Identification

SURVEY ID NUMBER

SWE_1890_PHC_v01_M_v7.5_A_IPUMS

TITLE

Census of Sweden 1890 - IPUMS Subset

ABBREVIATION OR ACRONYM

PHC Sweden 1890 (100%) (IPUMS Harmonized Subset)

COUNTRY

Name	Country code
Sweden	SWE

STUDY TYPE

Population and Housing Census [hh/popcen] IPUMS International

SERIES INFORMATION

DOI:10.18128/D020.V7.5

KIND OF DATA

Population and Housing Census [hh/popcen]

UNIT OF ANALYSIS

Persons, households, and dwellings

UNITS IDENTIFIED:

- Dwellings: yes
- Vacant Units: No
- Households: yes
- Individuals: yes
- Group quarters: yes

UNIT DESCRIPTIONS:

- Dwellings: no
- Households: Persons belonging to the same consumption unit
- Group quarters: Yes

Version

VERSION DESCRIPTION

Version 7.5. The datasets contain selected variables from the original census microdata plus harmonized variables from the IPUMS-International database.

VERSION DATE

2024-10-05

Scope

NOTES

Additional notes on a sample that is part of this study: Sweden 1890 (100%)

TOPICS

DATA COLLECTION NOTES

de jure, CENSUS DAY: December 31, 1890

questionnaires

QUESTIONNAIRES

In Sweden, the censuses were taken by vicars and parish priests who made extracts from the already existing parish books. The parish books were updated continuously by the vicar or parish priest. They kept track of persons, families and households, their birth, marriage, death, and recorded whenever a person moved within or between parishes. The priest also recorded a person's attendance to the church examinations, their knowledge in the Christian teachings, ability to read and write and many other things. The parish books were kept in all of Sweden except in the city of Stockholm where the censuses were based on the tax census. The directors or governing boards of institutions were responsible for compiling information on persons living in prisons, hospitals, asylums, nursing homes, institutions for disabled persons, and other institutions.

Access policy

CONTACTS

Name
Statistics Sweden

CONFIDENTIALITY

IPUMS International distributes integrated microdata of individuals and households only by agreement of collaborating national statistical offices and under the strictest of confidence. Before data may be distributed to an individual researcher, an electronic license agreement must be signed and approved. To gain access to the data, a researcher must agree to the following: (1) Implement security measures to prevent unauthorized access to census microdata. Under IPUMS International agreements with collaborating agencies, redistribution of the data to third parties is prohibited. (2) Use the microdata for the exclusive purposes of scholarly research and education. Researchers must explicitly agree to not use microdata acquired for any commercial or income-generating venture. (3) Maintain the confidentiality of persons, households, and other entities. Any attempt to ascertain the identity of persons or households from the microdata is prohibited. Alleging that a person or household has been identified is also prohibited. (4) Report all publications based on these data to IPUMS International, which will in turn pass the information on to the relevant national statistical agencies. Once a project is approved, a password is issued and data may be acquired through the Internet. Penalties for violating the license include: revocation of

the license, recall of all microdata acquired, filing of a motion of censure to the appropriate professional organizations, and civil prosecution under the relevant national or international statutes. These safeguards mirror the principles from the Joint ECE/Eurostat Work Session on Statistical Data Confidentiality. Employees of the Minnesota Population Center who work with the census microdata to produce the harmonized database also sign agreements to respect the confidentiality of the data. IPUMS International works with each country's statistical office to minimize the risk of disclosure of respondent information. The details of the confidentiality protections vary across countries, but in all cases, names and detailed geographic information are suppressed and top-codes are imposed on variables such as income that might identify specific persons. In addition, IPUMS International uses a variety of technical procedures to enhance confidentiality protection. These include the following: (1) Swapping an undisclosed fraction of records from one administrative district to another to make positive identification of individuals impossible. (2) Randomizing the placement of households within districts to disguise the order in which individuals were enumerated or the data processed. (3) Aggregating codes of sensitive characteristics (e.g., grouping together very small ethnic categories) (4) Top- and bottom-coding continuous variables to prevent identification of extreme cases. The safety record for public-use census microdata is apparently perfect. In almost four decades of use, there has not been a single verified breach of statistical confidentiality. The measures implemented by the IPUMS International are designed to extend this record.

ACCESS CONDITIONS

An adapted version of the dataset, harmonized for international comparability, is available from IPUMS International (<https://international.ipums.org/international/>) under the following conditions:

IPUMS International distributes integrated microdata of individuals and households only by agreement of collaborating national statistical offices and under the strictest of confidence. Before data may be distributed to an individual researcher, an electronic license agreement must be signed and approved. To gain access to the data, a researcher must agree to the following:

- (1) Implement security measures to prevent unauthorized access to census microdata. Under IPUMS International agreements with collaborating agencies, redistribution of the data to third parties is prohibited.
- (2) Use the microdata for the exclusive purposes of scholarly research and education. Researchers must explicitly agree to not use microdata acquired for any commercial or income-generating venture.
- (3) Maintain the confidentiality of persons, households, and other entities. Any attempt to ascertain the identity of persons or households from the microdata is prohibited. Alleging that a person or household has been identified is also prohibited.
- (4) Report all publications based on these data to IPUMS International, which will in turn pass the information on to the relevant national statistical agencies.

Once a project is approved, a password is issued and data may be acquired through the Internet. Penalties for violating the license include: revocation of the license, recall of all microdata acquired, filing of a motion of censure to the appropriate professional organizations, and civil prosecution under the relevant national or international statutes.

These safeguards mirror the principles from the Joint ECE/Eurostat Work Session on Statistical Data Confidentiality. Employees of the Minnesota Population Center who work with the census microdata to produce the harmonized database also sign agreements to respect the confidentiality of the data.

DDI DOCUMENT VERSION

Version 7.5 October 2024. NEW FEATURES.

--Historical data from NAPP project now available from IPUMS-International.

--Historical census data from Canada, Denmark, the United Kingdom, Germany, Iceland, Norway, Sweden, and the United States for the period 1703 to 1911 are now available from IPUMS-International. The complete count and sample datasets were previously disseminated by the North Atlantic Population Project (NAPP). Where possible, the data have been integrated into existing IPUMS-International variable coding schema. Some new variables have been created that are available only for these pre-1960 datasets. NAPP data users should note that many NAPP variables are available from IPUMS-International by different names. For a complete list of NAPP variables that have been renamed in IPUMS-International, refer to the crosswalk.

--Individual country shapefiles for the third-level administrative level of geography are now available for a few IPUMS samples.

--New spatially harmonized previous-residence variables at the second administrative level of geography are available for several samples in this data release. More information is available here. Users should note that many older migration variables are available by different names. Refer to this table for a crosswalk of old and corresponding new migration variables.

--IPUMS now hosts the Census Mosaic data collection. Census Mosaic identifies, gathers, harmonizes, and distributes surviving historical census microdata from regions of Continental Europe where complete centralized records are not available. The Mosaic project was founded by a consortium of historical social scientists in Europe. Data can be downloaded as static files from the Census Mosaic website. Although the data are not yet integrated fully into IPUMS International, variables have been standardized and harmonized to be roughly compatible with IPUMS coding structures.

NEW SAMPLES.

--Full-count datasets for Great Britain 1851, 1861, 1871 (Scotland only), 1891, and 1901.

--Full-count dataset for Sweden 1910. Denmark (1845, 1880, and 1885)

--Labor force surveys from Spain and eight new labor force surveys from Italy added to the series.

Newly added countries:

Benin, Cote d'Ivoire, Finland, Guatemala, Honduras, Laos, Lesotho, Mauritius, Myanmar, Papua New Guinea, Russia, Slovak Republic, Suriname, Togo, and Zimbabwe

New samples for:

Bolivia, Cambodia, Cambodia, Chile, Cuba, Cote d'Ivoire, Egypt (1848 and 1868, historical samples), Fiji, Guinea, Ireland, Israel, Italy, Lao PDR, Mexico, Morocco, Nepal, Netherlands, Palestine, Peru, Philippines, Puerto Rico, Rwanda, Senegal, Sierra Leone, South Africa, Switzerland, Uganda, United States, United Kingdom, United States, Vietnam, and Zimbabwe

SUPPLEMENTAL DATA.

Data from censuses from Benin and Lesotho that record individual fertility and/or mortality events were made available in IPUMS-International. These files can be downloaded and linked to data produced by the extract system.

NEW VARIABLES.

--IPUMS-International now provides harmonized and year-specific geography variables for all countries including 13 new samples from Dominican Republic, Germany, Indonesia, Israel, Malaysia, Mongolia, Nicaragua, Nigeria, Palestine, Paraguay, Thailand, United Kingdom, and Uruguay. First-level and second-level year specific geography variables are also available for all countries. IPUMS provides corresponding, downloadable GIS boundary files for all harmonized and year specific geography variables. More information about IPUMS geography variables is available [here](#).

--IPUMS International now provides spatially harmonized previous-residence variables at the first administrative level of geography. The codes for the spatially harmonized previous-residence variables match the spatially harmonized place of current residence. More information is available [here](#).

--IPUMS International provides spatially harmonized previous-residence variables at the first administrative level of geography for all samples; previously available country-specific migration variables at the first administrative level that were not fully harmonized spatially have been phased out. Spatially harmonized previous-residence variables at the second administrative level of geography are available for selected samples. More information is available [here](#). Users should note that many older migration variables are available by different names. Refer to this table for a crosswalk of old and corresponding new migration variables.

--IPUMS International now provides spatially harmonized previous-residence variables at the first administrative level of geography for all samples. Spatially harmonized previous-residence variables at the second administrative level of geography are available for several samples in this data release. More information is available [here](#). Users should note that many older migration variables are available by different names. Refer to this table for a crosswalk of old and corresponding new migration variables.

--Lower (third) level geography codes and GIS files have been added for Bangladesh, China, Ethiopia, Mali, Rwanda, and Zimbabwe. Some geography codes and labels might have changed for these countries to accommodate the newer lower level geography.

--Added more detailed 3-digit industry and occupation variables for China 2000.

EDITED SAMPLES.

--Revised full-count data for Great Britain 1881

--Revised full-count datasets for Sweden 1890 and 1900. The revision includes the following changes that improve comparability across Sweden datasets:

--Revisions to certain ethnicity and work variables (and the underlying source data): ORIGIN, LABFORCE, OCCHISCO, OCRELATE, OCSTATUS.

--Revisions to unharmonized source variables: SE1890A_HISCOSE, SE1890A_HISCRELSE, SE1890A_HISCSTATSE, SE1890A_OCCMULTISE, SE1900A_HISCOSE, SE1900A_HISCRELSE, SE1900A_HISCSTATSE, SE1900A_OCCMULTISE.

--A new United States 1850 full-count dataset now matches the corresponding dataset distributed by the USA IPUMS data project. The source variable US1850A_0502 (HISTID) provides a linking key to match person records to the USA version of the data. The IPUMS International version of the data contains names, which the USA version cannot distribute.

EDITED VARIABLES.

An error affecting HHWT for South Africa 2007 was corrected. The existing values were adjusted by a factor of 0.01.

AGEMARR was edited to add data for Hungary 1980 and 1990.

Harmonized and year-specific geography variables for Brazil and Colombia have been edited to accommodate for the

availability of refined municipal boundaries. Users should be aware that codes and labels have changed in all harmonized and year specific geography variables for these two countries.

Errors affecting BPLSE2 (formerly BLPARSE) for Sweden 1890 and the underlying source variable were corrected. Several thousand cases were incorrectly coded as 258101000. These cases have been updated with the correct code: 258171000.

Harmonized geography variables for Italy, Philippines, Rwanda, and United States have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

The codes for the source variable RW2002A_0419 were corrected to include 0 and 8 as possible responses, which were previously identified as 'unknown years' within primary education.

Errors affecting EDUCFJ for Fiji 2006 were corrected.

A problem with PERWT for Tanzania 2012 was corrected. The previous weights were adjusted to properly reflect population totals.

MOMLOC, POPLOC, and PARRULE were updated for the United States 2010 and 2015 samples to include additional information on subfamilies. Prior to this correction, persons above age 17 were not receiving links to their co-resident mothers and fathers.

An error affecting codes for the URBAN variable in Egypt 1986 for Cairo, Alexandria, Port-Said, and Suez was corrected.

An error in INCEARN affecting Venezuela 2001 was corrected. Earned income in the source variable VE2001A_0440 is interpreted as a monthly amount, thus adjustments previously applied to convert data from daily or weekly income were suppressed.

All the six Brazil samples in IPUMS International were replaced with higher density samples.

An edited version of the Chile 2017 sample was introduced to correct an error in household breaks.

Errors affecting codes for GEO1_ZA in South Africa 2011 and ENUTS1 in United Kingdom 1991 were corrected.

Harmonized geography variables for Cambodia, Fiji, and Nepal have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year-specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

An error in PERWT affecting Nepal 2001 was corrected.

Errors affecting a code in GQ for Brazil 2010 and Indonesia 2010 were corrected. Both census samples now identify 1-person units created by splitting a large household.

An error in MARRNUM affecting Indonesia 1976 was corrected. Some codes for GEO1_EG2006 and GEO2_EG2006 were edited.

Harmonized geography variables for Bolivia, Cuba, Guinea, Ireland, Morocco, Palestine, Senegal, South Africa, and Uganda have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year-specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

An error in INCEARN affecting Brazil 1980 was corrected.

An error in EDATTAIN affecting Ireland 1971 and 1981 was corrected.

A small proportion of person records in Mexico 1960 were re-classified in MIGRATEP based on information about their current and previous residence. These were previously coded to 'different major administrative unit', even though their place of residence suggests that their last move was within the same major administrative unit.

The second-level technician (higher) degrees for Spain 1991, 2001, and 2011 were re-classified into post-secondary technical education in EDATTAIN.

An error affecting codes for SEX for Egypt 1848 and 1868 was corrected. The values for male and female had been reversed.

A problem with HHWT and PERWT for Canada 2011 was corrected. The previous weights were adjusted to properly reflect population totals.

Harmonized geography variables for Cambodia, Lao PDR, Mexico, Peru, Switzerland, Vietnam, Puerto Rico, United Kingdom, and United States have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year-specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

Harmonized geography variables for Chile and Sierra Leone have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year-specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

An error affecting codes for COMPUTER for Senegal 2013 was corrected.

An error affecting labels available in IND for Peru 1993 was corrected.

An error affecting codes for persons previously residing abroad for MIG1_5_BO in Bolivia 2001 and 2012 was corrected.

EDUCAR, EDATTAIN, and YRSCHOOL were adjusted in the Argentina samples to incorporate information on completion of education levels in the data harmonization.

HHWT and PERWT were calibrated in Kenya 1979 to properly reflect the population distribution by province.

In GQ (group quarters status), persons residing in hospitals of all types were reclassified to 'institutional group quarters' from 'other group quarters,' making their treatment consistent with GQTYPE.

Errors affecting codes for BPLBJ2 in Benin 1979, 1992, and 2002 were corrected.

Errors affecting codes for GEO2_BR1970 in Brazil 1970 were corrected.

GQ: Group quarters (collective dwelling) status

Data file: SWE1890_PHC-H-H.dat

Overview

Type: Discrete Decimal: 0 Width: 2 Range: - Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
00	Vacant
10	Households
20	Group quarters (collective), n.s.
21	Institutions
22	Other group quarters
29	1-person unit created by splitting large household
99	Unknown/group quarters not identified

description

DEFINITION

GQ identifies households as vacant dwellings, group quarters, or private households. Group quarters -- collective dwellings -- are generally institutions and other group living arrangements such as rooming houses and boarding schools.

Institutions often retain persons under formal supervision or custody, such as correctional institutions, military barracks, asylums, or nursing homes. Educational and religious group dwellings (e.g., boarding schools, convents, monasteries, etc.) are also included in the institutional classification.

Group quarter designations are often useful for understanding the universe of households that answered questions about household characteristics. Censuses will often exclude group quarters from such questions.

Group Quarters Variables -- HOUSEHOLD	IPUMS

HHWT: Household weight**Data file:** SWE1890_PHC-H-H.dat**Overview**

Type: Continuous Decimal: 2 Width: 8 Range: - Format: Numeric

description

DEFINITION

HHWT indicates the number of households in the population represented by the household in the sample.

For the samples that are truly weighted (see the comparability discussion), HHWT must be used to yield accurate household-level statistics.

NOTE: HHWT has 2 implied decimal places. That is, the last two digits of the eight-digit variable are decimal digits, but there is no actual decimal in the data.

concept

CONCEPT

var_concept.title	Vocabulary
Technical Household Variables -- HOUSEHOLD	IPUMS

Imputation and derivation

DERIVATION

HHWT is an 8-digit numeric variable with 2 implied decimal places. See the variable description.

PERSONS: Number of person records in the household**Data file:** SWE1890_PHC-H-H.dat**Overview**

Type: Continuous Decimal: 0 Width: 4 Range: - Format: Numeric

description

DEFINITION

PERSONS indicates how many person records are included in the household (i.e., the number of person records associated with the household record in the sample). These person records will all have the same serial number (SERIAL) as the household record. The information contained in the household record will normally apply to all of these persons.

concept

CONCEPT

var_concept.title	Vocabulary
Technical Household Variables -- HOUSEHOLD	IPUMS

Imputation and derivation

DERIVATION

PERSONS is a 4-digit numeric variable.

RECTYPE: Record type

Data file: SWE1890_PHC-H-H.dat

Overview

Type: Continuous Decimal: 0 Width: 1 Range: - Format: character

Questions and instructions

CATEGORIES

Value	Category
H	Household
P	Person

description

DEFINITION

RECTYPE identifies the type of record for the case: household or person.

NOTE: RECTYPE is an alphabetic (character string) variable with a value of 'H' for household records and 'P' for person records. RECTYPE will not appear as a variable in the default rectangular extracts produced by the data extract system. It is only available in hierarchical extracts, to distinguish between the two record types.

description

DEFINITION

SAMPLE identifies the IPUMS sample from which the case is drawn. Each sample receives a unique 9-digit code. The code is structured as follows:

The first 3 digits are the ISO/UN codes used in COUNTRY

The next 4 digits are the year of the census/survey

The final 2 digits identify the sample within the year. For the last two digits, censuses or large census-like surveys have a value "0" (e.g, 01) in the second-to-last digit, household surveys have a value of "2" (e.g., 21), and employment surveys have a value of "4" (e.g., 41).

SERIAL: Household serial number**Data file:** SWE1890_PHC-H-H.dat**Overview**

Type: Continuous Decimal: 0 Width: 12 Range: - Format: Numeric

description

DEFINITION

SERIAL is an identifying number unique to each household in a given sample. All person records are assigned the same serial number as the household record that they follow. (Person records also have their own unique identifiers -- see PERNUM.) The combination of SAMPLE and SERIAL provides a unique identifier for every household in the IPUMS-International database; SAMPLE, SERIAL and PERNUM uniquely identify every person in the database.

SERIAL can be used to identify dwellings in some samples. In these samples, the first 7 digits of SERIAL provide the dwelling number common to all households that were sampled from the same structure. The last three digits give the sequence of the household within the dwelling. The following is a list of samples in which dwellings can be inferred:

Chile 1970, 1992, 2002Colombia 1993, 2005Costa Rica 1984, 2000Cuba 2002Dominican Republic 1981, 2002, 2010Ecuador 1990, 2001Germany 1971Hungary 1980, 1990, 2001Jamaica 1982, 1991, 2001Malaysia 1970, 1991, 2000Mexico 1995, 1990, 2000, 2005Nigeria 2006Panama 2000Peru 1993, 2007Portugal 1981, 1991, 2001Spain 1991Uruguay 2011Venezuela 1990, 2001Vietnam 1989In all other samples, the last 3 digits are always zeroes.

SERIAL was constructed for IPUMS-International, and has no relation to the serial number in the original datasets.

The U.S. 1900 sample and 1880 10% sample have multi-household dwellings that can be identified using the last 3 digits of SERIAL.

concept

CONCEPT

var_concept.title	Vocabulary
Technical Household Variables -- HOUSEHOLD	IPUMS

Imputation and derivation

DERIVATION

SERIAL is a 10-digit numeric variable.

The last 3 digits of SERIAL indicate household number within dwelling for selected samples noted in the variable description. In all other samples, the last 3 digits are always zeroes.

FARM: Farm status, historical**Data file:** SWE1890_PHC-H-H.dat**Overview**

Type: Discrete Decimal: 0 Width: 1 Range: - Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
1	No one in household with any connection to agriculture
2	At least one household member works as farmer
3	At least one household member works as agricultural laborer
4	At least one household member works as a cottar
9	Unknown

description

DEFINITION

FARM indicates the connection of a household to agriculture. To accommodate differences in census enumeration practices and occupational structure, FARM is not constructed in the same way as FARMIPUM.

FARM classifies a household's connections to agriculture into four levels:

1: Nobody in the household indicates any connection with agriculture

2: At least one member of the household is a farmer, and the household's location meets the population [density] threshold. Farmers are identified by having an occupation in minor group 6-1 (See the OCCISCO codes). If the only agricultural occupation(s) in the household were husbandmen or cottars (61115), the household did not receive this code. Husbandmen and cottars are found in Denmark, Norway, Sweden, and Iceland, and their residence was not always on a farm. For all full-count England and Wales datasets and for Scotland 1881, a parish population density threshold of 75 persons per acre was applied. For the two percent United Kingdom 1851 sample, a population density threshold of 64 persons per acre was applied. Households with farmers that were in locations with greater population [densities] were not given this code. Parish density information is not available in Scotland 1861, 1871, or 1891. FARM is defined based on occupation alone in these samples. 3: At least one member of the household was an agricultural laborer; or in Norway there was a cottar in the household, who had no other trade.

FARMIPUM: Farm status, IPUMS historical**Data file:** SWE1890_PHC-H-H.dat

Overview

Type: Discrete Decimal: 0 Width: 1 Range: - Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
1	Non-farm
2	Farm

description

DEFINITION

FARMIPUM identifies farm households according to the IPUMS-USA definition. Any household containing a person with the occupation "farmer" is coded as a farm, including group quarters.

Farmers are identified as individuals with an OCCHISCO code between 61110 and 61400. In the United States, we also check if there is anyone in the household with an US1880A_0406 code of 100. For the two percent sample of United Kingdom 1851, we use the OCCUK code of 100.

Any household containing a farmer under these definitions is regarded as a farm. FARMIPUM does not require the household to be in a non-urban area. The variable FARM restricts farm status to non-urban areas only, based on the (URBAN) variable.

08	Non-family household
09	Unclassified subfamily
10	Other relative or non-relative household
11	Group quarters
99	Unclassifiable

description

DEFINITION

HHTYPE is a constructed variable that describes the composition of households.

HHTYPE is constructed from information in RELATE (relationship to head), from the constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father), and from information on group quarters status, GQ.

2	2 families
3	3 families
4	4 families
5	5 families
6	6 families
7	7 families
8	8 families
9	9 or more families

description

DEFINITION

NFAMS is a constructed variable that indicates the number of families within each household. Family membership is defined by FAMUNIT. A "family" is any group of persons related by blood, adoption, or marriage. An unrelated individual within the household is considered a separate family. Thus, a household consisting of a widow and a domestic employee contains two families; a household consisting of a large, multi-generation extended family with no persons unrelated to the head counts as a single family.

NFAMS is constructed from information in RELATE (relationship to head) and from the constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father). See those variable descriptions for more detail.

description

DEFINITION

PARSE indicates the parish in Sweden where the household was located. Parishes are the smallest level of geography identified for the Sweden historical datasets and are stable over time. Other geography variables from 1880 Sweden include GEO1_SE1880_1910.

Codes for this variable are based upon the official Swedish six-digit code for county, municipality and parish -- the SCB-code. This code has been used for administrative and statistical purposes since the beginning of the 1950s. The extended code was invented in the early 1990s to keep track of subsequent generations of SCB-codes, where, for example, a parish was split and one of the parts inherited the old code. The SCB-code is used extensively in the archival community to identify parish and fiscal records and as a means of linking to other records within a number of archival information systems, in particular the national system ARKIS-II.

The coding table used in IPUMS is more extensive than the one used by the Swedish National Archives. Certain codes for non-territorial parishes, such as military establishments, hospitals, prisons and asylums that have been added, were codes for parishes that were merged into larger parishes during the 19th century. These new codes will be inserted into the official National Archives table upon verification.

NFATHERS: Number of fathers in household

Data file: SWE1890_PHC-H-H.dat

Overview

Type: Discrete Decimal: 0 Width: 1 Range: - Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
0	No fathers in household
1	1 father
2	2 fathers
3	3 fathers
4	4 fathers
5	5 fathers
6	6 fathers
7	7 fathers
8	8 fathers
9	9 or more fathers in household

description

DEFINITION

NFATHERS is a constructed variable indicating the number of fathers -- of persons of any age -- within a household.

NFATHERS is constructed using the IPUMS-International pointer variable POPLOC (father's location in the household).

PRMFAMSZ: Size of primary family, historical

Data file: SWE1890_PHC-H-H.dat

Overview

Type: Continuous Decimal: 0 Width: 4 Range: - Format: Numeric

description

DEFINITION

PRMFAMSZ is the size of the primary, or first, family in the household. It is the FAMSIZE of the first family unit (FAMUNIT) recorded in the household.

PRMFAMSZ and FAMSIZE are constructed from information in RELATE (relationship to head of household) and from the constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father).

Note: Users should be aware that in the United States census of 1880, where relationship to the head was not transcribed for non-relatives, FAMSIZE and PRMFAMSZ may be inaccurate in some cases.

description

DEFINITION

SERVANTS is a constructed variable that indicates the number of servants in the household, who are not related to the household head but are likely to be working in the household.

SERVANTS was constructed uniformly for all pre-1950 samples, based on information in RELATE and occupation (OCCHISCO or OCC50US). Specifically, in all countries SERVANTS counts the number of people in the household who meet the following conditions: 1) their relationship to head was non-relative and their occupation indicated they were a servant; 2) an occupation response other than servant but a relationship code of servant; 3) an occupation of servant and a surname different from the head of household (for samples that lack relationship-to-head information).

The variable SERVANTS is top-coded at 99.

INTERVIEWER INSTRUCTIONS

f. The enumeration form is divided into 14 columns with the following content:

Col. 2: That the names of villages or other places of residence (blocks or wards in cities) should be written on a special row and underlined. It should be noted if the village or place of residence belongs to another judicial district than the rest of the parish. The word "urban district" [köpingslikt område] should also be added for those rural areas where the population is concentrated, including at least 100 persons, and where the houses are concentrated along one or more streets, whereby the area takes on the appearance of a small town (like for example some suburbs, railway stations, fishing villages, loading sites, factory sites or larger rural villages). It should be noted if a place of residence belongs to such an "urban district".

description

DEFINITION

This variable identifies the parish code within a county. The same codes are used in 1890 and 1900.

UNIVERSE

Sweden 1890: All households

Geography: O-Z Variables -- HOUSEHOLD	IPUMS

MOMLOC: Mother's location in household**Data file:** SWE1890_PHC-P-H.dat**Overview**

Type: Continuous Decimal: 0 Width: 3 Range: - Format: Numeric

description

DEFINITION

MOMLOC is a constructed variable that indicates whether or not the person's mother lived in the same household and, if so, gives the person number of the mother (see PERNUM). MOMLOC makes it easy for researchers to link the characteristics of children and their (probable) mothers.

The method by which probable child-mother links are identified is described in PARRULE.

The general design of MOMLOC and other constructed variables follows the methods developed for IPUMS-USA "Family Interrelationships," but the details vary significantly. For more details on the construction of MOMLOC, see the Comparability section of PARRULE and this paper on IPUMSI family linking methodology.

Note: MOMLOC identifies social relationships (such as stepmother and adopted mother) as well as biological relationships. The variable STEPMOM is designed to identify some of these social relationships. To restrict MOMLOC to biological mothers, such as for own children fertility estimation, MOMLOC should be reset to zero when STEPMOM is greater than zero.

Questions and instructions

CATEGORIES

Value	Category
-------	----------

0	No mother link
1	Unambiguous mother link
2	Daughter/grandchild/greatgrandchild link
3	Ambiguous mother link
7	Spouse of father becomes stepmother

description

DEFINITION

MOMRULEH explains the criteria by which the variable MOMLOC linked the person to a probable mother in pre-1950 datasets.

Pre-1950 datasets in IPUMS International establish child-mother links according to four basic rules, and MOMRULEH gives the number of the rule that applied to the link in question. MOMRULEH works the same way for all countries. A lower-numbered rule (greater than 0) takes precedence over a higher numbered rule. The codes for MOMRULEH are as follows:

0 = No mother of this person present in the household.

1 = Unambiguous relationship. This rule covers four basic cases, and occurs when the person linked is 10 to 69 years younger than the probable parent. All relationship pairings are not available in every sample. The allowable relationship pairings are as follows:

Child linked to head or spouse/unmarried partner of the head
 Head or sibling linked to parent
 Spouse or sibling-in-law linked to parent-in-law
 Child/child-in-law linked to head or spouse
 2 = Grandchildren. Potential mothers are females listed as child or child-in-law in RELATE who are 13-49 years older than persons listed as grandchildren and who share the grandchild's surname. If there is more than one potential mother, we used relative positions in the household, age and marital status to decide the link.

3 = Other relatives and non-relatives. Link to a preceding person with a plausible relationship pairing of child-to-mother, where the mother is 13- 49 years older, is ever-married, and shares the child's surname. The mother must immediately precede the child or all intervening persons must also be linked to the mother as spouse or child. No links are made for non-relatives over age 17. Permissible relationship pairings are as follows (child to mother):

Nephew/niece to sibling or sibling-in-law
 Cousin to aunt/uncle
 Other relative to sibling
 Grandchild to other relative
 Other relative to other relative (RELATEH code 1000, 1001, 1061)
 Non-relative to non-relative (RELATEH code 1100-1303)
 7= If the child is already linked to a father (see POPLOC and POPRULEH), and that father has a wife present in the household who has not been linked to the child by another rule, the wife is linked to the child as a stepmother, regardless of the age gap between child and the stepmother.

Consistency checks: If a husband and wife were both linked to the same mother, historic samples chose the best mother link based on detailed relationship (RELATEH) and proximity within the household. If a person is linked to two parents who are not linked to each other, remove one of the parental links on the basis of proximity within the household.

Constructed Family Interrelationship Variables -- PERSON	IPUMS

PERNUM: Person number

Data file: SWE1890_PHC-P-H.dat

Overview

Type: Continuous Decimal: 0 Width: 4 Range: - Format: Numeric

description

DEFINITION

PERNUM numbers all persons within each household consecutively (starting with "1" for the first person record of each household). When combined with SAMPLE and SERIAL, PERNUM uniquely identifies each person in the IPUMS-International database.

concept

CONCEPT

var_concept.title	Vocabulary
Technical Person Variables -- PERSON	IPUMS

Imputation and derivation

DERIVATION

PERNUM is a 4-digit numeric variable.

PERWT: Person weight

Data file: SWE1890_PHC-P-H.dat

Overview

Type: Continuous Decimal: 2 Width: 8 Range: - Format: Numeric

description

DEFINITION

PERWT indicates the number of persons in the actual population represented by the person in the sample.

For the samples that are truly weighted (see the comparability discussion), PERWT must be used to yield accurate statistics for the population.

NOTE: PERWT has 2 implied decimal places. That is, the last two digits of the eight-digit variable are decimal digits, but there is no actual decimal in the data.

concept

CONCEPT

var_concept.title	Vocabulary
Technical Person Variables -- PERSON	IPUMS

Imputation and derivation

DERIVATION

PERWT is an 8-digit numeric variable with 2 implied decimal places. See the variable description.

POPLOC: Father's location in household

Data file: SWE1890_PHC-P-H.dat

Overview

Type: Continuous Decimal: 0 Width: 3 Range: - Format: Numeric

description

DEFINITION

POPLOC is a constructed variable that indicates whether or not the person's father lived in the same household and, if so, gives the person number of the father (see PERNUM). POPLOC makes it easy for researchers to link the characteristics of children and their (probable) fathers.

The method by which probable child-father links are identified is described in PARRULE.

The general design of POPLOC and other constructed variables follows the methods developed for IPUMS-USA "Family Interrelationships," but the details vary significantly. For more details on the construction of POPLOC, see the Comparability section of PARRULE and this paper on IPUMSI family linking methodology.

Note: POPLOC identifies social relationships (such as stepfather and adopted father) as well as biological relationships. The variable STEPPPOP is designed to identify some of these social relationships. To restrict POPLOC to biological mothers, such as for own children fertility estimation, POPLOC should be reset to zero when STEPPPOP is greater than zero.

0	No father link
1	Unambiguous father link
2	Son/granchild/greatgrandchild link
3	Ambiguous father link
7	Husband of mother becomes stepfather

description

DEFINITION

POPRULEH explains the criteria by which the variable POPLOC linked the person to a probable father in pre-1950 datasets.

In the pre-1950 datasets, child-father links were established according to four basic rules, and POPRULEH gives the number of the rule that applied to the link in question.

POPRULEH works the same way for all countries. A lower-numbered rule (greater than 0) takes precedence over a higher numbered rule. The codes for POPRULEH are as follows:

0 = No father of this person present in the household.

1 = Unambiguous relationship. This rule covers four basic cases, and occurs when the person linked is 10 to 69 years younger than the probable parent. All relationship pairings are not available in every sample. The allowable relationship pairings are as follows:

Child linked to head or spouse/unmarried partner of the head
 Head or sibling linked to parent
 Spouse or sibling-in-law linked to parent-in-law
 Child/child-in-law linked to head or spouse
 2 = Grandchildren. Potential fathers are males listed as child or child-in-law in RELATE 13-79 years older than persons listed as grandchildren and who share the grandchild's surname. If there is more than one potential father, we used relative positions in the household, age and marital status to decide the link.

3 = Other relatives and nonrelatives. Link to a preceding person with a plausible relationship pairing of child-to-father, where the father is 13-79 years older, is ever-married, and shares the child's surname. The father must immediately precede the child or all intervening persons must also be linked to the father as spouse or child. Permissible relationship pairings are as follows (child to father):

Nephew/niece to sibling or sibling-in-law
 Cousin to aunt/uncle
 Other relative to sibling
 Grandchild to other relative
 Other relative to other relative (RELATEH code 1000, 1001, 1061)
 Non-relative to non-relative (RELATEH code 1100-1303)
 7 = If a child is linked to a mother (see MOMLOC and MOMRULEH), and that mother is linked to a husband who has not been linked to the child by another rule, the husband is linked to the child as a stepfather, regardless of the age gap between child and husband.

Consistency checks: If a husband and wife were both linked to the same father, the best father link was chosen based on detailed relationship (RELATEH) and proximity within the household. If a person is linked to two parents who are not linked to each other, remove one of the parental links on the basis of proximity within the household.

Constructed Family Interrelationship Variables -- PERSON	IPUMS

SPLOC: Spouse's location in household

Data file: SWE1890_PHC-P-H.dat

Overview

Type: Continuous Decimal: 0 Width: 3 Range: - Format: Numeric

description

DEFINITION

SPLOC is a constructed variable that indicates whether or not the person's spouse lived in the same household and, if so, gives the person number (PERNUM) of the spouse. SPLOC makes it easy for researchers to link the characteristics of (probable) spouses.

The method by which probable spouse-spouse links are identified is described in SPRULE.

The general design of SPLOC and other constructed variables is modeled on the methods developed for IPUMS-USA "Family Interrelationships", but the details vary significantly. For more details on the construction of SPLOC, see the Comparability section of SPRULE and this paper on IPUMSI family linking methodology.

concept

CONCEPT

Constructed Family Interrelationship Variables -- PERSON	IPUMS

Imputation and derivation

DERIVATION

SPLOC is a 3-digit numeric variable.

Codes0 = No spouse of this person present in the household.

1 or higher = The person number of this person's spouse

SPRULEH: Rule for linking spouse (historical)

Data file: SWE1890_PHC-P-H.dat

Overview

Type: Discrete Decimal: 0 Width: 1 Range: - Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
0	No spouse link
1	Unambiguous adjacent link
2	Unambiguous non-adjacent links -- consistent relationship to head/age differences
3	Weak relationship pairing -- adjacent links
4	Weak relationship pairing -- non-adjacent links

description

DEFINITION

SPRULEH explains the criteria by which the variable SPLOC linked the person to a probable spouse for the pre-1950 datasets.

Spouse-spouse links are established according to four basic rules, and SPRULEH gives the number of the rule that applied to the link in question.

SPRULEH works the same way for all countries. In all countries both partners are required to be age 12 and older and to either have a marital status of married or be the unmarried partner of the household head (see MARST and RELATEH). In addition, both partners were required to share the same surname, except when linking heads to spouses or in the Scandinavian samples where SURSIM does not capture family relationships (e.g. patronymic surnames in Norway and non-reporting of child surnames in Sweden). In some samples, however, we were compelled to customize the links beyond what could be implemented more generally.

The codes for SPRULEH are as follows. A lower-numbered rule (greater than 0) takes precedence over a higher numbered rule. All relationship pairings are not available in every sample. Additional conditions were added to the rules for some samples.

0 = No spouse of this person present in household.

1 = A married/in-union woman and a married/in-union man were linked because she immediately followed or preceded him in the dataset and both persons' relationship to the household head (see RELATEH) justified a link, as follows:

Head to spouse Unmarried partner to spouse Parent to parent Parent-in-law to parent-in-law Child to child-in-law Sibling to sibling-in-law
 2 = A married woman and a married man who did not appear adjacently on the form were linked because:
 they had one of the relationship sets listed in rule 1
 the woman was at least 13 years old
 the man was at least 15 years old
 the man was not more than 25 years older than the woman, AND
 the woman was not more than 10 years older than the man.
 3 = A married/in-union woman and a married/in-union man were linked because she immediately followed or preceded him in the dataset and both persons' relationship to the household head (RELATEH) suggested a possible pairing and the female spouse was no more than 10 years older or 25 years younger than the male spouse. The possible relationship pairings are as follows:

Other relative to other relative (RELATEH codes 1000, 1001, 1061)
 Non-relative to non-relative (RELATEH codes 1000-1303)
 Child to other relative
 Sibling to other relative
 Grandchild to grandchild-in-law
 Grandparent to grandparent/
 grandparent-in-law/grandparent-in-law
 Grandchild to other relative
 Aunt to uncle
 Nephew/niece to nephew/niece
 Cousin to cousin
 Unknown to unknown; missing to missing
 Head to unknown or missing
 Child to unknown or missing
 4 = Same as rule 3, but the married/in-union woman was not adjacent to the married/in-union man in the data.

Constructed Family Interrelationship Variables -- PERSON	IPUMS

STEPMOMH: Probable stepmother (historical)**Data file:** SWE1890_PHC-P-H.dat**Overview**

Type: Discrete Decimal: 0 Width: 1 Range: - Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
0	No stepmother present
1	Improbable age difference
2	Spouse of father
3	Identified stepmother
5	Identified as adopted

description

DEFINITION

STEPMOMH indicates for the pre-1950 datasets whether a person's mother, as identified by MOMLOC, was most probably not the person's biological mother. Non-zero values of STEPMOMH explain why it is probable that the person's mother was a step- or adopted mother. A value of 0 indicates no likely stepmother because (1) the mother identified in MOMLOC was probably the biological mother or (2) there is no mother of this person present in the household. Only persons under age 19 are linked to their mothers.

The codes for STEPMOMH are as follows:

0 = Biological mother or no mother of this person present in household.

1 = Age difference between mother and child was less than 12 or greater than 54 years.

2 = Link was established only because the mother was married to father.

3 = Child explicitly identified relationship as stepchild.

5 = Child explicitly identified as adopted.

If more than one value applied to the case, the lowest value was assigned.

See MOMRULEH for a description of the linking process.

Users should note that there are many stepmothers and adopted mothers in the population that cannot be identified with information available in the censuses. Therefore, STEPMOMH will always under-represent their actual number in the population.

STEPPOPH: Probable stepfather (historical)**Data file: SWE1890_PHC-P-H.dat****Overview**

Type: Discrete Decimal: 0 Width: 1 Range: - Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
0	No stepfather present
1	Improbable age difference
2	Spouse of mother
3	Identified stepfather
5	Identified as adopted

description

DEFINITION

STEPPOPH indicates for the pre-1950 datasets whether a person's father, as identified by POPLOC, was most probably not the person's biological father. Non-zero values of STEPPOPH explain why it is probable that the person's father was a step- or adopted father. A value of 0 indicates no likely stepfather because (1) the father identified in POPLOC was probably the biological father or (2) there is no father of this person present in the household. Only persons under age 19 are linked to their fathers.

The codes for STEPPOPH are as follows:

0 = Biological father or no father of this person present in household.

1 = Age difference between father and child was less than 14 years.

2 = Link was established only because the father was married to mother.

3 = Explicitly identified relationship (stepchild).

5 = Explicitly identified relationship (adopted).

If more than one value applied to the case, the lowest value was assigned.

See POPRULEH for a description of the linking process.

Users should note that there are many stepfathers and adopted fathers in the population that cannot be identified with information available in the censuses. Therefore, STEPPOPH will always under-represent their actual number in the population.

description

DEFINITION

FAMSIZE counts the number of the person's own family members living in the household with her/him, including the person her/himself. These include all persons related to the person by blood, adoption, or marriage as indicated by the census forms or inferred from them.

FAMSIZE is calculated from the units identified in the IPUMS constructed variable FAMUNIT (family unit membership). The primary family is defined as all persons related to the head in the RELATE variable. Secondary families are individuals or groups of persons linked together by the IPUMS constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of

spouse, mother, and father).

Constructed Family Interrelationship Variables -- PERSON	IPUMS

FAMUNIT: Family unit membership

Data file: SWE1890_PHC-P-H.dat

Overview

Type: Continuous Decimal: 0 Width: 4 Range: - Format: Numeric

description

DEFINITION

FAMUNIT is a constructed variable indicating to which family within the household a person belongs.

All persons related to the household head receive a 1 (see RELATE). Each secondary family or secondary individual receives a higher code. For purposes of FAMUNIT, secondary families are individuals or groups of persons linked together by the IPUMS constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father).

concept

description

DEFINITION

NUMGEN describes the number of generations in a given family unit. (See the documentation for FAMUNIT).

For example, a family unit comprised of parents and children has a NUMGEN of 2. A family unit which has co-resident grandparents, parents and children has a NUMGEN of 3. A family unit with only grandparents and grandchildren has a NUMGEN of 2, as the intervening generation is not resident.

CATEGORIES

Value	Category
0	NIU (not in universe)
1	Single/never married
2	Married/in union
3	Separated/divorced/spouse absent
4	Widowed
9	Unknown/missing

description

DEFINITION

MARST describes the person's current marital status according to law or custom. Individuals who remarried should report the status relevant to their most recent marriage. Census instructions rarely explicitly limit marital status to strictly legal unions.

Note regarding universe: The lowest age at which a person can be anything but "never married" varies among samples.

description

DEFINITION

RELATEH is the NAPP version of the RELATE variable, which describes an individual's relationship to the head of household. This variable is largely compatible with the IPUMS-International variable RELATE, though some changes have been made.

The relationship codes are divided into two categories-relatives (codes 1- 10) and non-relatives (codes 11-12). The codes for relatives are self- explanatory. The non-relative codes are divided into three groups: "Partner, friend, visitor", roughly described as persons who do not pay or work for their accommodations (unless they share ownership); "Other non-relatives", including those persons paying or working for accommodations; and "Institutional inmates".

description

DEFINITION

BPLSE1 indicates the county of birth for those born in Sweden, whenever this is possible to determine from the given place of birth. This variable is drawn from the parish of birth variable BPLSE2, which is stable over time and provides greater detail. The codes of BPLSE are comparable to the codes for County, COUNTYSE.

Persons born outside Sweden are coded 99. Users may find more detailed information about persons born outside of Sweden in the variable for country of birth, BPLCNTRY.

BPLSE2: Parish of birth, Sweden

Data file: SWE1890_PHC-P-H.dat

Overview

Type: Continuous Decimal: 0 Width: 9 Range: - Format: Numeric

description

DEFINITION

BPLSE2 indicates the person's parish of birth within Sweden. This variable is a nine digit code which is stable over time.

This code is based upon the official Swedish six digit code for county, municipality and parish -- the SCB-code. This code has been used for administrative and statistical purposes since the beginning of the 1950s. The extended code was invented in the early nineties to keep track of subsequent generations of SCB-codes, where, for example, a parish was split and one of the parts inherited the old code. It is used extensively in the archival community to identify parish and fiscal records and as a means of linking to other records within a number of archival information systems, in particular the national system ARKIS-II.

The coding table used in the IPUMS data file is more extensive than the one used by the National Archives. Certain codes for non-territorial parishes, such as military establishments, hospitals, prisons and asylums have been added, as well as codes for parishes that were merged into larger parishes during the 19th century. These new codes will be inserted into the official National Archives table upon verification.

description

DEFINITION

LABFORCE is a dichotomous variable identifying whether a person participated in the labor force. Labor force participation generally means working or seeking work within a specified reference period.

For most samples LABFORCE is a recode of EMPSTAT (employment status). A consistent lower age universe of 15 or older has been applied to increase comparability across samples. Full detail is retained in EMPSTAT, which should be used for any study of child labor.

33150	Money collector

33160	Cash desk cashier
33170	Toll collectors
33180	Collector (cash or account)
33190	Bookkeeping, account and cash handling workers nec
33210	Railway clerks (UK) and railway agents (CA/US)
33220	Baggage agents and baggage men
33320	Agent, water transport (principally steamship and steamboat)
33330	Agent, land transport (non-rail)
34000	Office machine operators
36010	Conductors, nfs
36020	Railway guards (UK) and railroad conductors (US/CAN)
36030	Sleeping- or pullman-car attendants
36040	Bus, tram or streetcar conductors
36090	Transport conductors, nec
37020	Postal, mail and telegraph clerks
37030	Mail carriers, aka postmen (UK)
37040	Messengers
37050	Mail sorters
37090	Post office, mail, and message workers nec
38010	Tel. operator
38020	Telephone operator
38030	Telegraph operator
38090	Other telephone/telegraph operators
39000	Clerk, nfs
39100	Stock, weight and shipping clerks
39130	Stock records clerk
39310	Office clerks, specialisation unknown
39320	Correspondence clerks
39340	Legal clerks
39350	Insurance clerks
39390	Other correspondence and reporting clerks
39400	Hotel clerk or other receptionist
39500	Library and filing clerks
39600	Railroad, railway clerk
39720	Timekeepers, railway
39730	Timekeepers, factory
39790	Timekeepers, undefined and nec
39900	Other specified clerks
39990	Proofreader

40000	Sales workers, nfs
41000	Working proprietors, nfs
41010	Dealer, merchant etc. (wholesale and retail trade)
41015	Merchants, specified large-scale wholesaling
41020	Hirers out
42000	Buyers
42200	Buyers nec
43010	Agents nfs
43020	Commercial travellers
43030	Manufacturers and sales agents
43090	Other specialized agents
44110	Insurance, real state or securities salesmen, nfs
44120	Insurance salesmen and agents
44130	Real estate agents
44140	Brokers
44150	Stockbrokers
44160	Patent Agents
44190	Insurance, real estate and securities salesmen nec
44200	Advertising salesmen
44320	Auctioneers
44330	Appraisers
45120	Salespeople, wholesale or retail trade
45130	Clerks in shops and stores
45140	Fashion models
45190	Other sales personnel men, shop assistants and demonstrators
45220	Street sellers, pedlars and hawkers, non-food items
45230	Street sellers, pedlars and hawkers, food items
45240	Newsvendors
45250	Canvassers
45290	Other street traders for coffee and food
49020	Pawnbrokers
49030	Scrap and junk dealers, scavengers
49040	Street vendors, canvassers and news vendors, newsvendors
49090	Dealers and salesworkers nec
51020	Hotel keepers and managers
51030	Restaurant keepers and managers
51040	Boarding and lodging house keepers and managers
51050	Pub, saloon, tavern and coffee house keepers
51060	Ship's pursers

51090	Other hospitality and entertainment keepers and managers
52020	Housekeeper
52030	Stewards
52040	Matrons
52050	Butlers
52090	Other housekeeping service supervisors
53100	Cooks
53101	Cook (domestic) UK only
53102	Cook (not domestic)
53103	Ship's cooks
53220	Waiter or waitress
53230	Bartender
53290	Other food and drink service workers
54010	Servants nfs
54020	House servants nfs and maids
54030	Personal servants and valets
54040	Nursemaids
54050	Companions
54060	Chambermaids and room attendants
54090	Other specified servants
55100	Caretakers and janitors
55200	Charworkers
55230	Window cleaners
55240	Chimney sweeps
55250	Refuse collectors and removers
55290	Other charworkers, cleaners and related workers
56000	Washing and laundry services
57020	Hairdressers
57030	Barbers
57040	Bath attendants
57090	Other barbers, hairdressers and related workers
58100	Firefighters
58210	Policemen and detectives, employer unknown
58220	Policemen and detectives, public service
58230	Policemen and detectives, private service
58240	Sheriffs and their deputies
58290	Other law enforcement officers
58300	Watchmen and guards
58410	Military, rank unknown

58420	Military officers
58430	Other members of the armed forces
58500	Prison keepers and guards
58900	Other protective service workers
59100	Guides
59200	Undertakers and embalmers
59300	Prostitutes
59920	Bookmakers (sport)
59930	Croupiers
59940	Nursing aids and attendants
59950	Errand boys and errand girls
59960	Practical aid (veterinary)
59990	Other service workers nec
61110	General farmers and farmers nfs
61115	Husbandmen or cottars
61117	Female farmer
61120	Major landowner
61220	Field crop farmers
61230	Orchardists and fruit farmers
61240	Market gardeners
61250	Nurserymen and florists
61260	Livestock farmers
61270	Dairy farmers
61280	Poultry farmers
61290	Other specialised farmers
61320	Farmer and fisherman
61330	Cottar and fisherman
61400	Farm managers, foremen and supervisors nfs
62110	Farm workers, specialisation unknown
62113	Farmer's sons and other male relatives
62200	Farm workers (field crop and vegetables)
62300	Farm labourers, orchard and fruit farm workers
62410	Livestock workers, general or nfs
62420	Cattle workers, except specified dairy
62430	Sheep workers
62440	Pig workers
62450	Fur-bearing animal workers
62460	Horse workers
62461	Grooms and horse keepers (domestic)

62463	Grooms and horse keepers (not domestic)
62470	Horse breaker
62490	Livestock workers, nec
62500	Farm workers (dairy)
62600	Farm workers (poultry)
62710	Gardeners nfs
62711	Gardener (domestic)
62713	Gardener (not domestic)
62720	Market garden labourers
62730	Nursery labourers
62740	Landscape gardeners
62790	Other nursery workers and gardeners
62800	Farm machinery operators
62920	Other animal workers e.g., dogs, elephants
62930	Other plant workers e.g., gathers of herbs etc.
62940	Groundskeepers, etc.
62990	Others in agricultural or husbandry
63110	Woodsmen and workers in the woods, nfs
63120	Lumbermen, loggers and kindred workers
63130	River drivers
63140	Wood cutters and choppers
63190	Others in logging and wood cutting
63220	Foresters and wood wardens
63230	Forestry workers
63240	Timber cruisers
63250	Forest fire-fighters
63290	Other forestry workers
64100	Fishermen
64920	Fish farm workers
64930	Oyster farm workers
64940	Whale hunters
64950	Whale or seal hunters
64960	Seal hunters
64970	Trappers or hunters
64990	Other fishermen, hunters and related workers
71120	Miners
71130	Quarrymen
71190	Others working in mines and quarries
71200	Mineral or stone treaters

71300	Well drillers, borers and related workers
72000	Metal workers, specialisation unknown
72100	Metal smelter and furnacemen
72200	Metal rollers
72300	Metal melters and reheaters, and workers in metal melting mills
72400	Metal casters and workers in metal casting plants
72500	Metal moulders and coremakers
72600	Metal annealers, temperers and hardeners
72700	Metal drawers and workers in metal drawing
72800	Metal platers and coaters
72900	Other (specialised) metal workers
73100	Wood treaters
73200	Sawyers and other titled wood/sawmill operatives
73300	Papermill machine operators and paper makers
74000	Chemical workers, product nfs
74100	Drug workers
74200	Gunpowder and explosive makers
74320	Charcoal burners
74330	Coal gas makers
74340	Tar makers
74390	Other coal product makers e.g., coke
74420	Salt makers
74430	Alkali and soda makers
74500	Oil mill workers
74620	Paint and varnish makers
74630	Dye makers
74640	Ink, blacking, colouring, etc., makers
74720	Tallow chandlers, candle makers and grease makers
74730	Soap and perfume makers
74740	Glue, size and gelatine makers
74750	Wax and polish makers
74920	Fertilizer and manure makers
74930	Starch makers
74940	Turpentine makers
74990	Specified chemical workers nec
75000	Textile workers, specialisation unknown
75100	Fibre preparers
75200	Spinners, doublers, twistors and winders
75300	Weaving and knitting-machine setters and pattern-card preparers

75400	Weavers
75500	Knitters
75600	Bleachers, dyer or textile product finisher
75700	Rope makers
75920	Net maker
75990	Other specialised textile workers nec
76110	Tanners or fellmongers, specialisation unknown
76120	Fellmongers
76130	Tanners
76140	Leather carriers and finishers
76190	Other specified leather curers
76200	Fur and pelt dressers
77100	Millers and related workers
77200	Sugar refiners
77310	Butchers
77320	Pork butchers
77340	Slaughterer, meat cutters or meat packer
77350	Sausage makers
77360	Fish butchers
77380	Meat cannery workers and other meat preservers (not sausages)
77390	Other workers in meat preparation
77400	Cannery workers and other food preservers
77500	Butter, cheese and dairy product makers
77610	Baker and confectioner
77620	Bakers
77630	Confectioners and pastry makers
77640	Candy makers
77650	Chocolate makers
77690	Other baked goods makers
77700	Tea, coffee and cocoa preparers
77820	Brewers
77830	Maltsters
77840	Wine workers
77850	Vinegar makers and workers
77860	Distillers
77870	Makers of soft drinks
77880	Bottlers
77890	Other drinks makers and workers
77990	Other food and beverage processors

78100	Tobacco preparers and tobacco factory workers
78200	Cigar makers
78300	Cigarette makers
78400	Other tobacco product makers
79120	Tailors and tailoresses
79130	Dressmakers
79190	Other garment makers
79200	Furriers and fur workers
79320	Milliners
79330	Hat makers
79340	Straw hat makers
79390	Other hat makers
79400	Glove makers and related workers
79520	Seamstresses
79530	Sewers and sewing machine operators
79540	Embroiderers
79590	Others hand sewers
79620	Upholsterers (except vehicle)
79630	Vehicle trimmers and upholsterers
79640	Mattress makers
79690	Others working in upholstery jobs
79920	Sail, tent and awning makers
79930	Umbrella makers
79940	Artificial flower makers
79990	Other cloth and related product manufacturing workers
80100	Boot and shoe makers and repairers
80200	Specialised occupations in the boot and shoe making industry
80320	Saddlers and harness makers
80330	Trunk or bag maker
80390	Other leather goods makers
81120	Cabinet makers
81130	Chair makers
81140	Wicker furniture makers
81190	Other furniture makers
81210	Woodworkers
81220	Sawyers, woodworking
81230	Wood turners and handle makers
81240	Wood planers
81250	Wood carvers

81290	Other woodworking machine operators
81300	Coach, carriage and wagon makers
81400	Wheelwrights and cartwrights
81500	Coopers, hoop makers and benders
81600	Clog makers
81710	Box makers nfs
81720	Wooden box makers
81730	Paper box makers
81790	Box makers nec
81920	Wooden tool makers
81930	Ski makers
81990	Other makers of wooden products
82000	Stone carvers or cutters and stone yard workers
83120	Blacksmiths
83130	Hammersmiths
83140	Forgemen
83150	Farriers or horseshoers
83160	Specialised makers of forged metal products
83190	Other blacksmiths, hammermen and forgeing-press operators
83210	Tool makers nfs
83220	Tool and die makers
83230	Pattern makers nfs and nec
83290	Other tool makers and metal markers
83310	Metalworking machine operators
83320	Metal turners
83390	Other metal working machine operators
83400	Machinists
83520	Metal polishers and finishers
83530	Metal grinders and sharpeners
83540	Cutlers and cutting instrument makers
83550	Cutler (knives, forks, spoon)
83590	Other metal grinders, polishers and tool sharpeners nec
83600	Gunsmiths
83700	Locksmiths
83820	Saw makers
83830	Saw, spade, shovel and half wood/half metal agricultural instrument type things
83840	Chain makers
83850	Nailer and nail makers
83860	Wire makers

83890	Other metal workers nec
84110	Mechanics
84120	Millwrights
84130	Machine makers, builders and fitters
84140	Engine and locomotive builders
84150	Sewing machine makers and builders
84190	Other machinery fitters and machine assemblers
84220	Watch and clock makers
84230	Optical instrument makers and workers (not opticians)
84290	Other specialized instrument makers (not musical instrument makers)
84300	Bicycle makers
84400	Motor vehicle manufacturing and repair workers, specialization unknown
84460	Automobile manufacturing workers
84900	Others in machinery
85100	Electrical fitters and electrical equipment assemblers
85500	Electricians and wiremen
85600	Telephone and telegraph installers
85700	Linesmen: telephone, telegraph and electric
85920	Electrical products inspector or tester
85990	Other electrical fitters and related electrical workers
87120	Plumbers
87130	Pipe fitters
87220	Welders
87230	Braziers
87250	Flamecutter
87290	Other welders, braziers, solderers
87320	Sheet metal worker, general
87330	Coppersmith or copperware maker
87340	Tinsmith, tinner or tinker
87350	Boilermaker
87390	Other sheet metal workers
87420	Structural metal workers
87430	Rivettters nec
87490	Other structural metal preparers and erectors
87520	Ship and boat builders
87530	Shipwrights and ship joiners
87540	Ship's carpenters
87550	Block, mast and tackle makers
87560	Caulker

87590	Other ship builders
88020	Jewellers
88030	Goldsmith
88040	Silversmith
88050	Working with gems and stones
88090	Other jewellery and precious metal workers
89120	Glass makers
89130	Glass bottle makers
89190	Other specific glass makers
89200	Pottery and porcelain makers and workers
89300	Brick and tile makers
89400	Glass engravers, etchers and finishers
89500	Pottery and porcelain painters
89620	Cement makers
89630	Lime burners
89700	Clay-based products makers
90100	Rubber product makers
90200	Tire makers and vulcanisers
91020	Paper and paperboard products makers, except boxes
91090	Other paper product makers
91100	Paper and paper board product makers
92000	Printers nec
92110	Printers nfs
92120	Compositors
92190	Other compositors and typesetters
92200	Lithographic printers
92300	Stereotypers and electrotypers
92400	Lithographers
92500	Photo-engravers
92600	Bookbinders and related workers
92800	Textile printers
92900	Other printers and related workers
93110	Painters, nfs
93120	Painters, construction
93130	Painters, ship
93190	Other specialised painters nec
93200	Decorators
93320	Lacquerers and enamellers
93330	Japanners

93400	Gilders
94110	Musical instrument maker nfs
94120	Piano maker
94130	Piano tuner
94140	Organ builder
94190	Other musical instrument makers and tuner
94220	Basket makers
94230	Brush makers
94240	Broom makers
94290	Bristle and straw workers nec
94300	Non-metallic mineral product makers
94910	Other production or related worker, specialisation unknown
94920	Animal stuffers, taxidermists and shell workers
94930	Linoleum makers and floor cloth makers
94940	Toy and doll makers
94990	Production and related workers nec
95110	Mason nfs or combined
95120	Bricklayers
95130	Stone masons
95140	Plasterers
95150	Paviours
95160	Marble mason
95190	Others in construction
95200	Cement masons and finishers
95310	Roofer, specialisation unknown
95320	Slate and tile roofers
95330	Thatchers
95390	Other roofers
95410	Carpenter and joiner
95420	Carpenters
95430	Joiners
95440	Scaffolders
95490	Other wooden construction workers
95600	Pipe coverers and insulators
95700	Glaziers
95910	Construction workers nec
95920	Paperhangers
95930	Carpet planners
95940	Whitewashers

95950	Demolition workers
95960	Marblers
95990	Others in building construction
96100	Electricity generators
96220	Engineers (US) nfs
96230	Stationary engineers and engine men
96240	Stationary firemen and firemen nfs
96900	Other stationary engine and related equipment operators
97120	Ship boat loaders and dock workers
97130	Railway freight handlers
97140	Porters
97150	Packers
97190	Other freight handlers
97210	Riggers nec or nfs
97220	Ship riggers
97300	Crane and hoist operators
97410	Navy, excavator and diggers, nfs
97420	Road builders, workers and labourers
97430	Railway builders, workers and labourers
97440	Waterway and harbour builders, workers and labourers
97490	Other road, railway and related construction labourers
97900	Material handling equipment operators nec
98120	Seamen
98130	Boatmen and canalmen
98190	Other crew of boats, ships, etc.
98200	Ship's engine men
98300	Railway/railroad locomotive operators
98320	Railway/railroad engineers and enginemen
98330	Railway/railroad firemen and stokers
98420	Railway brakemen
98430	Railway signallers
98440	Railway switchmen and shunters
98490	Others skilled railway workers
98510	Drivers, nec
98520	Drivers (private)
98530	Drivers (personal, for hire)
98540	Drivers (public)
98550	Delivery men and drivers of goods
98560	Drivers (general haulage)

98562	Carter (agricultural)
98570	Teamsters (inc. mine driver, etc.)
98590	Others drivers
98700	Lock and gate keepers
98720	Lock keepers
98730	Gate keepers
98900	Other transport equipment operators
99120	Labourers nfs
99130	Common labourers or general labourers
99140	Day labourers (e.g., journalier)
99150	Worker nfs
99200	Factory labourers (unspecified)
99300	Occupational title unclassifiable
99420	Assistants nfs
99430	Helpers nfs
99440	Helpers of relative or helping at home
99450	Apprentices nfs
99500	Ambiguous responses
99998	Alternative occupation (Sweden)
99999	No occupation/unknown

description

DEFINITION

OCCISCO is a uniformly coded classification of occupations that is consistent across all countries. It is the most complicated variable to code consistently in the pre-1950 samples, and the present documentation does not fully cover the issues addressed. We will be progressively adding to the level of detail available on this variable. For example, we will occasionally provide examples of common responses below each code so that users will be able to see what responses were coded where. Users with queries about the coding of specific occupations should contact the IPUMS staff in the first instance. Users interested in variation in occupational responses below the level of detail provided in the codes (e.g., distinguishing "caretakers" from "janitors") should look at the OCCSTRNG variable.

The codes for OCC were adapted from the Historical International Standard Classification of Occupations (HISCO) coding scheme. More information on HISCO is available in M.H.D. van Leeuwen, I. Maas and A. Miles. (2002) HISCO: Historical International Standard Classification of Occupations. Leuven: Leuven University Press. HISCO in turn is based on the International Standard Classification of Occupations from 1968, commonly known as ISCO-68. Information on HISCO can also be located at the HISCO database of occupational titles, and the International Institute of Social History.

More information on the adaptations IPUMS made to HISCO can be found in the article "Occupational Classification in the North Atlantic Population Project" (2003), *Historical Methods*, Vol. 36, No. 2 (Part 2), pp.89-96.

Structure of the classification scheme

The classification scheme is hierarchical, in the sense that each digit in the 5 digit codes introduces a new level of detail. Codes sharing the same first 1, 2 or 3 digits are considered to be increasingly similar. For example, all people working in agriculture have the first digit 6. The first digit of a code indicates the "Major group" a person's occupation is in.

The second digit indicates a "Minor group" distinction. Continuing the previous example, people who have the first two digits "61" are farmers - who may specify what they are cultivating or tending - and farm managers. Thus, as well as sharing the characteristic of working in agriculture (6) they also share the characteristic of being owners or managers (61).

The first 3 digits denote the "Unit group" of an occupation. At the third digit level, we introduce more detail. For example, the unit group "612" indicates "Specialized farmers". Within this unit group, 4th and 5th digit distinctions known as "titles" or "headings" are made. For example, "61220" indicates "Field crop farmers," and "61230" indicates "Orchardists and fruit farmers."

Understanding headings

In general, if the last two digits of a code are "00" the heading is reserved for general titles. For example, in unit group "721" for "Metal smelter and furnace workers", the heading "72100" is reserved for responses such as "Metal smelter" and "Furnace men."

If the last two digits of a code are "10" the heading is reserved for "not further specified" titles (often abbreviated "n.f.s." or "nfs" in syntax files), and codes ending in "20", "30" and higher multiples of 10 are reserved for responses with more detail on some aspect of the occupation. For example, "58210" is the code for "Policemen and detectives, employer unknown," whereas "58220" and "58230" are the codes for "Policemen and detectives, public service," and "Policemen and detectives, private service" respectively.

Headings ending in digits other than "0" (e.g., 2, 3, 4, 9) are generally reserved for frequent responses specific to a particular country that probably belong with responses sharing the same first four digits of the heading. For example, "61115" ("Husbandman or cottar") in Norway and Sweden and "61117" ("Female farmer") in Canada could be classified with "Other general farmers" ("61110"), but occurred frequently enough that we felt they should be given a separate code for easier identification.

If the last two digits of a code are "90", the heading is reserved for "not elsewhere classified" responses. For example, "58290" is the code for "Other law enforcement officers".

The difference between "n.f.s." and "n.e.c." responses is that "n.f.s." responses are quite general, and may not offer much detail on the tasks and duties of the job. Conversely, "n.e.c." responses are typically quite detailed in the information provided, but there are not enough similar responses to justify a separate heading.

Alterations to HISCO

Compared to HISCO we have reduced the overall number of headings, while still introducing new ones, and retaining more detail from vaguely specified occupations.

In general, we made the fewest changes to the structure of the HISCO codes in major groups 0 and 1 (professional workers). We re-organized the codes within major groups 2 (administrative and managerial workers), 3 (clerical workers), 4 (sales workers), 5 (service workers), and 6 (workers in agriculture). We made the most substantial revisions in moving people between major groups in the manufacturing and transport major groups (7, 8, and 9).

In particular, we created codes for vague responses of the form "Works in [specified type of] factory," such as "Works in cotton mill." We grouped these workers with "Laborers" and titled, skilled workers in the same general industry.

We eliminated codes where HISCO made distinctions that were not consistently made in nineteenth century census data. For example, HISCO distinguished between hand and machine spinners. We found that most spinners did not specify whether they were spinning by hand or machine, more often giving information on what they were spinning (e.g., cotton, wool, silk), or a firm's name.

We introduced codes to handle vague occupations, as discussed above. We also created codes to retain linguistic and nominal distinctions above a rough frequency level. These distinctions are generally made in the fourth and fifth digit of the codes. For example, we distinguish between "Farm workers, specialisation unknown" (62110) and "Farmer's sons and other male relatives" (62113), because "farmer's son" was a numerically significant response in Canada. Both are considered part of the "Farm labourers and helpers, general farming and n.f.s" unit group (621).

Other variables

Responses to the occupational questions also returned information that cannot be classified within an occupational classification scheme, such as relationship to workers, or indications of status. Please see the documentation for the variables OCRELATE and OCSTATUS.

Information on the products sold by retail workers (Major Group 4) is available in the variable PRODUCT.

Occupations were also coded into domestic occupational classification schemes in Great Britain, Norway, and the United States. See the documentation for the following variables for more information.

description

DEFINITION

OCCISCO records the person's primary occupation, coded according to the major categories in the International Standard Classification of Occupations (ISCO) scheme for 1988. For someone with more than one job, the primary occupation is typically the one in which the person had spent the most time or earned the most money.

description

DEFINITION

ORIGIN records the respondent's self-reported ethnic origin. This variable is the only way to identify black persons (usually "African") or indigenous persons ("Indian", or the specific tribe name) in Canada in 1881.

Researchers interested in comparisons with the United States and Canada should examine the codes for this variable in conjunction with the RACE variable.

In Norway, information about ethnicity in the censuses is only included in the most ethnically diverse areas of Norway, mainly the three northernmost provinces: Nordland, Troms and Finnmark. In addition to these three provinces, the Norway 1910 census also included information about ethnicity from some southern ethnically diverse municipalities.

OCCSTRNG: Occupation as transcribed

Data file: SWE1890_PHC-P-H.dat

Overview

Type: Continuous Decimal: 0 Width: 30 Range: - Format: character

description

DEFINITION

OCCSTRNG is an alphabetic variable that preserves the transcription of an individual's response to questions about their occupation. Although the various occupation and industry codes preserve significant detail on occupation and industry, much variation exists in the occupational strings.

OCCSTRNG will primarily be of interest to researchers who are linking census data to other sources, or are investigating occupations at a much more detailed level than offered by the various coding schemes.

The collection of occupation information was extensively covered in the instructions to enumerators. Researchers who are interested in OCCSTRNG should also read the enumerator instructions for assistance in interpreting occupational responses.

Because of the size of this variable (30 columns), users should not select this variable unless it is essential for their research. Users should be aware that some responses are truncated at this length.

concept**CONCEPT**

var_concept.title	Vocabulary
Work Variables -- PERSON	IPUMS

Imputation and derivation**DERIVATION**

OCCSTRNG is a 30-character string variable.

OCRELATE: Relationship information in occupation string

Data file: SWE1890_PHC-P-H.dat

Overview

Type: Discrete Decimal: 0 Width: 2 Range: - Format: Numeric

Questions and instructions**CATEGORIES**

Value	Category
00	None
10	Wife
11	Widow
12	Son
13	Daughter
14	Other male relative
15	Other female relative
16	Dependent
21	Former or retired
22	Future

31	Voluntary or honorary relationship
41	Physical or mental disability
51	Homeworker

description

DEFINITION

OCRELATE preserves inconsistently available information in responses to occupational questions. It is modified from the HISCO subsidiary coding scheme "RELATION." The purpose of OCRELATE is to retain information about social and familial relationships around a person's occupation.

For example, some respondents indicated that they were a "laborer's wife." In this case the response received the occupational (OCCHISCO) code for not having an occupation, and the OCRELATE code for wife (10) to indicate that they were related as a wife to a worker.

Changes from the HISCO RELATION codes

We have removed the "temporal relationships" category from the OCRELATE codes and moved them to OCSTATUS. We felt that "former or retired" and "future" relationships to work were better described as status designators. Future relationships to an occupation were often people describing themselves as students or apprentices in specified professions and trades.

concept

CONCEPT

var_concept.title	Vocabulary
Work Variables -- PERSON	IPUMS

OCSTATUS: Status information in occupation string

Data file: SWE1890_PHC-P-H.dat

Overview

Type: Discrete Decimal: 0 Width: 2 Range: - Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
00	None
11	Retired
12	Unemployed
13	Pauper
14	Owner
15	Leaseholder
21	Master
22	Journeyman

24	Artisan
31	Principal
32	Worker or works in
33	Labourer
34	Assistant or helper
40	Attending school or college
51	Nobility
52	Prestige
99	No occupation, unknown

description

DEFINITION

OCSTATUS preserves inconsistently available information in responses to occupational questions. It is similar to the HISCO subsidiary coding scheme "STATUS". The purpose of OCSTATUS is to preserve information about the social status of an occupation.

Correct usage of OCSTATUS is critical to proper interpretation of the occupation codes.

In modifying the HISCO system we faced the challenge of classifying industrial workers who often gave information on the industry they were employed in and less specific information on the tasks and functions they performed. We have grouped people of varying statuses in similar occupational codes.

To differentiate between skilled workers, people who "worked in" a particular industry (skill level indeterminate), and laborers, you must use OCSTATUS.

OCSTATUS has been applied to all occupations. Thus, a person indicating that they are an "Assistant Superintendent" receives the occupational code for Superintendent (22xxx), and the OCSTATUS code 34 for assistant.

Changes from the HISCO STATUS codes

We have changed the HISCO STATUS codes for ownership to

- 11Retired
- 12Unemployed
- 13Pauper
- 14Owner
- 15Leaseholder

Changes from the HISCO RELATION codes

We have removed the "temporal relationships" category from the OCRELATE codes and moved them to OCSTATUS. We felt that "former or retired" and "future" relationships to work were better described as status designators. Future relationships to an occupation were often people describing themselves as students or apprentices in specified professions and trades.

description

DEFINITION

SURSIM assigns the same code to all persons within each household who had the same surname. Persons coded 1, including the household head, had the same surname as the household head. Other surnames are assigned codes in the order in which they appear within the household on the census form. Persons within a household who shared a surname will have the same code for this variable.

INTERVIEWER INSTRUCTIONS

f. The enumeration form is divided into 14 columns with the following content:

Col. 1: That persons belonging to the same household or consumption unit should be kept together with a clearly visible bracket in order to give Statistics Sweden the necessary guidance to count the number and size of the households or consumption units.

That for every village or place of residence follows the list of persons that should contain the full name of every person, with the given name before or after the last name according to the custom in the catechetical registers. There should also be a note about the person's position within the family, for example wife, son, daughter etcetera. Appropriate abbreviations may be used. No person may occupy more than one row in the enumeration form.

description**DEFINITION**

This variable identifies the mother's location in household as constructed in the Swedish National Archives census database.

INTERVIEWER INSTRUCTIONS

f. The enumeration form is divided into 14 columns with the following content:

Col. 1: That persons belonging to the same household or consumption unit should be kept together with a clearly visible bracket in order to give Statistics Sweden the necessary guidance to count the number and size of the households or consumption units.

That for every village or place of residence follows the list of persons that should contain the full name of every person, with the given name before or after the last name according to the custom in the catechetical registers. There should also be a note about the person's position within the family, for example wife, son, daughter etcetera. Appropriate abbreviations may be used. No person may occupy more than one row in the enumeration form.

description

DEFINITION

This variable identifies the location in the household of a person's spouse, as constructed in the Swedish National Archives census database.

description

DEFINITION

This variable indicates the possessive pronoun used to describe a person's relationship to other family members ("their", "belonging to both", "her", or "his"). For instance, whether a child living with two parents is described as "their" daughter as opposed to "her" daughter provides information as to whether a child is biologically related to both parents or is probably a stepchild of the father.

INTERVIEWER INSTRUCTIONS

f. The enumeration form is divided into 14 columns with the following content:

That in column 4 it should for foreign citizens, living in the parish, be recorded as accurately as possible to which foreign power the person is subject. Recording names such as "Germany", "The German Empire" or "Austria" is not sufficient, instead a state should be recorded, for example Prussia, Saxony, Saxony-Altenburg, Hamburg, Hungary etcetera. It should be observed that if a note about nationality is missing it is assumed that the person is a Swedish citizen. A note should however be made if a person has become a Swedish citizen but has a birth place which can lead to believe that the person has a foreign nationality.

<p><sva r a="all" v="SE90A447 SE90A448 SE90A449 SE90A450 SE90A451 SE90A452 SE90A453 SE90A454 SE90A455 SE90A456">Col. 3: That, if possible, an accurate and complete information should be provided about occupation, office, service or trade (for example landlord, farmer, tenant farmer, crofter, settler, saw mill owner, shoemaker, tailor, shoemaker apprentice, tailor apprentice, domestic worker, servant, poor, vagrant, prisoner etcetera). It should not only be written "worker" or "factory worker", instead additional information should be provided (for example: farm worker, saw mill worker, worker at N. N. match factory etcetera). An occupation should also be recorded for a woman if she exercises an occupation or a trade. If someone has more than one occupation they should all be recorded. The first occupation should be regarded as the main occupation. Also if a person formerly has had an occupation, but currently is without employment, the former occupation may be recorded. An occupation can also be recorded, to ensure the possibility of future identification of a person, if the person is commonly called by the name of a profession. Similarly some titles can be recorded (for example farmer and former sergeant, landlord and chamberlain) while other titles that do not give information about service, occupation or trade are of no value for the listing of occupations.

LITERAL QUESTION

<sva r v="SE90A464"> ___ Not baptized in the Swedish church
</sva r>

CATEGORIES

Value	Category
0	No entry about baptism in the source record
1	Source includes notation: Not baptised in the Swedish church

INTERVIEWER INSTRUCTIONS

f. The enumeration form is divided into 14 columns with the following content:</p>

<p><sva r a="all" v="SE90A445 SE90A464 SE90A465">That for those persons living in the parish and have a foreign religious belief, and not belong to a denomination that independently report population statistics to Statistics Sweden, the foreign faith should be recorded in column 4. If a person legally has exited the Swedish church a note "exited" should be made, abbreviations may be used. In the same column "not baptized" should be noted for those children that, for confessional reasons, haven't been baptized within the Swedish church. For persons having a foreign faith it should be observed that according to 8 in the government decree of the 31st of October 1873 these people should be recorded in the catechetical register. The list of them should be included at the end of the extracts, but before the final summation so they won't be excluded from the summation of population for the parish and the country.

That for those persons who are recorded in the catechetical register but are known to be living outside the parish a notification using the word "absent"

should be made in column 4.
</svar>

INTERVIEWER INSTRUCTIONS

f. The enumeration form is divided into 14 columns with the following content:</p>

<p><svar a="all" v="SE90A447 SE90A448 SE90A449 SE90A450 SE90A451 SE90A452 SE90A453 SE90A454 SE90A455 SE90A456">Col. 3: That, if possible, an accurate and complete information should be provided about occupation, office, service or trade (for example landlord, farmer, tenant farmer, crofter, settler, saw mill owner, shoemaker, tailor, shoemaker apprentice, tailor apprentice, domestic worker, servant, poor, vagrant, prisoner etcetera). It should not only be written "worker" or "factory worker", instead additional information should be provided (for example: farm worker, saw mill worker, worker at N. N. match factory etcetera). An occupation should also be recorded for a woman if she exercises an occupation or a trade. If someone has more than one occupation they should all be recorded. The first occupation should be regarded as the main occupation. Also if a person formerly has had an occupation, but currently is without employment, the former occupation may be recorded. An occupation can also be recorded, to ensure the possibility of future identification of a person, if the person is commonly called by the name of a profession. Similarly some titles can be recorded (for example farmer and former sergeant, landlord and chamberlain) while other titles that do not give information about service, occupation or trade are of no value for the listing of occupations.

73100	Wood treater, specialisation unknown
73190	Other wood treaters
73200	Sawyer, plywood maker or related wood-processing worker, specialisation unknown
73210	Sawyer, general
73220	Edge sawyer
73290	Other sawyer, plywood makers and related wood-processing workers
73390	Other paper pulp preparers
73400	Paper maker, specialisation unknown
73490	Other paper makers
74190	Other crushers, grinders and mixers
74220	Cooker (chemical and related processes)

74290	Other cookers, roasters and related heat-treaters
74400	Still or reactor operator, specialisation unknown
74590	Other petroleum-refining workers
74920	Coke burner
74925	Coal-gas maker
74930	Charcoal burner
74990	Other chemical processors and related workers
75000	Spinner, weaver, knitter, dyer or related worker, specialisation unknown
75100	Fibre preparer, specialisation unknown
75120	Wool scourer
75135	Fibre carder
75190	Other fibre preparers
75220	Spinner, thread and yarn
75290	Other spinners and winders
75400	Weaver, specialisation unknown
75432	Cotton weaver (hand or machine)
75440	Cloth weaver (machine, except jacquard loom)
75455	Carpet weaver (hand)
75457	Carpet weaver (hand or machine)
75475	Fabrics repairer
75490	Other weavers and related workers
75500	Knitter, specialisation unknown
75540	Knitter (hand-operated machine)
75590	Other knitters
75600	Bleacher, dyer or textile product finisher, specialisation unknown
75622	Yarn, fabric or garment dyer
75655	Textile fuller
75690	Other bleachers, dyers and textile product finishers
75710	Rope maker, general
75922	Braid maker (hand or machine)
75930	Crocheter (hand)
75940	Net maker (hand)
75990	Other spinners, weavers, knitters, dyers and related workers
76100	Tanners or fellmonger, specialisation unknown
76125	Fellmonger
76145	Tanner
76155	Leather dyer and stainer
76190	Other tanners and fellmongers
76200	Pelt dresser, specialisation unknown

77120	Grain miller
77190	Other grain millers and related workers
77200	Sugar processor or refiner, specialisation unknown
77240	Carbonation man (sugar refining)
77310	Butcher, general
77330	Meat cutter
77340	Sausage maker
77390	Other butchers and meat preparers
77415	Fish-preserving cook
77460	Meat and fish smoker
77490	Other food preservers
77510	Dairy product processor, general
77610	Baker, general
77620	Bread baker
77630	Pastry maker
77640	Macaroni maker
77650	Chocolate maker
77660	Confectionery maker
77690	Other bakers, pastry cooks and confectionery makers
77750	Coffee roaster
77790	Other tea, coffee and cocoa preparers
77810	Brewer, general
77820	Germination worker (malting)
77825	Kilnman (malting)
77830	Malt cooker
77840	Yeast maker
77850	Wine worker
77870	Vinegar maker
77890	Other brewers, wine and beverage makers
77940	Fish butcher
77990	Other food and beverage processors
78100	Tobacco preparer, specialisation unknown
78200	Cigar maker, specialisation unknown
78290	Other cigar makers
78320	Cigarette maker (machine)
78920	Snuff maker
79100	Tailor, specialisation unknown
79140	Dressmaker
79190	Other tailors and dressmakers

79220	Fur tailor
79290	Other fur tailors and related workers
79310	Hat maker, general
79320	Milliner, general
79390	Other milliners and hat makers
79400	Pattern maker or cutter, specialisation unknown
79460	Leather garment cutter
79475	Glove cutter, leather or other material
79510	Hand and machine sewer, general
79520	Garment hand sewer (except leather and fur)
79540	Fur hand sewer
79550	Sewing-machine operator
79565	Embroiderer, hand or machine
79590	Other sewers and embroiderers
79620	Furniture upholsterer
79920	Sail, tent and awning maker
79930	Umbrella maker
80110	Shoemaker, general
80130	Shoe repairer
80190	Other shoemakers and shoe repairers
80222	Shoe cutter (hand or machine)
80225	Shoe cutter (hand)
80250	Shoe sewer (hand or machine)
80320	Saddler and harness maker
80360	Leather goods assembler
80390	Other leather goods makers
81000	Woodworker, specialisation unknown
81120	Cabinetmaker
81190	Other cabinetmakers
81230	Wood turner
81240	Wood-lathe setter operator
81270	Wood-planing machine setter operator
81275	Wood planer
81290	Other woodworking-machine operators
81925	Cartwright
81930	Cooper
81935	Wooden pattern maker
81940	Wooden model maker
81945	Wood carver

81955	Wooden furniture finisher
81960	Smoking-pipe maker
81990	Other cabinetmakers and related woodworkers
82000	Stone cutter or carver, specialisation unknown
82020	Stone cutter and finisher
82050	Stone lathe operator
82070	Stone carver (hand)
83000	Blacksmith, toolmaker or machine-tool operator, specialisation unknown
83110	Blacksmith, general
83120	Hammersmith
83130	Drop hammer operator
83140	Forging press operator
83190	Other blacksmiths, hammersmiths and forging-press operators
83220	Tool and die maker
83290	Other toolmakers, metal pattern makers and metal markers
83320	Lathe setter operator
83390	Other machine-tool setter-operators
83410	Machine tool operator, general
83430	Milling -machine operator
83440	Planing machine operator
83490	Other machine-tool operators
83520	Buffing and polishing-machine operator
83530	Tool grinder, machine tools
83540	Cutting instruments sharpener
83590	Other metal grinders, polishers and tool sharpeners
83920	Gunsmith
83930	Locksmith
83990	Other blacksmiths, toolmakers and machine-tool operators not elsewhere classified
84100	Machinery fitter or machine assembler, type of machine unknown
84160	Agricultural machinery fitter assembler
84190	Other machinery fitters and machine assemblers
84222	Watch and clock assembler or repairer
84230	Precision instrument maker
84290	Other watch, clock and precision instrument makers
84390	Other motor-vehicle mechanics
84900	Machinery fitter, machine assembler or precision instrument maker (except electrical) not elsewhere classified, specialisation unknown
84910	Machinery mechanic, general
84980	Oiler and greaser (except ships' engines)

84990	Other machinery fitters, machine assemblers and precision instrument makers (except electrical)
85510	Electrician, general
85590	Other electrical wiremen
85600	Telephone and telegraph installer, specialisation unknown
85620	Telephone and telegraph installer
85630	Telephone and telegraph mechanic
86240	Cinema projectionist
87105	Plumber, general
87240	Lead burner
87260	Solderer (hand)
87310	Sheet metal worker, general
87330	Coppersmith
87340	Tinsmith
87350	Boilersmith
87390	Other sheet-metal workers
87450	Metal shipwright
88010	Jeweller, general
88050	Goldsmith and silversmith
88070	Precious metal leaf roller
88090	Other jewellery and precious metal workers
89100	Glass former, potter or related worker, specialisation unknown
89120	Glass blower
89156	Glass cutter
89190	Other glass formers, cutters, grinders and finishers
89210	Potter, general
89225	Pottery and porcelain thrower
89242	Brick and tile moulder (hand or machine)
89290	Other potters and related clay and abrasive formers
89300	Glass or ceramics kilnman, specialisation unknown
89360	Brick and tile kilnman
89390	Other glass and ceramics kilnmen
89420	Glass engraver
89430	Glass etcher
89520	Glass painter
89530	Ceramics painter
89540	Ceramics decorator
89560	Ceramics dipper
89590	Other glass and ceramics painters and decorators
89990	Other glass formers, potters and related workers

90120	Rubber millman
90290	Other tire makers and vulcanisers
92110	Printer, general
92120	Hand compositor
92140	Type-casting machine operator
92150	Imposer
92190	Other compositors and type-setters
92225	Platen pressman
92250	Direct lithographic pressman
92270	Wallpaper printer
92290	Other printing pressmen
92320	Stereotyper
92415	Lithographer
92420	Metal printing plate, roller and die engraver (hand)
92430	Wood, rubber or linoleum block engraver (hand)
92460	Metal engraving etcher
92510	Photo engraver, general
92625	Bookbinder (hand or machine)
92690	Other bookbinders and related workers
92990	Other printers and related workers
93120	Building painter
93920	Brush painter (except construction)
93950	Sign painter
93990	Other painters
94100	Musical instrument maker or tuner, specialisation unknown
94160	Organ builder
94170	Piano maker
94180	Musical instrument tuner
94220	Basket maker
94230	Brush maker (hand)
94240	Broom maker (hand)
94290	Other basketry weavers and brush makers
94920	Taxidermist
94960	Candle maker
94990	Other production and related workers not elsewhere classified
95000	Construction worker, specialisation unknown
95120	Bricklayer (construction)
95130	Firebrick layer
95150	Tile setter

95160	Paviour
95190	Other bricklayers, stonemasons and tile setters
95210	Reinforced concreter, general
95220	Concrete shutterer
95290	Other reinforced concreters, cement finishers and terazzo workers
95300	Roofer, specialisation unknown
95320	Slate and tile roofer
95390	Other roofers
95410	Carpenter, general
95415	Construction carpenter
95440	Wood shipwright
95450	Wooden boatbuilder
95455	Ship's carpenter
95490	Other carpenters, joiners and parquetry workers
95510	Plasterer, general
95720	Building glazier
95910	Housebuilder, general
95950	Pipe layer
95955	Well digger
95990	Other construction workers
96120	Steam power plant operator
96910	Stationary engine operator, general
96930	Boiler fireman
96950	Water treatment plant operator (waterworks)
97120	Docker
97125	Loader of ship, truck, wagon or airplane
97130	Railway and road vehicle loader
97145	Warehouse porter
97152	Packer, hand or machine
97190	Other dockers and freight handlers
97205	Hoisting equipment rigger, general
97315	Crane driver (bridge- or gantry crane, jib-crane, tower-crane or mobile crane)
97390	Other crane and hoist operators
97400	Excavator, specialisation unknown
97415	Excavator (hand tools)
97420	Excavating machine operator
97435	Dredge operator
97490	Other earth-moving and related machinery operators
97900	Material handling equipment operator not elsewhere classified, specialisation unknown

97990	Other material handling equipment operators
98100	Ships' deck rating, barge crew or boatman, specialisation unknown
98120	Boatswain
98130	Able seaman
98135	Seaman, able or ordinary
98140	Ordinary seaman
98190	Other ships' deck ratings, barge crews and boatmen
98220	Ship's fireman
98320	Railway engine driver
98330	Railway steam engine fireman
98360	Engine-driver (mine and quarry)
98420	Railway brakeman (freight train)
98430	Railway signaller
98440	Railway shunter
98500	Motor vehicle driver, specialisation unknown
98520	Tram driver
98540	Motor bus driver
98555	Lorry and van driver (local or long-distance transport)
98600	Animal or animal-drawn vehicle driver, specialisation unknown
98620	Animal drawn vehicle driver (road)
98690	Other animal and animal-drawn vehicle drivers
98930	Lock operator (canal or port)
98940	Lighthouse man
98990	Other transport equipment operators
99900	Worker, no further information
99910	Labourer
99920	Day-labourer
99930	Factory worker
99999	No occupation/unknown

INTERVIEWER INSTRUCTIONS

f. The enumeration form is divided into 14 columns with the following content:</p>

<p><sva a="all" v="SE90A447 SE90A448 SE90A449 SE90A450 SE90A451 SE90A452 SE90A453 SE90A454 SE90A455 SE90A456">Col. 3: That, if possible, an accurate and complete information should be provided about occupation, office, service or trade (for example landlord, farmer, tenant farmer, crofter, settler, saw mill owner, shoemaker, tailor, shoemaker apprentice, tailor apprentice, domestic worker, servant, poor, vagrant, prisoner etcetera). It should not only be written "worker" or "factory worker", instead additional information should be provided (for example: farm worker, saw mill worker, worker at N. N. match factory etcetera). An occupation should also be recorded for a woman if she exercises an occupation or a trade. If someone has more than one occupation they should all be recorded. The first occupation should be regarded as the main occupation. Also if a person formerly has had an occupation, but currently is without employment, the former occupation may be recorded. An occupation can also be recorded, to ensure the possibility of future identification of a person, if the person is commonly called by the name of a profession. Similarly some titles can be recorded (for example farmer and former sergeant, landlord and chamberlain) while other titles that do not give information about service, occupation or trade are of no value for the listing of occupations.

INTERVIEWER INSTRUCTIONS

f. The enumeration form is divided into 14 columns with the following content:</p>

<p><svar a="all" v="SE90A447 SE90A448 SE90A449 SE90A450 SE90A451 SE90A452 SE90A453 SE90A454 SE90A455

SE90A456">Col. 3: That, if possible, an accurate and complete information should be provided about occupation, office, service or trade (for example landlord, farmer, tenant farmer, crofter, settler, saw mill owner, shoemaker, tailor, shoemaker apprentice, tailor apprentice, domestic worker, servant, poor, vagrant, prisoner etcetera). It should not only be written "worker" or "factory worker", instead additional information should be provided (for example: farm worker, saw mill worker, worker at N. N. match factory etcetera). An occupation should also be recorded for a woman if she exercises an occupation or a trade. If someone has more than one occupation they should all be recorded. The first occupation should be regarded as the main occupation. Also if a person formerly has had an occupation, but currently is without employment, the former occupation may be recorded. An occupation can also be recorded, to ensure the possibility of future identification of a person, if the person is commonly called by the name of a profession. Similarly some titles can be recorded (for example farmer and former sergeant, landlord and chamberlain) while other titles that do not give information about service, occupation or trade are of no value for the listing of occupations.

51	Nobility
52	Prestige
99	Unknown

INTERVIEWER INSTRUCTIONS

f. The enumeration form is divided into 14 columns with the following content:</p>

<p><sva r a="all" v="SE90A447 SE90A448 SE90A449 SE90A450 SE90A451 SE90A452 SE90A453 SE90A454 SE90A455 SE90A456">Col. 3: That, if possible, an accurate and complete information should be provided about occupation, office, service or trade (for example landlord, farmer, tenant farmer, crofter, settler, saw mill owner, shoemaker, tailor, shoemaker apprentice, tailor apprentice, domestic worker, servant, poor, vagrant, prisoner etcetera). It should not only be written "worker" or "factory worker", instead additional information should be provided (for example: farm worker, saw mill worker, worker at N. N. match factory etcetera). An occupation should also be recorded for a woman if she exercises an occupation or a trade. If someone has more than one occupation they should all be recorded. The first occupation should be regarded as the main occupation. Also if a person formerly has had an occupation, but currently is without employment, the former occupation may be recorded. An occupation can also be recorded, to ensure the possibility of future identification of a person, if the person is commonly called by the name of a profession. Similarly some titles can be recorded (for example farmer and former sergeant, landlord and chamberlain) while other titles that do not give information about service, occupation or trade are of no value for the listing of occupations.
</sva r>

description

DEFINITION

This variable identifies employment status information that was recorded in the occupation string.

UNIVERSE

Sweden 1890: All persons

LITERAL QUESTION

<svr v="SE90A444"> ___ Ethnicity (mention if foreign ethnicity, for example Finn, Sami, Gypsy etc)</svr>

CATEGORIES

Value	Category
5210	Sami (Sweden)
5300	Finnish
6810	Roma (Romani)
9999	Unknown

INTERVIEWER INSTRUCTIONS

f. The enumeration form is divided into 14 columns with the following content:</p>

<p><svr a="all" v="SE90A444">That for every Swedish citizen who belongs to a foreign ethnicity a note should be made in column 4 using the words Finn, Sami, Roma etcetera. It should be observed that even if the ethnicity usually can be determined from the language commonly used in the household this should not always be regarded as the deciding factor. It is known that Swedish families, living among Finns in the county of Norrbotten, have in recent times adopted the Finnish language as the family language. For the Sami population it is of special interest to record their different forms of trade (for example mountain Sami, forest Sami, fishing Sami etcetera). This should be recorded in column 3.</svr>

description

DEFINITION

This variable records a person's first-stated ethnic origin.
