the community questionnaire is to obtain information about the perceptions of the community members on the agricultural and non-agricultural activities in the community.

Additional objectives of the overall NASC program include the following:

- To provide data to help the government at different levels in formulating policies on agriculture aimed at attaining food security and poverty alleviation
- To provide data for the proposed Gross Domestic Product (GDP) rebasing

VERSION DESCRIPTION

Version 1.0: Edited, anonymized microdata

VERSION DATE

2022-04-23

VERSION NOTES

This dataset is the anonymized version of the cleaned dataset of the 2022 National Agricultural Sample Census Community listing.

Scope

NOTES

The community listing component of National Agricultural Sample Census (NASC) covered the following subject areas:

- Identification of the community
- Respondent Characteristics (Name, Sex, age)
- Agricultural Activities in the Community
- Disasters and Shocks
- Community Infrastructure and Transportation
- Community Organizations
- Community Resources Management
- Land Prices and Credit
- Community Key Events
- Labour

Sampling

SAMPLING PROCEDURE

Focus group interviews were performed in communities overlapping with in the EAs selected for the extended listing operation. Accordingly, a focus group discussion in a total of 26,555 communities were undertaken to administer the community level questionnaire. It is important to note here that the results from the community survey are unweighted results and all the tables produced from the community level data are only from the 26,555 communities interviewed.

WEIGHTING

Statistics in the community listing microdata are unweighted

Data collection

DATES OF DATA COLLECTION

Start	End
2022-07-06	2022-09-09

DATA COLLECTION MODE

Computer Assisted Personal Interview [capi]

SUPERVISION

Adequate physical monitoring and spot-checks were carried out by senior-level officers of the Bureau, Federal Ministry of Agriculture and Food Security (FMAFS), and National Population Commission (NPC).

The monitoring of fieldwork was done in three phases, the first round started concurrently with the commencement of data collection to ensure a smooth start to the data collection effort. The second round of monitoring was in the middle of the fieldwork stage, while the third occurred towards the end of the fieldwork.

The activities carried out included:

- Visitation of different teams in various LGAs with special attention to the EAs that were broken into segments.
- Resolving observable challenges that called for urgent attention.
- Collaborating with the state officers to compile all EAs that required replacement, reach out to enumerators, and discuss observations and comments from the World Bank and FAO, and proffer solutions where necessary.
- Identification of enumerators who did not properly classify agricultural and non-agricultural enterprises, for better understanding and proper classification.
- Spot-checking of EAs where the number of households listed by the enumerators was less than what the NPC listed.
- Randomly visited households where enumerators listed over 100 members of a household to confirm the true scenario of the household membership using the interviewer keys.
- Online real-time data monitoring and immediate feedback.

DATA COLLECTION NOTES

THE TRAINING OF FIELD STAFF

The NASC training was conducted at two levels. The first level was a national level training-of-trainers (ToT), which took place at the Public Service Institute in Abuja. The training lasted for 5 days (the 20th-24th of June 2022). The last day of the training was utilized for field practice, where the trainees were taught on how to locate enumeration areas using the pointer in the Google Earth application to navigate and trace the boundaries of the EA, and collect information on the buildings and households in the EA.

Participants at the first level of training included the following:

- Trainers/Monitors (National Bureau of Statistics (NBS), Federal Ministry of Agriculture and Food Security (FMAFS) (formally Federal Ministry of Agriculture and Rural Development (FMARD)) and the National Population Commission (NPC)).
- State Officers (NBS)
- Coordinators (NBS, FMAFS AND NPC)
- Facilitators (NBS)

The second level training was the Training of Enumerators (ToE), which took place in all the 36 states and the Federal Capital Territory (FCT). There were eighty-two (82) training centers nationwide. The state-level trainings were held over a period of six days (29th of June-5th July, 2022) including five days of training, and one day of field tests.

Participants at the state training level include the following:

- Enumerators/Interviewers (NBS, FMAFS (formally FMARD), State Agriculture Development Programme (ADP), State Bureaus of Statistics/State Statistical Agencies (SBS/SSA)
- NBS State Officers
- NBS Zonal Controllers
- Trainers/Monitors
- Coordinators
- Statistician General of State Bureau of Statistics/Directors of State Statistical Agency
- Staff of State Ministry of Agriculture
- Independent Monitors

DATA COLLECTION

Two teams were constituted in each LGA. A team comprised of one team lead and one teammate. Permanent field staff of National Bureau of Statistics (NBS) served mostly as team leads. Enumerators were also drawn from relevant stakeholders from Ministries, Departments and Agencies (MDAs), both at the federal and state level. The two enumerators had separate CAPI devices and they both served as listers and mappers. The two interviewers worked simultaneously in the same EA. They located together the boundaries of the EA and identified all of the buildings therein and numbered the building accordingly. Following this, they split the buildings into two, with one interviewer covering the buildings with odd numbers, while other covered the buildings with even numbers. This was to avoid omission or double counting within the EAs. Interviewers were expected to spend two and a half days for both the household listing and administration of community questionnaires in each EA. A team was mandated to cover twenty (20) EAs, with the total number of days allotted for fieldwork at fifty (50) days.

ORGANIZATION OF FIELD WORK

On arrival at the EA, the enumerators visited the community head(s) to explain their mission to the community and made arrangement on how to go about the administration of the questionnaires. The two enumerators first did the numbering of all relevant structures within the EA, and thereafter, carried out the listing exercise accordingly. One enumerator listed the structures with odd numbers while the second enumerator listed all the structures with even numbers.

questionnaires

QUESTIONNAIRES

The NASC community listing questionnaire served as a meticulously designed instrument administered within every community selected to gather comprehensive data. It encompassed various aspects such as agricultural activities in the community, infrastructures, disaster, etc. The questionnaire was structured into the following sections:

- Identification of the community
- Respondent Characteristics (Name, Sex, age)
- Agricultural Activities in the Community
- Disasters and Shocks
- Community Infrastructure and Transportation
- Community Organizations
- Community Resources Management
- Land Prices and Credit
- Community Key Events
- Labour

data_processing

DATA EDITING

Data processing of the NASC household listing survey included checking for inconsistencies, incompleteness, and outliers. Data editing and cleaning was carried out electronically using the Stata software package. In some cases where data inconsistencies were found a call back to the household was carried out. A pre-analysis tabulation plan was developed and the final tables for publication were created using the Stata software package.

METHODOLOGY NOTES

STATISTICAL DISCLOSURE CONTROL

To safeguard the confidentiality of household information, rigorous anonymization techniques have been employed on the edited microdata. This process involved the removal of all direct identifiers, such as names, GPS locations, and specific addresses. Additionally, geographic information below the state level has been excised to prevent any potential identification of communities based on their location.

Furthermore, a masking technique (local suppression algorithms) has been implemented on the quasi-identifying variables using the R package sdcMicro. This ensures that even subtle patterns or combinations of variables that could potentially lead to re-identification are obfuscated, thereby enhancing the overall security and privacy of the dataset.

CONFIDENTIALITY

The confidentiality of the individual respondent is protected by law (Statistical Act 2007) This is published in the Official

Gazette of the Federal republic of Nigeria No. 60 vol. 94 of 11th June 2007. See section 26 para.2. Punitive measures for breeches of confidentiality are outlined in section 28 of the same Act.

ACCESS CONDITIONS

A comprehensive data access policy is been developed by NBS, however section 27 of the Statistical Act 2007 outlines the data access obligation of data producers which includes the release of properly anonymized micro data.

V103	c2eq1__1	three main causes of conflict: Land	1. (a) What were the three main causes of conflict in this community in the past 3 years? (b) FOR EACH CAUSE: Was this conflict due to [CAUSE] experienced frequently or occasionally in the community? : Land
V104	c2eq1__2	three main causes of conflict: Water	1. (a) What were the three main causes of conflict in this community in the past 3 years? (b) FOR EACH CAUSE: Was this conflict due to [CAUSE] experienced frequently or occasionally in the community? : Water
V105	c2eq1__3	three main causes of conflict: Other natural resources	1. (a) What were the three main causes of conflict in this community in the past 3 years? (b) FOR EACH CAUSE: Was this conflict due to [CAUSE] experienced frequently or occasionally in the community? : Other natural resources
V106	c2eq1__4	three main causes of conflict: Livestock related	1. (a) What were the three main causes of conflict in this community in the past 3 years? (b) FOR EACH CAUSE: Was this conflict due to [CAUSE] experienced frequently or occasionally in the community? : Livestock related
V107	c2eq1__5	three main causes of conflict: Boundary disputes	1. (a) What were the three main causes of conflict in this community in the past 3 years? (b) FOR EACH CAUSE: Was this conflict due to [CAUSE] experienced frequently or occasionally in the community? : Boundary Dispute
V108	c2eq1__98	three main causes of conflict: No conflict in this community	1. (a) What were the three main causes of conflict in this community in the past 3 years? (b) FOR EACH CAUSE: Was this conflict due to [CAUSE] experienced frequently or occasionally in the community? : No conflict in this community
V109	c2eq1__999	three main causes of conflict: Others	1. (a) What were the three main causes of conflict in this community in the past 3 years? (b) FOR EACH CAUSE: Was this conflict due to [CAUSE] experienced frequently or occasionally in the community? : Others (specify)
V110	c2fq1__1	difficulties related to crop production: Lack of agricultural land	1. Which of the following difficulties related to crop production did farmers face in this community in the past 3 years? A. Lack of agricultural Land
V111	c2fq1__2	difficulties related to crop production: Access to land	1. Which of the following difficulties related to crop production did farmers face in this community in the past 3 years? B. Poor access to land
V112	c2fq1__3	difficulties related to crop production: Access to energy	1. Which of the following difficulties related to crop production did farmers face in this community in the past 3 years? C. Poor access to energy
V113	c2fq1__4	difficulties ... to crop production: Soil degradation/decreasing soil fertility	1. Which of the following difficulties related to crop production did farmers face in this community in the past 3 years? D. Soil degradation/decreasing soil fertility
V114	c2fq1__5	difficulties related to crop production: Crop diseases	1. Which of the following difficulties related to crop production did farmers face in this community in the past 3 years? E. Crop diseases
V115	c2fq1__6	difficulties related to crop production: Drought	1. Which of the following difficulties related to crop production did farmers face in this community in the past 3 years? F. Drought
V116	c2fq1__7	difficulties related to crop production: Flood	1. Which of the following difficulties related to crop production did farmers face in this community in the past 3 years? G. Flood
V117	c2fq1__8	difficulties related to crop production: Water scarcity	1. Which of the following difficulties related to crop production did farmers face in this community in the past 3 years? I. Water scarcity

ID	Name	Label	Question
V118	c2fq1__9	difficulties related to crop production: Animal damage	1. Which of the following difficulties related to crop production did farmers face in this community in the past 3 years? J. Animal damage
V119	c2fq1__10	difficulties related to crop production: Production theft	1. Which of the following difficulties related to crop production did farmers face in this community in the past 3 years? K. Production theft
V120	c2fq1__11	difficulties related to crop production: Insecurity, violence	1. Which of the following difficulties related to crop production did farmers face in this community in the past 3 years? L. Insecurity, violence
V121	c2fq1__12	difficulties related to crop production: Insufficient manpower	1. Which of the following difficulties related to crop production did farmers face in this community in the past 3 years? M. Insufficient manpower
V122	c2fq1__13	difficulties related to crop production: Difficulties in selling the products	1. Which of the following difficulties related to crop production did farmers face in this community in the past 3 years? N. Difficulties in selling the products
V123	c2fq1__14	difficulties ... to crop production: Lack of and difficulties in supplying input	1. Which of the following difficulties related to crop production did farmers face in this community in the past 3 years? O. Lack of and difficulties in getting input
V124	c2fq1__15	difficulties related to crop production: High input costs	1. Which of the following difficulties related to crop production did farmers face in this community in the past 3 years? P. High input costs
V125	c2fq1__16	difficulties related to crop production: Difficulty accessing credit	1. Which of the following difficulties related to crop production did farmers face in this community in the past 3 years? Q. Difficulty accessing credit
V126	c2fq1__17	difficulties related to crop production: Indebtedness	1. Which of the following difficulties related to crop production did farmers face in this community in the past 3 years? R. Indebtedness
V127	c2fq1__18	difficulties ... to crop production: Limited access to machinery and equipment	1. Which of the following difficulties related to crop production did farmers face in this community in the past 3 years? S. Limited Access to machinery and equipment
V128	c2fq1__19	difficulties related to crop production: Poor transportation and/or infrastructure	1. Which of the following difficulties related to crop production did farmers face in this community in the past 3 years? T. Poor transportation and/or infrastructure
V129	c2fq1__20	difficulties related to crop production: Low adoption of improved technology	1. Which of the following difficulties related to crop production did farmers face in this community in the past 3 years? U. Low adoption of improved technology
V130	c2fq1__999	difficulties related to crop production: Other	1. Which of the following difficulties related to crop production did farmers face in this community in the past 3 years? 999. Others (specify)
V131	c2fq2__1	difficulties related to livestock production: Insufficient grazing	2. Which of the following difficulties related to livestock production did livestock farmers face in this community in the past 3 years? A. Insufficient grazing
V132	c2fq2__2	difficulties related to livestock production: Insufficient feed for cattle	2. Which of the following difficulties related to livestock production did livestock farmers face in this community in the past 3 years? B. Insufficient feed for cattle
V133	c2fq2__3	difficulties related to livestock production: High cost of cattle feed	2. Which of the following difficulties related to livestock production did livestock farmers face in this community in the past 3 years? C. High cost of cattle feed

ID	Name	Label	Question
V134	c2fq2__4	difficulties...livestock production: Considerable drop in livestock producer price	2. Which of the following difficulties related to livestock production did livestock farmers face in this community in the past 3 years? D. Considerable drop in livestock producer prices
V135	c2fq2__5	difficulties related to livestock production: Insufficient manpower	2. Which of the following difficulties related to livestock production did livestock farmers face in this community in the past 3 years? E. Insufficient manpower
V136	c2fq2__6	difficulties related to livestock production: Cattle theft	2. Which of the following difficulties related to livestock production did livestock farmers face in this community in the past 3 years? F. Cattle theft
V137	c2fq2__7	difficulties related to livestock production: Animal parasite	2. Which of the following difficulties related to livestock production did livestock farmers face in this community in the past 3 years? G. Animal parasite
V138	c2fq2__8	difficulties related to livestock production: Predators	2. Which of the following difficulties related to livestock production did livestock farmers face in this community in the past 3 years? H. Predators
V139	c2fq2__9	difficulties related to livestock production: Insecurity, violence	2. Which of the following difficulties related to livestock production did livestock farmers face in this community in the past 3 years? I. Insecurity, violence
V140	c2fq2__10	difficulties related to livestock production: Conflicts between livestock producers	2. Which of the following difficulties related to livestock production did livestock farmers face in this community in the past 3 years? J. Conflicts between livestock producers
V141	c2fq2__11	difficulties livestock prod: Conflicts between livestock producers and crops producers	2. Which of the following difficulties related to livestock production did livestock farmers face in this community in the past 3 years? K. Conflicts between livestock producers and crops producers
V142	c2fq2__12	difficulties related to livestock production: Low level of technical supervision	2. Which of the following difficulties related to livestock production did livestock farmers face in this community in the past 3 years? L. Low level of technical supervision
V143	c2fq2__13	difficulties...livestock production: Difficulties in accessing veterinary services	2. Which of the following difficulties related to livestock production did livestock farmers face in this community in the past 3 years? M. Difficulties in accessing veterinary services
V144	c2fq2__14	difficulties related to livestock production: Difficulty accessing credit	2. Which of the following difficulties related to livestock production did livestock farmers face in this community in the past 3 years? N. Difficulty accessing credit
V145	c2fq2__15	difficulties related to livestock production: Indebtedness	2. Which of the following difficulties related to livestock production did livestock farmers face in this community in the past 3 years? O. Indebtedness
V146	c2fq2__16	difficulties related to livestock production: Inadequate insemination centres	2. Which of the following difficulties related to livestock production did livestock farmers face in this community in the past 3 years? P. Inadequate insemination centres
V147	c2fq2__17	difficulties...livestock production: Rare application of modern technology in production	2. Which of the following difficulties related to livestock production did livestock farmers face in this community in the past 3 years? Q. Rare application of modern technology in production
V148	c2fq2__999	difficulties related to livestock production:	2. Which of the following difficulties related to livestock production did livestock farmers face in this community in the past 3 years? 999. Other (specify)
