Identification

SURVEY ID NUMBER

DNK_1885_PHC_v01_M_v7.5_A_IPUMS

TITLE

Danish Census 1885 - IPUMS Subset

ABBREVIATION OR ACRONYM

PHC Denmark 1885 (15%) (IPUMS Harmonized Subset)

COUNTRY

Name	Country code
Denmark	DNK

STUDY TYPE

Population and Housing Census [hh/popcen] IPUMS International

SERIES INFORMATION

DOI:10.18128/D020.V7.5

KIND OF DATA

Population and Housing Census [hh/popcen]

UNIT OF ANALYSIS

Persons, households, and dwellings Copenhagen only

UNITS IDENTIFIED:

- Dwellings: yes
- Vacant Units: No
- Households: yes
- Individuals: yes
- Group quarters: yes

UNIT DESCRIPTIONS:

- Dwellings: no
- Households: Yes
- Group quarters: Yes

Version

VERSION DESCRIPTION

Version 7.5. The datasets contain selected variables from the original census microdata plus harmonized variables from the IPUMS-International database.

VERSION DATE

2024-10-05

Scope

NOTES

Additional notes on a sample that is part of this study: Denmark 1885 (15%)

Note: Copenhagen only

TOPICS

Topic	Vocabulary
-------	------------

Geography: A-E Variables -- HOUSEHOLD	IPUMS
Demographic Variables -- PERSON	IPUMS
Technical Household Variables -- HOUSEHOLD	IPUMS
Constructed Family Interrelationship Variables -- PERSON	IPUMS
Group Quarters Variables -- HOUSEHOLD	IPUMS
Constructed Household Variables -- HOUSEHOLD	IPUMS
Work Variables -- PERSON	IPUMS
Migration: Global Variables -- PERSON	IPUMS
Technical Person Variables -- PERSON	IPUMS
Geography: Global Variables -- HOUSEHOLD	IPUMS
Other Person Variables -- PERSON	IPUMS
Ethnicity and Language Variables -- PERSON	IPUMS
Nativity and Birthplace Variables -- PERSON	IPUMS
Work: Occupation Variables -- PERSON	IPUMS

Coverage

GEOGRAPHIC UNIT

Parish

UNIVERSE

Persons who slept in the households in the census night, including those who do not have their permanent residence in the house, but whose presence only is of temporary character. However, nobody who is absent should be included even if their absence is only temporary.

CONFIDENTIALITY

IPUMS International distributes integrated microdata of individuals and households only by agreement of collaborating national statistical offices and under the strictest of confidence. Before data may be distributed to an individual researcher, an electronic license agreement must be signed and approved. To gain access to the data, a researcher must agree to the following: (1) Implement security measures to prevent unauthorized access to census microdata. Under IPUMS International agreements with collaborating agencies, redistribution of the data to third parties is prohibited. (2) Use the microdata for the exclusive purposes of scholarly research and education. Researchers must explicitly agree to not use microdata acquired for any commercial or income-generating venture. (3) Maintain the confidentiality of persons, households, and other entities. Any attempt to ascertain the identity of persons or households from the microdata is prohibited. Alleging that a person or household has been identified is also prohibited. (4) Report all publications based on these data to IPUMS International, which will in turn pass the information on to the relevant national statistical agencies. Once a project is approved, a password is issued and data may be acquired through the Internet. Penalties for violating the license include: revocation of the license, recall of all microdata acquired, filing of a motion of censure to the appropriate professional organizations, and civil prosecution under the relevant national or international statutes. These safeguards mirror the principles from the Joint ECE/Eurostat Work Session on Statistical Data Confidentiality. Employees of the Minnesota Population Center who work with the census microdata to produce the harmonized database also sign agreements to respect the confidentiality of the data. IPUMS International works with each country's statistical office to minimize the risk of disclosure of respondent information. The details of the confidentiality protections vary across countries, but in all cases, names and detailed geographic information are suppressed and top-codes are imposed on variables such as income that might identify specific persons. In addition, IPUMS International uses a variety of technical procedures to enhance confidentiality protection. These include the following: (1) Swapping an undisclosed fraction of records from one administrative district to another to make positive identification of individuals impossible. (2) Randomizing the placement of households within districts to disguise the order in which individuals were enumerated or the data processed. (3) Aggregating codes of sensitive characteristics (e.g., grouping together very small ethnic categories) (4) Top- and bottom-coding continuous variables to prevent identification of extreme cases. The safety record for public-use census microdata is apparently perfect. In almost four decades of use, there has not been a single verified breach of statistical confidentiality. The measures implemented by the IPUMS International are designed to extend this record.

ACCESS CONDITIONS

An adapted version of the dataset, harmonized for international comparability, is available from IPUMS International (<https://international.ipums.org/international/>) under the following conditions:

IPUMS International distributes integrated microdata of individuals and households only by agreement of collaborating

national statistical offices and under the strictest of confidence. Before data may be distributed to an individual researcher, an electronic license agreement must be signed and approved. To gain access to the data, a researcher must agree to the following:

- (1) Implement security measures to prevent unauthorized access to census microdata. Under IPUMS International agreements with collaborating agencies, redistribution of the data to third parties is prohibited.
- (2) Use the microdata for the exclusive purposes of scholarly research and education. Researchers must explicitly agree to not use microdata acquired for any commercial or income-generating venture.
- (3) Maintain the confidentiality of persons, households, and other entities. Any attempt to ascertain the identity of persons or households from the microdata is prohibited. Alleging that a person or household has been identified is also prohibited.
- (4) Report all publications based on these data to IPUMS International, which will in turn pass the information on to the relevant national statistical agencies.

Once a project is approved, a password is issued and data may be acquired through the Internet. Penalties for violating the license include: revocation of the license, recall of all microdata acquired, filing of a motion of censure to the appropriate professional organizations, and civil prosecution under the relevant national or international statutes.

These safeguards mirror the principles from the Joint ECE/Eurostat Work Session on Statistical Data Confidentiality. Employees of the Minnesota Population Center who work with the census microdata to produce the harmonized database also sign agreements to respect the confidentiality of the data.

DDI DOCUMENT VERSION

Version 7.5 October 2024. NEW FEATURES.

--Historical data from NAPP project now available from IPUMS-International.

--Historical census data from Canada, Denmark, the United Kingdom, Germany, Iceland, Norway, Sweden, and the United States for the period 1703 to 1911 are now available from IPUMS-International. The complete count and sample datasets were previously disseminated by the North Atlantic Population Project (NAPP). Where possible, the data have been integrated into existing IPUMS-International variable coding schema. Some new variables have been created that are available only for these pre-1960 datasets. NAPP data users should note that many NAPP variables are available from IPUMS-International by different names. For a complete list of NAPP variables that have been renamed in IPUMS-International, refer to the crosswalk.

--Individual country shapefiles for the third-level administrative level of geography are now available for a few IPUMS samples.

--New spatially harmonized previous-residence variables at the second administrative level of geography are available for several samples in this data release. More information is available [here](#). Users should note that many older migration variables are available by different names. Refer to this table for a crosswalk of old and corresponding new migration variables.

--IPUMS now hosts the Census Mosaic data collection. Census Mosaic identifies, gathers, harmonizes, and distributes surviving historical census microdata from regions of Continental Europe where complete centralized records are not available. The Mosaic project was founded by a consortium of historical social scientists in Europe. Data can be downloaded as static files from the Census Mosaic website. Although the data are not yet integrated fully into IPUMS International, variables have been standardized and harmonized to be roughly compatible with IPUMS coding structures.

NEW SAMPLES.

--Full-count datasets for Great Britain 1851, 1861, 1871 (Scotland only), 1891, and 1901.

--Full-count dataset for Sweden 1910. Denmark (1845, 1880, and 1885)

--Labor force surveys from Spain and eight new labor force surveys from Italy added to the series.

Newly added countries:

Benin, Cote d'Ivoire, Finland, Guatemala, Honduras, Laos, Lesotho, Mauritius, Myanmar, Papua New Guinea, Russia, Slovak Republic, Suriname, Togo, and Zimbabwe

New samples for:

Bolivia, Cambodia, Cambodia, Chile, Cuba, Cote d'Ivoire, Egypt (1848 and 1868, historical samples), Fiji, Guinea, Ireland, Israel, Italy, Lao PDR, Mexico, Morocco, Nepal, Netherlands, Palestine, Peru, Philippines, Puerto Rico, Rwanda, Senegal, Sierra Leone, South Africa, Switzerland, Uganda, United States, United Kingdom, United States, Vietnam, and Zimbabwe

SUPPLEMENTAL DATA.

Data from censuses from Benin and Lesotho that record individual fertility and/or mortality events were made available in IPUMS-International. These files can be downloaded and linked to data produced by the extract system.

NEW VARIABLES.

--IPUMS-International now provides harmonized and year-specific geography variables for all countries including 13 new samples from Dominican Republic, Germany, Indonesia, Israel, Malaysia, Mongolia, Nicaragua, Nigeria, Palestine, Paraguay,

Thailand, United Kingdom, and Uruguay. First-level and second-level year specific geography variables are also available for all countries. IPUMS provides corresponding, downloadable GIS boundary files for all harmonized and year specific geography variables. More information about IPUMS geography variables is available [here](#).

--IPUMS International now provides spatially harmonized previous-residence variables at the first administrative level of geography. The codes for the spatially harmonized previous-residence variables match the spatially harmonized place of current residence. More information is available [here](#).

--IPUMS International provides spatially harmonized previous-residence variables at the first administrative level of geography for all samples; previously available country-specific migration variables at the first administrative level that were not fully harmonized spatially have been phased out. Spatially harmonized previous-residence variables at the second administrative level of geography are available for selected samples. More information is available [here](#). Users should note that many older migration variables are available by different names. Refer to this table for a crosswalk of old and corresponding new migration variables.

--IPUMS International now provides spatially harmonized previous-residence variables at the first administrative level of geography for all samples. Spatially harmonized previous-residence variables at the second administrative level of geography are available for several samples in this data release. More information is available [here](#). Users should note that many older migration variables are available by different names. Refer to this table for a crosswalk of old and corresponding new migration variables.

--Lower (third) level geography codes and GIS files have been added for Bangladesh, China, Ethiopia, Mali, Rwanda, and Zimbabwe. Some geography codes and labels might have changed for these countries to accommodate the newer lower level geography.

--Added more detailed 3-digit industry and occupation variables for China 2000.

EDITED SAMPLES.

--Revised full-count data for Great Britain 1881

--Revised full-count datasets for Sweden 1890 and 1900. The revision includes the following changes that improve comparability across Sweden datasets:

--Revisions to certain ethnicity and work variables (and the underlying source data): ORIGIN, LABFORCE, OCCHISCO, OCRELATE, OCSTATUS.

--Revisions to unharmonized source variables: SE1890A_HISCOSE, SE1890A_HISCRELSE, SE1890A_HISCSTATSE, SE1890A_OCCMULTISE, SE1900A_HISCOSE, SE1900A_HISCRELSE, SE1900A_HISCSTATSE, SE1900A_OCCMULTISE.

--A new United States 1850 full-count dataset now matches the corresponding dataset distributed by the USA IPUMS data project. The source variable US1850A_0502 (HISTID) provides a linking key to match person records to the USA version of the data. The IPUMS International version of the data contains names, which the USA version cannot distribute.

EDITED VARIABLES.

An error affecting HHWT for South Africa 2007 was corrected. The existing values were adjusted by a factor of 0.01.

AGEMARR was edited to add data for Hungary 1980 and 1990.

Harmonized and year-specific geography variables for Brazil and Colombia have been edited to accommodate for the availability of refined municipal boundaries. Users should be aware that codes and labels have changed in all harmonized and year specific geography variables for these two countries.

Errors affecting BPLSE2 (formerly BLPARSE) for Sweden 1890 and the underlying source variable were corrected. Several thousand cases were incorrectly coded as 258101000. These cases have been updated with the correct code: 258171000.

Harmonized geography variables for Italy, Philippines, Rwanda, and United States have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

The codes for the source variable RW2002A_0419 were corrected to include 0 and 8 as possible responses, which were previously identified as 'unknown years' within primary education.

Errors affecting EDUCFJ for Fiji 2006 were corrected.

A problem with PERWT for Tanzania 2012 was corrected. The previous weights were adjusted to properly reflect population totals.

MOMLOC, POPLOC, and PARRULE were updated for the United States 2010 and 2015 samples to include additional information on subfamilies. Prior to this correction, persons above age 17 were not receiving links to their co-resident mothers and fathers.

An error affecting codes for the URBAN variable in Egypt 1986 for Cairo, Alexandria, Port-Said, and Suez was corrected.

An error in INCEARN affecting Venezuela 2001 was corrected. Earned income in the source variable VE2001A_0440 is interpreted as a monthly amount, thus adjustments previously applied to convert data from daily or weekly income were suppressed.

All the six Brazil samples in IPUMS International were replaced with higher density samples.

An edited version of the Chile 2017 sample was introduced to correct an error in household breaks.

Errors affecting codes for GEO1_ZA in South Africa 2011 and ENUTS1 in United Kingdom 1991 were corrected.

Harmonized geography variables for Cambodia, Fiji, and Nepal have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year-specific geography variables for these countries. More information about IPUMS geography variables is available here.

An error in PERWT affecting Nepal 2001 was corrected.

Errors affecting a code in GQ for Brazil 2010 and Indonesia 2010 were corrected. Both census samples now identify 1-person units created by splitting a large household.

An error in MARRNUM affecting Indonesia 1976 was corrected. Some codes for GEO1_EG2006 and GEO2_EG2006 were edited.

Harmonized geography variables for Bolivia, Cuba, Guinea, Ireland, Morocco, Palestine, Senegal, South Africa, and Uganda have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year-specific geography variables for these countries. More information about IPUMS geography variables is available here.

An error in INCEARN affecting Brazil 1980 was corrected.

An error in EDATTAIN affecting Ireland 1971 and 1981 was corrected.

A small proportion of person records in Mexico 1960 were re-classified in MIGRATEP based on information about their current and previous residence. These were previously coded to 'different major administrative unit', even though their place of residence suggests that their last move was within the same major administrative unit.

The second-level technician (higher) degrees for Spain 1991, 2001, and 2011 were re-classified into post-secondary technical education in EDATTAIN.

An error affecting codes for SEX for Egypt 1848 and 1868 was corrected. The values for male and female had been reversed.

A problem with HHWT and PERWT for Canada 2011 was corrected. The previous weights were adjusted to properly reflect population totals.

Harmonized geography variables for Cambodia, Lao PDR, Mexico, Peru, Switzerland, Vietnam, Puerto Rico, United Kingdom, and United States have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year-specific geography variables for these countries. More information about IPUMS geography variables is available here.

Harmonized geography variables for Chile and Sierra Leone have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year-specific geography variables for these countries. More information about IPUMS geography variables is available here.

An error affecting codes for COMPUTER for Senegal 2013 was corrected.

An error affecting labels available in IND for Peru 1993 was corrected.

An error affecting codes for persons previously residing abroad for MIG1_5_BO in Bolivia 2001 and 2012 was corrected.

EDUCAR, EDATTAIN, and YRSCHOOL were adjusted in the Argentina samples to incorporate information on completion of education levels in the data harmonization.

HHWT and PERWT were calibrated in Kenya 1979 to properly reflect the population distribution by province.

In GQ (group quarters status), persons residing in hospitals of all types were reclassified to 'institutional group quarters' from 'other group quarters,' making their treatment consistent with GQTYPE.

Errors affecting codes for BPLBJ2 in Benin 1979, 1992, and 2002 were corrected.

Errors affecting codes for GEO2_BR1970 in Brazil 1970 were corrected.

Value	Category
00	Vacant
10	Households
20	Group quarters (collective), n.s.
21	Institutions
22	Other group quarters
29	1-person unit created by splitting large household
99	Unknown/group quarters not identified

description

DEFINITION

GQ identifies households as vacant dwellings, group quarters, or private households. Group quarters -- collective dwellings -- are generally institutions and other group living arrangements such as rooming houses and boarding schools.

Institutions often retain persons under formal supervision or custody, such as correctional institutions, military barracks, asylums, or nursing homes. Educational and religious group dwellings (e.g., boarding schools, convents, monasteries, etc.) are also included in the institutional classification.

Group quarter designations are often useful for understanding the universe of households that answered questions about household characteristics. Censuses will often exclude group quarters from such questions.

Group Quarters Variables -- HOUSEHOLD	IPUMS

HHWT: Household weight**Data file:** DNK1885_PHC-H-H.dat**Overview**

Type: Continuous Decimal: 2 Width: 8 Range: - Format: Numeric

description

DEFINITION

HHWT indicates the number of households in the population represented by the household in the sample.

For the samples that are truly weighted (see the comparability discussion), HHWT must be used to yield accurate household-level statistics.

NOTE: HHWT has 2 implied decimal places. That is, the last two digits of the eight-digit variable are decimal digits, but there is no actual decimal in the data.

concept

CONCEPT

var_concept.title	Vocabulary
Technical Household Variables -- HOUSEHOLD	IPUMS

Imputation and derivation

DERIVATION

HHWT is an 8-digit numeric variable with 2 implied decimal places. See the variable description.

PERSONS: Number of person records in the household**Data file:** DNK1885_PHC-H-H.dat**Overview**

Type: Continuous Decimal: 0 Width: 4 Range: - Format: Numeric

description

DEFINITION

PERSONS indicates how many person records are included in the household (i.e., the number of person records associated with the household record in the sample). These person records will all have the same serial number (SERIAL) as the household record. The information contained in the household record will normally apply to all of these persons.

concept

CONCEPT

var_concept.title	Vocabulary
Technical Household Variables -- HOUSEHOLD	IPUMS

Imputation and derivation

DERIVATION

PERSONS is a 4-digit numeric variable.

RECTYPE: Record type

Data file: DNK1885_PHC-H-H.dat

Overview

Type: Continuous Decimal: 0 Width: 1 Range: - Format: character

Questions and instructions

CATEGORIES

Value	Category
H	Household
P	Person

description

DEFINITION

RECTYPE identifies the type of record for the case: household or person.

NOTE: RECTYPE is an alphabetic (character string) variable with a value of 'H' for household records and 'P' for person records. RECTYPE will not appear as a variable in the default rectangular extracts produced by the data extract system. It is only available in hierarchical extracts, to distinguish between the two record types.

description

DEFINITION

SAMPLE identifies the IPUMS sample from which the case is drawn. Each sample receives a unique 9-digit code. The code is structured as follows:

The first 3 digits are the ISO/UN codes used in COUNTRY

The next 4 digits are the year of the census/survey

The final 2 digits identify the sample within the year. For the last two digits, censuses or large census-like surveys have a value "0" (e.g, 01) in the second-to-last digit, household surveys have a value of "2" (e.g., 21), and employment surveys have a value of "4" (e.g., 41).

Technical Household Variables -- HOUSEHOLD	IPUMS

SERIAL: Household serial number**Data file:** DNK1885_PHC-H-H.dat**Overview**

Type: Continuous Decimal: 0 Width: 12 Range: - Format: Numeric

description

DEFINITION

SERIAL is an identifying number unique to each household in a given sample. All person records are assigned the same serial number as the household record that they follow. (Person records also have their own unique identifiers -- see PERNUM.) The combination of SAMPLE and SERIAL provides a unique identifier for every household in the IPUMS-International database; SAMPLE, SERIAL and PERNUM uniquely identify every person in the database.

SERIAL can be used to identify dwellings in some samples. In these samples, the first 7 digits of SERIAL provide the dwelling number common to all households that were sampled from the same structure. The last three digits give the sequence of the household within the dwelling. The following is a list of samples in which dwellings can be inferred:

Chile 1970, 1992, 2002Colombia 1993, 2005Costa Rica 1984, 2000Cuba 2002Dominican Republic 1981, 2002, 2010Ecuador 1990, 2001Germany 1971Hungary 1980, 1990, 2001Jamaica 1982, 1991, 2001Malaysia 1970, 1991, 2000Mexico 1995, 1990, 2000, 2005Nigeria 2006Panama 2000Peru 1993, 2007Portugal 1981, 1991, 2001Spain 1991Uruguay 2011Venezuela 1990, 2001Vietnam 1989In all other samples, the last 3 digits are always zeroes.

SERIAL was constructed for IPUMS-International, and has no relation to the serial number in the original datasets.

The U.S. 1900 sample and 1880 10% sample have multi-household dwellings that can be identified using the last 3 digits of SERIAL.

Technical Household Variables -- HOUSEHOLD	IPUMS

Imputation and derivation

DERIVATION

SERIAL is a 10-digit numeric variable.

The last 3 digits of SERIAL indicate household number within dwelling for selected samples noted in the variable description. In all other samples, the last 3 digits are always zeroes.

UNREL: Number of unrelated persons**Data file:** DNK1885_PHC-H-H.dat**Overview**

description

DEFINITION

DISTDK reports the district in Denmark where the household was located. Districts are larger than PARISHDK1 and PARISHDK2 (parishes) and smaller than COUNTYDK (counties) in all Denmark samples.

Other geography variables for Denmark include administrative units as ADMINDK, regions identified in variable GEO1_DK1787_1885, counties identified in COUNTYDK, parishes in 1787, 1801, and 1845 as PARISHDK1, and parishes in 1880 and 1885 as PARISHDK2.

DISTDK is not mappable.

DEFINITION

GEO1_DK1787_1885 identifies the household's region for all the samples in Denmark. Regions are the largest geographical unit available from the 1787 to 1885 Denmark datasets.

Other year-specific variables identifying regions include GEO1_DK1787, GEO1_DK1801, GEO1_DK1845, GEO1_DK1880, and GEO1_DK1885.

Other geography variables for Denmark include administrative units as ADMINDK, counties identified in COUNTYDK, districts as DISTDK, parishes in 1787, 1801, and 1845 as PARISHDK1, and parishes in 1880 and 1885 as PARISHDK2.

GEO1_DK1787_1885 is not mappable.

description

DEFINITION

HHTYPE is a constructed variable that describes the composition of households.

HHTYPE is constructed from information in RELATE (relationship to head), from the constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father), and from information on group quarters status, GQ.

2	2 families

3	3 families
4	4 families
5	5 families
6	6 families
7	7 families
8	8 families
9	9 or more families

description

DEFINITION

NFAMS is a constructed variable that indicates the number of families within each household. Family membership is defined by FAMUNIT. A "family" is any group of persons related by blood, adoption, or marriage. An unrelated individual within the household is considered a separate family. Thus, a household consisting of a widow and a domestic employee contains two families; a household consisting of a large, multi-generation extended family with no persons unrelated to the head counts as a single family.

NFAMS is constructed from information in RELATE (relationship to head) and from the constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father). See those variable descriptions for more detail.

description

DEFINITION

PARISHDK2 reports the parish or street in Denmark where the household was located in the 1880 to 1885 samples. Parishes are the lowest levels of geography found in all Denmark samples.

Other geography variables for Denmark include administrative units as ADMINDK, regions identified in variable GEO1_DK1787_1885, counties identified in COUNTYDK, districts as DISTDK, and parishes in 1787, 1801, and 1845 as PARISHDK1.

PARISHDK2 is not mappable.

MOMLOC: Mother's location in household**Data file:** DNK1885_PHC-P-H.dat**Overview**

Type: Continuous Decimal: 0 Width: 3 Range: - Format: Numeric

description

DEFINITION

MOMLOC is a constructed variable that indicates whether or not the person's mother lived in the same household and, if so, gives the person number of the mother (see PERNUM). MOMLOC makes it easy for researchers to link the characteristics of children and their (probable) mothers.

The method by which probable child-mother links are identified is described in PARRULE.

The general design of MOMLOC and other constructed variables follows the methods developed for IPUMS-USA "Family Interrelationships," but the details vary significantly. For more details on the construction of MOMLOC, see the Comparability section of PARRULE and this paper on IPUMSI family linking methodology.

Note: MOMLOC identifies social relationships (such as stepmother and adopted mother) as well as biological relationships. The variable STEPMOM is designed to identify some of these social relationships. To restrict MOMLOC to biological mothers, such as for own children fertility estimation, MOMLOC should be reset to zero when STEPMOM is greater than zero.

concept

CONCEPT

var_concept.title	Vocabulary
Constructed Family Interrelationship Variables -- PERSON	IPUMS

Imputation and derivation

DERIVATION

MOMLOC is a 3-digit numeric variable.

Codes0 = No mother of this person present in the household.

1 or higher = The person number of this person's mother

PARRULE: Rule for linking parent**Data file:** DNK1885_PHC-P-H.dat**Overview**

description

DEFINITION

PARRULE describes the criteria by which the IPUMS International variables MOMLOC and POPLOC linked the person to a probable mother and/or father.

IPUMS International establishes child-parent links according to five basic rules, and PARRULE gives the number of the rule that applied to the link in question. A link to any parent automatically generates a second link to that parent's spouse or partner, so only one rule is needed to describe both MOMLOC and POPLOC.

The design of the interrelationship variables is described in this paper on IPUMSI family linking methodology.

Constructed Family Interrelationship Variables -- PERSON	IPUMS

PERNUM: Person number

Data file: DNK1885_PHC-P-H.dat

Overview

Type: Continuous Decimal: 0 Width: 4 Range: - Format: Numeric

description

DEFINITION

PERNUM numbers all persons within each household consecutively (starting with "1" for the first person record of each household). When combined with SAMPLE and SERIAL, PERNUM uniquely identifies each person in the IPUMS-International database.

concept

CONCEPT

var_concept.title	Vocabulary
Technical Person Variables -- PERSON	IPUMS

Imputation and derivation

DERIVATION

PERNUM is a 4-digit numeric variable.

PERWT: Person weight

Data file: DNK1885_PHC-P-H.dat

Overview

Type: Continuous Decimal: 2 Width: 8 Range: - Format: Numeric

description

DEFINITION

PERWT indicates the number of persons in the actual population represented by the person in the sample.

For the samples that are truly weighted (see the comparability discussion), PERWT must be used to yield accurate statistics for the population.

NOTE: PERWT has 2 implied decimal places. That is, the last two digits of the eight-digit variable are decimal digits, but there is no actual decimal in the data.

concept

CONCEPT

var_concept.title	Vocabulary
Technical Person Variables -- PERSON	IPUMS

Imputation and derivation

DERIVATION

PERWT is an 8-digit numeric variable with 2 implied decimal places. See the variable description.

POLYMAL: Man with more than one wife linked

Data file: DNK1885_PHC-P-H.dat

Overview

Type: Discrete Decimal: 0 Width: 1 Range: - Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
0	No more than one wife linked via SPLOC
1	More than one wife linked via SPLOC

description

DEFINITION

POLYMAL indicates if a man had more than one wife linked to him in the constructed IPUMS variable SPLOC -- Spouse's Location in Household.

The point of POLYMAL is to facilitate using SPLOC in samples that identify polygamy. Some statistical matching procedures expect to find only one matching record for each subject record.

concept

CONCEPT

var_concept.title	Vocabulary
Constructed Family Interrelationship Variables -- PERSON	IPUMS

POPLOC: Father's location in household

Data file: DNK1885_PHC-P-H.dat

Overview

Type: Continuous Decimal: 0 Width: 3 Range: - Format: Numeric

description

DEFINITION

POPLOC is a constructed variable that indicates whether or not the person's father lived in the same household and, if so, gives the person number of the father (see PERNUM). POPLOC makes it easy for researchers to link the characteristics of children and their (probable) fathers.

The method by which probable child-father links are identified is described in PARRULE.

The general design of POPLOC and other constructed variables follows the methods developed for IPUMS-USA "Family Interrelationships," but the details vary significantly. For more details on the construction of POPLOC, see the Comparability section of PARRULE and this paper on IPUMSI family linking methodology.

Note: POPLOC identifies social relationships (such as stepfather and adopted father) as well as biological relationships. The variable STEPPPOP is designed to identify some of these social relationships. To restrict POPLOC to biological mothers, such as for own children fertility estimation, POPLOC should be reset to zero when STEPPPOP is greater than zero.

concept

CONCEPT

var_concept.title	Vocabulary
Constructed Family Interrelationship Variables -- PERSON	IPUMS

Imputation and derivation

DERIVATION

POPLOC is a 3-digit numeric variable.

Codes0 = No father of this person present in the household.
1 or higher = The person number of this person's father

SPLOC: Spouse's location in household

Data file: DNK1885_PHC-P-H.dat

Overview

Type: Continuous Decimal: 0 Width: 3 Range: - Format: Numeric

description

DEFINITION

SPLOC is a constructed variable that indicates whether or not the person's spouse lived in the same household and, if so, gives the person number (PERNUM) of the spouse. SPLOC makes it easy for researchers to link the characteristics of (probable) spouses.

The method by which probable spouse-spouse links are identified is described in SPRULE.

The general design of SPLOC and other constructed variables is modeled on the methods developed for IPUMS-USA "Family Interrelationships", but the details vary significantly. For more details on the construction of SPLOC, see the Comparability section of SPRULE and this paper on IPUMSI family linking methodology.

concept

CONCEPT

var_concept.title	Vocabulary
Constructed Family Interrelationship Variables -- PERSON	IPUMS

Imputation and derivation

DERIVATION

SPLOC is a 3-digit numeric variable.

Codes0 = No spouse of this person present in the household.

1 or higher = The person number of this person's spouse

SPRULE: Rule for linking spouse

Data file: DNK1885_PHC-P-H.dat

Overview

Type: Discrete Decimal: 0 Width: 2 Range: - Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
00	No spouse present
01	Rule 1: strong relationship pairing, couple adjacent
02	Rule 2: strong relationship pairing, couple not adjacent
03	Rule 3: weak relationship pairing, couple adjacent
04	Rule 4: weak relationship pairing, couple not adjacent
05	Rule 5: weak consensual union pairings
06	Rule 6: sample-specific rules (usually child-to-child)

description

DEFINITION

SPRULE explains the criteria by which the IPUMS-International variable SPLOC linked the person to his/her probable spouse.

IPUMS International establishes spouse-spouse links according to five basic rules, and SPRULE gives the number of the rule that applied to the link in question. A sixth rule identifies sample-specific linking procedures only imposed in selected instances.

The design of the interrelationship variables is described in this paper on IPUMSI family linking methodology.

Constructed Family Interrelationship Variables -- PERSON	IPUMS

STEPMOM: Probable stepmother

Data file: DNK1885_PHC-P-H.dat

Overview

Type: Discrete Decimal: 0 Width: 1 Range: - Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
0	Biological mother or no mother present
1	Mother has no children born or surviving
2	Child reports mother is deceased
3	Explicitly identified step relationship
4	Mother reports no children in the home
5	Age difference implausible
6	Child exceeds known fertility of mother

description

DEFINITION

STEPMOM indicates whether a person's mother, as identified by MOMLOC, was most probably not the person's biological mother. Non-zero values of STEPMOM explain why it is probable that the person's mother was a step- or adopted mother. A value of 0 indicates no likely stepmother because (1) the mother identified in MOMLOC was probably the biological mother or (2) there is no mother of this person present in the household.

The codes for STEPMOM are as follows:

- 0 = Biological mother or no mother of this person present in household.
- 1 = Mother has no children born or surviving.
- 2 = Child reports mother is deceased.
- 3 = Explicitly identified relationship (stepchild, adopted child, child of unmarried partner, stepchild/child-in-law).
- 4 = Mother reports no children in the home.
- 5 = Age difference between mother and child was less than 12 or greater than 54 years.
- 6 = Child exceeds known fertility of mother.

In cases where more than one criterion for a likely stepmother is met, STEPMOM will take the value of the criterion with the lowest code. See PARRULE for a description of the linking process.

Users should note that there are many stepmothers and adopted mothers in the population that cannot be identified with information available in the censuses. Therefore, STEPMOM will always under-represent their actual number in the population.

STEPPOP: Probable stepfather

Data file: DNK1885_PHC-P-H.dat

Overview

Type: Discrete Decimal: 0 Width: 1 Range: - Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
0	Biological father or no father present
1	Child reports father is deceased
2	Explicitly identified step relationship
3	Age difference implausible
4	Spouse of mother
5	Identified as adopted
6	Surname difference -- male child or never-married female

description

DEFINITION

STEPPOP indicates whether a person's father, as identified by POPLOC, was most probably not the person's biological father. Non-zero values of STEPPPOP explain why it is probable that the person's father was a step- or adopted father. A value of 0 indicates no likely stepfather because (1) the father identified in POPLOC was probably the biological father or (2) there is no father of this person present in the household.

The codes for STEPPPOP are as follows:

- 0 = Biological father or no father of this person present in household.
- 1 = Child reports father is deceased.
- 2 = Explicitly identified relationship (stepchild, adopted child, child of unmarried partner; stepchild/child-in-law).
- 3 = Age difference between father and child was less than 12 or greater than 54 years.

In cases where more than one criterion for a likely stepfather is met, STEPPPOP will take the value of the criterion with the lowest code. See PARRULE for a description of the linking process.

Users should note that there are many stepfathers and adopted fathers in the population that cannot be identified with information available in the censuses. Therefore, STEPPPOP will always under-represent their actual number in the population.

description

DEFINITION

FAMSIZE counts the number of the person's own family members living in the household with her/him, including the person her/himself. These include all persons related to the person by blood, adoption, or marriage as indicated by the census forms or inferred from them.

FAMSIZE is calculated from the units identified in the IPUMS constructed variable FAMUNIT (family unit membership). The primary family is defined as all persons related to the head in the RELATE variable. Secondary families are individuals or groups of persons linked together by the IPUMS constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father).

Constructed Family Interrelationship Variables -- PERSON	IPUMS

FAMUNIT: Family unit membership**Data file: DNK1885_PHC-P-H.dat****Overview**

Type: Continuous Decimal: 0 Width: 4 Range: - Format: Numeric

description

DEFINITION

FAMUNIT is a constructed variable indicating to which family within the household a person belongs.

All persons related to the household head receive a 1 (see RELATE). Each secondary family or secondary individual receives a higher code. For purposes of FAMUNIT, secondary families are individuals or groups of persons linked together by the IPUMS constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father).

description

DEFINITION

RELATEH is the NAPP version of the RELATE variable, which describes an individual's relationship to the head of household. This variable is largely compatible with the IPUMS-International variable RELATE, though some changes have been made.

The relationship codes are divided into two categories-relatives (codes 1- 10) and non-relatives (codes 11-12). The codes for relatives are self- explanatory. The non-relative codes are divided into three groups: "Partner, friend, visitor", roughly described as persons who do not pay or work for their accommodations (unless they share ownership); "Other non-relatives", including those persons paying or working for accommodations; and "Institutional inmates".

description

DEFINITION

YNGCH gives the age of the person's youngest own child living in the household with her or him. These include all children linked to the person via the constructed IPUMS pointer variables MOMLOC or POPLOC -- mother's and father's location in the household.

YNGCH is top-coded at age 50 or older.

LABFORCE: Labor force participation

Data file: DNK1885_PHC-P-H.dat

Overview

Type: Discrete Decimal: 0 Width: 1 Range: - Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
1	No, not in the labor force
2	Yes, in the labor force
8	Unknown
9	NIU (not in universe)

description

DEFINITION

LABFORCE is a dichotomous variable identifying whether a person participated in the labor force. Labor force participation generally means working or seeking work within a specified reference period.

For most samples LABFORCE is a recode of EMPSTAT (employment status). A consistent lower age universe of 15 or older has been applied to increase comparability across samples. Full detail is retained in EMPSTAT, which should be used for any study of child labor.

MARST: Marital status [general version]**Data file:** DNK1885_PHC-P-H.dat**Overview**

Type: Discrete Decimal: 0 Width: 1 Range: - Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
0	NIU (not in universe)
1	Single/never married
2	Married/in union
3	Separated/divorced/spouse absent
4	Widowed
9	Unknown/missing

description

DEFINITION

MARST describes the person's current marital status according to law or custom. Individuals who remarried should report the status relevant to their most recent marriage. Census instructions rarely explicitly limit marital status to strictly legal unions.

Note regarding universe: The lowest age at which a person can be anything but "never married" varies among samples.

CONCEPT

var_concept.title	Vocabulary
Migration: Global Variables -- PERSON	IPUMS

OCC: Occupation, unrecoded

Data file: DNK1885_PHC-P-H.dat

Overview

Type: Continuous Decimal: 0 Width: 4 Range: - Format: Numeric

description

DEFINITION

OCC records the person's primary occupation, classified according to the system used by the respective national census office at the time. For someone with more than one job, the primary occupation is usually the one in which the person spent the most time or earned the most money, although this may not have been explicit in the instructions for a specific census.

To ensure confidentiality, very small occupations are recoded to a residual category indicating the persons had an occupation, but the job title is not identified. The number of cases recoded should be too small to affect analyses.

concept

CONCEPT

var_concept.title	Vocabulary
Work Variables -- PERSON	IPUMS

Imputation and derivation

DERIVATION

OCC is a 4-digit numeric variable.

Some samples use fewer than 4 digits. In those cases, the data are right-justified, and the extra leading digits are padded with zeroes.

Questions and instructions

CATEGORIES

Value	Category
01100	Chemists
01200	Physicists
01300	Physical scientists nec
01400	Physical science assistants and technicians
02000	Professional engineers, specialisation unknown
02100	Architects
02200	Civil engineers
02300	Electrical engineers
02410	Mechanical engineers, general or nfs
02420	Industrial machinery or tools engineers
02430	Mechanical engineer (motors and engines, except marine)
02440	Marine engineers
02450	Ship construction engineers
02460	Heating, ventilation and refrigeration engineers
02490	Other mechanical engineers
02500	Chemical engineers
02600	Metallurgists and assayers
02700	Mining engineers
02800	Industrial engineers
02900	Professional engineers nec
03010	Surveyors, general and nfs
03020	Land surveyors

03030	Mine surveyors
03040	Hydrographic surveyors
03090	Other surveyors
03100	Draughtsmen
03200	Technician, specialisation unknown
03210	Technicians
03220	Civil engineering technicians
03230	Electrical engineering technicians
03240	Mechanical engineering technicians
03250	Chemical engineering technicals
03260	Metallurgical technicians
03270	Mining technicians
03290	Engineering technicians nec
04200	Ship's deck officer or pilot
04210	Ships officers nfs
04220	Ship's masters and captains (sea)
04230	Ship's masters and captains (sea or inland waterways)
04240	Ship's masters and captains (inland waterways)
04250	Ship's navigating officers and ship's mates
04260	Ship and boat pilots
04270	Marine superintendents (deck)
04290	Other ship deck officers and pilots
04300	Ship's engineers
05100	Biologists, botanists, zoologists and related scientists
05200	Medical scientists
05300	Agronomists and related scientists
05400	Life sciences technicians
06100	Medical doctors and surgeons
06110	Medical doctors and physicians (UK: Medical doctors only)
06130	Surgeons
06140	Specialised physicians
06150	Specialised surgeons
06160	Public health physicians
06170	Oculist
06190	Medical doctors, nec
06200	Dentists
06300	Veterinarians
06400	Pharmacists
06500	Medical and related assistants

07110	Trained nurses
07210	Nurses nfs
07220	Medical nurses, untrained or level of training unknown
07320	Midwives
07330	Monthly nurses
07500	Opticians and optometrists
07600	Healers and therapists nec
07920	Osteopaths
07930	Chiropractors
07940	Sanitarians
07990	Other medical, dental, veterinary and related workers
08000	Mathematicians and actuaries, etc.
09000	Economists
11010	Accountants
11020	Auditors
11090	Accountants nec
12110	Lawyers
12120	Barristers
12130	Solicitors
12200	Judge
12220	Justice of the peace
12300	Notary
12900	Jurists (except lawyer, judge or solicitor)
13100	Teachers in higher education
13200	Teachers not in higher education
13210	Teachers (unspecified)
13220	Teachers (secondary)
13230	Teachers (primary)
13240	Teachers (pre-primary)
13250	Teachers (of the disabled)
13300	School administrators and principals
13920	Governesses
13990	Other teaching personnel
14120	Ministers of religion
14130	Missionaries
14140	Members of religious orders
14190	Other ministers of religion
14900	Workers in religion nec
15100	Authors

15220	Editors
15230	Journalists, reporters and correspondents
15900	Others writers
16110	Artists nfs and art teachers
16120	Sculptors
16130	Artistic painters
16140	Cartoonists
16150	Engravers and etchers (artistic)
16190	Other specified creative artists
16200	Designers
16300	Photographers
16400	Engravers
17120	Musical performers and musicians nfs
17130	Music teachers
17190	Others in music
17200	Dancers and dancing teachers
17300	Actors and related workers
17400	Producers, performing arts
17900	Performing artists nec
18000	Athletes, sportsmen and related workers
19100	Librarians, archivists and curators
19200	Social scientists and historians
19300	Social workers
19500	Interpreters, translators and philologists
19920	Patent agents
19930	Underwriters
19990	Other professional, technical and related workers nec
20100	Legislative officials and heads of government
20200	Government administrators
21110	Proprietors, nfs
21112	Executive officers, nfs (U.S. only)
21120	Manufacturers nfs
21122	Executive officers of manufacturing concerns nfs
21130	Manufacturers or proprietors of specified manufacturing concerns
21132	Executive officers of specified manufacturing concerns
21140	Proprietor, mining, quarrying, oil and natural gas extraction
21141	Oil producer
21142	Executive officers of extractive industry
21150	Proprietor, railway company

21152	Executive officers of railway concerns
21160	Proprietor, other transport and communications
21162	Executive officer of other transport and communications
21170	Proprietor, public utilities (i.e., water, gas, etc.)
21172	Executive officer of public utilities
21180	Proprietor, finance
21182	Executive officer finance company
21190	Other owners of large scale productive enterprises
21192	Executive officers of other large scale productive enterprises
21194	Publisher
21210	Contractors nfs
21220	Construction contractors
21230	Builders
21290	Other specified contractors
21330	Capitalists
21340	Speculators
21390	Investors nec
22110	Superintendents and managers nfs
22120	Superintendents and managers, manufacturing
22130	Superintendents and managers, mining, quarrying, etc.
22140	Superintendents and managers, railways
22150	Superintendents and managers, other transport and communications
22160	Superintendents and managers, public utilities
22170	Superintendents and managers, construction, except railway construction
22180	Superintendents and managers, commerce
22190	Superintendents and managers, nec
23110	Foremen and supervisors nfs
23120	Foremen and supervisors, manufacturing
23130	Foremen and supervisors, mining
23140	Foremen and supervisors, railways
23150	Foremen and supervisors, other transport and communications
23160	Foremen and supervisors, public utilities
23170	Foremen and supervisors, construction, except railway construction
23180	Foremen and supervisors, commerce
23190	Foremen and supervisors, nec
24100	Inspectors of manufactories, companies etc.
31010	Civil servants, title unknown
31020	Tax collectors
31030	Tax assessors

31040	Customs officers
31050	Postmasters or postmistresses
31060	Clerks of court and other court clerks
31090	Government functionaries, nec
32000	Typists, stenographers and secretaries
33120	Bookkeepers and bookkeeping clerks
33130	Cashiers, bank or office
33140	Bank clerks
33142	Bank tellers (US)
33150	Money collector
33160	Cash desk cashier
33170	Toll collectors
33180	Collector (cash or account)
33190	Bookkeeping, account and cash handling workers nec
33210	Railway clerks (UK) and railway agents (CA/US)
33220	Baggage agents and baggage men
33320	Agent, water transport (principally steamship and steamboat)
33330	Agent, land transport (non-rail)
34000	Office machine operators
36010	Conductors, nfs
36020	Railway guards (UK) and railroad conductors (US/CAN)
36030	Sleeping- or pullman-car attendants
36040	Bus, tram or streetcar conductors
36090	Transport conductors, nec
37020	Postal, mail and telegraph clerks
37030	Mail carriers, aka postmen (UK)
37040	Messengers
37050	Mail sorters
37090	Post office, mail, and message workers nec
38010	Tel. operator
38020	Telephone operator
38030	Telegraph operator
38090	Other telephone/telegraph operators
39000	Clerk, nfs
39100	Stock, weight and shipping clerks
39130	Stock records clerk
39310	Office clerks, specialisation unknown
39320	Correspondence clerks
39340	Legal clerks

39350	Insurance clerks
39390	Other correspondence and reporting clerks
39400	Hotel clerk or other receptionist
39500	Library and filing clerks
39600	Railroad, railway clerk
39720	Timekeepers, railway
39730	Timekeepers, factory
39790	Timekeepers, undefined and nec
39900	Other specified clerks
39990	Proofreader
40000	Sales workers, nfs
41000	Working proprietors, nfs
41010	Dealer, merchant etc. (wholesale and retail trade)
41015	Merchants, specified large-scale wholesaling
41020	Hirers out
42000	Buyers
42200	Buyers nec
43010	Agents nfs
43020	Commercial travellers
43030	Manufacturers and sales agents
43090	Other specialized agents
44110	Insurance, real state or securities salesmen, nfs
44120	Insurance salesmen and agents
44130	Real estate agents
44140	Brokers
44150	Stockbrokers
44160	Patent Agents
44190	Insurance, real estate and securities salesmen nec
44200	Advertising salesmen
44320	Auctioneers
44330	Appraisers
45120	Salespeople, wholesale or retail trade
45130	Clerks in shops and stores
45140	Fashion models
45190	Other sales personnel men, shop assistants and demonstrators
45220	Street sellers, pedlars and hawkers, non-food items
45230	Street sellers, pedlars and hawkers, food items
45240	Newsvendors
45250	Canvassers

45290	Other street traders for coffee and food
49020	Pawnbrokers
49030	Scrap and junk dealers, scavengers
49040	Street vendors, canvassers and news vendors, newsvendors
49090	Dealers and salesworkers nec
51020	Hotel keepers and managers
51030	Restaurant keepers and managers
51040	Boarding and lodging house keepers and managers
51050	Pub, saloon, tavern and coffee house keepers
51060	Ship's pursers
51090	Other hospitality and entertainment keepers and managers
52020	Housekeeper
52030	Stewards
52040	Matrons
52050	Butlers
52090	Other housekeeping service supervisors
53100	Cooks
53101	Cook (domestic) UK only
53102	Cook (not domestic)
53103	Ship's cooks
53220	Waiter or waitress
53230	Bartender
53290	Other food and drink service workers
54010	Servants nfs
54020	House servants nfs and maids
54030	Personal servants and valets
54040	Nursemaids
54050	Companions
54060	Chambermaids and room attendants
54090	Other specified servants
55100	Caretakers and janitors
55200	Charworkers
55230	Window cleaners
55240	Chimney sweeps
55250	Refuse collectors and removers
55290	Other charworkers, cleaners and related workers
56000	Washing and laundry services
57020	Hairdressers
57030	Barbers

57040	Bath attendants
57090	Other barbers, hairdressers and related workers
58100	Firefighters
58210	Policemen and detectives, employer unknown
58220	Policemen and detectives, public service
58230	Policemen and detectives, private service
58240	Sheriffs and their deputies
58290	Other law enforcement officers
58300	Watchmen and guards
58410	Military, rank unknown
58420	Military officers
58430	Other members of the armed forces
58500	Prison keepers and guards
58900	Other protective service workers
59100	Guides
59200	Undertakers and embalmers
59300	Prostitutes
59920	Bookmakers (sport)
59930	Croupiers
59940	Nursing aids and attendents
59950	Errand boys and errand girls
59960	Practical aid (veterinary)
59990	Other service workers nec
61110	General farmers and farmers nfs
61115	Husbandmen or cottars
61117	Female farmer
61120	Major landowner
61220	Field crop farmers
61230	Orchardists and fruit farmers
61240	Market gardeners
61250	Nurserymen and florists
61260	Livestock farmers
61270	Dairy farmers
61280	Poultry farmers
61290	Other specialised farmers
61320	Farmer and fisherman
61330	Cottar and fisherman
61400	Farm managers, foremen and supervisors nfs
62110	Farm workers, specialisation unknown

62113	Farmer's sons and other male relatives
62200	Farm workers (field crop and vegetables)
62300	Farm labourers, orchard and fruit farm workers
62410	Livestock workers, general or nfs
62420	Cattle workers, except specified dairy
62430	Sheep workers
62440	Pig workers
62450	Fur-bearing animal workers
62460	Horse workers
62461	Grooms and horse keepers (domestic)
62463	Grooms and horse keepers (not domestic)
62470	Horse breaker
62490	Livestock workers, nec
62500	Farm workers (dairy)
62600	Farm workers (poultry)
62710	Gardeners nfs
62711	Gardener (domestic)
62713	Gardener (not domestic)
62720	Market garden labourers
62730	Nursery labourers
62740	Landscape gardeners
62790	Other nursery workers and gardeners
62800	Farm machinery operators
62920	Other animal workers e.g., dogs, elephants
62930	Other plant workers e.g., gathers of herbs etc.
62940	Groundskeepers, etc.
62990	Others in agricultural or husbandry
63110	Woodsmen and workers in the woods, nfs
63120	Lumbermen, loggers and kindred workers
63130	River drivers
63140	Wood cutters and choppers
63190	Others in logging and wood cutting
63220	Foresters and wood wardens
63230	Forestry workers
63240	Timber cruisers
63250	Forest fire-fighters
63290	Other forestry workers
64100	Fishermen
64920	Fish farm workers

64930	Oyster farm workers
64940	Whale hunters
64950	Whale or seal hunters
64960	Seal hunters
64970	Trappers or hunters
64990	Other fishermen, hunters and related workers
71120	Miners
71130	Quarrymen
71190	Others working in mines and quarries
71200	Mineral or stone treaters
71300	Well drillers, borers and related workers
72000	Metal workers, specialisation unknown
72100	Metal smelter and furnacemen
72200	Metal rollers
72300	Metal melters and reheaters, and workers in metal melting mills
72400	Metal casters and workers in metal casting plants
72500	Metal moulders and coremakers
72600	Metal annealers, temperers and hardeners
72700	Metal drawers and workers in metal drawing
72800	Metal platers and coaters
72900	Other (specialised) metal workers
73100	Wood treaters
73200	Sawyers and other titled wood/sawmill operatives
73300	Papermill machine operators and paper makers
74000	Chemical workers, product nfs
74100	Drug workers
74200	Gunpowder and explosive makers
74320	Charcoal burners
74330	Coal gas makers
74340	Tar makers
74390	Other coal product makers e.g., coke
74420	Salt makers
74430	Alkali and soda makers
74500	Oil mill workers
74620	Paint and varnish makers
74630	Dye makers
74640	Ink, blacking, colouring, etc., makers
74720	Tallow chandlers, candle makers and grease makers
74730	Soap and perfume makers

74740	Glue, size and gelatine makers
74750	Wax and polish makers
74920	Fertilizer and manure makers
74930	Starch makers
74940	Turpentine makers
74990	Specified chemical workers nec
75000	Textile workers, specialisation unknown
75100	Fibre preparers
75200	Spinners, doublers, twisters and winders
75300	Weaving and knitting-machine setters and pattern-card preparers
75400	Weavers
75500	Knitters
75600	Bleachers, dyer or textile product finisher
75700	Rope makers
75920	Net maker
75990	Other specialised textile workers nec
76110	Tanners or fellmongers, specialisation unknown
76120	Fellmongers
76130	Tanners
76140	Leather curriers and finishers
76190	Other specified leather curers
76200	Fur and pelt dressers
77100	Millers and related workers
77200	Sugar refiners
77310	Butchers
77320	Pork butchers
77340	Slaughterer, meat cutters or meat packer
77350	Sausage makers
77360	Fish butchers
77380	Meat cannery workers and other meat preservers (not sausages)
77390	Other workers in meat preparation
77400	Cannery workers and other food preservers
77500	Butter, cheese and dairy product makers
77610	Baker and confectioner
77620	Bakers
77630	Confectioners and pastry makers
77640	Candy makers
77650	Chocolate makers
77690	Other baked goods makers

77700	Tea, coffee and cocoa preparers
77820	Brewers
77830	Maltsters
77840	Wine workers
77850	Vinegar makers and workers
77860	Distillers
77870	Makers of soft drinks
77880	Bottlers
77890	Other drinks makers and workers
77990	Other food and beverage processors
78100	Tobacco preparers and tobacco factory workers
78200	Cigar makers
78300	Cigarette makers
78400	Other tobacco product makers
79120	Tailors and tailoresses
79130	Dressmakers
79190	Other garment makers
79200	Furriers and fur workers
79320	Milliners
79330	Hat makers
79340	Straw hat makers
79390	Other hat makers
79400	Glove makers and related workers
79520	Seamstresses
79530	Sewers and sewing machine operators
79540	Embroiderers
79590	Others hand sewers
79620	Upholsterers (except vehicle)
79630	Vehicle trimmers and upholsterers
79640	Mattress makers
79690	Others working in upholstery jobs
79920	Sail, tent and awning makers
79930	Umbrella makers
79940	Artificial flower makers
79990	Other cloth and related product manufacturing workers
80100	Boot and shoe makers and repairers
80200	Specialised occupations in the boot and shoe making industry
80320	Saddlers and harness makers
80330	Trunk or bag maker

80390	Other leather goods makers
81120	Cabinet makers
81130	Chair makers
81140	Wicker furniture makers
81190	Other furniture makers
81210	Woodworkers
81220	Sawyers, woodworking
81230	Wood turners and handle makers
81240	Wood planers
81250	Wood carvers
81290	Other woodworking machine operators
81300	Coach, carriage and wagon makers
81400	Wheelwrights and cartwrights
81500	Coopers, hoop makers and benders
81600	Clog makers
81710	Box makers nfs
81720	Wooden box makers
81730	Paper box makers
81790	Box makers nec
81920	Wooden tool makers
81930	Ski makers
81990	Other makers of wooden products
82000	Stone carvers or cutters and stone yard workers
83120	Blacksmiths
83130	Hammersmiths
83140	Forgemen
83150	Farriers or horseshoers
83160	Specialised makers of forged metal products
83190	Other blacksmiths, hammermen and forging-press operators
83210	Tool makers nfs
83220	Tool and die makers
83230	Pattern makers nfs and nec
83290	Other tool makers and metal markers
83310	Metalworking machine operators
83320	Metal turners
83390	Other metal working machine operators
83400	Machinists
83520	Metal polishers and finishers
83530	Metal grinders and sharpeners

83540	Cutlers and cutting instrument makers
83550	Cutler (knives, forks, spoon)
83590	Other metal grinders, polishers and tool sharpeners nec
83600	Gunsmiths
83700	Locksmiths
83820	Saw makers
83830	Saw, spade, shovel and half wood/half metal agricultural instrument type things
83840	Chain makers
83850	Nailer and nail makers
83860	Wire makers
83890	Other metal workers nec
84110	Mechanics
84120	Millwrights
84130	Machine makers, builders and fitters
84140	Engine and locomotive builders
84150	Sewing machine makers and builders
84190	Other machinery fitters and machine assemblers

99999	No occupation/unknown

description

DEFINITION

OCCHISCO is a uniformly coded classification of occupations that is consistent across all countries. It is the most complicated variable to code consistently in the pre-1950 samples, and the present documentation does not fully cover the issues addressed. We will be progressively adding to the level of detail available on this variable. For example, we will occasionally provide examples of common responses below each code so that users will be able to see what responses were coded where. Users with queries about the coding of specific occupations should contact the IPUMS staff in the first instance. Users interested in variation in occupational responses below the level of detail provided in the codes (e.g., distinguishing "caretakers" from "janitors") should look at the OCCSTRNG variable.

The codes for OCC were adapted from the Historical International Standard Classification of Occupations (HISCO) coding

scheme. More information on HISCO is available in M.H.D. van Leeuwen, I. Maas and A. Miles. (2002) HISCO: Historical International Standard Classification of Occupations. Leuven: Leuven University Press. HISCO in turn is based on the International Standard Classification of Occupations from 1968, commonly known as ISCO-68. Information on HISCO can also be located at the HISCO database of occupational titles, and the International Institute of Social History.

More information on the adaptations IPUMS made to HISCO can be found in the article "Occupational Classification in the North Atlantic Population Project" (2003), *Historical Methods*, Vol. 36, No. 2 (Part 2), pp.89-96.

Structure of the classification scheme

The classification scheme is hierarchical, in the sense that each digit in the 5 digit codes introduces a new level of detail. Codes sharing the same first 1, 2 or 3 digits are considered to be increasingly similar. For example, all people working in agriculture have the first digit 6. The first digit of a code indicates the "Major group" a person's occupation is in.

The second digit indicates a "Minor group" distinction. Continuing the previous example, people who have the first two digits "61" are farmers - who may specify what they are cultivating or tending - and farm managers. Thus, as well as sharing the characteristic of working in agriculture (6) they also share the characteristic of being owners or managers (61).

The first 3 digits denote the "Unit group" of an occupation. At the third digit level, we introduce more detail. For example, the unit group "612" indicates "Specialized farmers". Within this unit group, 4th and 5th digit distinctions known as "titles" or "headings" are made. For example, "61220" indicates "Field crop farmers," and "61230" indicates "Orchardists and fruit farmers."

Understanding headings

In general, if the last two digits of a code are "00" the heading is reserved for general titles. For example, in unit group "721" for "Metal smelter and furnace workers", the heading "72100" is reserved for responses such as "Metal smelter" and "Furnace men."

If the last two digits of a code are "10" the heading is reserved for "not further specified" titles (often abbreviated "n.f.s." or "nfs" in syntax files), and codes ending in "20", "30" and higher multiples of 10 are reserved for responses with more detail on some aspect of the occupation. For example, "58210" is the code for "Policemen and detectives, employer unknown," whereas "58220" and "58230" are the codes for "Policemen and detectives, public service," and "Policemen and detectives, private service" respectively.

Headings ending in digits other than "0" (e.g., 2, 3, 4, 9) are generally reserved for frequent responses specific to a particular country that probably belong with responses sharing the same first four digits of the heading. For example, "61115" ("Husbandman or cottar") in Norway and Sweden and "61117" ("Female farmer") in Canada could be classified with "Other general farmers" ("61110"), but occurred frequently enough that we felt they should be given a separate code for easier identification.

If the last two digits of a code are "90", the heading is reserved for "not elsewhere classified" responses. For example, "58290" is the code for "Other law enforcement officers".

The difference between "n.f.s." and "n.e.c." responses is that "n.f.s." responses are quite general, and may not offer much detail on the tasks and duties of the job. Conversely, "n.e.c." responses are typically quite detailed in the information provided, but there are not enough similar responses to justify a separate heading.

Alterations to HISCO

Compared to HISCO we have reduced the overall number of headings, while still introducing new ones, and retaining more detail from vaguely specified occupations.

In general, we made the fewest changes to the structure of the HISCO codes in major groups 0 and 1 (professional workers). We re-organized the codes within major groups 2 (administrative and managerial workers), 3 (clerical workers), 4 (sales workers), 5 (service workers), and 6 (workers in agriculture). We made the most substantial revisions in moving people between major groups in the manufacturing and transport major groups (7, 8, and 9).

In particular, we created codes for vague responses of the form "Works in [specified type of] factory," such as "Works in cotton mill." We grouped these workers with "Laborers" and titled, skilled workers in the same general industry.

We eliminated codes where HISCO made distinctions that were not consistently made in nineteenth century census data. For example, HISCO distinguished between hand and machine spinners. We found that most spinners did not specify whether they were spinning by hand or machine, more often giving information on what they were spinning (e.g., cotton, wool, silk), or a firm's name.

We introduced codes to handle vague occupations, as discussed above. We also created codes to retain linguistic and nominal distinctions above a rough frequency level. These distinctions are generally made in the fourth and fifth digit of the codes. For example, we distinguish between "Farm workers, specialisation unknown" (62110) and "Farmer's sons and other male relatives" (62113), because "farmer's son" was a numerically significant response in Canada. Both are considered part of the "Farm labourers and helpers, general farming and n.f.s" unit group (621).

Other variables

Responses to the occupational questions also returned information that cannot be classified within an occupational classification scheme, such as relationship to workers, or indications of status. Please see the documentation for the variables OCRELATE and OCSTATUS.

Information on the products sold by retail workers (Major Group 4) is available in the variable PRODUCT.

Occupations were also coded into domestic occupational classification schemes in Great Britain, Norway, and the United States. See the documentation for the following variables for more information.
