TITLE  
Whole of Afghanistan Assessment 2022

ABBREVIATION OR ACRONYM  
HDX-WAA 2022

COUNTRY

Name	Country code
Afghanistan	AFG

ABSTRACT

The Whole of Afghanistan Assessment 2022 (Annual WoAA 2022) is a multi sectoral need assessment, conducted based on in-person household-level interviews. This data consists the results collected from the head of household across the country, and provides data on household`s different sectoral and intersectoral needs such as health, education, nutrition, WASH, food security, shocks, protection, and so on. Data for this assessment was collected using stratified cluster sampling and all findings calculated using this data have a minimum confidence level of 95% and a 5% margin of error at the national-level. Urban and rural findings are representative with a confidence level of 90% and a 9% margin of error at the provincial level. Findings of the refugee population have a minimum confidence level of 90% and a 7% margin of error at the provincial-level.
