

National Census of Population and Housing 1988 - IPUMS Subset

Central Statistical Office, IPUMS

report_generated_on: September 3, 2025

visit_data_catalog_at: <http://catalog.ihsn.org/>

Identification

SURVEY ID NUMBER

POL_1988_PHC_v01_M_v7.5_A_IPUMS

TITLE

National Census of Population and Housing 1988 - IPUMS Subset

ABBREVIATION OR ACRONYM

PHC Poland 1988 (IPUMS Harmonized Subset)

COUNTRY

Name	Country code
Poland	POL

STUDY TYPE

Population and Housing Census [hh/popcen] IPUMS International

SERIES INFORMATION

DOI:10.18128/D020.V7.5

KIND OF DATA

Population and Housing Census [hh/popcen]

UNIT OF ANALYSIS

Persons, households, and dwellings

UNITS IDENTIFIED:

- Dwellings: yes
- Vacant Units: no
- Households: yes
- Individuals: yes
- Group quarters: yes

UNIT DESCRIPTIONS:

- Dwellings: A dwelling is a separate set of rooms or one room with separate supportive space bordered with solid walls, regardless whether it is inhabited according to one or more ownership titles. Every dwelling should possess a separate entrance.
- Households: A household is a number of related and nonrelated individuals who have been living or staying together in one dwelling and support each other financially.
- Group quarters: Collective housing a a hotel-like object renting a space in relation to performed work, studies, recovering, social help and monasteries.

Version

VERSION DESCRIPTION

Version 7.5. The datasets contain selected variables from the original census microdata plus harmonized variables from the IPUMS-International database.

VERSION DATE

2024-10-05

Scope

NOTES

Additional notes on a sample that is part of this study: Poland 1988

Coverage

GEOGRAPHIC UNIT

Voivodeship

UNIVERSE

All individuals who were registered in a dwelling at the census moment regardless of if they were inhabiting the dwelling at that moment.

Producers and sponsors

PRIMARY INVESTIGATORS

Name	Affiliation
Central Statistical Office	
IPUMS	University of Minnesota

Sampling

SAMPLING PROCEDURE

MICRODATA SOURCE: Central Statistical Office

SAMPLE SIZE (person records): 3894527.

SAMPLE DESIGN: Systematic; every tenth private household after a random start. Additionally every 10th individual in collective housing in the household.

WEIGHTING

Self-weighting (expansion factor=10)

Data collection

DATES OF DATA COLLECTION

Start	End
1988-12-07	1988-12-12

TIME PERIODS

Start date	End date
1988-12-06	1988-12-07

DATA COLLECTION MODE

Face-to-face [f2f]

DATA COLLECTION NOTES

de jure, CENSUS DAY: December 6/7 1988

questionnaires

QUESTIONNAIRES

A form: on population and housing. C-obw form: summary for registered districts. With additional forms for women fertility, dwelling characteristics, or businesses.

Access policy

CONTACTS

Name
Central Statistical Office

CONFIDENTIALITY

IPUMS International distributes integrated microdata of individuals and households only by agreement of collaborating national statistical offices and under the strictest of confidence. Before data may be distributed to an individual researcher, an electronic license agreement must be signed and approved. To gain access to the data, a researcher must agree to the following: (1) Implement security measures to prevent unauthorized access to census microdata. Under IPUMS International agreements with collaborating agencies, redistribution of the data to third parties is prohibited. (2) Use the microdata for the exclusive purposes of scholarly research and education. Researchers must explicitly agree to not use microdata acquired for any commercial or income-generating venture. (3) Maintain the confidentiality of persons, households, and other entities. Any attempt to ascertain the identity of persons or households from the microdata is prohibited. Alleging that a person or household has been identified is also prohibited. (4) Report all publications based on these data to IPUMS International, which will in turn pass the information on to the relevant national statistical agencies. Once a project is approved, a

password is issued and data may be acquired through the Internet. Penalties for violating the license include: revocation of the license, recall of all microdata acquired, filing of a motion of censure to the appropriate professional organizations, and civil prosecution under the relevant national or international statutes. These safeguards mirror the principles from the Joint ECE/Eurostat Work Session on Statistical Data Confidentiality. Employees of the Minnesota Population Center who work with the census microdata to produce the harmonized database also sign agreements to respect the confidentiality of the data. IPUMS International works with each country's statistical office to minimize the risk of disclosure of respondent information. The details of the confidentiality protections vary across countries, but in all cases, names and detailed geographic information are suppressed and top-codes are imposed on variables such as income that might identify specific persons. In addition, IPUMS International uses a variety of technical procedures to enhance confidentiality protection. These include the following: (1) Swapping an undisclosed fraction of records from one administrative district to another to make positive identification of individuals impossible. (2) Randomizing the placement of households within districts to disguise the order in which individuals were enumerated or the data processed. (3) Aggregating codes of sensitive characteristics (e.g., grouping together very small ethnic categories) (4) Top- and bottom-coding continuous variables to prevent identification of extreme cases. The safety record for public-use census microdata is apparently perfect. In almost four decades of use, there has not been a single verified breach of statistical confidentiality. The measures implemented by the IPUMS International are designed to extend this record.

ACCESS CONDITIONS

An adapted version of the dataset, harmonized for international comparability, is available from IPUMS International (<https://international.ipums.org/international/>) under the following conditions:

IPUMS International distributes integrated microdata of individuals and households only by agreement of collaborating national statistical offices and under the strictest of confidence. Before data may be distributed to an individual researcher, an electronic license agreement must be signed and approved. To gain access to the data, a researcher must agree to the following:

- (1) Implement security measures to prevent unauthorized access to census microdata. Under IPUMS International agreements with collaborating agencies, redistribution of the data to third parties is prohibited.
- (2) Use the microdata for the exclusive purposes of scholarly research and education. Researchers must explicitly agree to not use microdata acquired for any commercial or income-generating venture.
- (3) Maintain the confidentiality of persons, households, and other entities. Any attempt to ascertain the identity of persons or households from the microdata is prohibited. Alleging that a person or household has been identified is also prohibited.
- (4) Report all publications based on these data to IPUMS International, which will in turn pass the information on to the relevant national statistical agencies.

Once a project is approved, a password is issued and data may be acquired through the Internet. Penalties for violating the license include: revocation of the license, recall of all microdata acquired, filing of a motion of censure to the appropriate professional organizations, and civil prosecution under the relevant national or international statutes.

These safeguards mirror the principles from the Joint ECE/Eurostat Work Session on Statistical Data Confidentiality. Employees of the Minnesota Population Center who work with the census microdata to produce the harmonized database also sign agreements to respect the confidentiality of the data.

DDI DOCUMENT VERSION

Version 7.5 October 2024. NEW FEATURES.

--Historical data from NAPP project now available from IPUMS-International.

--Historical census data from Canada, Denmark, the United Kingdom, Germany, Iceland, Norway, Sweden, and the United States for the period 1703 to 1911 are now available from IPUMS-International. The complete count and sample datasets were previously disseminated by the North Atlantic Population Project (NAPP). Where possible, the data have been integrated into existing IPUMS-International variable coding schema. Some new variables have been created that are available only for these pre-1960 datasets. NAPP data users should note that many NAPP variables are available from IPUMS-International by different names. For a complete list of NAPP variables that have been renamed in IPUMS-International, refer to the crosswalk.

--Individual country shapefiles for the third-level administrative level of geography are now available for a few IPUMS samples.

--New spatially harmonized previous-residence variables at the second administrative level of geography are available for several samples in this data release. More information is available [here](#). Users should note that many older migration variables are available by different names. Refer to this table for a crosswalk of old and corresponding new migration variables.

--IPUMS now hosts the Census Mosaic data collection. Census Mosaic identifies, gathers, harmonizes, and distributes surviving historical census microdata from regions of Continental Europe where complete centralized records are not available. The Mosaic project was founded by a consortium of historical social scientists in Europe. Data can be downloaded as static files from the [Census Mosaic website](#). Although the data are not yet integrated fully into IPUMS International, variables have been standardized and harmonized to be roughly compatible with IPUMS coding structures.

NEW SAMPLES.

--Full-count datasets for Great Britain 1851, 1861, 1871 (Scotland only), 1891, and 1901.

--Full-count dataset for Sweden 1910. Denmark (1845, 1880, and 1885)

--Labor force surveys from Spain and eight new labor force surveys from Italy added to the series.

Newly added countries:

Benin, Cote d'Ivoire, Finland, Guatemala, Honduras, Laos, Lesotho, Mauritius, Myanmar, Papua New Guinea, Russia, Slovak Republic, Suriname, Togo, and Zimbabwe

New samples for:

Bolivia, Cambodia, Cambodia, Chile, Cuba, Cote d'Ivoire, Egypt (1848 and 1868, historical samples), Fiji, Guinea, Ireland, Israel, Italy, Lao PDR, Mexico, Morocco, Nepal, Netherlands, Palestine, Peru, Philippines, Puerto Rico, Rwanda, Senegal, Sierra Leone, South Africa, Switzerland, Uganda, United States, United Kingdom, United States, Vietnam, and Zimbabwe

SUPPLEMENTAL DATA.

Data from censuses from Benin and Lesotho that record individual fertility and/or mortality events were made available in IPUMS-International. These files can be downloaded and linked to data produced by the extract system.

NEW VARIABLES.

--IPUMS-International now provides harmonized and year-specific geography variables for all countries including 13 new samples from Dominican Republic, Germany, Indonesia, Israel, Malaysia, Mongolia, Nicaragua, Nigeria, Palestine, Paraguay, Thailand, United Kingdom, and Uruguay. First-level and second-level year specific geography variables are also available for all countries. IPUMS provides corresponding, downloadable GIS boundary files for all harmonized and year specific geography variables. More information about IPUMS geography variables is available [here](#).

--IPUMS International now provides spatially harmonized previous-residence variables at the first administrative level of geography. The codes for the spatially harmonized previous-residence variables match the spatially harmonized place of current residence. More information is available [here](#).

--IPUMS International provides spatially harmonized previous-residence variables at the first administrative level of geography for all samples; previously available country-specific migration variables at the first administrative level that were not fully harmonized spatially have been phased out. Spatially harmonized previous-residence variables at the second administrative level of geography are available for selected samples. More information is available [here](#). Users should note that many older migration variables are available by different names. Refer to this table for a crosswalk of old and corresponding new migration variables.

--IPUMS International now provides spatially harmonized previous-residence variables at the first administrative level of geography for all samples. Spatially harmonized previous-residence variables at the second administrative level of geography are available for several samples in this data release. More information is available [here](#). Users should note that many older migration variables are available by different names. Refer to this table for a crosswalk of old and corresponding new migration variables.

--Lower (third) level geography codes and GIS files have been added for Bangladesh, China, Ethiopia, Mali, Rwanda, and Zimbabwe. Some geography codes and labels might have changed for these countries to accommodate the newer lower level geography.

--Added more detailed 3-digit industry and occupation variables for China 2000.

EDITED SAMPLES.

--Revised full-count data for Great Britain 1881

--Revised full-count datasets for Sweden 1890 and 1900. The revision includes the following changes that improve comparability across Sweden datasets:

--Revisions to certain ethnicity and work variables (and the underlying source data): ORIGIN, LABFORCE, OCCHISCO, OCRELATE, OCSTATUS.

--Revisions to unharmonized source variables: SE1890A_HISCOSE, SE1890A_HISCRELSE, SE1890A_HISCSTATSE, SE1890A_OCCMULTISE, SE1900A_HISCOSE, SE1900A_HISCRELSE, SE1900A_HISCSTATSE, SE1900A_OCCMULTISE.

--A new United States 1850 full-count dataset now matches the corresponding dataset distributed by the USA IPUMS data project. The source variable US1850A_0502 (HISTID) provides a linking key to match person records to the USA version of the data. The IPUMS International version of the data contains names, which the USA version cannot distribute.

EDITED VARIABLES.

An error affecting HHWT for South Africa 2007 was corrected. The existing values were adjusted by a factor of 0.01.

AGEMARR was edited to add data for Hungary 1980 and 1990.

Harmonized and year-specific geography variables for Brazil and Colombia have been edited to accommodate for the availability of refined municipal boundaries. Users should be aware that codes and labels have changed in all harmonized and year specific geography variables for these two countries.

Errors affecting BPLSE2 (formerly BLPARSE) for Sweden 1890 and the underlying source variable were corrected. Several thousand cases were incorrectly coded as 258101000. These cases have been updated with the correct code: 258171000.

Harmonized geography variables for Italy, Philippines, Rwanda, and United States have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

The codes for the source variable RW2002A_0419 were corrected to include 0 and 8 as possible responses, which were previously identified as 'unknown years' within primary education.

Errors affecting EDUCFJ for Fiji 2006 were corrected.

A problem with PERWT for Tanzania 2012 was corrected. The previous weights were adjusted to properly reflect population totals.

MOMLOC, POPLOC, and PARRULE were updated for the United States 2010 and 2015 samples to include additional information on subfamilies. Prior to this correction, persons above age 17 were not receiving links to their co-resident mothers and fathers.

An error affecting codes for the URBAN variable in Egypt 1986 for Cairo, Alexandria, Port-Said, and Suez was corrected.

An error in INCEARN affecting Venezuela 2001 was corrected. Earned income in the source variable VE2001A_0440 is interpreted as a monthly amount, thus adjustments previously applied to convert data from daily or weekly income were suppressed.

All the six Brazil samples in IPUMS International were replaced with higher density samples.

An edited version of the Chile 2017 sample was introduced to correct an error in household breaks.

Errors affecting codes for GEO1_ZA in South Africa 2011 and ENUTS1 in United Kingdom 1991 were corrected.

Harmonized geography variables for Cambodia, Fiji, and Nepal have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year-specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

An error in PERWT affecting Nepal 2001 was corrected.

Errors affecting a code in GQ for Brazil 2010 and Indonesia 2010 were corrected. Both census samples now identify 1-person units created by splitting a large household.

An error in MARRNUM affecting Indonesia 1976 was corrected. Some codes for GEO1_EG2006 and GEO2_EG2006 were edited.

Harmonized geography variables for Bolivia, Cuba, Guinea, Ireland, Morocco, Palestine, Senegal, South Africa, and Uganda have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year-specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

An error in INCEARN affecting Brazil 1980 was corrected.

An error in EDATTAIN affecting Ireland 1971 and 1981 was corrected.

A small proportion of person records in Mexico 1960 were re-classified in MIGRATEP based on information about their current and previous residence. These were previously coded to 'different major administrative unit', even though their place of residence suggests that their last move was within the same major administrative unit.

The second-level technician (higher) degrees for Spain 1991, 2001, and 2011 were re-classified into post-secondary technical education in EDATTAIN.

An error affecting codes for SEX for Egypt 1848 and 1868 was corrected. The values for male and female had been reversed.

A problem with HHWT and PERWT for Canada 2011 was corrected. The previous weights were adjusted to properly reflect population totals.

Harmonized geography variables for Cambodia, Lao PDR, Mexico, Peru, Switzerland, Vietnam, Puerto Rico, United Kingdom, and United States have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year-specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

Harmonized geography variables for Chile and Sierra Leone have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year-specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

An error affecting codes for COMPUTER for Senegal 2013 was corrected.

An error affecting labels available in IND for Peru 1993 was corrected.

An error affecting codes for persons previously residing abroad for MIG1_5_BO in Bolivia 2001 and 2012 was corrected.

EDUCAR, EDATTAIN, and YRSCHOOL were adjusted in the Argentina samples to incorporate information on completion of education levels in the data harmonization.

HHWT and PERWT were calibrated in Kenya 1979 to properly reflect the population distribution by province.

In GQ (group quarters status), persons residing in hospitals of all types were reclassified to 'institutional group quarters' from 'other group quarters,' making their treatment consistent with GQTYPE.

Errors affecting codes for BPLBJ2 in Benin 1979, 1992, and 2002 were corrected.

Errors affecting codes for GEO2_BR1970 in Brazil 1970 were corrected.

ID	Name	Label	Question
PL1988A_HHN	PL1988A_HHN	Number of households in dwelling	
PL1988A_PERND	PL1988A_PERND	Number of persons in dwelling	
PL1988A_PERN	PL1988A_PERN	Number of persons in household	
PL1988A_GQ	PL1988A_GQ	Type of living arrangement	Question 1. Type of housing ☐ 1 Dwelling ☐ 2 Provisional housing or mobile housing (specify the kind) ☐ Other: Collective housing (specify the name) ____
PL1988A_ADMSIZE	PL1988A_ADMSIZE	Size and kind of the administrative unit (1988)	
PL1988A_LOCTYP	PL1988A_LOCTYP	Kind of locality (in 1988)	
PL1988A_OWNBLED	PL1988A_OWNBLED	Building ownership	Characteristics of a building Fill for the building in which at least one dwelling was enumerated. Answers for questions 1-10 write in only once -- in a first enumerated dwelling. In the forms filled for other dwellings this part should be crossed. 2. The building is owned by: ☐ 1 State ☐ 2 Housing cooperative ☐ 3 Other socialized institution (such as working establishment, socio-political organization etc.) ☐ 4 Is privately owned but at least one flat in a building is allocated by decision of the local authority ☐ 5 Is privately owned and there are no flats in a building being allocated by decision of the local authority ☐ 6 Church
PL1988A_BLDTYPE	PL1988A_BLDTYPE	Building type	Characteristics of households Fill for the building in which at least one dwelling was enumerated. Answers for questions 1-10 write in only once -- in a first enumerated dwelling. In the forms filled for other dwellings this part should be crossed. 3. Kind of building: ☐ 1 Residential ☐ 2 Partly residential; residential -- inventoried (being a part of a agricultural farm) ☐ 3 Collective housing (more than half of the building is occupied by hospital, hotel or boarding school) ☐ 4 Non residential (but more than half of the building is occupied by office, shop or school)

ID	Name	Label	Question
PL1988A_BLYEAR	PL1988A_BLYEAR	Year of construction	Characteristics of households Fill for the building in which at least one dwelling was enumerated. Answers for questions 1-10 write in only once -- in a first enumerated dwelling. In the forms filled for other dwellings this part should be crossed. 6. When was the building built: ☐ 01 Before 1918 ☐ 02 1918 - 1944 ☐ 03 1945 - 1960 ☐ 04 1961 - 1970 ☐ 05 1971 - 1978 ☐ 06 1979 - 1980 ☐ 07 1981 - 1982 ☐ 08 1983 - 1985 ☐ 09 1986 ☐ 10 1987 ☐ 11 1988
PL1988A_FLOORS	PL1988A_FLOORS	Number of floors	Characteristics of households Fill for the building in which at least one dwelling was enumerated. Answers for questions 1-10 write in only once -- in a first enumerated dwelling. In the forms filled for other dwellings this part should be crossed. 5. Number of floors ☐ 0 Ground floor only ___ number of floors (write in the relevant number)
PL1988A_WALLS	PL1988A_WALLS	Outer walls material	Characteristics of households Fill for the building in which at least one dwelling was enumerated. Answers for questions 1-10 write in only once -- in a first enumerated dwelling. In the forms filled for other dwellings this part should be crossed. 3. Material of outer walls of the building: ☐ 1 Non-flammable (concrete, bricks etc.) ☐ 2 Flammable (wood etc.)
PL1988A_ROOF	PL1988A_ROOF	Roof material	Characteristics of households Fill for the building in which at least one dwelling was enumerated. Answers for questions 1-10 write in only once -- in a first enumerated dwelling. In the forms filled for other dwellings this part should be crossed. 4. Material used for the roof ☐ 1 Eternit or tiles ☐ 2 Metal plate ☐ 3 Roof felt ☐ 4 Other
PL1988A_WATPBLD	PL1988A_WATPBLD	Piped water in building	Characteristics of households Fill for the building in which at least one dwelling was enumerated. Answers for questions 1-10 write in only once -- in a first enumerated dwelling. In the forms filled for other dwellings this part should be crossed. 7. Pipe water: ☐ 1 Yes -- network ☐ 2 Yes -- local system ☐ 3 Not in a building but within a property ☐ 0 Neither in a building nor within a property

ID	Name	Label	Question
PL1988A_SEWAGE	PL1988A_SEWAGE	Sewage in building	Characteristics of households Fill for the building in which at least one dwelling was enumerated. Answers for questions 1-10 write in only once -- in a first enumerated dwelling. In the forms filled for other dwellings this part should be crossed. 8. Sewage: [] 1 Yes -- network [] 2 Yes -- local system [] 0 Not in a building
PL1988A_HEATBLD	PL1988A_HEATBLD	Central heating in building	Characteristics of households Fill for the building in which at least one dwelling was enumerated. Answers for questions 1-10 write in only once -- in a first enumerated dwelling. In the forms filled for other dwellings this part should be crossed. 9. Central heating: [] 1 Yes -- network [] 2 Yes -- local system [] 0 Not in a building
PL1988A_GASBLD	PL1988A_GASBLD	Piped (network) gas in building	10. Gas in dwelling [] 1 Supplied from public network [] 2 From bottles [] 0 There is no gas in dwelling
PL1988A_ROOMS	PL1988A_ROOMS	Number of rooms in the dwelling	Characteristics of the dwelling 2. Number of rooms (with window and not smaller than 4 meters squared) ____ Write in a total number of rooms e.g. bedrooms, studies, rented rooms, empty rooms etc.)
PL1988A_KITCHENWI	PL1988A_KITCHENWI	Number of kitchens with window in the dwelling	Characteristics of the dwelling 3. Number of kitchens a) with window and not smaller than 4 meters squared (if there are not any write in "0") ____ b) without window (so called blind kitchen) or with a window but smaller than 4 meters squared (if there are not any write in "0") ____
PL1988A_KITCHENWO	PL1988A_KITCHENWO	Number of kitchens without windows in the dwelling	Characteristics of the dwelling 3. Number of kitchens a) with window and not smaller than 4 meters squared (if there are not any write in "0") ____ b) without window (so called blind kitchen) or with a window but smaller than 4 meters squared (if there are not any write in "0") ____
PL1988A_CHAMBERS	PL1988A_CHAMBERS	Number of chambers in the dwelling	Characteristics of the dwelling 4. Total number of chambers (sum of 2 and 3a) ____
PL1988A_FLRSPC	PL1988A_FLRSPC	Useful floor space of dwelling (in square meters)	Characteristics of the dwelling 5. Total useful floor space of dwelling ____ Sum of floor space of all the rooms -- rooms, kitchens with or without window, antechambers, bathrooms, toilets, larders etc. The answer should be given at full square meter precision.

ID	Name	Label	Question
PL1988A_WATPDW	PL1988A_WATPDW	Piped water in the dwelling	Characteristics of the dwelling 6. Pipe water [] 1 In dwelling Not in dwelling: [] 2 But the inhabitants can use pipe water in the building they live in [] 0 The inhabitants can not use pipe water in the building they live in
PL1988A_TOILET	PL1988A_TOILET	Flush toilet	Characteristics of the dwelling 7. Flush toilet [] 1 In dwelling Not in dwelling: [] 2 But the inhabitants can use flush toilets in the building they live in [] 0 The inhabitants can not use flush toilets in the building they live in
PL1988A_BATH	PL1988A_BATH	Bathroom in the dwelling	Characteristics of the dwelling 8. Bathroom in dwelling [] 1 There is [] 0 There is not
PL1988A_HOTWAT	PL1988A_HOTWAT	Hot running water	Characteristics of the dwelling 9. Hot running water in dwelling [] 1 Heated outside the dwelling [] 2 Heated in dwelling [] 0 There is not

description

DEFINITION

COUNTRY gives the country from which the sample was drawn. The codes assigned to each country are those used by the

UN Statistics Division and the ISO (International Organization for Standardization).

concept

CONCEPT

GQ: Group quarters (collective dwelling) status

Data file: POL1988_PHC-H-H

Overview

Type: Discrete Width: 2 Range: - Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
00	Vacant
10	Households
20	Group quarters (collective), n.s.
21	Institutions
22	Other group quarters
29	1-person unit created by splitting large household
99	Unknown/group quarters not identified

description

DEFINITION

GQ identifies households as vacant dwellings, group quarters, or private households. Group quarters -- collective dwellings -- are generally institutions and other group living arrangements such as rooming houses and boarding schools.

Institutions often retain persons under formal supervision or custody, such as correctional institutions, military barracks, asylums, or nursing homes. Educational and religious group dwellings (e.g., boarding schools, convents, monasteries, etc.) are also included in the institutional classification.

Group quarter designations are often useful for understanding the universe of households that answered questions about household characteristics. Censuses will often exclude group quarters from such questions.

concept

CONCEPT

HHWT: Household weight

Data file: POL1988_PHC-H-H

Overview

Type: Continuous Decimal: 2 Width: 8 Range: - Format: Numeric

description

DEFINITION

HHWT indicates the number of households in the population represented by the household in the sample.

For the samples that are truly weighted (see the comparability discussion), HHWT must be used to yield accurate household-level statistics.

NOTE: HHWT has 2 implied decimal places. That is, the last two digits of the eight-digit variable are decimal digits, but there is no actual decimal in the data.

concept

CONCEPT

Imputation and derivation

DERIVATION

HHWT is an 8-digit numeric variable with 2 implied decimal places. See the variable description.

PERSONS: Number of person records in the household

Data file: POL1988_PHC-H-H

Overview

Type: Continuous Width: 4 Range: - Format: Numeric

description

DEFINITION

PERSONS indicates how many person records are included in the household (i.e., the number of person records associated with the household record in the sample). These person records will all have the same serial number (SERIAL) as the household record. The information contained in the household record will normally apply to all of these persons.

concept

CONCEPT

Imputation and derivation

DERIVATION

PERSONS is a 4-digit numeric variable.

RECTYPE: Record type**Data file:** POL1988_PHC-H-H**Overview**

Type: Continuous Width: 1 Range: - Format: character

Questions and instructions

CATEGORIES

Value	Category
H	Household
P	Person

description

DEFINITION

RECTYPE identifies the type of record for the case: household or person.

NOTE: RECTYPE is an alphabetic (character string) variable with a value of 'H' for household records and 'P' for person records. RECTYPE will not appear as a variable in the default rectangular extracts produced by the data extract system. It is only available in hierarchical extracts, to distinguish between the two record types.

description

DEFINITION

SAMPLE identifies the IPUMS sample from which the case is drawn. Each sample receives a unique 9-digit code. The code is structured as follows:

The first 3 digits are the ISO/UN codes used in COUNTRY

The next 4 digits are the year of the census/survey

The final 2 digits identify the sample within the year. For the last two digits, censuses or large census-like surveys have a value "0" (e.g., 01) in the second-to-last digit, household surveys have a value of "2" (e.g., 21), and employment surveys have a value of "4" (e.g., 41).

concept

CONCEPT

SERIAL: Household serial number

Data file: POL1988_PHC-H-H

Overview

Type: Continuous Width: 12 Range: - Format: Numeric

description

DEFINITION

SERIAL is an identifying number unique to each household in a given sample. All person records are assigned the same serial number as the household record that they follow. (Person records also have their own unique identifiers -- see PERNUM.) The combination of SAMPLE and SERIAL provides a unique identifier for every household in the IPUMS-International database; SAMPLE, SERIAL and PERNUM uniquely identify every person in the database.

SERIAL can be used to identify dwellings in some samples. In these samples, the first 7 digits of SERIAL provide the dwelling

number common to all households that were sampled from the same structure. The last three digits give the sequence of the household within the dwelling. The following is a list of samples in which dwellings can be inferred:

Chile 1970, 1992, 2002Colombia 1993, 2005Costa Rica 1984, 2000Cuba 2002Dominican Republic 1981, 2002, 2010Ecuador 1990, 2001Germany 1971Hungary 1980, 1990, 2001Jamaica 1982, 1991, 2001Malaysia 1970, 1991, 2000Mexico 1995, 1990, 2000, 2005Nigeria 2006Panama 2000Peru 1993, 2007Portugal 1981, 1991, 2001Spain 1991Uruguay 2011Venezuela 1990, 2001Vietnam 1989In all other samples, the last 3 digits are always zeroes.

SERIAL was constructed for IPUMS-International, and has no relation to the serial number in the original datasets.

The U.S. 1900 sample and 1880 10% sample have multi-household dwellings that can be identified using the last 3 digits of SERIAL.

concept

CONCEPT

Imputation and derivation

DERIVATION

SERIAL is a 10-digit numeric variable.

The last 3 digits of SERIAL indicate household number within dwelling for selected samples noted in the variable description. In all other samples, the last 3 digits are always zeroes.

SUBSAMP: Subsample number

Data file: POL1988_PHC-H-H

description

DEFINITION

SUBSAMP allocates each case to one of 100 subsample replicates, randomly numbered from 0 to 99. Each subsample is nationally representative and preserves any stratification of the sample from which it is drawn. Users who need a representative subset of a sample can use SUBSAMP to select their cases. For example, to randomly extract 10% of the cases from a sample, select any 10 of the 100 subsamples.

description

DEFINITION

GEO1ALT_PL identifies the household's voivodship within Poland in 1978 and 1988. Voivodships are the first level administrative units of the country. GEO1ALT_PL is spatially harmonized to account for political boundary changes across census years. Some detail is lost in harmonization; see the comparability discussion. A GIS map (in shapefile format), corresponding to GEO1ALT_PL can be downloaded from the GIS Boundary files page in the IPUMS International web site.

The full set of geography variables for Poland can be found in the IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level of any country refer to GEOLEV1, and GEOLEV2. More information on IPUMS-International geography can be found [here](#).

description

DEFINITION

OWNERSHIP indicates whether a member of the household owned the housing unit. Households that acquired their unit with a mortgage or other lending arrangement were understood to "own" their unit even if they had not yet completed repayment. For those that did not own their housing unit, several options were possible: renting (from various types of owners), subletting, usufruct, and de facto occupation.

concept

CONCEPT

EMARST: Marital status, Europe

Data file: POL1988_PHC-P-H

Overview

Type: Discrete Width: 1 Range: - Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
	NIU (not in universe)
1	Never married
2	Married
3	Widowed and not remarried
4	Divorced/separated and not remarried
5	Widowed or divorced
9	Unknown / missing

description

DEFINITION

EMARST describes for the European samples the person's current marital status according to law or custom. Individuals who remarried should report the status relevant to their most recent marriage. European census instructions generally limit marital status to legal unions, but there are exceptions.

EMARST has been classified according to the recommendations given by the Conference of European Statisticians for the 2010 Population and Housing Censuses.

concept

CONCEPT

PERNUM: Person number

Data file: POL1988_PHC-P-H

Overview

Type: Continuous Width: 4 Range: - Format: Numeric

description

DEFINITION

PERNUM numbers all persons within each household consecutively (starting with "1" for the first person record of each household). When combined with SAMPLE and SERIAL, PERNUM uniquely identifies each person in the IPUMS-International database.

concept

CONCEPT

Imputation and derivation

DERIVATION

PERNUM is a 4-digit numeric variable.

PERWT: Person weight

Data file: POL1988_PHC-P-H

Overview

Type: Continuous Decimal: 2 Width: 8 Range: - Format: Numeric

description

DEFINITION

PERWT indicates the number of persons in the actual population represented by the person in the sample.

For the samples that are truly weighted (see the comparability discussion), PERWT must be used to yield accurate statistics for the population.

NOTE: PERWT has 2 implied decimal places. That is, the last two digits of the eight-digit variable are decimal digits, but there is no actual decimal in the data.

concept

CONCEPT

Imputation and derivation

DERIVATION

PERWT is an 8-digit numeric variable with 2 implied decimal places. See the variable description.

CLASSWK: Status in employment (class of worker) [general version]**Data file:** POL1988_PHC-P-H**Overview**

Type: Discrete Width: 1 Range: - Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
	NIU (not in universe)
1	Self-employed
2	Wage/salary worker
3	Unpaid worker
4	Other
9	Unknown/missing

description

DEFINITION

CLASSWK refers to the status of an economically active person with respect to his or her employment -- that is, the type of explicit or implicit contract of employment with other persons or organizations that the person has in his/her job. In general, the variable indicates whether a person was self-employed, or worked for someone else, either for pay or as an unpaid family worker. CLASSWK is related to EMPSTAT, which is used to define the universe in many samples.

Class of worker is often referred to as "status in employment" in other sources.

description

DEFINITION

ECLASSWK refers in European Samples to the status of an economically active person with respect to his or her employment -- that is, the type of explicit or implicit contract of employment with other persons or organizations that the person has in his/her job. In general, the variable indicates whether a person was self-employed, or worked for someone else, either for pay or as an unpaid family worker.

ECLASSWK is related to EEMPSTAT (employment status), which is used to define the universe for the variable in many samples.

ECLASSWK has been classified according to the recommendations given by the Conference of European Statisticians for the 2010 Population and Housing Censuses. "Class of worker" is referred to as "Status in Employment" in the CES recommendations. The former term is used to maintain concordance with IPUMS practice.

EDATTAIN: Educational attainment, international recode [general version]**Data file:** POL1988_PHC-P-H**Overview**

Type: Discrete Width: 1 Range: - Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
	NIU (not in universe)
1	Less than primary completed
2	Primary completed
3	Secondary completed
4	University completed
9	Unknown

description

DEFINITION

EDATTAIN records the person's educational attainment in terms of the level of schooling completed (degree or other milestone). The emphasis on level completed is critical: a person attending the final year of secondary education receives the code for having completed lower secondary only -- and in some samples only primary.

EDATTAIN does not necessarily reflect any particular country's definition of the various levels of schooling in terms of terminology or the number of years of schooling. EDATTAIN is an attempt to merge -- into a single, roughly comparable variable -- samples that provide degrees, ones that provide actual years of schooling, and those that have some of both. In addition to EDATTAIN, a country-specific education classification is provided which loses no information and reflects the particular educational system of that country (for example EDUCBR for Brazil, EDUCCL for Chile, and EDUCUS for the United States). As always, users can refer to the original education source variables for each sample, if they wish.

Many samples also give single years of schooling completed, recorded in YRSCHOOL. Some samples provide educational information in a form that could not be incorporated into EDATTAIN.

DEFINITION

EEDATTAIN records the person's educational attainment in terms of the level of schooling completed (degree or other milestone) for the European samples. The emphasis on level completed is critical: a person attending the final year of secondary education receives the code for having completed lower secondary only -- and in some samples only primary. All education that was relevant to the completion of a level should be taken into account even if it was provided outside of schools and universities.

EEDATTAIN does not necessarily reflect any particular country's definition of the various levels of schooling in terms of terminology or the number of years of schooling. EEDATTAIN is an attempt to merge -- into a single, roughly comparable variable -- samples that provide degrees, ones that provide actual years of schooling, and those that have some of both. In addition to EEDATTAIN, a country-specific education classification is provided which loses no information and reflects the particular educational system of that country.

Hungary 1980 and 1990 also give single years of schooling completed, recorded in YRSCHOOL.

EEDATTAIN has been classified according to the recommendations of the Conference of European Statisticians for the 2010 Population and Housing Censuses. EEDATTAIN presents a less detailed version of EDATTAIN for the European Samples.

concept

CONCEPT

OCC: Occupation, unrecoded**Data file: POL1988_PHC-P-H**

Overview

Type: Continuous Width: 4 Range: - Format: Numeric

description

DEFINITION

OCC records the person's primary occupation, classified according to the system used by the respective national census office at the time. For someone with more than one job, the primary occupation is usually the one in which the person spent the most time or earned the most money, although this may not have been explicit in the instructions for a specific census.

To ensure confidentiality, very small occupations are recoded to a residual category indicating the persons had an occupation, but the job title is not identified. The number of cases recoded should be too small to affect analyses.

concept

CONCEPT

Imputation and derivation

DERIVATION

OCC is a 4-digit numeric variable.

Some samples use fewer than 4 digits. In those cases, the data are right-justified, and the extra leading digits are padded with zeroes.

123	Production dispatchers and similar professions
124	Work safety inspectors, instructors, and similar professions
125	Quality control and technical supervision inspectors, controllers, technical surveyors and similar professions

126	Professionals of rationalization and development, work normalization, patent attorneys
127	Land surveyors, cartographers, geologists, and similar professions
128	Electricians, energetic engineers, electronic engineers, automatic engineers, metal workers, mechanics, and similar technical and production-related professions
129	Exact science-oriented professionals working outside education, hydrology and meteorology specialists
130	Technicians and production professionals, manipulators, and similar professions
131	Technical experts not classified in any other group
132	Analysts, designers, programmers, data processing organizers, and similar professions
133	Verification professionals, controllers, documentation gatherers, database creators, and similar professions
134	Agriculture engineers, mechanics, plumbers, planting instructors, plant protection instructions, zoo technicians, and similar professions connected with agriculture
135	Cultivation and breeding technicians, as well as similar professions
136	Vets
137	Veterinary controllers, inspectors, and technicians
138	Foresters, deputy foresters, and similar professions
139	Research associates, constables, collectors, and similar professions connected with forestry
140	Maritime navigation and inland navigation professionals
141	Aviation professionals
142	Experts, communication and transportation protection supervisors, transportation and shipping controllers and similar professions
143	Traffic orderlies, dispatches, transportation organizers, and similar professions
144	Collectors, railroad associates, machine operators, train drivers, and similar professions
145	Postal communication, radio and television communication professionals
146	Controllers, supervisors and other professions connected with postal communication, radio and television communication
147	International trade professionals, supply and selling experts, material and advertising professionals, as well as similar professions
148	International trade inspectors, supply and selling instructors, material and advertising instructors, as well as similar professions
149	Technical engineers, catering experts and similar professions
150	Professors, assistant professors
151	Research associates, assistants, lecturers, tutors, and similar professions
152	Experts - scientists and manipulators working for research institutions, research facilities, and educational organizations
153	Custodians, licensed librarians, research associates, librarian assistants, archivists, conservators, and similar professions
154	Licensed professionals keeping scientific, technical, and economic records, licensed documentation gatherers, assistants, and research associates
155	Librarians, inspectors, library and archiving instructors, stocktaking technicians, and similar professions
156	Inspectors, museum instructors, stocktaking technicians specializing in classification and categorizing of monuments, as well as similar professions
157	Conservators, monument renovators, book and archive renovators
158	Visitors, inspectors, education, nursing, and teaching instructors, as well as similar professions

159	Teachers in general and vocational schools, course leaders
160	Teachers in kindergartens
161	Educators in special training and education centers, nursing houses, kids shelters, and similar professions
162	Tutors and educators working in out-of-school facilities, as well as similar professions
163	Vocational tutors, vocational instructors, household maintenance instructors, and similar professions
164	Directors, stage designers, choreographers, conductors and similar professions
165	Actors, performers, dancers, musicians, and similar professions
166	Cameramen, operators, and similar professions
167	Film, radio, and TV production technicians
168	Organizers of cultural events, fair animators, stage managers, and similar professions
169	Plastics, graphics, and similar professions
170	Exhibitions and educational events inspectors and instructors, as well as similar professions
171	Journalists, editors, spokesmen, and similar professions
172	Writers and similar professions
173	Translators
174	Technical and visual editors, proofreaders, and similar professions connected with journalism and publishing
175	General practitioners
176	Dentists
177	Pharmacists
178	Biologists, microbiologists, medical analyst, and similar professions
179	Medical examination, dentistry, pharmacy, hygiene and nursing inspectors, sanitary supervisors, and similar professions
180	Barber surgeons, nurses, midwives, and similar professions
181	Medical, dentistry, and pharmacy technicians, medical laboratory technicians, therapy performance instructors
182	Movement rehabilitation experts
183	Tourism and accommodation experts, organizers of sport and recreation-related events
184	Tourism and recreation instructors, tour guides, informers, and similar professions
185	Coaches and sport instructors
186	Judges, court supervisors, associate judges, and advocate's trainees
187	Attorneys, vice-attorneys, associate attorneys, and attorney's trainees
188	Arbitrators, associate arbitrators, and arbitrator's trainees
189	Lawyers, lawyer's trainees
190	Notaries, supervisors, associate notaries, and notary's trainees
191	Advisors, reporters, and reference documentation gatherers
192	Professional custodians
193	Finance, loans, pricing, and insurance experts, treasurers, and similar professions
194	Accountants, financial, loans, and accounting inspectors, supervisors, as well as similar professions

196	Management, work and production experts

197	Planning and statistics experts
198	Economists
199	Employment and wages experts
200	Employment, training, and professional improvement experts
201	Social issues experts
202	Administration and commerce experts
203	Psychologists, sociologists, and similar professions
204	Firefighters
205	Property protection and defense experts
206	Customs officers
207	Priests
208	Experts not classified in other groups
209	Technical issues, production, work normalization, work security reporters and similar professions
210	Technical draftsmen and similar professions
211	Economy, finance, material management, storage reporters and similar professions
212	Administrative and commerce reporters, as well as similar professions
213	Reporters not classified in other groups
214	Secretaries
215	Stenographers, office correspondents, clerks, and similar professions
216	Operators of digital machines and supplementary devices
217	Operators of small and medium machinery
218	Conservators of data processing machines and devices
219	Accountants, reckoners, and similar professions
220	Cashiers, excluding cashiers working in shops and selling tickets, and similar professions
221	Building administrators, pursers, receptionists, warehousemen, prop managers, and similar professions
222	Receptionists, dispatchers, ticket sellers, managers and supervisors of floors in hotels, as well as similar professions
223	Mayors
224	Technical executor not classified in other groups
225	Mining foremen
226	Miners, drillers, quarrymen, and similar professions
227	Operators of mining machinery and similar professions
228	Gas and oil extraction machinery operators and similar professions
229	Other miners and similar professions
230	Ironworks foremen
231	Metalworkers and similar professions
232	Founders, smelters, iron founders, and similar professions
233	Blacksmiths and similar professions
234	Metal and ore processors and similar professions

235	Other metallurgists
236	Foremen in metal processing companies
237	Panel beaters, lofts-men, metal melting workers, and similar professions
238	Machinist millers, grinders, metal drillers, and similar professions
239	Welders and similar professions
240	Galvanizing workers, metal processors, varnishing workers, and similar professions
241	Locksmith and similar professions
242	Other metal processing workers
243	Mechanics and assemblers, excluding professional mechanics, electric engineers, electronic engineers/
244	Machinery operators and similar professions
245	Professional mechanics, excluding professional engineers, electric engineers, electronic engineers
246	Professional assemblers, excluding professional engineers, electric engineers, electronic engineers
247	Greasers and similar professions
248	Assemblers and professional engineers
249	Professional assemblers, professional engineers, opticians, and similar professions
250	Jewelers, goldsmiths, grinders of precious stones, precious metal workers, and similar professions
251	Foremen working in companies connected with providing power supply, electronic and technical services
252	Power line engineers, excluding stationary machinery operators
253	Electric devices' engineers, electric devices assemblers, electric and electronic installations and machinery assemblers
254	Power and telecommunication lines assemblers and engineers
255	Equipment, apparatuses, and automatic machinery assemblers, operators of electronic, electric, electro technical machines and devices
256	Assemblers of transmission, telecommunication, and tele-commutation devices
257	Foremen in chemical companies
258	Chemical processes operators, fabric production operators, and similar professions
259	Hand packers of paper, rubber, and plastic commodities
260	Chemical production, paper and cellulose production devices' operators
261	Burners in chemical production-oriented companies and similar professions
262	Other chemical production workers and similar professions
263	Foremen in construction materials, glass, and ceramics production companies
264	Process operators in companies specializing in construction materials, glass, and ceramics production
265	Ceramic, gypsum, and silicate products shapers, model-makers, foundry workers in companies producing glass, ceramic, and abrasive products and similar professions
266	Glass and ceramics decorators, as well as similar professions
267	Operators of machines used to produce construction materials and similar professions
268	Other construction materials, glass, and ceramics production workers
269	Foremen in woodworking and wood production companies
270	Carpenters, woodworkers, wheelwrights, coopers
271	Operators of machinery used for wood processing and wood production, as well as similar professions

272	Wood butchers, and similar professions
273	Wood grinders, shapers, processors, machinist millers and similar professions
274	Basket makers, rim makers and similar professions
275	Other woodworkers and wood production professionals
276	Foremen in companies producing textiles
277	Fiber inspectors, spinners, and similar professions
278	Operators of textile production machinery, knitters, shapers and similar professions
279	Dyers and finishers of textiles, as well as similar professions
280	Other textiles production workers
281	Tailors, sewers and similar professions
282	Knitters, shapers and similar professions
283	Furriers
284	Hat makers, milliners
285	Lingerie makers and similar professions
286	Embroidery makers and similar professions
287	Upholsterers and similar professions
288	Other clothing production workers and similar professions
289	Foremen in leather processing companies
290	Tanners and tanning machine operators, as well as similar professions
291	Shoemakers and similar professions
292	Leatherworkers and saddlers
293	Other leather processing and leather production workers
294	Foremen in food processing and similar professions
295	Process operators in sugar production and similar professions
296	Process operators and supervisors of machines and devices used for processing of potatoes, starch produces and similar professions
297	Process operators in alcoholic beverages production
298	Process operators and supervisors of machines and devices used for production of canned food, smokers, salt adders, and similar professions
299	Process operators and supervisors of machines and devices used for meat processing, butchers, sausage makers, and similar professions
300	Process operators and supervisors of machines and devices used for eggs and poultry processing, classification professionals, poultry breeders, and similar professions
301	Process operators in dairy products production, butter and cheese makers, and similar professions
302	Process operators in production and processing of fruits and vegetables, press operators, blender operators, and similar professions
303	Operators of machines and devices used for grain processing, millers, granary supervisors, and similar professions
304	Operators of machines and devices used for production of bakery products, bakers, pastry cooks and similar professions
305	Operators of machines and devices used for production of confectionery products, chocolate makers, caramel makers, and similar professions
306	Operators of machines used for production of tobacco-related products

307	Process operators of utilization devices, fodder producers, and similar professions
308	Other food processing workers
309	Foremen in printing companies
310	Automatic and manual assemblers, operators of printing devices, printing professionals and similar professions
311	Copying professionals, reproduction makers, correctors, engravers, product preparation experts, and similar professions
312	Binders, producers of paper-based and plastic items
313	Other workers hired in printing industry
314	Violin makers, musical instrument assemblers and adjusters, keyboard makers, adjusters, musical instrument makers, and similar professions
315	Process operators of devices used for distribution of liquids, packers, product labelers, and similar professions
316	Operators of cranes and gantry cranes
317	Operators of lifts and similar professions
318	Operators of loading machinery in harbors, longshoremen, and similar professions
319	Operators of loading and sorting machinery, excluding machinery used in harbors
320	Foremen in construction-related companies
321	Concreters, bricklayers, assemblers, carpenters, enforcers, and similar professions
322	Glazers and similar professions
323	Painters and similar professions
324	Floorers and similar professions
325	Stonemasons and similar professions
326	Pavers and similar professions
327	Railroad constructors and similar professions
328	Dam constructors, drainpipe assemblers and similar professions
329	Other construction workers
330	Operators of machines used for road works, ground works, track laying, water and sewage-related works, as well as similar professions
331	Assemblers of steel and enforced constructions, as well as similar professions
332	Pipe network assemblers, plumbers and similar professions
333	Individual farmers
334	Foremen in agriculture
335	Workers in arable farming
336	Gardeners and similar professions
337	Breeders and similar professions
338	Operators of devices used in agriculture and horticulture
339	Fishermen /inland and maritime fishers
340	Other agricultural workers
341	Foremen in forestry and similar professions
342	Operators of machines and devices used for gathering and processing of peat
343	Operators of machines and forestry equipment, woodcutters, rafts-men, and similar professions

344	Forest protection, exploitation and management workers
345	Train operators, operators of rail traction units, smokers, and similar professions
346	Ticker inspectors
347	Train maneuvering and maintenance workers, compartment inspectors and similar professions
348	Tram and trolley drivers
349	Car drivers
350	Sailors
351	Boatswains - ship conservators, snorkelers, divers, and similar professions
352	Typists, telephone typing professionals and operators of office equipment
353	Callers, telegraphers, radio-telegraphers, radio-callers
354	Postal dispatchers and clerks
355	Salesmen and cashiers in shops
356	Clerks in servicing points and buying stations
357	Assistants of nurses, paramedics, and similar professions
358	Orthopedists
359	Waiters, buffet workers
360	Cooks
361	Hairdressers, beauticians, and similar professions
362	Photographers, film and photography associates, and similar professions
363	Cleaners, ironing workers, dyers, and similar professions
364	Firefighters
365	Guards
366	Laboratory technicians, assistants, and similar professions
367	Foremen not classified in other groups
368	Haberdashery makers, toy makers, and similar professions
369	Dress fitter, assemblers of decorations and other workers not classified in other groups
370	Janitors, runners, porters, liftboys, dressing room workers, wardens, and similar professions
371	Workers employed in transportation, loading, packers, luggage carriers, storage keepers, and similar professions
372	Ash collectors, strokes, chimneysweepers, and similar professions
373	Cleaners, sanitation workers, agricultural workers, and other workers performing activities not requiring any professional qualifications
374	Not specified working positions
998	Unknown
