

Fourth Census of Canada 1901 - IPUMS Subset

Department of Agriculture, Census Branch, IPUMS

report_generated_on: September 3, 2025

visit_data_catalog_at: <http://catalog.ihsn.org/>

Identification

SURVEY ID NUMBER

CAN_1901_PHC_v01_M_v7.5_A_IPUMS

TITLE

Fourth Census of Canada 1901 - IPUMS Subset

ABBREVIATION OR ACRONYM

PHC Canada 1901 (5%) (IPUMS Harmonized Subset)

COUNTRY

Name	Country code
Canada	CAN

STUDY TYPE

Population and Housing Census [hh/popcen] IPUMS International

SERIES INFORMATION

DOI:10.18128/D020.V7.5

KIND OF DATA

Population and Housing Census [hh/popcen]

UNIT OF ANALYSIS

Persons, households, and dwellings

UNITS IDENTIFIED:

- Dwellings: yes
- Vacant Units: no
- Households: yes
- Individuals: yes
- Group quarters: yes

UNIT DESCRIPTIONS:

- Dwellings: Any structure which provides shelter for a human being. If the structure has only one entrance it counts as a single dwelling, no matter how many families it may shelter. If the structure has two front or principal doors leading into separate parts, the structure is counted as two dwellings.
- Households: A household may include all persons in a housekeeping community, whether related by ties of blood or not, but usually with one of their number occupying the position of head. But single persons living alone who have a special dwelling and carry on their own housekeeping are also to be regarded as households.
- Group quarters: An institution household includes such establishments as hospitals, asylums, poor house, prisons, penitentiaries, schools of learning, barracks, etc., whose inmates, if they have no home or domicile elsewhere outside of the institution, are to be entered under the name of the institution.

Version

VERSION DESCRIPTION

Version 7.5. The datasets contain selected variables from the original census microdata plus harmonized variables from the IPUMS-International database.

VERSION DATE

2024-10-05

Scope

NOTES

Additional notes on a sample that is part of this study: Canada 1901 (5%)

TOPICS

Topic	Vocabulary

CONFIDENTIALITY

IPUMS International distributes integrated microdata of individuals and households only by agreement of collaborating national statistical offices and under the strictest of confidence. Before data may be distributed to an individual researcher, an electronic license agreement must be signed and approved. To gain access to the data, a researcher must agree to the following: (1) Implement security measures to prevent unauthorized access to census microdata. Under IPUMS International agreements with collaborating agencies, redistribution of the data to third parties is prohibited. (2) Use the microdata for the exclusive purposes of scholarly research and education. Researchers must explicitly agree to not use microdata acquired for any commercial or income-generating venture. (3) Maintain the confidentiality of persons, households, and other entities. Any attempt to ascertain the identity of persons or households from the microdata is prohibited. Alleging that a person or household has been identified is also prohibited. (4) Report all publications based on these data to IPUMS International, which will in turn pass the information on to the relevant national statistical agencies. Once a project is approved, a password is issued and data may be acquired through the Internet. Penalties for violating the license include: revocation of the license, recall of all microdata acquired, filing of a motion of censure to the appropriate professional organizations, and

civil prosecution under the relevant national or international statutes. These safeguards mirror the principles from the Joint ECE/Eurostat Work Session on Statistical Data Confidentiality. Employees of the Minnesota Population Center who work with the census microdata to produce the harmonized database also sign agreements to respect the confidentiality of the data. IPUMS International works with each country's statistical office to minimize the risk of disclosure of respondent information. The details of the confidentiality protections vary across countries, but in all cases, names and detailed geographic information are suppressed and top-codes are imposed on variables such as income that might identify specific persons. In addition, IPUMS International uses a variety of technical procedures to enhance confidentiality protection. These include the following: (1) Swapping an undisclosed fraction of records from one administrative district to another to make positive identification of individuals impossible. (2) Randomizing the placement of households within districts to disguise the order in which individuals were enumerated or the data processed. (3) Aggregating codes of sensitive characteristics (e.g., grouping together very small ethnic categories) (4) Top- and bottom-coding continuous variables to prevent identification of extreme cases. The safety record for public-use census microdata is apparently perfect. In almost four decades of use, there has not been a single verified breach of statistical confidentiality. The measures implemented by the IPUMS International are designed to extend this record.

ACCESS CONDITIONS

An adapted version of the dataset, harmonized for international comparability, is available from IPUMS International (<https://international.ipums.org/international/>) under the following conditions:

IPUMS International distributes integrated microdata of individuals and households only by agreement of collaborating national statistical offices and under the strictest of confidence. Before data may be distributed to an individual researcher, an electronic license agreement must be signed and approved. To gain access to the data, a researcher must agree to the following:

- (1) Implement security measures to prevent unauthorized access to census microdata. Under IPUMS International agreements with collaborating agencies, redistribution of the data to third parties is prohibited.
- (2) Use the microdata for the exclusive purposes of scholarly research and education. Researchers must explicitly agree to not use microdata acquired for any commercial or income-generating venture.
- (3) Maintain the confidentiality of persons, households, and other entities. Any attempt to ascertain the identity of persons or households from the microdata is prohibited. Alleging that a person or household has been identified is also prohibited.
- (4) Report all publications based on these data to IPUMS International, which will in turn pass the information on to the relevant national statistical agencies.

Once a project is approved, a password is issued and data may be acquired through the Internet. Penalties for violating the license include: revocation of the license, recall of all microdata acquired, filing of a motion of censure to the appropriate professional organizations, and civil prosecution under the relevant national or international statutes.

These safeguards mirror the principles from the Joint ECE/Eurostat Work Session on Statistical Data Confidentiality. Employees of the Minnesota Population Center who work with the census microdata to produce the harmonized database also sign agreements to respect the confidentiality of the data.

CITATION REQUIREMENTS

Steven Ruggles, Lara Cleveland, Rodrigo Lovaton, Sula Sarkar, Matthew Sobek, Derek Burk, Dan Ehrlich, Quinn Heimann, Jane Lee. Integrated Public Use Microdata Series, International: Version 7.5 [dataset]. Minneapolis, MN: IPUMS, 2024. <https://doi.org/10.1> [dataset]. DDI DOCUMENT VERSION

Version 7.5 October 2024. NEW FEATURES.

--Historical data from NAPP project now available from IPUMS-International.

--Historical census data from Canada, Denmark, the United Kingdom, Germany, Iceland, Norway, Sweden, and the United States for the period 1703 to 1911 are now available from IPUMS-International. The complete count and sample datasets were previously disseminated by the North Atlantic Population Project (NAPP). Where possible, the data have been integrated into existing IPUMS-International variable coding schema. Some new variables have been created that are available only for these pre-1960 datasets. NAPP data users should note that many NAPP variables are available from IPUMS-International by different names. For a complete list of NAPP variables that have been renamed in IPUMS-International, refer to the crosswalk.

--Individual country shapefiles for the third-level administrative level of geography are now available for a few IPUMS samples.

--New spatially harmonized previous-residence variables at the second administrative level of geography are available for several samples in this data release. More information is available here. Users should note that many older migration variables are available by different names. Refer to this table for a crosswalk of old and corresponding new migration variables.

--IPUMS now hosts the Census Mosaic data collection. Census Mosaic identifies, gathers, harmonizes, and distributes surviving historical census microdata from regions of Continental Europe where complete centralized records are not available. The Mosaic project was founded by a consortium of historical social scientists in Europe. Data can be downloaded as static files from the Census Mosaic website. Although the data are not yet integrated fully into IPUMS International, variables have been standardized and harmonized to be roughly compatible with IPUMS coding structures.

NEW SAMPLES.

--Full-count datasets for Great Britain 1851, 1861, 1871 (Scotland only), 1891, and 1901.

--Full-count dataset for Sweden 1910. Denmark (1845, 1880, and 1885)

--Labor force surveys from Spain and eight new labor force surveys from Italy added to the series.

Newly added countries:

Benin, Cote d'Ivoire, Finland, Guatemala, Honduras, Laos, Lesotho, Mauritius, Myanmar, Papua New Guinea, Russia, Slovak Republic, Suriname, Togo, and Zimbabwe

New samples for:

Bolivia, Cambodia, Cambodia, Chile, Cuba, Cote d'Ivoire, Egypt (1848 and 1868, historical samples), Fiji, Guinea, Ireland, Israel, Italy, Lao PDR, Mexico, Morocco, Nepal, Netherlands, Palestine, Peru, Philippines, Puerto Rico, Rwanda, Senegal, Sierra Leone, South Africa, Switzerland, Uganda, United States, United Kingdom, United States, Vietnam, and Zimbabwe

SUPPLEMENTAL DATA.

Data from censuses from Benin and Lesotho that record individual fertility and/or mortality events were made available in IPUMS-International. These files can be downloaded and linked to data produced by the extract system.

NEW VARIABLES.

--IPUMS-International now provides harmonized and year-specific geography variables for all countries including 13 new samples from Dominican Republic, Germany, Indonesia, Israel, Malaysia, Mongolia, Nicaragua, Nigeria, Palestine, Paraguay, Thailand, United Kingdom, and Uruguay. First-level and second-level year specific geography variables are also available for all countries. IPUMS provides corresponding, downloadable GIS boundary files for all harmonized and year specific geography variables. More information about IPUMS geography variables is available [here](#).

--IPUMS International now provides spatially harmonized previous-residence variables at the first administrative level of geography. The codes for the spatially harmonized previous-residence variables match the spatially harmonized place of current residence. More information is available [here](#).

--IPUMS International provides spatially harmonized previous-residence variables at the first administrative level of geography for all samples; previously available country-specific migration variables at the first administrative level that were not fully harmonized spatially have been phased out. Spatially harmonized previous-residence variables at the second administrative level of geography are available for selected samples. More information is available [here](#). Users should note that many older migration variables are available by different names. Refer to this table for a crosswalk of old and corresponding new migration variables.

--IPUMS International now provides spatially harmonized previous-residence variables at the first administrative level of geography for all samples. Spatially harmonized previous-residence variables at the second administrative level of geography are available for several samples in this data release. More information is available [here](#). Users should note that many older migration variables are available by different names. Refer to this table for a crosswalk of old and corresponding new migration variables.

--Lower (third) level geography codes and GIS files have been added for Bangladesh, China, Ethiopia, Mali, Rwanda, and Zimbabwe. Some geography codes and labels might have changed for these countries to accommodate the newer lower level geography.

--Added more detailed 3-digit industry and occupation variables for China 2000.

EDITED SAMPLES.

--Revised full-count data for Great Britain 1881

--Revised full-count datasets for Sweden 1890 and 1900. The revision includes the following changes that improve comparability across Sweden datasets:

--Revisions to certain ethnicity and work variables (and the underlying source data): ORIGIN, LABFORCE, OCCHISCO, OCRELATE, OCSTATUS.

--Revisions to unharmonized source variables: SE1890A_HISCOSE, SE1890A_HISCRELSE, SE1890A_HISCSTATSE, SE1890A_OCCMULTISE, SE1900A_HISCOSE, SE1900A_HISCRELSE, SE1900A_HISCSTATSE, SE1900A_OCCMULTISE.

--A new United States 1850 full-count dataset now matches the corresponding dataset distributed by the USA IPUMS data project. The source variable US1850A_0502 (HISTID) provides a linking key to match person records to the USA version of the data. The IPUMS International version of the data contains names, which the USA version cannot distribute.

EDITED VARIABLES.

An error affecting HHWT for South Africa 2007 was corrected. The existing values were adjusted by a factor of 0.01.

AGEMARR was edited to add data for Hungary 1980 and 1990.

Harmonized and year-specific geography variables for Brazil and Colombia have been edited to accommodate for the availability of refined municipal boundaries. Users should be aware that codes and labels have changed in all harmonized and year specific geography variables for these two countries.

Errors affecting BPLSE2 (formerly BLPARSE) for Sweden 1890 and the underlying source variable were corrected. Several thousand cases were incorrectly coded as 258101000. These cases have been updated with the correct code: 258171000.

Harmonized geography variables for Italy, Philippines, Rwanda, and United States have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year specific geography variables for these countries. More information about IPUMS geography variables is available [here](#). The codes for the source variable RW2002A_0419 were corrected to include 0 and 8 as possible responses, which were previously identified as 'unknown years' within primary education.

Errors affecting EDUCFJ for Fiji 2006 were corrected.

A problem with PERWT for Tanzania 2012 was corrected. The previous weights were adjusted to properly reflect population totals.

MOMLOC, POPLOC, and PARRULE were updated for the United States 2010 and 2015 samples to include additional information on subfamilies. Prior to this correction, persons above age 17 were not receiving links to their co-resident mothers and fathers.

An error affecting codes for the URBAN variable in Egypt 1986 for Cairo, Alexandria, Port-Said, and Suez was corrected.

An error in INCEARN affecting Venezuela 2001 was corrected. Earned income in the source variable VE2001A_0440 is interpreted as a monthly amount, thus adjustments previously applied to convert data from daily or weekly income were suppressed.

All the six Brazil samples in IPUMS International were replaced with higher density samples.

An edited version of the Chile 2017 sample was introduced to correct an error in household breaks.

Errors affecting codes for GEO1_ZA in South Africa 2011 and ENUTS1 in United Kingdom 1991 were corrected.

Harmonized geography variables for Cambodia, Fiji, and Nepal have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year-specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

An error in PERWT affecting Nepal 2001 was corrected.

Errors affecting a code in GQ for Brazil 2010 and Indonesia 2010 were corrected. Both census samples now identify 1-person units created by splitting a large household.

An error in MARRNUM affecting Indonesia 1976 was corrected. Some codes for GEO1_EG2006 and GEO2_EG2006 were edited.

Harmonized geography variables for Bolivia, Cuba, Guinea, Ireland, Morocco, Palestine, Senegal, South Africa, and Uganda have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year-specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

An error in INCEARN affecting Brazil 1980 was corrected.

An error in EDATTAIN affecting Ireland 1971 and 1981 was corrected.

A small proportion of person records in Mexico 1960 were re-classified in MIGRATEP based on information about their current and previous residence. These were previously coded to 'different major administrative unit', even though their place of residence suggests that their last move was within the same major administrative unit.

The second-level technician (higher) degrees for Spain 1991, 2001, and 2011 were re-classified into post-secondary technical education in EDATTAIN.

An error affecting codes for SEX for Egypt 1848 and 1868 was corrected. The values for male and female had been reversed.

A problem with HHWT and PERWT for Canada 2011 was corrected. The previous weights were adjusted to properly reflect population totals.

Harmonized geography variables for Cambodia, Lao PDR, Mexico, Peru, Switzerland, Vietnam, Puerto Rico, United Kingdom, and United States have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year-specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

Harmonized geography variables for Chile and Sierra Leone have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year-specific geography variables for these countries.

More information about IPUMS geography variables is available [here](#).

An error affecting codes for COMPUTER for Senegal 2013 was corrected.

An error affecting labels available in IND for Peru 1993 was corrected.

An error affecting codes for persons previously residing abroad for MIG1_5_BO in Bolivia 2001 and 2012 was corrected.

EDUCAR, EDATTAIN, and YRSCHOOL were adjusted in the Argentina samples to incorporate information on completion of education levels in the data harmonization.

HHWT and PERWT were calibrated in Kenya 1979 to properly reflect the population distribution by province.

In GQ (group quarters status), persons residing in hospitals of all types were reclassified to 'institutional group quarters' from 'other group quarters,' making their treatment consistent with GQTYPE.

Errors affecting codes for BPLBJ2 in Benin 1979, 1992, and 2002 were corrected.

Errors affecting codes for GEO2_BR1970 in Brazil 1970 were corrected.

description

DEFINITION

COUNTRY gives the country from which the sample was drawn. The codes assigned to each country are those used by the

UN Statistics Division and the ISO (International Organization for Standardization).

concept

CONCEPT

GQ: Group quarters (collective dwelling) status

Data file: CAN1901_PHC-H-H

Overview

Type: Discrete Width: 2 Range: - Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
00	Vacant
10	Households
20	Group quarters (collective), n.s.
21	Institutions
22	Other group quarters
29	1-person unit created by splitting large household
99	Unknown/group quarters not identified

description

DEFINITION

GQ identifies households as vacant dwellings, group quarters, or private households. Group quarters -- collective dwellings -- are generally institutions and other group living arrangements such as rooming houses and boarding schools.

Institutions often retain persons under formal supervision or custody, such as correctional institutions, military barracks, asylums, or nursing homes. Educational and religious group dwellings (e.g., boarding schools, convents, monasteries, etc.) are also included in the institutional classification.

Group quarter designations are often useful for understanding the universe of households that answered questions about household characteristics. Censuses will often exclude group quarters from such questions.

concept

CONCEPT

HHWT: Household weight

Data file: CAN1901_PHC-H-H

Overview

Type: Continuous Decimal: 2 Width: 8 Range: - Format: Numeric

description

DEFINITION

HHWT indicates the number of households in the population represented by the household in the sample.

For the samples that are truly weighted (see the comparability discussion), HHWT must be used to yield accurate household-level statistics.

NOTE: HHWT has 2 implied decimal places. That is, the last two digits of the eight-digit variable are decimal digits, but there is no actual decimal in the data.

concept

CONCEPT

Imputation and derivation

DERIVATION

HHWT is an 8-digit numeric variable with 2 implied decimal places. See the variable description.

PERSONS: Number of person records in the household

Data file: CAN1901_PHC-H-H

Overview

Type: Continuous Width: 4 Range: - Format: Numeric

description

DEFINITION

PERSONS indicates how many person records are included in the household (i.e., the number of person records associated with the household record in the sample). These person records will all have the same serial number (SERIAL) as the household record. The information contained in the household record will normally apply to all of these persons.

concept

CONCEPT

Imputation and derivation

DERIVATION

PERSONS is a 4-digit numeric variable.

RECTYPE: Record type**Data file:** CAN1901_PHC-H-H**Overview**

Type: Continuous Width: 1 Range: - Format: character

Questions and instructions

CATEGORIES

Value	Category
H	Household
P	Person

description

DEFINITION

RECTYPE identifies the type of record for the case: household or person.

NOTE: RECTYPE is an alphabetic (character string) variable with a value of 'H' for household records and 'P' for person records. RECTYPE will not appear as a variable in the default rectangular extracts produced by the data extract system. It is only available in hierarchical extracts, to distinguish between the two record types.

description

DEFINITION

SAMPLE identifies the IPUMS sample from which the case is drawn. Each sample receives a unique 9-digit code. The code is structured as follows:

The first 3 digits are the ISO/UN codes used in COUNTRY

The next 4 digits are the year of the census/survey

The final 2 digits identify the sample within the year. For the last two digits, censuses or large census-like surveys have a value "0" (e.g., 01) in the second-to-last digit, household surveys have a value of "2" (e.g., 21), and employment surveys have a value of "4" (e.g., 41).

concept

CONCEPT

SERIAL: Household serial number

Data file: CAN1901_PHC-H-H

Overview

Type: Continuous Width: 12 Range: - Format: Numeric

description

DEFINITION

SERIAL is an identifying number unique to each household in a given sample. All person records are assigned the same serial number as the household record that they follow. (Person records also have their own unique identifiers -- see PERNUM.) The combination of SAMPLE and SERIAL provides a unique identifier for every household in the IPUMS-International database; SAMPLE, SERIAL and PERNUM uniquely identify every person in the database.

SERIAL can be used to identify dwellings in some samples. In these samples, the first 7 digits of SERIAL provide the dwelling

number common to all households that were sampled from the same structure. The last three digits give the sequence of the household within the dwelling. The following is a list of samples in which dwellings can be inferred:
 Chile 1970, 1992, 2002Colombia 1993, 2005Costa Rica 1984, 2000Cuba 2002Dominican Republic 1981, 2002, 2010Ecuador 1990, 2001Germany 1971Hungary 1980, 1990, 2001Jamaica 1982, 1991, 2001Malaysia 1970, 1991, 2000Mexico 1995, 1990, 2000, 2005Nigeria 2006Panama 2000Peru 1993, 2007Portugal 1981, 1991, 2001Spain 1991Uruguay 2011Venezuela 1990, 2001Vietnam 1989In all other samples, the last 3 digits are always zeroes.

SERIAL was constructed for IPUMS-International, and has no relation to the serial number in the original datasets.

The U.S. 1900 sample and 1880 10% sample have multi-household dwellings that can be identified using the last 3 digits of SERIAL.

concept

CONCEPT

Imputation and derivation

DERIVATION

SERIAL is a 10-digit numeric variable.

The last 3 digits of SERIAL indicate household number within dwelling for selected samples noted in the variable description. In all other samples, the last 3 digits are always zeroes.

UNREL: Number of unrelated persons

Data file: CAN1901_PHC-H-H

FARMIPUM: Farm status, IPUMS historical

Data file: CAN1901_PHC-H-H

Overview

Type: Discrete Width: 1 Range: - Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
1	Non-farm
2	Farm

description

DEFINITION

FARMIPUM identifies farm households according to the IPUMS-USA definition. Any household containing a person with the occupation "farmer" is coded as a farm, including group quarters.

Farmers are identified as individuals with an OCCHISCO code between 61110 and 61400. In the United States, we also check if there is anyone in the household with an US1880A_0406 code of 100. For the two percent sample of United Kingdom 1851, we use the OCCUK code of 100.

Any household containing a farmer under these definitions is regarded as a farm. FARMIPUM does not require the household to be in a non-urban area. The variable FARM restricts farm status to non-urban areas only, based on the (URBAN) variable.

2	2 families
3	3 families
4	4 families
5	5 families
6	6 families
7	7 families
8	8 families
9	9 or more families

description

DEFINITION

NFAMS is a constructed variable that indicates the number of families within each household. Family membership is defined by FAMUNIT. A "family" is any group of persons related by blood, adoption, or marriage. An unrelated individual within the household is considered a separate family. Thus, a household consisting of a widow and a domestic employee contains two families; a household consisting of a large, multi-generation extended family with no persons unrelated to the head counts as a single family.

NFAMS is constructed from information in RELATE (relationship to head) and from the constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father). See those variable descriptions for more detail.

DERIVATION

HEADLOC is a 3-digit numeric variable.

PRMFAMSZ: Size of primary family, historical

Data file: CAN1901_PHC-H-H

Overview

Type: Continuous Width: 4 Range: - Format: Numeric

description

DEFINITION

PRMFAMSZ is the size of the primary, or first, family in the household. It is the FAMSIZE of the first family unit (FAMUNIT) recorded in the household.

PRMFAMSZ and FAMSIZE are constructed from information in RELATE (relationship to head of household) and from the constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father).

Note: Users should be aware that in the United States census of 1880, where relationship to the head was not transcribed for non-relatives, FAMSIZE and PRMFAMSZ may be inaccurate in some cases.

concept

CONCEPT

Imputation and derivation

DERIVATION

PRMFAMSZ is a 4-digit numeric variable.

description

DEFINITION

SERVANTS is a constructed variable that indicates the number of servants in the household, who are not related to the household head but are likely to be working in the household.

SERVANTS was constructed uniformly for all pre-1950 samples, based on information in RELATE and occupation (OCCHISCO or OCC50US). Specifically, in all countries SERVANTS counts the number of people in the household who meet the following conditions: 1) their relationship to head was non-relative and their occupation indicated they were a servant; 2) an occupation response other than servant but a relationship code of servant; 3) an occupation of servant and a surname different from the head of household (for samples that lack relationship-to-head information).

The variable SERVANTS is top-coded at 99.

concept

CONCEPT

MOMLOC: Mother's location in household**Data file:** CAN1901_PHC-P-H**Overview**

Type: Continuous Width: 3 Range: - Format: Numeric

description

DEFINITION

MOMLOC is a constructed variable that indicates whether or not the person's mother lived in the same household and, if so, gives the person number of the mother (see PERNUM). MOMLOC makes it easy for researchers to link the characteristics of children and their (probable) mothers.

The method by which probable child-mother links are identified is described in PARRULE.

The general design of MOMLOC and other constructed variables follows the methods developed for IPUMS-USA "Family Interrelationships," but the details vary significantly. For more details on the construction of MOMLOC, see the Comparability section of PARRULE and this paper on IPUMSI family linking methodology.

Note: MOMLOC identifies social relationships (such as stepmother and adopted mother) as well as biological relationships. The variable STEPMOM is designed to identify some of these social relationships. To restrict MOMLOC to biological mothers, such as for own children fertility estimation, MOMLOC should be reset to zero when STEPMOM is greater than zero.

concept

CONCEPT

Imputation and derivation

DERIVATION

MOMLOC is a 3-digit numeric variable.

Codes0 = No mother of this person present in the household.
1 or higher = The person number of this person's mother

MOMRULEH: Rule for linking mother (historical)**Data file:** CAN1901_PHC-P-H**Overview**

Type: Discrete Width: 1 Range: - Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
	No mother link
1	Unambiguous mother link

2	Daughter/grandchild/greatgrandchild link
3	Ambiguous mother link
7	Spouse of father becomes stepmother

description

DEFINITION

MOMRULEH explains the criteria by which the variable MOMLOC linked the person to a probable mother in pre-1950 datasets.

Pre-1950 datasets in IPUMS International establish child-mother links according to four basic rules, and MOMRULEH gives the number of the rule that applied to the link in question. MOMRULEH works the same way for all countries. A lower-numbered rule (greater than 0) takes precedence over a higher numbered rule. The codes for MOMRULEH are as follows:

0 = No mother of this person present in the household.

1 = Unambiguous relationship. This rule covers four basic cases, and occurs when the person linked is 10 to 69 years younger than the probable parent. All relationship pairings are not available in every sample. The allowable relationship pairings are as follows:

Child linked to head or spouse/unmarried partner of the head
 Head or sibling linked to parent
 Spouse or sibling-in-law linked to parent-in-law
 Child/child-in-law linked to head or spouse
 2 = Grandchildren. Potential mothers are females listed as child or child-in-law in RELATE who are 13-49 years older than persons listed as grandchildren and who share the grandchild's surname. If there is more than one potential mother, we used relative positions in the household, age and marital status to decide the link.

3 = Other relatives and non-relatives. Link to a preceding person with a plausible relationship pairing of child-to-mother, where the mother is 13- 49 years older, is ever-married, and shares the child's surname. The mother must immediately precede the child or all intervening persons must also be linked to the mother as spouse or child. No links are made for non-relatives over age 17. Permissible relationship pairings are as follows (child to mother):

Nephew/niece to sibling or sibling-in-law
 Cousin to aunt/uncle
 Other relative to sibling
 Grandchild to other relative
 Other relative to other relative (RELATEH code 1000, 1001, 1061)
 Non-relative to non-relative (RELATEH code 1100-1303)
 7= If the child is already linked to a father (see POPLOC and POPRULEH), and that father has a wife present in the household who has not been linked to the child by another rule, the wife is linked to the child as a stepmother, regardless of the age gap between child and the stepmother.

Consistency checks: If a husband and wife were both linked to the same mother, historic samples chose the best mother link based on detailed relationship (RELATEH) and proximity within the household. If a person is linked to two parents who are not linked to each other, remove one of the parental links on the basis of proximity within the household.

concept

CONCEPT

PERNUM: Person number

Data file: CAN1901_PHC-P-H

Overview

Type: Continuous Width: 4 Range: - Format: Numeric

description

DEFINITION

PERNUM numbers all persons within each household consecutively (starting with "1" for the first person record of each household). When combined with SAMPLE and SERIAL, PERNUM uniquely identifies each person in the IPUMS-International database.

concept

CONCEPT

Imputation and derivation

DERIVATION

PERNUM is a 4-digit numeric variable.

PERWT: Person weight

Data file: CAN1901_PHC-P-H

Overview

Type: Continuous Decimal: 2 Width: 8 Range: - Format: Numeric

description

DEFINITION

PERWT indicates the number of persons in the actual population represented by the person in the sample.

For the samples that are truly weighted (see the comparability discussion), PERWT must be used to yield accurate statistics for the population.

NOTE: PERWT has 2 implied decimal places. That is, the last two digits of the eight-digit variable are decimal digits, but there is no actual decimal in the data.

concept

CONCEPT

Imputation and derivation

DERIVATION

PERWT is an 8-digit numeric variable with 2 implied decimal places. See the variable description.

POPLOC: Father's location in household

Data file: CAN1901_PHC-P-H

Overview

Type: Continuous Width: 3 Range: - Format: Numeric

description

DEFINITION

POPLOC is a constructed variable that indicates whether or not the person's father lived in the same household and, if so, gives the person number of the father (see PERNUM). POPLOC makes it easy for researchers to link the characteristics of children and their (probable) fathers.

The method by which probable child-father links are identified is described in PARRULE.

The general design of POPLOC and other constructed variables follows the methods developed for IPUMS-USA "Family Interrelationships," but the details vary significantly. For more details on the construction of POPLOC, see the Comparability section of PARRULE and this paper on IPUMSI family linking methodology.

Note: POPLOC identifies social relationships (such as stepfather and adopted father) as well as biological relationships. The variable STEPPPOP is designed to identify some of these social relationships. To restrict POPLOC to biological mothers, such as for own children fertility estimation, POPLOC should be reset to zero when STEPPPOP is greater than zero.

concept

CONCEPT

Imputation and derivation

DERIVATION

POPLOC is a 3-digit numeric variable.

Codes0 = No father of this person present in the household.
1 or higher = The person number of this person's father

POPRULEH: Rule for linking father (historical)

Data file: CAN1901_PHC-P-H

Overview

Type: Discrete Width: 1 Range: - Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
	No father link
1	Unambiguous father link
2	Son/grandchild/greatgrandchild link
3	Ambiguous father link
7	Husband of mother becomes stepfather

description

DEFINITION

POPRULEH explains the criteria by which the variable POPLOC linked the person to a probable father in pre-1950 datasets.

In the pre-1950 datasets, child-father links were established according to four basic rules, and POPRULEH gives the number of the rule that applied to the link in question.

POPRULEH works the same way for all countries. A lower-numbered rule (greater than 0) takes precedence over a higher numbered rule. The codes for POPRULEH are as follows:

0 = No father of this person present in the household.

1 = Unambiguous relationship. This rule covers four basic cases, and occurs when the person linked is 10 to 69 years younger than the probable parent. All relationship pairings are not available in every sample. The allowable relationship pairings are as follows:

Child linked to head or spouse/unmarried partner of the head
Head or sibling linked to parent
Spouse or sibling-in-law linked to parent-in-law
Child/child-in-law linked to head or spouse
2 = Grandchildren. Potential fathers are males listed as child or child-in-law in RELATEH 13-79 years older than persons listed as grandchildren and who share the grandchild's surname. If there is more than one potential father, we used relative positions in the household, age and marital status to decide the link.

3 = Other relatives and nonrelatives. Link to a preceding person with a plausible relationship pairing of child-to-father, where the father is 13-79 years older, is ever-married, and shares the child's surname. The father must immediately precede the child or all intervening persons must also be linked to the father as spouse or child. Permissible relationship pairings are as follows (child to father):

Nephew/niece to sibling or sibling-in-law
Cousin to aunt/uncle
Other relative to sibling
Grandchild to other relative
Other relative to other relative (RELATEH code 1000, 1001, 1061)
Non-relative to non-relative (RELATEH code 1100-1303)
7 = If a child is linked to a mother (see MOMLOC and MOMRULEH), and that mother is linked to a husband who has not been linked to the child by another rule, the husband is linked to the child as a stepfather, regardless of the age gap between child and husband.

Consistency checks: If a husband and wife were both linked to the same father, the best father link was chosen based on detailed relationship (RELATEH) and proximity within the household. If a person is linked to two parents who are not linked to each other, remove one of the parental links on the basis of proximity within the household.

concept

CONCEPT

SPLOC: Spouse's location in household

Data file: CAN1901_PHC-P-H

Overview

Type: Continuous Width: 3 Range: - Format: Numeric

description

DEFINITION

SPLOC is a constructed variable that indicates whether or not the person's spouse lived in the same household and, if so, gives the person number (PERNUM) of the spouse. SPLOC makes it easy for researchers to link the characteristics of (probable) spouses.

The method by which probable spouse-spouse links are identified is described in SPRULE.

The general design of SPLOC and other constructed variables is modeled on the methods developed for IPUMS-USA "Family Interrelationships", but the details vary significantly. For more details on the construction of SPLOC, see the Comparability section of SPRULE and this paper on IPUMSI family linking methodology.

concept

CONCEPT

Imputation and derivation

DERIVATION

SPLOC is a 3-digit numeric variable.

Codes0 = No spouse of this person present in the household.
1 or higher = The person number of this person's spouse

SPRULEH: Rule for linking spouse (historical)

Data file: CAN1901_PHC-P-H

Overview

Type: Discrete Width: 1 Range: - Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
	No spouse link
1	Unambiguous adjacent link
2	Unambiguous non-adjacent links -- consistent relationship to head/age differences
3	Weak relationship pairing -- adjacent links
4	Weak relationship pairing -- non-adjacent links

description

DEFINITION

SPRULEH explains the criteria by which the variable SPLOC linked the person to a probable spouse for the pre-1950 datasets.

Spouse-spouse links are established according to four basic rules, and SPRULEH gives the number of the rule that applied to the link in question.

SPRULEH works the same way for all countries. In all countries both partners are required to be age 12 and older and to either have a marital status of married or be the unmarried partner of the household head (see MARST and RELATEH). In addition, both partners were required to share the same surname, except when linking heads to spouses or in the Scandinavian samples where SURSIM does not capture family relationships (e.g. patronymic surnames in Norway and non-reporting of child surnames in Sweden). In some samples, however, we were compelled to customize the links beyond what

could be implemented more generally.

The codes for SPRULEH are as follows. A lower-numbered rule (greater than 0) takes precedence over a higher numbered rule. All relationship pairings are not available in every sample. Additional conditions were added to the rules for some samples.

0 = No spouse of this person present in household.

1 = A married/in-union woman and a married/in-union man were linked because she immediately followed or preceded him in the dataset and both persons' relationship to the household head (see RELATEH) justified a link, as follows:

Head to spouse
Unmarried partner to spouse
Parent to parent
Parent-in-law to parent-in-law
Child to child-in-law
Sibling to sibling-in-law
2 = A married woman and a married man who did not appear adjacently on the form were linked because: they had one of the relationship sets listed in rule 1
the woman was at least 13 years old
the man was at least 15 years old
the man was not more than 25 years older than the woman, AND
the woman was not more than 10 years older than the man.
3 = A married/in-union woman and a married/in-union man were linked because she immediately followed or preceded him in the dataset and both persons' relationship to the household head (RELATEH) suggested a possible pairing and the female spouse was no more than 10 years older or 25 years younger than the male spouse. The possible relationship pairings are as follows:

Other relative to other relative (RELATEH codes 1000, 1001, 1061)
Non-relative to non-relative (RELATEH codes 1000-1303)
Child to other relative
Sibling to other relative
Grandchild to grandchild-in-law
Grandparent to grandparent-in-law
Grandparent-in-law to grandparent-in-law
Grandchild to other relative
Aunt to uncle
Nephew/niece to nephew/niece
Cousin to cousin
Unknown to unknown; missing to missing
Head to unknown or missing
Child to unknown or missing
4 = Same as rule 3, but the married/in-union woman was not adjacent to the married/in-union man in the data.

concept

CONCEPT

STEPMOMH: Probable stepmother (historical)

Data file: CAN1901_PHC-P-H

Overview

Type: Discrete Width: 1 Range: - Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
	No stepmother present
1	Improbable age difference
2	Spouse of father
3	Identified stepmother
5	Identified as adopted

description

DEFINITION

STEPMOMH indicates for the pre-1950 datasets whether a person's mother, as identified by MOMLOC, was most probably not the person's biological mother. Non-zero values of STEPMOMH explain why it is probable that the person's mother was a

step- or adopted mother. A value of 0 indicates no likely stepmother because (1) the mother identified in MOMLOC was probably the biological mother or (2) there is no mother of this person present in the household. Only persons under age 19 are linked to their mothers.

The codes for STEPMOMH are as follows:

0 = Biological mother or no mother of this person present in household.

1 = Age difference between mother and child was less than 12 or greater than 54 years.

2 = Link was established only because the mother was married to father.

3 = Child explicitly identified relationship as stepchild.

5 = Child explicitly identified as adopted.

If more than one value applied to the case, the lowest value was assigned.

See MOMRULEH for a description of the linking process.

Users should note that there are many stepmothers and adopted mothers in the population that cannot be identified with information available in the censuses. Therefore, STEPMOMH will always under-represent their actual number in the population.

concept

CONCEPT

STEPPOPH: Probable stepfather (historical)

Data file: CAN1901_PHC-P-H

Overview

Type: Discrete Width: 1 Range: - Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
	No stepfather present
1	Improbable age difference
2	Spouse of mother
3	Identified stepfather
5	Identified as adopted

description

DEFINITION

STEPPOPH indicates for the pre-1950 datasets whether a person's father, as identified by POPLOC, was most probably not the person's biological father. Non-zero values of STEPPOPH explain why it is probable that the person's father was a step- or adopted father. A value of 0 indicates no likely stepfather because (1) the father identified in POPLOC was probably the biological father or (2) there is no father of this person present in the household. Only persons under age 19 are linked to

their fathers.

The codes for STEPPOPH are as follows:

0 = Biological father or no father of this person present in household.

1 = Age difference between father and child was less than 14 years.

2 = Link was established only because the father was married to mother.

3 = Explicitly identified relationship (stepchild).

5 = Explicitly identified relationship (adopted).

If more than one value applied to the case, the lowest value was assigned.

See POPRULEH for a description of the linking process.

Users should note that there are many stepfathers and adopted fathers in the population that cannot be identified with information available in the censuses. Therefore, STEPPOPH will always under-represent their actual number in the population.

description

DEFINITION

FAMSIZE counts the number of the person's own family members living in the household with her/him, including the person her/himself. These include all persons related to the person by blood, adoption, or marriage as indicated by the census forms or inferred from them.

FAMSIZE is calculated from the units identified in the IPUMS constructed variable FAMUNIT (family unit membership). The primary family is defined as all persons related to the head in the RELATE variable. Secondary families are individuals or groups of persons linked together by the IPUMS constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father).

concept

CONCEPT

FAMUNIT: Family unit membership

Data file: CAN1901_PHC-P-H

Overview

Type: Continuous Width: 4 Range: - Format: Numeric

description

DEFINITION

FAMUNIT is a constructed variable indicating to which family within the household a person belongs.

All persons related to the household head receive a 1 (see RELATE). Each secondary family or secondary individual receives a higher code. For purposes of FAMUNIT, secondary families are individuals or groups of persons linked together by the IPUMS constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father).

concept

CONCEPT

Imputation and derivation

DERIVATION

FAMUNIT is a 4-digit numeric variable.

CodesIf there is only one group of related individuals within the household, all of them will be coded "1;" if there is a second, separate such group listed on the form, all of them will be coded "2," and so on.

description

DEFINITION

NUMGEN describes the number of generations in a given family unit. (See the documentation for FAMUNIT).

For example, a family unit comprised of parents and children has a NUMGEN of 2. A family unit which has co-resident grandparents, parents and children has a NUMGEN of 3. A family unit with only grandparents and grandchildren has a NUMGEN of 2, as the intervening generation is not resident.

98	One or more children have unknown age
99	No own child in household

description

DEFINITION

YNGCH gives the age of the person's youngest own child living in the household with her or him. These include all children linked to the person via the constructed IPUMS pointer variables MOMLOC or POPLOC -- mother's and father's location in the household.

YNGCH is top-coded at age 50 or older.

description

DEFINITION

BPLCOUNTRY indicates the person's country of birth.

concept

CONCEPT

MARST: Marital status [general version]

Data file: CAN1901_PHC-P-H

Overview

Type: Discrete Width: 1 Range: - Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
	NIU (not in universe)
1	Single/never married
2	Married/in union
3	Separated/divorced/spouse absent
4	Widowed
9	Unknown/missing

description

DEFINITION

MARST describes the person's current marital status according to law or custom. Individuals who remarried should report the status relevant to their most recent marriage. Census instructions rarely explicitly limit marital status to strictly legal unions.

Note regarding universe: The lowest age at which a person can be anything but "never married" varies among samples.

description

DEFINITION

RELATEH is the NAPP version of the RELATE variable, which describes an individual's relationship to the head of household. This variable is largely compatible with the IPUMS-International variable RELATE, though some changes have been made.

The relationship codes are divided into two categories-relatives (codes 1- 10) and non-relatives (codes 11-12). The codes for relatives are self- explanatory. The non-relative codes are divided into three groups: "Partner, friend, visitor", roughly described as persons who do not pay or work for their accommodations (unless they share ownership); "Other non-relatives", including those persons paying or working for accommodations; and "Institutional inmates".

description

DEFINITION

BPLCA2 indicates the person's place of birth in Canada.

Enumerators were required to collect information on the foreign country of birth, or the province if the person was born in Canada. In practice, however, some respondents indicated Canadian locations below the provincial level, such as

metropolitan areas, cities and towns, or parts of the Territories not yet administratively distinct from each other. Users should note that BPLCA retains information on place of birth, which was not consistently recorded.

description

DEFINITION

LABFORCE is a dichotomous variable identifying whether a person participated in the labor force. Labor force participation generally means working or seeking work within a specified reference period.

For most samples LABFORCE is a recode of EMPSTAT (employment status). A consistent lower age universe of 15 or older has been applied to increase comparability across samples. Full detail is retained in EMPSTAT, which should be used for any study of child labor.

description

DEFINITION

OCCISCO records the person's primary occupation, coded according to the major categories in the International Standard Classification of Occupations (ISCO) scheme for 1988. For someone with more than one job, the primary occupation is typically the one in which the person had spent the most time or earned the most money.

description

DEFINITION

ORIGIN records the respondent's self-reported ethnic origin. This variable is the only way to identify black persons (usually "African") or indigenous persons ("Indian", or the specific tribe name) in Canada in 1881.

Researchers interested in comparisons with the United States and Canada should examine the codes for this variable in conjunction with the RACE variable.

In Norway, information about ethnicity in the censuses is only included in the most ethnically diverse areas of Norway, mainly the three northernmost provinces: Nordland, Troms and Finnmark. In addition to these three provinces, the Norway 1910 census also included information about ethnicity from some southern ethnically diverse municipalities.

description

DEFINITION

Race identifies the racial group with which a person identified himself or herself, or to which an enumerator assigned them. Determinations of race are based largely on appearance or ancestral place of origin.

description

DEFINITION

This variable gives the age in years as of the person's last birthday prior to or on the day of enumeration.

UNIVERSE

Canada 1901: All persons

concept

CONCEPT

CA1901A_PERNUM: Person number (within household)**Data file:** CAN1901_PHC-P-H**Overview**

Type: Continuous Width: 3 Range: - Format: Numeric

description

DEFINITION

This variable indicates the person number (within the household). The variable was computed during reformatting.

UNIVERSE

Canada 1901: All records

concept

CONCEPT

Imputation and derivation

DERIVATION

This is a 3-digit numeric variable with 0 implied decimal places

LINENUM: Line number**Data file:** CAN1901_PHC-P-H**Overview**

Type: Continuous Width: 2 Range: - Format: Numeric

description

DEFINITION

LINENUM indicates the line number of an individual on a given enumeration page (see PAGENUM).

Each page in the 1881 Canadian Census had 25 lines. Typographical errors in this column were cleaned by the 1881 Canadian Census Project staff so the file would sort properly. Some pages had blank lines at the bottom of the page, so the page will end at line 23 or 24. Some pages had a blank line at the top of the page or somewhere in the middle. If the enumerator "squeezed" an extra person between two lines, the lines following that extra person were renumbered so that the page ends on line 26. For those pages, the line numbers on the database will be "one off" the line numbers on the manuscript census, but it was decided that to preserve the numerical integrity of this field (for the purpose of sorting), this was the best solution.

Each page in the 1891 Canadian Census also had 25 lines.

concept

Imputation and derivation

DERIVATION

This is a 2-digit numeric variable with 0 implied decimal places

NAMEFRST: First name

Data file: CAN1901_PHC-P-H

Overview

Type: Continuous Width: 32 Range: - Format: character

description

DEFINITION

NAMEFRST is an alphabetic variable giving a person's full first name. It will primarily be of use to researchers linking the historical census data to other sources of demographic data, or researchers whose research topic involves naming patterns. Because of the length of this variable (32 columns), and the size of the dataset other researchers should not select this variable.

concept

CONCEPT

Imputation and derivation

DERIVATION

This is a 32-digit numeric variable with 0 implied decimal places

NAMELAST: Last name

Data file: CAN1901_PHC-P-H

Overview

Type: Continuous Width: 32 Range: - Format: character

description

DEFINITION

NAMELAST is an alphabetic variable giving a person's full last name. It will primarily be of use to researchers linking the IPUMS historical census data to other sources of demographic data, or researchers whose research topic involves naming patterns. Because of the length of this variable (32 columns), and the size of the dataset, other researchers should not select this variable.

NAMELAST is used to produce the variable SURSIM which assigns the same code to all persons within each household who had a shared surname.

concept

CONCEPT

Imputation and derivation

DERIVATION

This is a 32-digit numeric variable with 0 implied decimal places

OCCHISCO: Occupation, HISCO classification

22130	Superintendents and managers, mining, quarrying, etc.
22140	Superintendents and managers, railways
22150	Superintendents and managers, other transport and communications
22160	Superintendents and managers, public utilities
22170	Superintendents and managers, construction, except railway construction
22180	Superintendents and managers, commerce
22190	Superintendents and managers, nec
23110	Foremen and supervisors nfs
23120	Foremen and supervisors, manufacturing
23130	Foremen and supervisors, mining
23140	Foremen and supervisors, railways
23150	Foremen and supervisors, other transport and communications
23160	Foremen and supervisors, public utilities
23170	Foremen and supervisors, construction, except railway construction
23180	Foremen and supervisors, commerce
23190	Foremen and supervisors, nec
24100	Inspectors of manufactories, companies etc.
31010	Civil servants, title unknown
31020	Tax collectors

31030	Tax assessors
31040	Customs officers
31050	Postmasters or postmistresses
31060	Clerks of court and other court clerks
31090	Government functionaries, nec
32000	Typists, stenographers and secretaries
33120	Bookkeepers and bookkeeping clerks
33130	Cashiers, bank or office
33140	Bank clerks
33142	Bank tellers (US)
33150	Money collector
33160	Cash desk cashier
33170	Toll collectors
33180	Collector (cash or account)
33190	Bookkeeping, account and cash handling workers nec
33210	Railway clerks (UK) and railway agents (CA/US)
33220	Baggage agents and baggage men
33320	Agent, water transport (principally steamship and steamboat)
33330	Agent, land transport (non-rail)
34000	Office machine operators
36010	Conductors, nfs
36020	Railway guards (UK) and railroad conductors (US/CAN)
36030	Sleeping- or pullman-car attendants
36040	Bus, tram or streetcar conductors
36090	Transport conductors, nec
37020	Postal, mail and telegraph clerks
37030	Mail carriers, aka postmen (UK)
37040	Messengers
37050	Mail sorters
37090	Post office, mail, and message workers nec
38010	Tel. operator
38020	Telephone operator
38030	Telegraph operator
38090	Other telephone/telegraph operators
39000	Clerk, nfs
39100	Stock, weight and shipping clerks
39130	Stock records clerk
39310	Office clerks, specialisation unknown
39320	Correspondence clerks

39340	Legal clerks
39350	Insurance clerks
39390	Other correspondence and reporting clerks
39400	Hotel clerk or other receptionist
39500	Library and filing clerks
39600	Railroad, railway clerk
39720	Timekeepers, railway
39730	Timekeepers, factory
39790	Timekeepers, undefined and nec
39900	Other specified clerks
39990	Proofreader
40000	Sales workers, nfs
41000	Working proprietors, nfs
41010	Dealer, merchant etc. (wholesale and retail trade)
41015	Merchants, specified large-scale wholesaling
41020	Hirers out
42000	Buyers
42200	Buyers nec
43010	Agents nfs
43020	Commercial travellers
43030	Manufacturers and sales agents
43090	Other specialized agents
44110	Insurance, real state or securities salesmen, nfs
44120	Insurance salesmen and agents
44130	Real estate agents
44140	Brokers
44150	Stockbrokers
44160	Patent Agents
44190	Insurance, real estate and securities salesmen nec
44200	Advertising salesmen
44320	Auctioneers
44330	Appraisers
45120	Salespeople, wholesale or retail trade
45130	Clerks in shops and stores
45140	Fashion models
45190	Other sales personnel men, shop assistants and demonstrators
45220	Street sellers, pedlars and hawkers, non-food items
45230	Street sellers, pedlars and hawkers, food items
45240	Newsvendors

45250	Canvassers
45290	Other street traders for coffee and food
49020	Pawnbrokers
49030	Scrap and junk dealers, scavengers
49040	Street vendors, canvassers and news vendors, newsvendors
49090	Dealers and salesworkers nec
51020	Hotel keepers and managers
51030	Restaurant keepers and managers
51040	Boarding and lodging house keepers and managers
51050	Pub, saloon, tavern and coffee house keepers
51060	Ship's pursers
51090	Other hospitality and entertainment keepers and managers
52020	Housekeeper
52030	Stewards
52040	Matrons
52050	Butlers
52090	Other housekeeping service supervisors
53100	Cooks
53101	Cook (domestic) UK only
53102	Cook (not domestic)
53103	Ship's cooks
53220	Waiter or waitress
53230	Bartender
53290	Other food and drink service workers
54010	Servants nfs
54020	House servants nfs and maids
54030	Personal servants and valets
54040	Nursemaids
54050	Companions
54060	Chambermaids and room attendants
54090	Other specified servants
55100	Caretakers and janitors
55200	Charworkers
55230	Window cleaners
55240	Chimney sweeps
55250	Refuse collectors and removers
55290	Other charworkers, cleaners and related workers
56000	Washing and laundry services
57020	Hairdressers

57030	Barbers
57040	Bath attendants
57090	Other barbers, hairdressers and related workers
58100	Firefighters
58210	Policemen and detectives, employer unknown
58220	Policemen and detectives, public service
58230	Policemen and detectives, private service
58240	Sheriffs and their deputies
58290	Other law enforcement officers
58300	Watchmen and guards
58410	Military, rank unknown
58420	Military officers
58430	Other members of the armed forces
58500	Prison keepers and guards
58900	Other protective service workers
59100	Guides
59200	Undertakers and embalmers
59300	Prostitutes
59920	Bookmakers (sport)
59930	Croupiers
59940	Nursing aids and attendents
59950	Errand boys and errand girls
59960	Practical aid (veterinary)
59990	Other service workers nec
61110	General farmers and farmers nfs
61115	Husbandmen or cottars
61117	Female farmer
61120	Major landowner
61220	Field crop farmers
61230	Orchardists and fruit farmers
61240	Market gardeners
61250	Nurserymen and florists
61260	Livestock farmers
61270	Dairy farmers
61280	Poultry farmers
61290	Other specialised farmers
61320	Farmer and fisherman
61330	Cottar and fisherman
61400	Farm managers, foremen and supervisors nfs

62110	Farm workers, specialisation unknown
62113	Farmer's sons and other male relatives
62200	Farm workers (field crop and vegetables)
62300	Farm labourers, orchard and fruit farm workers
62410	Livestock workers, general or nfs
62420	Cattle workers, except specified dairy
62430	Sheep workers
62440	Pig workers
62450	Fur-bearing animal workers
62460	Horse workers
62461	Grooms and horse keepers (domestic)
62463	Grooms and horse keepers (not domestic)
62470	Horse breaker
62490	Livestock workers, nec
62500	Farm workers (dairy)
62600	Farm workers (poultry)
62710	Gardeners nfs
62711	Gardener (domestic)
62713	Gardener (not domestic)
62720	Market garden labourers
62730	Nursery labourers
62740	Landscape gardeners
62790	Other nursery workers and gardeners
62800	Farm machinery operators
62920	Other animal workers e.g., dogs, elephants
62930	Other plant workers e.g., gathers of herbs etc.
62940	Groundskeepers, etc.
62990	Others in agricultural or husbandry
63110	Woodsmen and workers in the woods, nfs
63120	Lumbermen, loggers and kindred workers
63130	River drivers
63140	Wood cutters and choppers
63190	Others in logging and wood cutting
63220	Foresters and wood wardens
63230	Forestry workers
63240	Timber cruisers
63250	Forest fire-fighters
63290	Other forestry workers
64100	Fishermen

64920	Fish farm workers
64930	Oyster farm workers
64940	Whale hunters
64950	Whale or seal hunters
64960	Seal hunters
64970	Trappers or hunters
64990	Other fishermen, hunters and related workers
71120	Miners
71130	Quarrymen
71190	Others working in mines and quarries
71200	Mineral or stone treaters
71300	Well drillers, borers and related workers
72000	Metal workers, specialisation unknown
72100	Metal smelter and furnacemen
72200	Metal rollers
72300	Metal melters and reheaters, and workers in metal melting mills
72400	Metal casters and workers in metal casting plants
72500	Metal moulders and coremakers
72600	Metal annealers, temperers and hardeners
72700	Metal drawers and workers in metal drawing
72800	Metal platers and coaters
72900	Other (specialised) metal workers
73100	Wood treaters
73200	Sawyers and other titled wood/sawmill operatives
73300	Papermill machine operators and paper makers
74000	Chemical workers, product nfs
74100	Drug workers
74200	Gunpowder and explosive makers
74320	Charcoal burners
74330	Coal gas makers
74340	Tar makers
74390	Other coal product makers e.g., coke
74420	Salt makers
74430	Alkali and soda makers
74500	Oil mill workers
74620	Paint and varnish makers
74630	Dye makers
74640	Ink, blacking, colouring, etc., makers
74720	Tallow chandlers, candle makers and grease makers

74730	Soap and perfume makers
74740	Glue, size and gelatine makers
74750	Wax and polish makers
74920	Fertilizer and manure makers
74930	Starch makers
74940	Turpentine makers
74990	Specified chemical workers nec
75000	Textile workers, specialisation unknown
75100	Fibre preparers
75200	Spinners, doublers, twistors and winders
75300	Weaving and knitting-machine setters and pattern-card preparers
75400	Weavers
75500	Knitters
75600	Bleachers, dyer or textile product finisher
75700	Rope makers
75920	Net maker
75990	Other specialised textile workers nec
76110	Tanners or fellmongers, specialisation unknown
76120	Fellmongers
76130	Tanners
76140	Leather curriers and finishers
76190	Other specified leather curers
76200	Fur and pelt dressers
77100	Millers and related workers
77200	Sugar refiners
77310	Butchers
77320	Pork butchers
77340	Slaughterer, meat cutters or meat packer
77350	Sausage makers
77360	Fish butchers
77380	Meat cannery workers and other meat preservers (not sausages)
77390	Other workers in meat preparation
77400	Cannery workers and other food preservers
77500	Butter, cheese and dairy product makers
77610	Baker and confectioner
77620	Bakers
77630	Confectioners and pastry makers
77640	Candy makers
77650	Chocolate makers

77690	Other baked goods makers
77700	Tea, coffee and cocoa preparers
77820	Brewers
77830	Maltsters
77840	Wine workers
77850	Vinegar makers and workers
77860	Distillers
77870	Makers of soft drinks
77880	Bottlers
77890	Other drinks makers and workers
77990	Other food and beverage processors
78100	Tobacco preparers and tobacco factory workers
78200	Cigar makers
78300	Cigarette makers
78400	Other tobacco product makers
79120	Tailors and tailoresses
79130	Dressmakers
79190	Other garment makers
79200	Furriers and fur workers
79320	Milliners
79330	Hat makers
79340	Straw hat makers
79390	Other hat makers
79400	Glove makers and related workers
79520	Seamstresses
79530	Sewers and sewing machine operators
79540	Embroiderers
79590	Others hand sewers
79620	Upholsterers (except vehicle)
79630	Vehicle trimmers and upholsterers
79640	Mattress makers
79690	Others working in upholstery jobs
79920	Sail, tent and awning makers
79930	Umbrella makers
79940	Artificial flower makers
79990	Other cloth and related product manufacturing workers
80100	Boot and shoe makers and repairers
80200	Specialised occupations in the boot and shoe making industry
80320	Saddlers and harness makers

80330	Trunk or bag maker
80390	Other leather goods makers
81120	Cabinet makers
81130	Chair makers
81140	Wicker furniture makers
81190	Other furniture makers
81210	Woodworkers
81220	Sawyers, woodworking
81230	Wood turners and handle makers
81240	Wood planers
81250	Wood carvers
81290	Other woodworking machine operators
81300	Coach, carriage and wagon makers
81400	Wheelwrights and cartwrights
81500	Coopers, hoop makers and benders
81600	Clog makers
81710	Box makers nfs
81720	Wooden box makers
81730	Paper box makers
81790	Box makers nec
81920	Wooden tool makers
81930	Ski makers
81990	Other makers of wooden products
82000	Stone carvers or cutters and stone yard workers
83120	Blacksmiths
83130	Hammersmiths
83140	Forgemen
83150	Farriers or horseshoers
83160	Specialised makers of forged metal products
83190	Other blacksmiths, hammermen and forging-press operators
83210	Tool makers nfs
83220	Tool and die makers
83230	Pattern makers nfs and nec
83290	Other tool makers and metal markers
83310	Metalworking machine operators
83320	Metal turners
83390	Other metal working machine operators
83400	Machinists
83520	Metal polishers and finishers

83530	Metal grinders and sharpeners
83540	Cutlers and cutting instrument makers
83550	Cutler (knives, forks, spoon)
83590	Other metal grinders, polishers and tool sharpeners nec
83600	Gunsmiths
83700	Locksmiths
83820	Saw makers
83830	Saw, spade, shovel and half wood/half metal agricultural instrument type things
83840	Chain makers
83850	Nailer and nail makers
83860	Wire makers
83890	Other metal workers nec
84110	Mechanics
84120	Millwrights
84130	Machine makers, builders and fitters
84140	Engine and locomotive builders
84150	Sewing machine makers and builders
84190	Other machinery fitters and machine assemblers
84220	Watch and clock makers
84230	Optical instrument makers and workers (not opticians)
84290	Other specialized instrument makers (not musical instrument makers)
84300	Bicycle makers
84400	Motor vehicle manufacturing and repair workers, specialization unknown
84460	Automobile manufacturing workers
84900	Others in machinery
85100	Electrical fitters and electrical equipment assemblers
85500	Electricians and wiremen
85600	Telephone and telegraph installers
85700	Linesmen: telephone, telegraph and electric
85920	Electrical products inspector or tester
85990	Other electrical fitters and related electrical workers
87120	Plumbers
87130	Pipe fitters
87220	Welders
87230	Braziers
87250	Flamecutter
87290	Other welders, braziers, solderers
87320	Sheet metal worker, general
87330	Coppersmith or copperware maker

87340	Tinsmith, tinner or tinker
87350	Boilermaker
87390	Other sheet metal workers
87420	Structural metal workers
87430	Riveters nec
87490	Other structural metal preparers and erectors
87520	Ship and boat builders
87530	Shipwrights and ship joiners
87540	Ship's carpenters
87550	Block, mast and tackle makers
87560	Caulker
87590	Other ship builders
88020	Jewellers
88030	Goldsmith
88040	Silversmith
88050	Working with gems and stones
88090	Other jewellery and precious metal workers
89120	Glass makers
89130	Glass bottle makers
89190	Other specific glass makers
89200	Pottery and porcelain makers and workers
89300	Brick and tile makers
89400	Glass engravers, etchers and finishers
89500	Pottery and porcelain painters
89620	Cement makers
89630	Lime burners
89700	Clay-based products makers
90100	Rubber product makers
90200	Tire makers and vulcanisers
91020	Paper and paperboard products makers, except boxes
91090	Other paper product makers
91100	Paper and paper board product makers
92000	Printers nec
92110	Printers nfs
92120	Compositors
92190	Other compositors and typesetters
92200	Lithographic printers
92300	Stereotypers and electrotypers
92400	Lithographers

92500	Photo-engravers
92600	Bookbinders and related workers
92800	Textile printers
92900	Other printers and related workers
93110	Painters, nfs
93120	Painters, construction
93130	Painters, ship
93190	Other specialised painters nec
93200	Decorators
93320	Lacquerers and enamellers
93330	Japanners
93400	Gilders
94110	Musical instrument maker nfs
94120	Piano maker
94130	Piano tuner
94140	Organ builder
94190	Other musical instrument makers and tuner
94220	Basket makers
94230	Brush makers
94240	Broom makers
94290	Bristle and straw workers nec
94300	Non-metallic mineral product makers
94910	Other production or related worker, specialisation unknown
94920	Animal stuffers, taxidermists and shell workers
94930	Linoleum makers and floor cloth makers
94940	Toy and doll makers
94990	Production and related workers nec
95110	Mason nfs or combined
95120	Bricklayers
95130	Stone masons
95140	Plasterers
95150	Paviours
95160	Marble mason
95190	Others in construction
95200	Cement masons and finishers
95310	Roofer, specialisation unknown
95320	Slate and tile roofers
95330	Thatchers
95390	Other roofers

95410	Carpenter and joiner
95420	Carpenters
95430	Joiners
95440	Scaffolders
95490	Other wooden construction workers
95600	Pipe coverers and insulators
95700	Glaziers
95910	Construction workers nec
95920	Paperhangers
95930	Carpet planners
95940	Whitewashers
95950	Demolition workers
95960	Marblers
95990	Others in building construction
96100	Electricity generators
96220	Engineers (US) nfs
96230	Stationary engineers and engine men
96240	Stationary firemen and firemen nfs
96900	Other stationary engine and related equipment operators
97120	Ship boat loaders and dock workers
97130	Railway freight handlers
97140	Porters
97150	Packers
97190	Other freight handlers
97210	Riggers nec or nfs
97220	Ship riggers
97300	Crane and hoist operators
97410	Navvy, excavator and diggers, nfs
97420	Road builders, workers and labourers
97430	Railway builders, workers and labourers
97440	Waterway and harbour builders, workers and labourers
97490	Other road, railway and related construction labourers
97900	Material handling equipment operators nec
98120	Seamen
98130	Boatmen and canalmen
98190	Other crew of boats, ships, etc.
98200	Ship's engine men
98300	Railway/railroad locomotive operators
98320	Railway/railroad engineers and enginemen

98330	Railway/railroad firemen and stokers
98420	Railway brakemen
98430	Railway signallers
98440	Railway switchmen and shunters
98490	Others skilled railway workers
98510	Drivers, nec
98520	Drivers (private)
98530	Drivers (personal, for hire)
98540	Drivers (public)
98550	Delivery men and drivers of goods
98560	Drivers (general haulage)
98562	Carter (agricultural)
98570	Teamsters (inc. mine driver, etc.)
98590	Others drivers
98700	Lock and gate keepers
98720	Lock keepers
98730	Gate keepers
98900	Other transport equipment operators
99120	Labourers nfs
99130	Common labourers or general labourers
99140	Day labourers (e.g., journalier)
99150	Worker nfs
99200	Factory labourers (unspecified)
99300	Occupational title unclassifiable
99420	Assistants nfs
99430	Helpers nfs
99440	Helpers of relative or helping at home
99450	Apprentices nfs
99500	Ambiguous responses
99998	Alternative occupation (Sweden)
99999	No occupation/unknown

description

DEFINITION

OCCHISCO is a uniformly coded classification of occupations that is consistent across all countries. It is the most complicated variable to code consistently in the pre-1950 samples, and the present documentation does not fully cover the issues addressed. We will be progressively adding to the level of detail available on this variable. For example, we will occasionally provide examples of common responses below each code so that users will be able to see what responses were coded where. Users with queries about the coding of specific occupations should contact the IPUMS staff in the first instance. Users interested in variation in occupational responses below the level of detail provided in the codes (e.g., distinguishing "caretakers" from "janitors") should look at the OCCSTRNG variable.

The codes for OCC were adapted from the Historical International Standard Classification of Occupations (HISCO) coding scheme. More information on HISCO is available in M.H.D. van Leeuwen, I. Maas and A. Miles. (2002) HISCO: Historical International Standard Classification of Occupations. Leuven: Leuven University Press. HISCO in turn is based on the International Standard Classification of Occupations from 1968, commonly known as ISCO-68. Information on HISCO can also be located at the HISCO database of occupational titles, and the International Institute of Social History.

More information on the adaptations IPUMS made to HISCO can be found in the article "Occupational Classification in the North Atlantic Population Project" (2003), *Historical Methods*, Vol. 36, No. 2 (Part 2), pp.89-96.

Structure of the classification scheme

The classification scheme is hierarchical, in the sense that each digit in the 5 digit codes introduces a new level of detail. Codes sharing the same first 1, 2 or 3 digits are considered to be increasingly similar. For example, all people working in agriculture have the first digit 6. The first digit of a code indicates the "Major group" a person's occupation is in.

The second digit indicates a "Minor group" distinction. Continuing the previous example, people who have the first two digits "61" are farmers - who may specify what they are cultivating or tending - and farm managers. Thus, as well as sharing the characteristic of working in agriculture (6) they also share the characteristic of being owners or managers (61).

The first 3 digits denote the "Unit group" of an occupation. At the third digit level, we introduce more detail. For example, the unit group "612" indicates "Specialized farmers". Within this unit group, 4th and 5th digit distinctions known as "titles" or "headings" are made. For example, "61220" indicates "Field crop farmers," and "61230" indicates "Orchardists and fruit farmers."

Understanding headings

In general, if the last two digits of a code are "00" the heading is reserved for general titles. For example, in unit group "721" for "Metal smelter and furnace workers", the heading "72100" is reserved for responses such as "Metal smelter" and "Furnace men."

If the last two digits of a code are "10" the heading is reserved for "not further specified" titles (often abbreviated "n.f.s." or "nfs" in syntax files), and codes ending in "20", "30" and higher multiples of 10 are reserved for responses with more detail on some aspect of the occupation. For example, "58210" is the code for "Policemen and detectives, employer unknown," whereas "58220" and "58230" are the codes for "Policemen and detectives, public service," and "Policemen and detectives, private service" respectively.

Headings ending in digits other than "0" (e.g., 2, 3, 4, 9) are generally reserved for frequent responses specific to a particular country that probably belong with responses sharing the same first four digits of the heading. For example, "61115" ("Husbandman or cottar") in Norway and Sweden and "61117" ("Female farmer") in Canada could be classified with "Other general farmers" ("61110"), but occurred frequently enough that we felt they should be given a separate code for easier identification.

If the last two digits of a code are "90", the heading is reserved for "not elsewhere classified" responses. For example, "58290" is the code for "Other law enforcement officers".

The difference between "n.f.s." and "n.e.c." responses is that "n.f.s." responses are quite general, and may not offer much detail on the tasks and duties of the job. Conversely, "n.e.c." responses are typically quite detailed in the information provided, but there are not enough similar responses to justify a separate heading.

Alterations to HISCO

Compared to HISCO we have reduced the overall number of headings, while still introducing new ones, and retaining more detail from vaguely specified occupations.

In general, we made the fewest changes to the structure of the HISCO codes in major groups 0 and 1 (professional workers). We re-organized the codes within major groups 2 (administrative and managerial workers), 3 (clerical workers), 4 (sales workers), 5 (service workers), and 6 (workers in agriculture). We made the most substantial revisions in moving people between major groups in the manufacturing and transport major groups (7, 8, and 9).

In particular, we created codes for vague responses of the form "Works in [specified type of] factory," such as "Works in cotton mill." We grouped these workers with "Laborers" and titled, skilled workers in the same general industry.

We eliminated codes where HISCO made distinctions that were not consistently made in nineteenth century census data. For example, HISCO distinguished between hand and machine spinners. We found that most spinners did not specify whether they were spinning by hand or machine, more often giving information on what they were spinning (e.g., cotton, wool, silk),

or a firm's name.

We introduced codes to handle vague occupations, as discussed above. We also created codes to retain linguistic and nominal distinctions above a rough frequency level. These distinctions are generally made in the fourth and fifth digit of the codes. For example, we distinguish between "Farm workers, specialisation unknown" (62110) and "Farmer's sons and other male relatives" (62113), because "farmer's son" was a numerically significant response in Canada. Both are considered part of the "Farm labourers and helpers, general farming and n.f.s" unit group (621).

Other variables

Responses to the occupational questions also returned information that cannot be classified within an occupational classification scheme, such as relationship to workers, or indications of status. Please see the documentation for the variables OCRELATE and OCSTATUS.

Information on the products sold by retail workers (Major Group 4) is available in the variable PRODUCT.

Occupations were also coded into domestic occupational classification schemes in Great Britain, Norway, and the United States. See the documentation for the following variables for more information.

concept

CONCEPT

OCCSTRNG: Occupation as transcribed

Data file: CAN1901_PHC-P-H

Overview

Type: Continuous Width: 30 Range: - Format: character

description

DEFINITION

OCCSTRNG is an alphabetic variable that preserves the transcription of an individual's response to questions about their occupation. Although the various occupation and industry codes preserve significant detail on occupation and industry, much variation exists in the occupational strings.

OCCSTRNG will primarily be of interest to researchers who are linking census data to other sources, or are investigating occupations at a much more detailed level than offered by the various coding schemes.

The collection of occupation information was extensively covered in the instructions to enumerators. Researchers who are interested in OCCSTRNG should also read the enumerator instructions for assistance in interpreting occupational responses.

Because of the size of this variable (30 columns), users should not select this variable unless it is essential for their research. Users should be aware that some responses are truncated at this length.

concept

CONCEPT

Imputation and derivation

DERIVATION

OCCSTRNG is a 30-character string variable.

OCSTATUS: Status information in occupation string**Data file:** CAN1901_PHC-P-H**Overview**

Type: Discrete Width: 2 Range: - Format: Numeric

32	Worker or works in
33	Labourer
34	Assistant or helper
40	Attending school or college
51	Nobility
52	Prestige
99	No occupation, unknown

description

DEFINITION

OCSTATUS preserves inconsistently available information in responses to occupational questions. It is similar to the HISCO subsidiary coding scheme "STATUS". The purpose of OCSTATUS is to preserve information about the social status of an occupation.

Correct usage of OCSTATUS is critical to proper interpretation of the occupation codes.

In modifying the HISCO system we faced the challenge of classifying industrial workers who often gave information on the industry they were employed in and less specific information on the tasks and functions they performed. We have grouped people of varying statuses in similar occupational codes.

To differentiate between skilled workers, people who "worked in" a particular industry (skill level indeterminate), and laborers, you must use OCSTATUS.

OCSTATUS has been applied to all occupations. Thus, a person indicating that they are an "Assistant Superintendent" receives the occupational code for Superintendent (22xxx), and the OCSTATUS code 34 for assistant.

Changes from the HISCO STATUS codes

We have changed the HISCO STATUS codes for ownership to

- 11Retired
- 12Unemployed
- 13Pauper
- 14Owner
- 15Leaseholder

Changes from the HISCO RELATION codes

We have removed the "temporal relationships" category from the OCRELATE codes and moved them to OCSTATUS. We felt that "former or retired" and "future" relationships to work were better described as status designators. Future relationships to an occupation were often people describing themselves as students or apprentices in specified professions and trades.

CONCEPT

PAGENUM: Page number

Data file: CAN1901_PHC-P-H

Overview

Type: Continuous Width: 6 Range: - Format: Numeric

description

DEFINITION

PAGENUM indicates the page on the microfilm reel where an individual can be found. Pages within each sub-district and division were numbered sequentially.

Typographical errors in this column were cleaned by IPUMS staff (and the 1881 Canadian Census Project staff), so the data can be sorted properly.

description

DEFINITION

SURSIM assigns the same code to all persons within each household who had the same surname. Persons coded 1, including the household head, had the same surname as the household head. Other surnames are assigned codes in the order in which they appear within the household on the census form. Persons within a household who shared a surname will have the same code for this variable.

62490	Livestock workers, nec
62500	Farm workers (dairy)
62600	Farm workers (poultry)
62710	Gardeners nfs

62730	Nursery labourers
62800	Farm machinery operators
62900	Others in agricultural or husbandry
63110	Woodsmen and workers in the woods, nfs
63120	Lumbermen, loggers and kindred workers
63130	River drivers
63140	Wood cutters and choppers
63190	Others in logging and wood cutting
63220	Foresters and wood wardens
63230	Forestry workers
63240	Timber cruisers
64100	Fishermen
64960	Seal hunters
64970	Trappers or hunters
64990	Other fishermen, hunters and related workers
71120	Miners
71130	Quarrymen
71190	Others working in mines and quarries
71200	Mineral or stone treaters
71300	Well drillers, borers and related workers
72000	Metal workers, specialisation unknown
72100	Metal smelter and furnacemen
72200	Metal rollers
72300	Metal melters and reheaters, and workers in metal melting mills
72400	Metal casters and workers in metal casting plants
72500	Metal moulders and coremakers
72700	Metal drawers and workers in metal drawing
72800	Metal platers and coaters
72900	Other (specialised) metal workers
73100	Wood treaters
73200	Sawyers and other titled wood/sawmill operatives
73300	Papermill machine operators and paper makers
74000	Chemical workers, product nfs
74320	Charcoal burners
74330	Coal gas makers
74420	Salt makers
74430	Alkali and soda makers
74620	Paint and varnish makers
74730	Soap and perfume makers

74740	Glue, size and gelatin[e] makers
74750	Wax and polish makers
74930	Starch makers
74990	Specified chemical workers nec
75000	Textile workers, specialisation unknown
75100	Fibre preparers
75110	Fibre preparers
75200	Spinners, doublers, twisters and winders
75300	Weaving and knitting-machine setters and pattern-card preparers
75400	Weavers
75500	Knitters
75600	Bleachers, dyer or textile product finisher
75700	Rope makers
75900	Other specialised textile workers nec
76110	Tanners or fellmongers, specialisation unknown
76130	Tanners
76140	Leather curriers and finishers
76190	Other specified leather curers
76200	Fur and pelt dressers
77100	Millers and related workers
77160	Baker and confectioner
77200	Sugar refiners
77310	Butchers
77350	Sausage makers
77360	Fish butchers
77390	Other workers in meat preparation
77400	Cannery workers and other food preservers
77500	Butter, cheese and dairy product makers
77620	Bakers
77630	Confectioners and pastry makers
77640	Candy makers
77690	Other baked goods makers
77700	Tea, coffee and cocoa preparers
77820	Brewers
77830	Maltsters
77840	Wine workers
77860	Distillers
77870	Makers of soft drinks
77880	Bottlers

78100	Tobacco preparers and tobacco factory workers
78200	Cigar makers
79120	Tailors and tailoresses
79130	Dressmakers
79190	Other garment makers
79200	Furriers and fur workers
79320	Milliners
79330	Hat makers
79390	Other hat makers
79400	Glove makers and related workers
79520	Seamstresses
79530	Sewers and sewing machine operators
79540	Embroiderers
79590	Others hand sewers
79620	Upholsterers (except vehicle)
79630	Vehicle trimmers and upholsterers
79640	Mattress makers
79650	Others working in upholstery jobs
79920	Sail, tent and awning makers
79930	Umbrella makers
79990	Other cloth and related product manufacturing workers
80100	Boot and shoe makers and repairers
80200	Specialised occupations in the boot and shoe making industry
80310	Other leather goods makers
80320	Saddlers and harness makers
80330	Trunk or bag maker
80390	Other leather goods makers
81120	Cabinet makers
81130	Chair makers
81190	Other furniture makers
81200	Sawyers, woodworking
81210	Woodworkers
81220	Sawyers, woodworking
81230	Wood turners and handle makers
81250	Wood carvers
81300	Coach, carriage and wagon makers
81400	Wheelwrights [and cartwrights]
81500	Coopers, hoop makers and benders
81710	Box makers nfs

81720	Wooden box makers
81730	Paper box makers
81790	Box makers nec
81990	Other makers of wooden products
82000	Stone carvers or cutters and stone yard workers
83120	Blacksmiths
83140	Foregemen
83150	Farriers or horseshoers
83160	Specialised makers of forged metal products
83190	Other blacksmiths, hammermen and forgeing-press operators
83210	Tool makers nfs
83220	Tool and die makers
83230	Pattern makers nfs and nec
83290	Other tool makers and metal markers
83320	Metal Turners
83400	Machinists
83520	Metal polishers and finishers
83530	Metal grinders and sharpeners
83540	Cutlers and cutting instrument makers
83550	Cutler (knives, forks, spoon)
83590	Other metal grinders, polishers and tool sharpeners nec
83600	Gunsmiths
83700	Locksmiths
83820	Saw makers
83840	Chain makers
83850	Nailer and nail makers
83860	Wire makers
83890	Other metal workers nec
84110	Mechanics
84120	Millwrights
84130	Machine makers, builders and fitters
84140	Engine and locomotive builders
84190	Other machinery fitters and machine assemblers
84220	Watch and clock makers
84230	Optical instrument makers and workers (not opticians)
84290	Other specialized instrument makers (not musical instrument makers)
84300	Bicycle makers
84900	Others in machinery
84990	Others in machinery

85500	Electricians and wiremen
85600	Telephone and telegraph installers
85700	Linesmen: telephone, telegraph and electric
85990	Other electrical fitters and related electrical workers
87120	Plumbers
87130	Pipe fitters
87320	Sheet metal worker, general
87330	Coppersmith or copperware maker
87340	Tinsmith, tinner or tinker
87350	Boilermaker
87430	Rivetters nec
87520	Ship and boat builders
87530	Shipwrights and ship joiners
87540	Ship's carpenters
87550	Block, mast and tackle makers
88020	Jewellers
88030	Goldsmith
88040	Silversmith
88050	Working with gems and stones
88090	Other jewellery and precious metal workers
89120	Glass makers
89200	Pottery and porcelain makers and workers
89300	Brick and tile makers
89400	Glass engravers, etchers and finishers
89500	Pottery and porcelain painters
89620	Cement makers
89630	Lime burners
90100	Rubber product makers
90200	Tire makers and vulcanisers
91020	Paper and paperboard products makers, except boxes
91090	Other paper product makers
92000	Printers nec
92110	Printers nfs
92120	Compositors
92190	Other compositors and typesetters
92200	Lithographic printers
92300	Stereotypers and electrotypers
92400	Lithographers
92600	Bookbinders and related workers

92800	Textile printers
92900	Other printers and related workers
93110	Painters, nfs
93120	Painters, construction
93190	Other specialised painters nec
93200	Decorators
93320	Lacquerers and enamellers
93330	Japanners
94120	Piano maker
94130	Piano tuner
94140	Organ builder
94190	Other musical instrument makers and tuner
94220	Basket makers
94240	Broom makers
94290	Bristle and straw workers nec
94320	Brush makers
94520	Carpenters
94910	Other production or related worker, specialisation unknown
94920	Animal stuffers, taxidermists and shell workers
94930	Linoleum makers and floor cloth makers
94950	Production and related workers nec
94990	Production and related workers nec
95110	Mason nfs or combined
95120	Bricklayers
95130	Stone masons
95140	Plasterers
95190	Others in construction
95200	Cement masons and finishers
95310	Roofer, specialisation unknown
95320	Slate and tile roofers
95390	Other roofers
95410	Carpenter and joiner
95420	Carpenters
95430	Joiners
95490	Other wooden construction workers
95500	Pipe coverers and Insulators
95700	Glaziers
95910	Construction workers nec
95940	Whitewashers

95990	Others in building construction
96100	Electricity generators
96220	Engineers (US) nfs
96230	Stationary engineers and engine men
96240	Stationary firemen and firemen nfs
96900	Other stationary engine and related equipment operators
97120	Ship boat loaders and dock workers
97130	Railway freight handlers
97140	Porters
97150	Packers
97190	Other freight handlers
97210	Riggers nec or nfs
97300	Crane and hoist operators
97410	Navvy, excavator and diggers, nfs
97420	Road builders, workers and labourers
97430	Railway builders, workers and labourers
97440	Waterway and harbour builders, workers and labourers
97490	Other road, railway and related construction labourers
97900	Material handling equipment operators nec
98120	Seamen
98130	Boatmen and canalmen
98190	Other crew of boats, ships, etc.
98200	Ship's engine men
98320	Railway/railroad engineers and enginemen
98330	Railway/railroad firemen and stokers
98420	Railway brakemen
98430	Railway signallers
98440	Railway switchmen and shunters
98490	Others skilled railway workers
98510	Drivers, nec
98530	Drivers (personal, for hire)
98540	Drivers (public)
98550	Delivery men and drivers of goods
98560	Drivers (general haulage)
98562	Carter (agricultural)
98670	Teamsters (inc. mine driver, etc.)
98720	Lock keepers
98730	Gate keepers
98900	Other transport equipment operators

99120	Labourers nfs
99130	Common labourers or general labourers
99140	Day labourers (e.g journalier)
99150	Worker nfs
99200	Factory labourers (unspecified)
99300	Occupational title unclassifiable
99430	Helpers nfs
99440	Helpers of relative or helping at home
99500	Ambiguous responses
99999	Unknown and NIU

description

DEFINITION

This variable is a uniformly coded classification of occupations.
