Name	Country code
Ethiopia	ETH

STUDY TYPE  
Other Household Survey [hh/oth]

ABSTRACT

The dataset presents the listing of households in a selected subset of kebeles as part of the RLLP project. The sample provides a cross-sectional snapshot on the livelihood status of households in different Sustainable Land Management program sites. This listing exercise was not designed to measure causal impacts of the Sustainable Land Management Program implemented from 2013-2018.

The survey questionnaire aimed to provide a parsimonious overview of household welfare. It covered the following topics: household composition, education, time use and labor, food security, crop production, household income, non-farm enterprise, and sustainable land management practices.

KIND OF DATA  
Sample survey data [ssd]

UNIT OF ANALYSIS  
Households and kebele level

## Version

---

VERSION DESCRIPTION  
-v01: Edited, anonymized datasets for public distribution.

## Coverage

---

GEOGRAPHIC COVERAGE

The survey targeted 60 kebeles from four regions: Amhara, Oromia, Southern Nations, Nationalities, and People's, and Tigray.

## Producers and sponsors

---

PRIMARY INVESTIGATORS

Name	Affiliation
Kehinde Ajayi	Center for Global Development

## PRODUCERS

Name	Affiliation	Role
Paul Martin	The World Bank	Practice Manager, Task Team Leader
Shewakena Aytenfisu Abab	RLLP Land tenure component	
Nolawi Tadesse		Field coordinator

## Sampling

## SAMPLING PROCEDURE

This dataset aims at listing households in a selected subset of kebeles. These data was aimed at serving as a sampling frame for future data collection activities in the study. The household listing sample consists of 10,223 households interviewed in 60 kebeles in four regional states: Amhara, Oromia, Southern Nations, Nationalities, and People's, and Tigray. The data collection included a random sample of approximately 170 households per kebele. The sampling frame in each kebele was constructed by using the updated list of households that was typically available in the Kebeles. In a few areas, the survey team updated an old sampling frame. For two kebeles a fresh sampling frame was generated through house to house registration visits. The sample includes three household types: i) those in major watersheds targeted by the second phase of the Sustainable Land Management Program (SLMP-II); ii) those in major watersheds newly targeted under RLLP; and iii) control households in neighboring kebeles not directly targeted by either program.

## Data collection

## DATES OF DATA COLLECTION

Start	End	Cycle
2019-01-01	2019-03-31	1

## DATA COLLECTION MODE

Face-to-face [f2f]

## DATA COLLECTION NOTES

Data collection took place between January and March 2019. The household listing survey questionnaire was programmed into the SurveyCTO application on Android tablets and trained enumerators administered the survey to household respondents in face-to-face interviews conducted during household visits. The survey questionnaire was developed in English language by the research team and translated into local languages by professional translators. Heads of households were the main target respondents. The average interview duration was 30 to 45 minutes.

## questionnaires

## QUESTIONNAIRES

A - Household Listing Survey Questionnaire

S1 - Cover

S2 - Roster

S3 - Education

S4 - Time use

S5 - Food security

S6 - Crop production

S7 - HH income and non-farm enterprise

S8 - RLLP

S9 - Contact information

B - Community Questionnaire

S1 - Cover

S2 - Roster

S3 - Basic Information

S4 - Access to basic services  
 S5 - Agriculture  
 S6 - Economic Activity  
 S7 - Smart/Resilient Land Management Practices

Notes on survey modules:

Household Listing Survey Questionnaire - This survey was implemented at household level and the respondent was the household head. The reference surveys were LSMS and SMLP Study.

Community Questionnaire - This survey was implemented at community level through Kebele administrators; RLLP and SLMP community facilitators and Development Agents at the kebele level.
