SERIES INFORMATION

The UNHCR Livelihoods Monitoring Framework surveys are designed to promote a standardized approach to tracking program performance and impact through revised impact and performance indicators with concrete definitions, which have made them more focused, precise and relevant to the key intervention areas. The data and the key analysis are available for UNHCR - and externally - financed programs across three primary focus areas - agriculture, self-employment and wage-employment - in terms of assets, employment, market access and more.

ABSTRACT

The UNHCR Livelihoods Monitoring Framework takes a program-based approach to monitoring, with the aim of tracking both outputs and the impact of UNHCR dollars spent on programming (either via partners or through direct implementation).

The process for developing the indicators began in 2015 with a review of existing tools and approaches. Consultations were held with governments, the private sector, field-based staff and civil society partners to devise a set of common, standardized measures rooted in global good practices.

## Sampling

## SAMPLING PROCEDURE

The sampling was conducted by each participating operations based on general sampling guidance provided as the following:

- If the total number of beneficiaries was less than 100, then the survey included all the beneficiaries.
- Otherwise, 10% of the total beneficiaries was taken as the sample size.
- If the above 10% resulted in less than 100, then 100 was the minimum sample size.
- If the above 10% resulted in more than 1000, then 1,000 was the maximum sample size.
