## Identification

---

### SURVEY ID NUMBER

ETH\_2022\_RMS-IDP\_v01\_M

### TITLE

Results Monitoring Survey, IDP 2022

### ABBREVIATION OR ACRONYM

RMS-IDP 2022

### COUNTRY

Name	Country code
Ethiopia	ETH

### STUDY TYPE

Other Household Survey [hh/oth]

### ABSTRACT

The UNHCR Results Monitoring Survey (RMS) is a household-level survey on persons of concern (PoC) to UNHCR directly or indirectly assisted by UNHCR, including refugees and asylum seekers, internally displaced persons, returnees, stateless and others of concern. The objective of the survey is to monitor impact and outcome level indicators on education, healthcare, livelihoods, protection concerns, shelter, and water and sanitation. The results contribute to an evidence base for reporting against UNHCR's multi-year strategies to key stakeholders.

The RMS can be implemented in any operational context. A standard structured questionnaire has been developed for the RMS, which can be conducted as a stand-alone survey or flexibly integrated with other data collection exercises. The data includes indicators collected at both the household and individual (household-member) level, and results are statistically representative.

This RMS took place in Ethiopia from July 2022 to August 2022. The surveyed population was IDPs only. Total number of IDPs in Ethiopia is close to 3,500,000 as of 2022. The survey design uses a cross-sectional, stratified two stage cluster random sampling, and it is meant to be representative at the ADM3 level.

This dataset is the anonymized version of the original data.

### KIND OF DATA

Sample survey data [ssd]

### UNIT OF ANALYSIS

Households and individuals

## Version

---

### VERSION DESCRIPTION

Version 2.1: Edited, cleaned and anonymised data.

### VERSION DATE

2022-12-15

## Scope

---

### NOTES

The scope includes:

- education
- healthcare and vaccination

- livelihoods
- protection concerns
- shelter
- water and sanitation

#### TOPICS

Topic
Livelihood and Social cohesion
Education
Basic Needs
Domestic Needs/Household Support
Water Sanitation Hygiene
Shelter/Other Infrastructure

## Coverage

#### GEOGRAPHIC COVERAGE

Amhara, Oromia, SNNP and Somali

#### UNIVERSE

All IDP in Amhara, Oromia, SNNP and Somali

## Producers and sponsors

#### PRIMARY INVESTIGATORS

Name	Affiliation
UN Refugee Agency (UNHCR)	UN

#### PRODUCERS

Name
Tango International

## Sampling

#### SAMPLING PROCEDURE

Two approaches were used for the IDP survey: 1) the sample frame (SF)-based approach and 2) the respondent-driven sampling (RDS) approach.

The SF-based survey was conducted in half of the IDP sample clusters (12 clusters). The SF-based survey was conducted by randomly selecting 30 households from each randomly selected cluster for the interview. Random selection of 30 IDP households was done once the IDP household listing was conducted by GPS in the selected clusters. The listing exercise involved GPS visiting the 13 selected clusters and working with local focal points to acquire and review the list of all IDP households at the cluster level. 30 households per cluster were selected for the interview. If any cluster was too large and the IDP households were too scattered, households were randomly selected from the smaller cluster.

The RDS-based approach was used in half of the IDP clusters. RDS is typically applied in contexts where a sampling frame is not available or is unreliable and when it is not possible to randomly select a sample representing the entire population of interest. This method combines 'snowball sampling' (getting individuals to refer those they know, who in turn refer those they know, and so on) with a mathematical model that weights the sample to compensate for the fact that the sample was collected in a non-random way.

## Data collection

### DATES OF DATA COLLECTION

Start	End
2022-07-28	2022-08-13

### DATA COLLECTION MODE

Computer Assisted Telephone Interview [cati]

### DATA COLLECTORS
