

2002 All-Russian Population Census - IPUMS Subset

Federal State Statistics Service, IPUMS

report_generated_on: January 5, 2026

visit_data_catalog_at: <http://catalog.ihsn.org/>

Identification

SURVEY ID NUMBER

RUS_2002_PHC_v01_M_v7.5_A_IPUMS

TITLE

2002 All-Russian Population Census - IPUMS Subset

ABBREVIATION OR ACRONYM

PHC Russia 2002 (IPUMS Harmonized Subset)

COUNTRY

Name	Country code
Russia	RUS

STUDY TYPE

Population and Housing Census [hh/popcen] IPUMS International

SERIES INFORMATION

DOI:10.18128/D020.V7.5

KIND OF DATA

Population and Housing Census [hh/popcen]

UNIT OF ANALYSIS

Persons and households

UNITS IDENTIFIED:

- Dwellings: no
- Vacant Units: no
- Households: yes
- Individuals: yes
- Group quarters: no

UNIT DESCRIPTIONS:

- Dwellings: Living quarters such as apartments, separate single-family houses, room in hostel, suite or room in hotel, and other dwellings converted or arranged for human habitation
- Households: A household is a group of people living together occupying the whole or a part of housing unit, jointly provide themselves with food and other essentials for living, i.e. completely or partly combine and spend their means. These persons can be connected with ties of kinship, or relationship resulting from marriage, or not be relatives. One household may comprise both relatives and non-relatives.
- Group quarters: Includes wards or other social institutions, barracks, penal institutions, or religious institutions

Version

VERSION DESCRIPTION

Version 7.5. The datasets contain selected variables from the original census microdata plus harmonized variables from the IPUMS-International database.

VERSION DATE

2024-10-05

Scope

NOTES

Additional notes on a sample that is part of this study: Russia 2002

TOPICS

Topic	Vocabulary
Demographic Variables -- PERSON	IPUMS
Geography: Global Variables -- HOUSEHOLD	IPUMS
Nativity and Birthplace Variables -- PERSON	IPUMS
Fertility and Mortality Variables -- PERSON	IPUMS
Work Variables -- PERSON	IPUMS
Technical Household Variables -- HOUSEHOLD	IPUMS
Education Variables -- PERSON	IPUMS
Constructed Family Interrelationship Variables -- PERSON	IPUMS
Geography: O-Z Variables -- HOUSEHOLD	IPUMS
Group Quarters Variables -- HOUSEHOLD	IPUMS
Constructed Household Variables -- HOUSEHOLD	IPUMS
Migration: Global Variables -- PERSON	IPUMS
Income Variables -- PERSON	IPUMS
Technical Person Variables -- PERSON	IPUMS
Ethnicity and Language Variables -- PERSON	IPUMS
Other Person Variables -- PERSON	IPUMS
Income Variables -- PERSON	IPUMS
Work Variables -- PERSON	IPUMS
Migration: Global Variables -- PERSON	IPUMS
Fertility and Mortality Variables -- PERSON	IPUMS

Coverage

GEOGRAPHIC UNIT

Region

UNIVERSE

Resident population at their permanent (usual) place of residence on October 9, 2002, including foreign and stateless persons permanently residing in the Russian Federation.

Producers and sponsors

PRIMARY INVESTIGATORS

Name	Affiliation
Federal State Statistics Service	
IPUMS	University of Minnesota

Sampling

SAMPLING PROCEDURE

MICRODATA SOURCE: Federal State Statistics Service

SAMPLE SIZE (person records): 7080849.

SAMPLE DESIGN: Systematic sample of every 20th household, drawn by the Federal State Statistics Service

WEIGHTING

Self-weighting (expansion factor = 20)

Data collection

DATES OF DATA COLLECTION

Start	End
2002-10-09	2002-10-16

TIME PERIODS

Start date	End date
2002-10-09	2002-10-09

DATA COLLECTION MODE

Face-to-face [f2f]

DATA COLLECTION NOTES

de jure, CENSUS DAY: October 9, 2002

questionnaires

QUESTIONNAIRES

Form P contained questions about housing conditions. Form K and D1 contained questions about all individuals permanently living in the household and collective households. Form D2 contained additional individual level questions asked of a 25 percent sample of the population.

Access policy

Name
Federal State Statistics Service

CONFIDENTIALITY

IPUMS International distributes integrated microdata of individuals and households only by agreement of collaborating national statistical offices and under the strictest of confidence. Before data may be distributed to an individual researcher, an electronic license agreement must be signed and approved. To gain access to the data, a researcher must agree to the following: (1) Implement security measures to prevent unauthorized access to census microdata. Under IPUMS International agreements with collaborating agencies, redistribution of the data to third parties is prohibited. (2) Use the microdata for the exclusive purposes of scholarly research and education. Researchers must explicitly agree to not use microdata acquired for any commercial or income-generating venture. (3) Maintain the confidentiality of persons, households, and other entities. Any attempt to ascertain the identity of persons or households from the microdata is prohibited. Alleging that a person or household has been identified is also prohibited. (4) Report all publications based on these data to IPUMS International, which will in turn pass the information on to the relevant national statistical agencies. Once a project is approved, a password is issued and data may be acquired through the Internet. Penalties for violating the license include: revocation of the license, recall of all microdata acquired, filing of a motion of censure to the appropriate professional organizations, and civil prosecution under the relevant national or international statutes. These safeguards mirror the principles from the Joint ECE/Eurostat Work Session on Statistical Data Confidentiality. Employees of the Minnesota Population Center who work with the census microdata to produce the harmonized database also sign agreements to respect the confidentiality of the data. IPUMS International works with each country's statistical office to minimize the risk of disclosure of respondent information.

The details of the confidentiality protections vary across countries, but in all cases, names and detailed geographic information are suppressed and top-codes are imposed on variables such as income that might identify specific persons. In addition, IPUMS International uses a variety of technical procedures to enhance confidentiality protection. These include the following: (1) Swapping an undisclosed fraction of records from one administrative district to another to make positive identification of individuals impossible. (2) Randomizing the placement of households within districts to disguise the order in which individuals were enumerated or the data processed. (3) Aggregating codes of sensitive characteristics (e.g., grouping together very small ethnic categories) (4) Top- and bottom-coding continuous variables to prevent identification of extreme cases. The safety record for public-use census microdata is apparently perfect. In almost four decades of use, there has not been a single verified breach of statistical confidentiality. The measures implemented by the IPUMS International are designed to extend this record.

ACCESS CONDITIONS

An adapted version of the dataset, harmonized for international comparability, is available from IPUMS International (<https://international.ipums.org/international/>) under the following conditions:

IPUMS International distributes integrated microdata of individuals and households only by agreement of collaborating national statistical offices and under the strictest of confidence. Before data may be distributed to an individual researcher, an electronic license agreement must be signed and approved. To gain access to the data, a researcher must agree to the following:

- (1) Implement security measures to prevent unauthorized access to census microdata. Under IPUMS International agreements with collaborating agencies, redistribution of the data to third parties is prohibited.
- (2) Use the microdata for the exclusive purposes of scholarly research and education. Researchers must explicitly agree to not use microdata acquired for any commercial or income-generating venture.
- (3) Maintain the confidentiality of persons, households, and other entities. Any attempt to ascertain the identity of persons or households from the microdata is prohibited. Alleging that a person or household has been identified is also prohibited.
- (4) Report all publications based on these data to IPUMS International, which will in turn pass the information on to the relevant national statistical agencies.

Once a project is approved, a password is issued and data may be acquired through the Internet. Penalties for violating the license include: revocation of the license, recall of all microdata acquired, filing of a motion of censure to the appropriate professional organizations, and civil prosecution under the relevant national or international statutes.

These safeguards mirror the principles from the Joint ECE/Eurostat Work Session on Statistical Data Confidentiality. Employees of the Minnesota Population Center who work with the census microdata to produce the harmonized database also sign agreements to respect the confidentiality of the data.

DDI DOCUMENT VERSION

Version 7.5 October 2024. NEW FEATURES.

--Historical data from NAPP project now available from IPUMS-International.

--Historical census data from Canada, Denmark, the United Kingdom, Germany, Iceland, Norway, Sweden, and the United States for the period 1703 to 1911 are now available from IPUMS-International. The complete count and sample datasets were previously disseminated by the North Atlantic Population Project (NAPP). Where possible, the data have been integrated into existing IPUMS-International variable coding schema. Some new variables have been created that are available only for these pre-1960 datasets. NAPP data users should note that many NAPP variables are available from IPUMS-International by different names. For a complete list of NAPP variables that have been renamed in IPUMS-International, refer to the crosswalk.

--Individual country shapefiles for the third-level administrative level of geography are now available for a few IPUMS samples.

--New spatially harmonized previous-residence variables at the second administrative level of geography are available for several samples in this data release. More information is available [here](#). Users should note that many older migration variables are available by different names. Refer to this table for a crosswalk of old and corresponding new migration variables.

--IPUMS now hosts the Census Mosaic data collection. Census Mosaic identifies, gathers, harmonizes, and distributes surviving historical census microdata from regions of Continental Europe where complete centralized records are not available. The Mosaic project was founded by a consortium of historical social scientists in Europe. Data can be downloaded as static files from the Census Mosaic website. Although the data are not yet integrated fully into IPUMS International, variables have been standardized and harmonized to be roughly compatible with IPUMS coding structures.

NEW SAMPLES.

--Full-count datasets for Great Britain 1851, 1861, 1871 (Scotland only), 1891, and 1901.

--Full-count dataset for Sweden 1910. Denmark (1845, 1880, and 1885)

--Labor force surveys from Spain and eight new labor force surveys from Italy added to the series.

Newly added countries:

Benin, Cote d'Ivoire, Finland, Guatemala, Honduras, Laos, Lesotho, Mauritius, Myanmar, Papua New Guinea, Russia, Slovak Republic, Suriname, Togo, and Zimbabwe

New samples for:

Bolivia, Cambodia, Chile, Cuba, Cote d'Ivoire, Egypt (1848 and 1868, historical samples), Fiji, Guinea, Ireland, Israel, Italy, Lao PDR, Mexico, Morocco, Nepal, Netherlands, Palestine, Peru, Philippines, Puerto Rico, Rwanda, Senegal, Sierra Leone, South Africa, Switzerland, Uganda, United States, United Kingdom, United States, Vietnam, and Zimbabwe

SUPPLEMENTAL DATA.

Data from censuses from Benin and Lesotho that record individual fertility and/or mortality events were made available in IPUMS-International. These files can be downloaded and linked to data produced by the extract system.

NEW VARIABLES.

--IPUMS-International now provides harmonized and year-specific geography variables for all countries including 13 new samples from Dominican Republic, Germany, Indonesia, Israel, Malaysia, Mongolia, Nicaragua, Nigeria, Palestine, Paraguay, Thailand, United Kingdom, and Uruguay. First-level and second-level year specific geography variables are also available for all countries. IPUMS provides corresponding, downloadable GIS boundary files for all harmonized and year specific geography variables. More information about IPUMS geography variables is available [here](#).

--IPUMS International now provides spatially harmonized previous-residence variables at the first administrative level of geography. The codes for the spatially harmonized previous-residence variables match the spatially harmonized place of current residence. More information is available [here](#).

--IPUMS International provides spatially harmonized previous-residence variables at the first administrative level of geography for all samples; previously available country-specific migration variables at the first administrative level that were not fully harmonized spatially have been phased out. Spatially harmonized previous-residence variables at the second administrative level of geography are available for selected samples. More information is available [here](#). Users should note that many older migration variables are available by different names. Refer to this table for a crosswalk of old and corresponding new migration variables.

--IPUMS International now provides spatially harmonized previous-residence variables at the first administrative level of geography for all samples. Spatially harmonized previous-residence variables at the second administrative level of geography are available for several samples in this data release. More information is available [here](#). Users should note that many older migration variables are available by different names. Refer to this table for a crosswalk of old and corresponding new migration variables.

--Lower (third) level geography codes and GIS files have been added for Bangladesh, China, Ethiopia, Mali, Rwanda, and Zimbabwe. Some geography codes and labels might have changed for these countries to accommodate the newer lower level geography.

--Added more detailed 3-digit industry and occupation variables for China 2000.

EDITED SAMPLES.

--Revised full-count data for Great Britain 1881

--Revised full-count datasets for Sweden 1890 and 1900. The revision includes the following changes that improve comparability across Sweden datasets:

--Revisions to certain ethnicity and work variables (and the underlying source data): ORIGIN, LABFORCE, OCCHISCO, OCRELATE, OCSTATUS.

--Revisions to unharmonized source variables: SE1890A_HISCOSE, SE1890A_HISCRELSE, SE1890A_HISCSTATSE, SE1890A_OCCMULTISE, SE1900A_HISCOSE, SE1900A_HISCRELSE, SE1900A_HISCSTATSE, SE1900A_OCCMULTISE.

--A new United States 1850 full-count dataset now matches the corresponding dataset distributed by the USA IPUMS data project. The source variable US1850A_0502 (HISTID) provides a linking key to match person records to the USA version of the data. The IPUMS International version of the data contains names, which the USA version cannot distribute.

EDITED VARIABLES.

An error affecting HHWT for South Africa 2007 was corrected. The existing values were adjusted by a factor of 0.01.

AGEMARR was edited to add data for Hungary 1980 and 1990.

Harmonized and year-specific geography variables for Brazil and Colombia have been edited to accommodate for the availability of refined municipal boundaries. Users should be aware that codes and labels have changed in all harmonized and year specific geography variables for these two countries.

Errors affecting BPLSE2 (formerly BPLPARSE) for Sweden 1890 and the underlying source variable were corrected. Several thousand cases were incorrectly coded as 258101000. These cases have been updated with the correct code: 258171000.

Harmonized geography variables for Italy, Philippines, Rwanda, and United States have been edited to accommodate new

samples. Users should be aware that codes and labels have changed in all harmonized and year specific geography variables for these countries. More information about IPUMS geography variables is available [here](#). The codes for the source variable RW2002A_0419 were corrected to include 0 and 8 as possible responses, which were previously identified as 'unknown years' within primary education.

Errors affecting EDUCFJ for Fiji 2006 were corrected.

A problem with PERWT for Tanzania 2012 was corrected. The previous weights were adjusted to properly reflect population totals.

MOMLOC, POPLOC, and PARRULE were updated for the United States 2010 and 2015 samples to include additional information on subfamilies. Prior to this correction, persons above age 17 were not receiving links to their co-resident mothers and fathers.

An error affecting codes for the URBAN variable in Egypt 1986 for Cairo, Alexandria, Port-Said, and Suez was corrected.

An error in INCEARN affecting Venezuela 2001 was corrected. Earned income in the source variable VE2001A_0440 is interpreted as a monthly amount, thus adjustments previously applied to convert data from daily or weekly income were suppressed.

All the six Brazil samples in IPUMS International were replaced with higher density samples.

An edited version of the Chile 2017 sample was introduced to correct an error in household breaks.

Errors affecting codes for GEO1_ZA in South Africa 2011 and ENUTS1 in United Kingdom 1991 were corrected.

Harmonized geography variables for Cambodia, Fiji, and Nepal have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year-specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

An error in PERWT affecting Nepal 2001 was corrected.

Errors affecting a code in GQ for Brazil 2010 and Indonesia 2010 were corrected. Both census samples now identify 1-person units created by splitting a large household.

An error in MARRNUM affecting Indonesia 1976 was corrected. Some codes for GEO1_EG2006 and GEO2_EG2006 were edited.

Harmonized geography variables for Bolivia, Cuba, Guinea, Ireland, Morocco, Palestine, Senegal, South Africa, and Uganda have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year-specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

An error in INCEARN affecting Brazil 1980 was corrected.

An error in EDATTAIN affecting Ireland 1971 and 1981 was corrected.

A small proportion of person records in Mexico 1960 were re-classified in MIGRATEP based on information about their current and previous residence. These were previously coded to 'different major administrative unit', even though their place of residence suggests that their last move was within the same major administrative unit.

The second-level technician (higher) degrees for Spain 1991, 2001, and 2011 were re-classified into post-secondary technical education in EDATTAIN.

An error affecting codes for SEX for Egypt 1848 and 1868 was corrected. The values for male and female had been reversed.

A problem with HHWT and PERWT for Canada 2011 was corrected. The previous weights were adjusted to properly reflect population totals.

Harmonized geography variables for Cambodia, Lao PDR, Mexico, Peru, Switzerland, Vietnam, Puerto Rico, United Kingdom, and United States have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year-specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

Harmonized geography variables for Chile and Sierra Leone have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year-specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

An error affecting codes for COMPUTER for Senegal 2013 was corrected.

An error affecting labels available in IND for Peru 1993 was corrected.

An error affecting codes for persons previously residing abroad for MIG1_5_BO in Bolivia 2001 and 2012 was corrected.

EDUCAR, EDATTAIN, and YRSCHOOL were adjusted in the Argentina samples to incorporate information on completion of education levels in the data harmonization.

HHWT and PERWT were calibrated in Kenya 1979 to properly reflect the population distribution by province.

In GQ (group quarters status), persons residing in hospitals of all types were reclassified to 'institutional group quarters' from 'other group quarters,' making their treatment consistent with GQTYPE.

Errors affecting codes for BPLBJ2 in Benin 1979, 1992, and 2002 were corrected.

Errors affecting codes for GEO2_BR1970 in Brazil 1970 were corrected.

GQ: Group quarters (collective dwelling) status

Data file: RUS2002_PHC-H-H.dat

Overview

Type: Discrete Decimal: 0 Width: 2 Range: - Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
00	Vacant
10	Households
20	Group quarters (collective), n.s.
21	Institutions
22	Other group quarters
29	1-person unit created by splitting large household
99	Unknown/group quarters not identified

description

DEFINITION

GQ identifies households as vacant dwellings, group quarters, or private households. Group quarters -- collective dwellings -- are generally institutions and other group living arrangements such as rooming houses and boarding schools.

Institutions often retain persons under formal supervision or custody, such as correctional institutions, military barracks, asylums, or nursing homes. Educational and religious group dwellings (e.g., boarding schools, convents, monasteries, etc.) are also included in the institutional classification.

Group quarter designations are often useful for understanding the universe of households that answered questions about household characteristics. Censuses will often exclude group quarters from such questions.

Group Quarters Variables -- HOUSEHOLD	IPUMS

HHWT: Household weight**Data file:** RUS2002_PHC-H-H.dat**Overview**

Type: Continuous Decimal: 2 Width: 8 Range: - Format: Numeric

description

DEFINITION

HHWT indicates the number of households in the population represented by the household in the sample.

For the samples that are truly weighted (see the comparability discussion), HHWT must be used to yield accurate household-level statistics.

NOTE: HHWT has 2 implied decimal places. That is, the last two digits of the eight-digit variable are decimal digits, but there is no actual decimal in the data.

concept

CONCEPT

var_concept.title	Vocabulary
Technical Household Variables -- HOUSEHOLD	IPUMS

Imputation and derivation

CODER INSTRUCTIONS

HHWT is an 8-digit numeric variable with 2 implied decimal places. See the variable description.

PERSONS: Number of person records in the household**Data file:** RUS2002_PHC-H-H.dat**Overview**

Type: Continuous Decimal: 0 Width: 4 Range: - Format: Numeric

description

DEFINITION

PERSONS indicates how many person records are included in the household (i.e., the number of person records associated with the household record in the sample). These person records will all have the same serial number (SERIAL) as the household record. The information contained in the household record will normally apply to all of these persons.

concept

CONCEPT

var_concept.title	Vocabulary
Technical Household Variables -- HOUSEHOLD	IPUMS

Imputation and derivation

CODER INSTRUCTIONS

PERSONS is a 4-digit numeric variable.

RECTYPE: Record type

Data file: RUS2002_PHC-H-H.dat

Overview

Type: Continuous Decimal: 0 Width: 1 Range: - Format: character

Questions and instructions

CATEGORIES

Value	Category
H	Household
P	Person

description

DEFINITION

RECTYPE identifies the type of record for the case: household or person.

NOTE: RECTYPE is an alphabetic (character string) variable with a value of 'H' for household records and 'P' for person records. RECTYPE will not appear as a variable in the default rectangular extracts produced by the data extract system. It is only available in hierarchical extracts, to distinguish between the two record types.

description

DEFINITION

SAMPLE identifies the IPUMS sample from which the case is drawn. Each sample receives a unique 9-digit code. The code is structured as follows:

The first 3 digits are the ISO/UN codes used in COUNTRY

The next 4 digits are the year of the census/survey

The final 2 digits identify the sample within the year. For the last two digits, censuses or large census-like surveys have a value "0" (e.g, 01) in the second-to-last digit, household surveys have a value of "2" (e.g., 21), and employment surveys have a value of "4" (e.g., 41).

Technical Household Variables -- HOUSEHOLD	IPUMS

SERIAL: Household serial number**Data file:** RUS2002_PHC-H-H.dat**Overview**

Type: Continuous Decimal: 0 Width: 12 Range: - Format: Numeric

description

DEFINITION

SERIAL is an identifying number unique to each household in a given sample. All person records are assigned the same serial number as the household record that they follow. (Person records also have their own unique identifiers -- see PERNUM.) The combination of SAMPLE and SERIAL provides a unique identifier for every household in the IPUMS-International database; SAMPLE, SERIAL and PERNUM uniquely identify every person in the database.

SERIAL can be used to identify dwellings in some samples. In these samples, the first 7 digits of SERIAL provide the dwelling number common to all households that were sampled from the same structure. The last three digits give the sequence of the household within the dwelling. The following is a list of samples in which dwellings can be inferred:

Chile 1970, 1992, 2002Colombia 1993, 2005Costa Rica 1984, 2000Cuba 2002Dominican Republic 1981, 2002, 2010Ecuador 1990, 2001Germany 1971Hungary 1980, 1990, 2001Jamaica 1982, 1991, 2001Malaysia 1970, 1991, 2000Mexico 1995, 1990, 2000, 2005Nigeria 2006Panama 2000Peru 1993, 2007Portugal 1981, 1991, 2001Spain 1991Uruguay 2011Venezuela 1990, 2001Vietnam 1989In all other samples, the last 3 digits are always zeroes.

SERIAL was constructed for IPUMS-International, and has no relation to the serial number in the original datasets.

The U.S. 1900 sample and 1880 10% sample have multi-household dwellings that can be identified using the last 3 digits of SERIAL.

concept

CONCEPT

var_concept.title	Vocabulary
Technical Household Variables -- HOUSEHOLD	IPUMS

Imputation and derivation

CODER INSTRUCTIONS

SERIAL is a 10-digit numeric variable.

The last 3 digits of SERIAL indicate household number within dwelling for selected samples noted in the variable description. In all other samples, the last 3 digits are always zeroes.

description

DEFINITION

SUBSAMP allocates each case to one of 100 subsample replicates, randomly numbered from 0 to 99. Each subsample is nationally representative and preserves any stratification of the sample from which it is drawn. Users who need a representative subset of a sample can use SUBSAMP to select their cases. For example, to randomly extract 10% of the cases from a sample, select any 10 of the 100 subsamples.

AREAMOLLWGEO1: Area of GEOLEV1 unit in square kilometers

Data file: RUS2002_PHC-H-H.dat

Overview

Type: Continuous Decimal: 0 Width: 10 Range: - Format: Numeric

description

DEFINITION

AREAMOLLWGEO1 indicates the area in square kilometers of the major administrative unit in which the household was enumerated. The major administrative unit of the household is identified by the GEOLEV1 variable.

The area of units in GEOLEV1 is calculated using Mollweide's equal area projection. For a full set of geography variables refer to IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1 and GEOLEV2. More information on IPUMS-International geography can be found here.

description

DEFINITION

GEO1_RU identifies the household's regions (referred to as federal subject) within Russia in all sample years. Regions are the first level administrative units of the country. GEO1_RU is spatially harmonized to account for political boundary changes across census years. Some detail is lost in harmonization; see the comparability discussion. A GIS map (in shapefile format), corresponding to GEO1_RU can be downloaded from the GIS Boundary files page in the IPUMS International web site.

The full set of geography variables for Russia can be found in the IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1, and GEOLEV2. More information on IPUMS-International geography can be found here.

GEOLEV1: 1st subnational geographic level, world [consistent boundaries over time]

Data file: RUS2002_PHC-H-H.dat

Overview

Type: Continuous Decimal: 0 Width: 6 Range: - Format: Numeric

description

DEFINITION

GEOLEV1 indicates the major administrative unit in which the household was enumerated. The variable incorporates the geographies for every country, to enable cross-national geographic analysis over time. First administrative units in GEOLEV1 have been spatiotemporally harmonized to provide spatially consistent boundaries across samples in each country.

description

DEFINITION

HHTYPE is a constructed variable that describes the composition of households.

HHTYPE is constructed from information in RELATE (relationship to head), from the constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father), and from information on group quarters status, GQ.

2	2 families
3	3 families
4	4 families
5	5 families
6	6 families
7	7 families
8	8 families
9	9 or more families

description

DEFINITION

NFAMS is a constructed variable that indicates the number of families within each household. Family membership is defined by FAMUNIT. A "family" is any group of persons related by blood, adoption, or marriage. An unrelated individual within the household is considered a separate family. Thus, a household consisting of a widow and a domestic employee contains two families; a household consisting of a large, multi-generation extended family with no persons unrelated to the head counts as a single family.

NFAMS is constructed from information in RELATE (relationship to head) and from the constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father). See those variable descriptions for more detail.

POPDENSGEO1: Population density of GEOLEV1 unit, in persons per square kilometer**Data file:** RUS2002_PHC-H-H.dat**Overview**

Type: Continuous Decimal: 0 Width: 8 Range: - Format: Numeric

description

DEFINITION

POPDENSGEO1 indicates the population density in persons per square kilometer of the major administrative unit in which the household was enumerated. The major administrative unit of the household is identified by the GEOLEV1 variable.

The area of units in GEOLEV1 is calculated using Mollweide's equal area projection. For a full set of geography variables refer to IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1 and GEOLEV2. More information on IPUMS-International geography can be found here.

MOMLOC: Mother's location in household**Data file:** RUS2002_PHC-P-H.dat**Overview**

Type: Continuous Decimal: 0 Width: 3 Range: - Format: Numeric

description

DEFINITION

MOMLOC is a constructed variable that indicates whether or not the person's mother lived in the same household and, if so, gives the person number of the mother (see PERNUM). MOMLOC makes it easy for researchers to link the characteristics of children and their (probable) mothers.

The method by which probable child-mother links are identified is described in PARRULE.

The general design of MOMLOC and other constructed variables follows the methods developed for IPUMS-USA "Family Interrelationships," but the details vary significantly. For more details on the construction of MOMLOC, see the Comparability section of PARRULE and this paper on IPUMSI family linking methodology.

Note: MOMLOC identifies social relationships (such as stepmother and adopted mother) as well as biological relationships. The variable STEPMOM is designed to identify some of these social relationships. To restrict MOMLOC to biological mothers, such as for own children fertility estimation, MOMLOC should be reset to zero when STEPMOM is greater than zero.

41	Other Relatives, within empirical child cap
42	Other Relatives, within constructed child cap
51	Non-Relatives, within empirical child cap
52	Non-Relatives, within constructed child cap

description

DEFINITION

PARRULE describes the criteria by which the IPUMS International variables MOMLOC and POPLOC linked the person to a probable mother and/or father.

IPUMS International establishes child-parent links according to five basic rules, and PARRULE gives the number of the rule that applied to the link in question. A link to any parent automatically generates a second link to that parent's spouse or partner, so only one rule is needed to describe both MOMLOC and POPLOC.

The design of the interrelationship variables is described in this paper on IPUMSI family linking methodology.

var_concept.title	Vocabulary
Constructed Family Interrelationship Variables -- PERSON	IPUMS

POPLOC: Father's location in household

Data file: RUS2002_PHC-P-H.dat

Overview

Type: Continuous Decimal: 0 Width: 3 Range: - Format: Numeric

description

DEFINITION

POPLOC is a constructed variable that indicates whether or not the person's father lived in the same household and, if so, gives the person number of the father (see PERNUM). POPLOC makes it easy for researchers to link the characteristics of children and their (probable) fathers.

The method by which probable child-father links are identified is described in PARRULE.

The general design of POPLOC and other constructed variables follows the methods developed for IPUMS-USA "Family Interrelationships," but the details vary significantly. For more details on the construction of POPLOC, see the Comparability section of PARRULE and this paper on IPUMSI family linking methodology.

Note: POPLOC identifies social relationships (such as stepfather and adopted father) as well as biological relationships. The variable STEPPPOP is designed to identify some of these social relationships. To restrict POPLOC to biological mothers, such as for own children fertility estimation, POPLOC should be reset to zero when STEPPPOP is greater than zero.

Constructed Family Interrelationship Variables -- PERSON	IPUMS

STEPMOM: Probable stepmother

Data file: RUS2002_PHC-P-H.dat

Overview

Type: Discrete Decimal: 0 Width: 1 Range: - Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
0	Biological mother or no mother present
1	Mother has no children born or surviving
2	Child reports mother is deceased
3	Explicitly identified step relationship
4	Mother reports no children in the home
5	Age difference implausible
6	Child exceeds known fertility of mother

description

DEFINITION

STEPMOM indicates whether a person's mother, as identified by MOMLOC, was most probably not the person's biological mother. Non-zero values of STEPMOM explain why it is probable that the person's mother was a step- or adopted mother. A value of 0 indicates no likely stepmother because (1) the mother identified in MOMLOC was probably the biological mother or (2) there is no mother of this person present in the household.

The codes for STEPMOM are as follows:

- 0 = Biological mother or no mother of this person present in household.
- 1 = Mother has no children born or surviving.
- 2 = Child reports mother is deceased.
- 3 = Explicitly identified relationship (stepchild, adopted child, child of unmarried partner, stepchild/child-in-law).
- 4 = Mother reports no children in the home.
- 5 = Age difference between mother and child was less than 12 or greater than 54 years.
- 6 = Child exceeds known fertility of mother.

In cases where more than one criterion for a likely stepmother is met, STEPMOM will take the value of the criterion with the lowest code. See PARRULE for a description of the linking process.

Users should note that there are many stepmothers and adopted mothers in the population that cannot be identified with information available in the censuses. Therefore, STEPMOM will always under-represent their actual number in the population.

Value	Category
0	Biological father or no father present
1	Child reports father is deceased
2	Explicitly identified step relationship
3	Age difference implausible
4	Spouse of mother
5	Identified as adopted
6	Surname difference -- male child or never-married female

description

DEFINITION

STEPPOP indicates whether a person's father, as identified by POPLOC, was most probably not the person's biological father. Non-zero values of STEPPPOP explain why it is probable that the person's father was a step- or adopted father. A value of 0 indicates no likely stepfather because (1) the father identified in POPLOC was probably the biological father or (2) there is no father of this person present in the household.

The codes for STEPPPOP are as follows:

- 0 = Biological father or no father of this person present in household.
- 1 = Child reports father is deceased.
- 2 = Explicitly identified relationship (stepchild, adopted child, child of unmarried partner; stepchild/child-in-law).
- 3 = Age difference between father and child was less than 12 or greater than 54 years.

In cases where more than one criterion for a likely stepfather is met, STEPPPOP will take the value of the criterion with the lowest code. See PARRULE for a description of the linking process.

Users should note that there are many stepfathers and adopted fathers in the population that cannot be identified with information available in the censuses. Therefore, STEPPPOP will always under-represent their actual number in the population.

description

DEFINITION

FAMSIZE counts the number of the person's own family members living in the household with her/him, including the person her/himself. These include all persons related to the person by blood, adoption, or marriage as indicated by the census forms or inferred from them.

FAMSIZE is calculated from the units identified in the IPUMS constructed variable FAMUNIT (family unit membership). The primary family is defined as all persons related to the head in the RELATE variable. Secondary families are individuals or groups of persons linked together by the IPUMS constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father).

Constructed Family Interrelationship Variables -- PERSON	IPUMS

FAMUNIT: Family unit membership**Data file:** RUS2002_PHC-P-H.dat**Overview**

Type: Continuous Decimal: 0 Width: 4 Range: - Format: Numeric

description

DEFINITION

FAMUNIT is a constructed variable indicating to which family within the household a person belongs.

All persons related to the household head receive a 1 (see RELATE). Each secondary family or secondary individual receives a higher code. For purposes of FAMUNIT, secondary families are individuals or groups of persons linked together by the IPUMS constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father).

POLY2ND: Woman is second or higher order wife

Data file: RUS2002_PHC-P-H.dat

Overview

Type: Discrete Decimal: 0 Width: 1 Range: - Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
0	Person is not the 2nd or higher order wife linked via SPLOC
1	Person is the 2nd or higher order wife linked via SPLOC

description

DEFINITION

POLY2ND indicates if a woman was the second or higher order wife linked to a husband in the constructed IPUMS variable SPLOC -- Spouse's Location in Household. The variable does not suggest the actual marital order of wives, only their relative positions in the person order of the household as it was enumerated.

The point of POLY2ND is to facilitate using SPLOC in samples that identify polygamy. Some statistical matching procedures expect to find only one matching record for each subject record.

description

DEFINITION

CHBORN reports the number of children ever born to each woman of whom the question was asked. In most samples, women were to report all live births by all fathers, whether or not the child was still living.

1	Never married
2	Married
3	Widowed and not remarried
4	Divorced/separated and not remarried
5	Widowed or divorced
9	Unknown / missing

description

DEFINITION

EMARST describes for the European samples the person's current marital status according to law or custom. Individuals who remarried should report the status relevant to their most recent marriage. European census instructions generally limit marital status to legal unions, but there are exceptions.

EMARST has been classified according to the recommendations given by the Conference of European Statisticians for the 2010 Population and Housing Censuses.

EDATTAIN: Educational attainment, international recode [general version]

Data file: RUS2002_PHC-P-H.dat

Overview

Type: Discrete Decimal: 0 Width: 1 Range: - Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
0	NIU (not in universe)
1	Less than primary completed
2	Primary completed
3	Secondary completed
4	University completed
9	Unknown

description

DEFINITION

EDATTAIN records the person's educational attainment in terms of the level of schooling completed (degree or other milestone). The emphasis on level completed is critical: a person attending the final year of secondary education receives the code for having completed lower secondary only -- and in some samples only primary.

EDATTAIN does not necessarily reflect any particular country's definition of the various levels of schooling in terms of terminology or the number of years of schooling. EDATTAIN is an attempt to merge -- into a single, roughly comparable variable -- samples that provide degrees, ones that provide actual years of schooling, and those that have some of both. In addition to EDATTAIN, a country-specific education classification is provided which loses no information and reflects the particular educational system of that country (for example EDUCBR for Brazil, EDUCCL for Chile, and EDUCUS for the United States). As always, users can refer to the original education source variables for each sample, if they wish.

Many samples also give single years of schooling completed, recorded in YRSCHOOL. Some samples provide educational information in a form that could not be incorporated into EDATTAIN.

description

DEFINITION

CLASSWK refers to the status of an economically active person with respect to his or her employment -- that is, the type of explicit or implicit contract of employment with other persons or organizations that the person has in his/her job. In general, the variable indicates whether a person was self-employed, or worked for someone else, either for pay or as an unpaid family worker. CLASSWK is related to EMPSTAT, which is used to define the universe in many samples.

Class of worker is often referred to as "status in employment" in other sources.

description

DEFINITION

ECLASSWK refers in European Samples to the status of an economically active person with respect to his or her employment -- that is, the type of explicit or implicit contract of employment with other persons or organizations that the person has in his/her job. In general, the variable indicates whether a person was self-employed, or worked for someone else, either for pay or as an unpaid family worker.

ECLASSWK is related to EEMPSTAT (employment status), which is used to define the universe for the variable in many samples.

ECLASSWK has been classified according to the recommendations given by the Conference of European Statisticians for the 2010 Population and Housing Censuses. "Class of worker" is referred to as "Status in Employment" in the CES recommendations. The former term is used to maintain concordance with IPUMS practice.

EEDATTAIN: Educational attainment, Europe

Data file: RUS2002_PHC-P-H.dat

Overview

Type: Discrete Decimal: 0 Width: 2 Range: - Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
00	NIU (not in universe)
10	Less than primary
20	Primary (first stage of basic education)
30	Lower secondary (second stage of basic education)
40	Upper secondary
50	Post-secondary non-tertiary education
60	University completed
99	Unknown/missing

description

DEFINITION

EEDATTAIN records the person's educational attainment in terms of the level of schooling completed (degree or other milestone) for the European samples. The emphasis on level completed is critical: a person attending the final year of secondary education receives the code for having completed lower secondary only -- and in some samples only primary. All education that was relevant to the completion of a level should be taken into account even if it was provided outside of schools and universities.

EEDATTAIN does not necessarily reflect any particular country's definition of the various levels of schooling in terms of terminology or the number of years of schooling. EEDATTAIN is an attempt to merge -- into a single, roughly comparable variable -- samples that provide degrees, ones that provide actual years of schooling, and those that have some of both. In addition to EEDATTAIN, a country-specific education classification is provided which loses no information and reflects the particular educational system of that country.

Hungary 1980 and 1990 also give single years of schooling completed, recorded in YRSCHOOL.

EEDATTAIN has been classified according to the recommendations of the Conference of European Statisticians for the 2010 Population and Housing Censuses. EEDATTAIN presents a less detailed version of EDATTAIN for the European Samples.

200	Not economically active, unspecified
210	Students
220	Pension or capital income recipients
230	Homemakers
240	Others
999	Unknown / missing

description

DEFINITION

EEMPSTAT indicates for the European samples whether or not the respondent was part of the labor force -- working or seeking work -- over a specified period of time. Depending on the sample, EEMPSTAT can also convey further information.

EEMPSTAT has been classified according to the recommendations given by the Conference of European Statisticians for the 2010 Population and Housing Censuses. "Employment Status" is referred to as "Activity Status" in the CES recommendations, but the former term is used to maintain consistency with IPUMS practices.

The economically active population constitutes the total labor force: employed and unemployed persons.

0	NIU (not in universe)
1	Employed
2	Unemployed
3	Inactive
9	Unknown/missing

description

DEFINITION

EMPSTAT indicates whether or not the respondent was part of the labor force -- working or seeking work -- over a specified period of time. Depending on the sample, EMPSTAT can also convey further information.

The first digit of EMPSTAT is fully comparable, and classifies the population into three groups: employed, unemployed, and inactive. The combination of employed and unemployed yields the total labor force. The second and third digits of EMPSTAT preserve additional information available for some countries and census years but not for others.

Employment status is sometimes referred to in other sources as "activity status".

Type: Discrete Decimal: 0 Width: 1 Range: - Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
1	No, not in the labor force
2	Yes, in the labor force
8	Unknown
9	NIU (not in universe)

description

DEFINITION

LABFORCE is a dichotomous variable identifying whether a person participated in the labor force. Labor force participation

generally means working or seeking work within a specified reference period.

For most samples LABFORCE is a recode of EMPSTAT (employment status). A consistent lower age universe of 15 or older has been applied to increase comparability across samples. Full detail is retained in EMPSTAT, which should be used for any study of child labor.

INTERVIEWER INSTRUCTIONS

Question 3. Your date of birth

Ask the question precisely in this wording, do not ask "How old are you?"

The response on the day, month and year of birth should be recorded in digits.

For example, if the respondent was born on May 12, 1946, the entry will be "12", "5" and "1946" respectively.

After you have recorded the date of birth, without additional inquiry and with the help of the "Auxiliary table for determining the age by the known date of birth as of October 9, 2002" you should determine the age of the respondent in complete years and indicate it in the appropriate field. Children younger than one year should be identified by the "0" years option. You will find the table on the back page of the cover, Census Documents for the Dwelling.

description**DEFINITION**

INTERVIEWER INSTRUCTIONS

Question 5. Your place of birth

For persons born in the Russian Federation you should indicate only the region, territory, republic, autonomous area, autonomous region, the cities of Moscow or St. Petersburg (e.g., Saratov Region, Republic of Daghestan, Chukot Autonomous Area).

Administrative and territorial changes which occurred after the person's birth are disregarded.

For those born outside the Russian Federation - in foreign countries or in one of the republics of the former Soviet Union - indicate the state or former Soviet republic (e.g., Kazakhstan, Latvia, Poland, Canada).

Do not complete the field for digits located after the entry of the place of birth made in writing.

INTERVIEWER INSTRUCTIONS

Question 6. Your citizenship

Russian citizens should be identified by the "Russia" prompt.

In the proper field (box) indicate the citizenship (name of the state) of a foreign respondent (e.g., Italy, Ukraine, Moldavia).

If a Russian citizen also has citizenship of another country, you should mark the "Russia" option and indicate his/her other citizenship (name of the state).

If a respondent is a citizen of two foreign states, indicate one foreign citizenship only - at his/her choice.

Persons without citizenship are identified by the "stateless" option.

Citizenship of children under 14 years is identified by their parents.

Do not complete the field for digits located after the entry of the name of the state made in writing.

02	Married, not registered
03	Widowed
04	Never married
05	Divorced or separated

98	Unknown
99	NIU (not in universe)

INTERVIEWER INSTRUCTIONS

Question 4. Your marital status

People who are 16 years or older should be identified by the mark corresponding to one of four suggested prompts.

The "Married" option is marked for those who are married at the present moment regardless of the official registration of the marriage at the registry office.

After you have marked the "Married" option, ask the respondent whether the marriage was registered at the registry office. Depending on the answer, mark the appropriate prompt - "yes" or "no".

For those persons who were identified as married, in a special field indicate the number of the spouse assigned to him/her in column 1, List A, Form S (he/she was recorded under the same number in Forms K or D).

If the spouse is not registered in the given household, no number should be indicated.

The "Was never married" option is for those who were never married, either in registered or unregistered (consensual union) marriage

The "Divorced" prompt should be marked for those who were formerly married, but at the present moment are not; regardless of whether the divorce was registered or not at the registry office, or those who were formerly living in consensual union, but at the present moment are separated.

[p. 46]

The "Widower, widow" option is for those who were formerly married (regardless of the official registration of the marriage), and the marriage ceased to exist because of the death of the spouse, and the person did not marry again.

As a rule, this item is not completed for respondents younger than 16 years. Only if a respondent younger than 16 years is really married, you should mark the proper option.

07	Child-in-law
08	Grandparent
09	Grandchild
10	Other relative
11	Not related

INTERVIEWER INSTRUCTIONS

Question 1. Your relationship to persons you reside with (in regard to person No. 1 in this enumeration unit)

Mark one of eleven suggested prompts.

[An image was omitted from the original document]

Person No. 1 of the household (first in the list of household members) should be marked as the "Person No. 1", all other members - according to available prompts. For example, if a respondent is a son (own, adopted or step son) of the reference person, mark the "daughter, son" prompt.

If a household is represented by a single person, mark the "Person No. 1" option.

If a respondent has a different relationship to the reference family member, or different characteristics from those indicated above (for example, a nephew), mark the "other degree of relationship, characteristics" prompt.

If the answer of the respondent makes it difficult to identify the proper option, refer to the last page of the cover, "Census Documents for the Dwelling", where you can find solutions to some difficult cases.

Those who belong to the given household but are not related to person No. 1 (e.g., a nurse-maid, servants and their family members living in the household and contributing therein) should be identified by the "Unrelated" prompt (e.g., the "Unrelated" prompt would be marked for a nurse-maid and her daughter).

For each member of the household (regardless of the age or marital status) living together with one or two parents in one household, in the special field of the form you should indicate the ordinal number of his/her mother (own, step or foster) assigned to her in column 1, List A, Form S (she was recorded under the same number in Forms K or D. If there is no mother in the household, and only the father (own, step or foster) is available, write down the father's number. If there is no mother or father in the household, no number is needed.

For the population of collective households:

- the person listed under No. 1 in List A, Form S is identified by the "Person No. 1" option, all others - by the "Unrelated" prompt.

If among the members of collective households there are people related to each other (e.g., man and wife in a boarding-house for elderly and disabled people or brother and sister in an orphanage), one of them should be recorded first in the dwelling, the other - second, indicating their relationship in a standard manner, while all others should be logged after them and identified by the "Unrelated" prompt.

INTERVIEWER INSTRUCTIONS

Question 12. Have you been living continuously in this city (urban settlement or rural area of the district) since birth?

The continuity of residence does not depend on the registration or its type (permanent or provisional).

The "Yes" prompt should be checked off for those who have been living in this population center since birth.

The continuity of residence is not deemed disrupted by:

- The movement from one rural population center to another within the boundaries of the same administrative district;

- The movement within the boundaries of the same city (town);

- All departures from the given locality not implying a change of the place of permanent residence (on vacation, visit to friends or relatives etc.).

Check off the "No" option for those who have not been living in a population center or rural area of the district since birth, including those who were born here but left the locality for permanent residence elsewhere for some time. For example, a respondent went to study at an institute and lived at the place of learning, or served a sentence in a penal institution. The "No" option should be chosen for those who moved from urban population centers to rural areas (or the opposite) within one and the same administrative district.

Ask the persons with the "No" option checked off the following sub-question:

1. Indicate the year since which you have been continually residing here.

Put down the year (in digits) reported by the respondent since which he/she has been continually residing in the given town or rural area of the district. For those who left this population center for permanent residence in other places, indicate the year since which they have been living here upon their return. For example, if a person was born in this locality in 1945, left it to study in another town in 1962, and came back in 1967, you should indicate " 1967".

If you indicated years from 1989 to 2002, ask another sub-question:

2. Where did you reside in January of 1989? (Children born after January 1989 do not have to answer the question).

a) Name of the autonomous republic, autonomous region, territory, region, autonomous area of the Russian Federation, republic of the former Soviet Union or another state.

[p. 65]

For those who in January of 1989 resided in the Russian Federation, put down in writing the name of the autonomous republic (territory, region, autonomous region or area, cities of Moscow or Leningrad) in the respective field (box). For those who in 1989 lived outside the Russian Federation, indicate the name of the state (including republics of the former Soviet Union).

Administrative and territorial changes which took place after January 1989 are disregarded.

Do not complete the field for digits located after the entry of the place of residence made in writing.

b) Type of the population center you were residing in.

Check off the prompt corresponding to the type of population center where the respondent lived in January of 1989. If he, she lived in a town or urban-type community (industrial or resort community), check off the "Urban" option, if he/she lived in a rural locality - check off the "Rural" option. The administrative and territorial changes which took place after the departure of the respondent from the former place of residence are disregarded. For example, if the status of a rural population center where a respondent resided before departure to the present locality was later upgraded to the status of an urban community or incorporated into a town, choose the "Rural" option.

INTERVIEWER INSTRUCTIONS

Question 8.3. a) Your education

Those who have reached the age of 10 should be identified by one of seven suggested prompts.

The highest educational attainment of a respondent should be recorded.

Apart from the current classification of the levels of education the prompts also suggest former classification of those levels (in brackets).

If a respondent finds difficulty in defining his/her level of education, observe the following rules.

"Primary comprehensive (primary)" and "basic comprehensive (lower secondary)" education can be determined by the highest grade completed and the year of graduation with the help of the following table.

Table for identification of the level of educational attainment of persons without secondary (complete) comprehensive education, with the classification by grades [table]

[Column headings:]	(A)	(B)
The highest grade of the comprehensive school completed by the respondent, or what grade he/she is attending now	(A) Highest completed grade or current grade: Completed primary comprehensive school	(B) Corresponding level of education: Primary comprehensive (primary education)
Level of education corresponding to the given grade	(A) Highest completed grade or current grade: Completed 3 grades of the three-year primary comprehensive school in 1972 or later	(B) Corresponding level of education: Primary comprehensive (primary education)
	(A) Highest completed grade or current grade: Completed 4-6 grades	(B) Corresponding level of education: Primary comprehensive (primary education)
	(A) Highest completed grade or current grade: Completed 7 grades in 1962 or later	(B) Corresponding level of education: Primary comprehensive (primary education)
	(A) Highest completed grade or current grade: Completed 8 grades in 1990 or later	(B) Corresponding level of education: Primary comprehensive (primary education)
	(A) Highest completed grade or current grade: Attends 5-9 grades	(B) Corresponding level of education: Primary comprehensive (primary education)
	(A) Highest completed grade or current grade: Dropped out of the 4th grade in 1972/1973 - 1988/1989 school years	(B) Corresponding level of education: Primary comprehensive (primary education)
	(A) Highest completed grade or current grade: Dropped out of the 5-7th grades	(B) Corresponding level of education: Primary comprehensive (primary education)
	(A) Highest completed grade or current grade: Dropped out of the 8th grade in 1962/1963 school year or later	(B) Corresponding level of education: Primary comprehensive (primary education)
	(A) Highest completed grade or current grade: Dropped out of the 9th grade in 1989/1990 school year or later	(B) Corresponding level of education: Primary comprehensive (primary education)
	(A) Highest completed grade or current grade:	(B) Completed lower secondary school:
	(A) Highest completed grade or current grade: Completed 7 grades in 1961 or earlier	(B) Corresponding level of education: Basic comprehensive (lower secondary) education
	(A) Highest completed grade or current grade: Completed 8 grades in 1989 or earlier	(B) Corresponding level of education: Basic comprehensive (lower secondary) education
	(A) Highest completed grade or current grade: Completed 9 grades	(B) Corresponding level of education: Basic comprehensive (lower secondary) education
	(A) Highest completed grade or current grade: Completed 10 grades of eleven- or twelve-year secondary school	(B) Corresponding level of education: Basic comprehensive (lower secondary) education
	(A) Highest completed grade or current grade: Completed 11 grades of twelve-year secondary school	(B) Corresponding level of education: Basic comprehensive (lower secondary) education
	(A) Highest completed grade or current grade: Attends 10-11 (12) grades	(B) Corresponding level of education: Basic comprehensive (lower secondary) education
	(A) Highest completed grade or current grade: Dropped out of the 8th grade in 1961/1962 school year or earlier	(B) Corresponding level of education: Basic comprehensive (lower secondary) education
	(A) Highest completed grade or current grade: Dropped out of the 9th grade in 1988/1989 school year or earlier	(B) Corresponding level of education: Basic comprehensive (lower secondary) education
	(A) Highest completed grade or current grade: Dropped out of the 10-11th (12th) grades	(B) Corresponding level of education: Basic comprehensive (lower secondary) education

Check off the appropriate prompt:

"Secondary (complete) comprehensive" - for those who completed secondary comprehensive school (including those with them-depth learning of certain subjects), lycees, gymnasias etc. and received a certificate of secondary (complete) comprehensive education.

"Secondary vocational (secondary special)" - for those who completed a secondary vocational educational institution: technical secondary school, medical or pedagogical school, college, technical secondary school at an enterprise etc.

"Incomplete higher (non-graduate)" - for those who completed the basic educational course of higher professional learning, attended the course for not less than 2 years, and received a diploma of incomplete higher education.

Mark the same prompt for those who is now attending or completed the basic educational course of higher professional learning, or attended the course for not less than one half of the established period of learning.

Those who do not have a diploma of incomplete higher education and attended the course for less than one half of the established period of learning should be identified by the prompt corresponding to the level of educational attainment they had reached before being admitted to a higher educational establishment i.e., "secondary vocational (secondary special)" or "secondary (complete) comprehensive".

[p. 50]

"Higher professional" for those who graduated from the higher educational establishment: institute, academy, university etc.

"Post-graduate professional" - for those who completed the post-graduate course, doctor's degree course, residency, military post-graduate course in educational establishments of higher professional learning and scientific institutions (regardless of the availability of an academic degree).

Part-time, correspondence or external students who graduated from educational institutions should be identified as graduates of the respective educational establishments.

For students and graduates of educational institutions which do not provide comprehensive education (e.g., training course (center), vocational training center, re-training or advanced training course, preparatory classes of higher educational establishments etc.) you should indicate the level of education attained before their admission to those educational establishments.

If you find difficulty in identifying the level of education, in the "Notes" section on the front page of the cover - Census forms for the dwelling - put down the ordinal number of the person with an unclear level of education, his/her full name, the name of educational establishment he/she graduated from, attended or is attending now, the grades (years) completed, and when (year).

The field should not be completed for children under 10.

description

DEFINITION

This variable indicates the person's highest level of education attained.

INTERVIEWER INSTRUCTIONS

Question 10. Indicate all your sources of livelihood (means of sustenance)

Before asking the question, let the respondent get acquainted with the card (a list of sources of livelihood). After he/she has looked through the list, the respondent should declare one or several sources of livelihood chosen from the suggested prompts.

Mark one or several prompts from twelve options suggested in the census form.

"Income from work (except work at personal subsidiary plots)" - for those who would be paid for their work in cash or in kind, including farm labor.

"Personal subsidiary plot" - for those who are engaged in farming and/or cattle breeding at their personal subsidiary plots (including orchards and vegetable gardens). This source should be indicated for those engaged in farming, livestock or poultry breeding, essentially for family use.

"Scholarship" - for students who receive a scholarship (including scholarship paid to students by the sponsor enterprise or organization, or employment service).

"Pension (except a disability pension)" - for those who receive a retirement (old age) pension, pension for the loss of a breadwinner, long-service pension, or social pension. Check off the appropriate prompt for those entitled to a pension, and not those who collect it. Thus, a pension paid to a child because of the loss of a breadwinner should be indicated in the child's census form and not in his/her mother's form - even if she is the recipient of the pension.

"Disability pension" - for those who receive a disability pension. Mark the appropriate prompt for those who are entitled to a pension, and not those who receive it.

"Allowance (except unemployment benefit)" - for those entitled to monthly allowance:

- For the period of child rearing leave up to 18 months granted to working mothers, to working mothers attending part-time educational establishments or studying by correspondence, as well as to mothers in the military service under a contract, or to persons substituting them (the prompt should be marked for the woman herself or for the person substituting her);
 - Children up to 16 years, as well as students of comprehensive educational institutions - until their graduation but not after the age of 18 years (the prompt should be marked for the child);
 - Spouses of servicemen in military service under a contract living together with the spouses in the areas where they cannot find a job matching their qualification;
 - Children up to 16 years whose parents evade to pay alimony, etc.

The "Allowance" prompt is marked for those entitled to it and not for those who collect it (e.g., if an allowance is granted to a child, and is received by the mother, the appropriate prompt should be marked for the child, and not the mother).

[p. 53]

"Unemployment benefit" - for those registered with the bodies of population employment service as unemployed and enjoying the unemployment benefit, as well as welfare granted by the employment foundation.

"Other types of governmental social welfare" - for inmates of children's homes, students of boarding schools, persons living in old people's and nursing homes etc., persons living on governmental welfare (population of collective households).

"Savings" - for those whose source of livelihood are savings, interest on deposits or securities.

"Income from renting or leasing of property" - for those receiving income in the form of rental fee for rented land, apartment, garage etc.

"Dependent on someone for support" - for those dependent on relatives or other persons, or alimony beneficiaries. If alimony is paid to minors, the "Dependent" option is marked for children, and not for the mother or father, though they may be the physical recipients of the alimony.

"Other source" - for those whose source of livelihood is different from the above (e.g., mendicancy, or collection and return of empty bottles etc.).

INTERVIEWER INSTRUCTIONS

9. Language proficiency

Language proficiency means an ability to speak, read and write, or only to speak a given language.

Question 9.1. Do you know the Russian language?

"Yes" should indicate those who know Russian.

"No" should indicate those who do not know Russian.

Question 9.2. What other languages do you know?

Each box is intended for one language only. The first box is for the mother tongue of the respondent. Therefore, you need to ask "What is your mother tongue?"

If a respondent says that his/her mother tongue is Russian, it should not be mentioned in the answer to question 9.2., but in the "Reserve" field in the bottom of the census form you must put the "Yes" mark. If, apart from the Russian language, a respondent knows other languages, they should be indicated in the available boxes.

If the mother tongue is not Russian, it should be identified in the first box. In the remaining two boxes you will indicate other languages the respondent knows.

If a respondent knows more languages than the available number of boxes, indicate the languages of his/her own choice. If a respondent finds difficulty in choosing the languages to be recorded, preference should be given to the national languages of the Russian Federation and indigenous languages of the CIS member-states. If a respondent lives on the territory of a republic (autonomous region or area), preference should be given to the state language of that territory.

Mark "No" in each line for those who does not know other languages, and for children yet unable to talk.

Do not complete the field for digits located after the entry of the language made in writing

Language of their nationality

INTERVIEWER INSTRUCTIONS

9. Language proficiency

Language proficiency means an ability to speak, read and write, or only to speak a given language.</p>

<p>Question 9.1. Do you know the Russian language?

"Yes" should indicate those who know Russian.

"No" should indicate those who do not know Russian.</p>

<p>Question 9.2. What other languages do you know?

Each box is intended for one language only. The first box is for the mother tongue of the respondent. Therefore, you need to ask "What is your mother tongue?"

If a respondent says that his/her mother tongue is Russian, it should not be mentioned in the answer to question 9.2., but in the "Reserve" field in the bottom of the census form you must put the "Yes" mark. If, apart from the Russian language, a respondent knows other languages, they should be indicated in the available boxes.

If the mother tongue is not Russian, it should be identified in the first box. In the remaining two boxes you will indicate other languages the respondent knows.

If a respondent knows more languages than the available number of boxes, indicate the languages of his/her own choice. If a respondent finds difficulty in choosing the languages to be recorded, preference should be given to the national languages of the Russian Federation and indigenous languages of the CIS member-states. If a respondent lives on the territory of a republic (autonomous region or area), preference should be given to the state language of that territory.

Mark "No" in each line for those does not know other languages, and for children yet unable to talk.

Do not complete the field for digits located after the entry of the language made in writing

description

DEFINITION

This variable indicates the (third) non-Russian language that the respondent is fluent in.

INTERVIEWER INSTRUCTIONS

Question 8.1 Do you attend an educational institution (school, technical secondary school, college, higher educational establishment etc.)?

Persons of 6 years or older attending full-time, part-time educational institutions or learning by correspondence (both public and private), which implement comprehensive or vocational educational programs, should be identified by the "Yes" option with the indication of one of the four types of educational institutions.

Mark one of the appropriate prompts:

"Comprehensive" students of primary, lower secondary, secondary comprehensive schools (including those with the in-depth learning of certain subjects), lyceums, gymnasia etc.

"Basic vocational training" - students of vocational (technical) schools etc.

"Secondary vocational education" - students of technical secondary schools, medical or pedagogical schools, colleges etc.

"Higher (tertiary) education" - students of higher educational establishments (institutes, academies, universities etc.), and those attending a post-graduate course, doctor's degree course, residency, military post-graduate course.

Persons of 6 years or older who do not attend an educational institution but study at the establishments of complementary education for children and adults: music (art, dance) schools, schools of arts, centers (palaces, houses, stations, clubs) of children's creativity, sports, technical, environmental etc., courses of different orientation or other institutions, which do not provide comprehensive education or vocational training, should be identified by the "No" prompt.

The field should not be completed for children under 6.

INTERVIEWER INSTRUCTIONS

11. Employment

Question 11. Did you perform any work for wage or salary a week before the census?

One of the suggested prompts should be marked for persons over 15 years.

"Yes" - for those in paid employment one week before the census (from October 2 to October 8, 2002) who:

1) Performed work regardless of the time of actual payment for the job:

- Work (at least one hour) for consideration regardless of the type: permanent, temporary, seasonal, odd or other job done for consideration;
 - Paid public works;
 - Work yielding income (but not for hire) - performed independently or with one or several partners - with or without hired labor;
 - Unpaid work at a family enterprise or farm;

2) Were temporarily not at work, but had a formal attachment to their job (e.g., an interpreter employed by the company awaiting a call).

The reasons of temporary absence from work are the following:

- Illness or injury, nursing care;
 - Annual leave or days off, compensatory leave or holiday, overtime or weekend (holiday) compensation;
 - Maternity and child rearing leave provided for by the law;
 - Studies or retraining outside the place of employment, academic leave;
 - Suspension of work with/without leave (holiday premium) on the management's initiative;
 - Rotation shift duty or another specific type of the job;
 - Strike;
 - Other similar reasons.

Students and pensioners in paid employment a week before the census (from October, 2 to October 8, 2002) are deemed employed. Mark the "Yes" option for them.

Those with the "Yes" option marked in question 11, must have an identified source of livelihood indicated in question 10 "income from work (except work at personal subsidiary plots)"

"No" - for those out of work or without a paying job, who were solely:

- Attending a military academy, post-graduate course, doctor's degree course as a full-time student;
 - Engaged in own-account production retained by the producer;
 - Performing household duties in cleaning the house, cooking for household members, tailoring, repair, laundering and cleaning of clothes for household members, upbringing of children, rearing of the elderly or sick members of the household;
 - Rendering services as a volunteer without pay to different persons or charity organizations, parent-teacher associations, veterans' committees, orphanages or old people's homes etc.;
 - Owning stock of enterprises or companies without direct participation in the economic activity of the enterprise or company;
 - Engaged in mendicancy, collection of empty bottles etc.

The "No" option should be also chosen for those who did not have a job or a paying employment during the week preceding the enumeration point of time.

Ask the persons with the "Yes" option. "What is your status at your primary job?" Inform the respondent of all the prompts and let him/her choose the appropriate answer.

If a respondent had more than one job (paying occupation), ask him/her to identify a job he/she him/herself considers to be the primary job.

If the respondent finds difficulty in identifying the primary job, it is the one where he/she worked most of the time, or the one yielding larger income.

Those who changed the main job during the reference week, should identify the job he/she was doing by the end of the week.

Mark one of two suggested prompts.

"Working for hire" - for those who worked under a written agreement, contract or verbal agreement concluded with the management of an enterprise, organization or institution of any form of ownership, or with a private employer, and were remunerated by a wage or salary (in cash or in kind). The same option should be chosen for:

- Persons elected, appointed or commissioned as manager, or director, or other persons receiving a managerial wage;
 - Students receiving a salary;
 - Members of the family who worked at a family enterprise for a consideration and enjoyed the same rights and were paid on a par with others performing the same work;
 - Ministers of religions.

"Working, but not for hire" - for those who:

<div class="i1">- worked at an own enterprise (on an individual basis) with or without hired labor;
- were members of producers' cooperatives (crews);
- worked without pay on a farm, in a producers' cooperative, at a private enterprise (individual or family enterprise) owned by a relative.</div><p>The respondents who identified themselves as "Working, but not for hire" should also choose one of the additional prompts:

[p. 56]

"With hired labor" - for those who managed his/her own enterprise or were independently engaged in professional activity or commerce, and used one or more hired workers.

"Without hired labor" - for those who were independently engaged in professional activity or commerce, and did not hire workers.

"Other activity" for those who were members of a producers' cooperative (crew), i.e. worked at an own enterprise (cooperative) producing commodities or services, where each owner enjoys equal rights with other owners in decision-making on the matters of production, sale and other aspects of the cooperative's activity, investment and distribution of income among the members~ for those who worked without pay on a farm, in a producers' cooperative, at a private enterprise (individual or family enterprise) owned by a relative.

INTERVIEWER INSTRUCTIONS

Question 10. Indicate all your sources of livelihood (means of sustenance)

Before asking the question, let the respondent get acquainted with the card (a list of sources of livelihood). After he/she has looked through the list, the respondent should declare one or several sources of livelihood chosen from the suggested prompts.

Mark one or several prompts from twelve options suggested in the census form.

"Income from work (except work at personal subsidiary plots)" - for those who would be paid for their work in cash or in kind, including farm labor.

"Personal subsidiary plot" - for those who are engaged in farming and/or cattle breeding at their personal subsidiary plots (including orchards and vegetable gardens). This source should be indicated for those engaged in farming, livestock or poultry breeding, essentially for family use.

"Scholarship" - for students who receive a scholarship (including scholarship paid to students by the sponsor enterprise or organization, or employment service).

"Pension (except a disability pension)" - for those who receive a retirement (old age) pension, pension for the loss of a breadwinner, long-service pension, or social pension. Check off the appropriate prompt for those entitled to a pension, and not those who collect it. Thus, a pension paid to a child because of the loss of a breadwinner should be indicated in the child's census form and not in his/her mother's form - even if she is the recipient of the pension.

"Disability pension" - for those who receive a disability pension. Mark the appropriate prompt for those who are entitled to a pension, and not those who receive it.

"Allowance (except unemployment benefit)" - for those entitled to monthly allowance:

- For the period of child rearing leave up to 18 months granted to working mothers, to working mothers attending part-time educational establishments or studying by correspondence, as well as to mothers in the military service under a contract, or to persons substituting them (the prompt should be marked for the woman herself or for the person substituting her);
 - Children up to 16 years, as well as students of comprehensive educational institutions - until their graduation but not after the age of 18 years (the prompt should be marked for the child);
 - Spouses of servicemen in military service under a contract living together with the spouses in the areas where they cannot find a job matching their qualification;
 - Children up to 16 years whose parents evade to pay alimony, etc.

The "Allowance" prompt is marked for those entitled to it and not for those who collect it (e.g., if an allowance is granted to a child. and is received by the mother, the appropriate prompt should be marked for the child, and not the mother).

[p. 53]

"Unemployment benefit" - for those registered with the bodies of population employment service as unemployed and enjoying the unemployment benefit, as well as welfare granted by the employment foundation.

"Other types of governmental social welfare" - for inmates of children's homes, students of boarding schools, persons living in old people's and nursing homes etc., persons living on governmental welfare (population of collective households).

"Savings" - for those whose source of livelihood are savings, interest on deposits or securities.

"Income from renting or leasing of property" - for those receiving income in the form of rental fee for rented land, apartment, garage etc.

"Dependent on someone for support" - for those dependent on relatives or other persons, or alimony beneficiaries. If alimony is paid to minors, the "Dependent" option is marked for children, and not for the mother or father, though they may be the physical recipients of the alimony.

"Other source" - for those whose source of livelihood is different from the above (e.g., mendicancy, or collection and return of empty bottles etc.).

Before asking the question, let the respondent get acquainted with the card (a list of sources of livelihood). After he/she has looked through the list, the respondent should declare one or several sources of livelihood chosen from the suggested prompts.

Mark one or several prompts from twelve options suggested in the census form.

"Income from work (except work at personal subsidiary plots)" - for those who would be paid for their work in cash or in kind, including farm labor.

"Personal subsidiary plot" - for those who are engaged in farming and/or cattle breeding at their personal subsidiary plots (including orchards and vegetable gardens). This source should be indicated for those engaged in farming, livestock or poultry breeding, essentially for family use.

"Scholarship" - for students who receive a scholarship (including scholarship paid to students by the sponsor enterprise or organization, or employment service).

"Pension (except a disability pension)" - for those who receive a retirement (old age) pension, pension for the loss of a breadwinner, long-service pension, or social pension. Check off the appropriate prompt for those entitled to a pension, and not those who collect it. Thus, a pension paid to a child because of the loss of a breadwinner should be indicated in the

child's census form and not in his/her mother's form - even if she is the recipient of the pension.

"Disability pension" - for those who receive a disability pension. Mark the appropriate prompt for those who are entitled to a pension, and not those who receive it.

"Allowance (except unemployment benefit)" - for those entitled to monthly allowance:</p>
</div>
<div class="i1">
<p>For the period of child rearing leave up to 18 months granted to working mothers, to working mothers attending part-time educational establishments or studying by correspondence, as well as to mothers in the military service under a contract, or to persons substituting them (the prompt should be marked for the woman herself or for the person substituting her);
- Children up to 16 years, as well as students of comprehensive educational institutions - until their graduation but not after the age of 18 years (the prompt should be marked for the child);
- Spouses of servicemen in military service under a contract living together with the spouses in the areas where they cannot find a job matching their qualification;
- Children up to 16 years whose parents evade to pay alimony, etc.</div>
<p>The "Allowance" prompt is marked for those entitled to it and not for those who collect it (e.g., if an allowance is granted to a child. and is received by the mother, the appropriate prompt should be marked for the child, and not the mother).</p>

[p. 53]

"Unemployment benefit" - for those registered with the bodies of population employment service as unemployed and enjoying the unemployment benefit, as well as welfare granted by the employment foundation.

"Other types of governmental social welfare" - for inmates of children's homes, students of boarding schools, persons living in old people's and nursing homes etc., persons living on governmental welfare (population of collective households).

"Savings" - for those whose source of livelihood are savings, interest on deposits or securities.

"Income from renting or leasing of property" - for those receiving income in the form of rental fee for rented land, apartment, garage etc.

"Dependent on someone for support" - for those dependent on relatives or other persons, or alimony beneficiaries. If alimony is paid to minors, the "Dependent" option is marked for children, and not for the mother or father, though they may be the physical recipients of the alimony.

"Other source" - for those whose source of livelihood is different from the above (e.g., mendicancy, or collection and return of empty bottles etc.).

[] 2 No - Skip to question 20</div>

CATEGORIES

Value	Category
1	Has job
2	Does not have job
8	Unknown
9	NIU (not in universe)

INTERVIEWER INSTRUCTIONS

>11. Employment</p>

>Question 11. Did you perform any work for wage or salary a week before the census?

One of the suggested prompts should be marked for persons over 15 years.

"Yes" - for those in paid employment one week before the census (from October 2 to October 8, 2002) who:

1) Performed work regardless of the time of actual payment for the job:

>- Work (at least one hour) for consideration regardless of the type: permanent, temporary, seasonal, odd or other job done for consideration;
- Paid public works;
- Work yielding income (but not for hire) - performed independently or with one or several partners - with or without hired labor;
- Unpaid work at a family enterprise or farm;</div>[p. 54]

2) Were temporarily not at work, but had a formal attachment to their job (e.g., an interpreter employed by the company awaiting a call).

The reasons of temporary absence from work are the following:

>- Illness or injury, nursing care;
- Annual leave or days off, compensatory leave or holiday, overtime or weekend (holiday) compensation;
- Maternity and child rearing leave provided for by the law;
- Studies or retraining outside the place of employment, academic leave;
- Suspension of work with/without leave (holiday premium) on the management's initiative;
- Rotation shift duty or another specific type of the job;
- Strike;
- Other similar reasons.</div><p>Students and pensioners in paid employment a week before the census (from October, 2 to October 8, 2002) are deemed employed. Mark the "Yes" option for them.

Those with the "Yes" option marked in question 11, must have an identified source of livelihood indicated in question 10 "income from work (except work at personal subsidiary plots)"

"No" - for those out of work or without a paying job, who were solely:

>- Attending a military academy, post-graduate course, doctor's degree course as a full-time student;
- Engaged in own-account production retained by the producer;
- Performing household duties in cleaning the house, cooking for household members, tailoring, repair, laundering and cleaning of clothes for household members, upbringing of children, rearing of the elderly or sick members of the household;
- Rendering services as a volunteer without pay to different persons or charity organizations, parent-teacher associations, veterans' committees, orphanages or old people's homes etc.;
-Owning stock of enterprises or companies without direct participation in the economic activity of the enterprise or company;
-Engaged in mendicancy, collection of empty bottles etc.</div>[p. 55]

The "No" option should be also chosen for those who did not have a job or a paying employment during the week preceding the enumeration point of time.

Ask the persons with the "Yes" option. "What is your status at your primary job?" Inform the respondent of all the prompts and let him/her choose the appropriate answer.

If a respondent had more than one job (paying occupation), ask him/her to identify a job he/she him/herself considers to be the primary job.

If the respondent finds difficulty in identifying the primary job, it is the one where he/she worked most of the time, or the one yielding larger income.

Those who changed the main job during the reference week, should identify the job he/she was doing by the end of the week.

Mark one of two suggested prompts.

"Working for hire" - for those who worked under a written agreement, contract or verbal agreement concluded with the management of an enterprise, organization or institution of any form of ownership, or with a private employer, and were remunerated by a wage or salary (in cash or in kind). The same option should be chosen for:</p>
</div>
<div class="i1">
<p>Persons elected, appointed or commissioned as manager, or director, or other persons receiving a managerial wage;
- Students receiving a salary;
- Members of the family who worked at a family enterprise for a consideration and enjoyed the same rights and were paid on a par with others performing the same work;
- Ministers of religions.</p>
</div>
<p>"Working, but not for hire" - for those who:</p>
<div class="i1">
<p>- worked at an own enterprise (on an individual basis) with or without hired labor;
- were members of producers' cooperatives (crews);
- worked without pay on a farm, in a producers' cooperative, at a private enterprise (individual or family enterprise) owned by a relative.</p>
</div>
<p>The respondents who identified themselves as "Working, but not for hire" should also choose one of the additional prompts:</p>

[p. 56]

"With hired labor" - for those who managed his/her own enterprise or were independently engaged in professional activity or commerce, and used one or more hired workers.

"Without hired labor" - for those who were independently engaged in professional activity or commerce, and did not hire workers.

"Other activity" for those who were members of a producers' cooperative (crew), i.e. worked at an own enterprise (cooperative) producing commodities or services, where each owner enjoys equal rights with other owners in decision-making on the matters of production, sale and other aspects of the cooperative's activity, investment and distribution of income among the members~ for those who worked without pay on a farm, in a producers' cooperative, at a private enterprise (individual or family enterprise) owned by a relative.

15	15+
98	Unknown
99	NIU (not in universe)

INTERVIEWER INSTRUCTIONS

Question 13. How many children did you give birth to?

The question should be asked only to females of 15 years or older (married or single). Put down the total number of born children (disregarding the number of still-born children) regardless of whether those children are alive at the present moment or not, whether they belong to the female's household or live separately.

Adopted children and children in care, as well as husband's children from the former wedlock are not registered in the number of children born by the given female.

If a female does not have any children, "0" is recorded.

Females younger than 15 years should not answer the question.

If in one of the dwellings of your counting area you meet a person temporarily staying in the Russian Federation and permanently residing abroad, who at the enumeration point of time was present in the area, he/she should be enumerated in List B, Form S, and Form V should be completed for him.

Questions and instructions

LITERAL QUESTION

21. Have you lived continuously in this town (municipality or rural district) ever since you were born?

1 Yes
2 No

If answer no in question 20

1. Indicate the year from which you have lived here continuously. If a year between 1989 and 2002 is shown, go to sub-question 2.

2. Indicate where were you living in January 1989?

(a) Name of autonomous district, region, district or republic of the Russian Federation or name of another State

(b) Type of location in which you were living

Urban
Rural

CATEGORIES

Value	Category
1	From birth
2	Not from birth

INTERVIEWER INSTRUCTIONS

Question 12. Have you been living continuously in this city (urban settlement or rural area of the district) since birth?

The continuity of residence does not depend on the registration or its type (permanent or provisional).

The "Yes" prompt should be checked off for those who have been living in this population center since birth.

The continuity of residence is not deemed disrupted by:

- The movement from one rural population center to another within the boundaries of the same administrative district;

- The movement within the boundaries of the same city (town);

- All departures from the given locality not implying a change of the place of permanent residence (on vacation, visit to friends or relatives etc.).

Check off the "No" option for those who have not been living in a population center or rural area of the district since birth, including those who were born here but left the locality for permanent residence elsewhere for some time. For example, a respondent went to study at an institute and lived at the place of learning, or served a sentence in a penal institution. The "No" option should be chosen for those who moved from urban population centers to rural areas (or the opposite) within one and the same administrative district.

Ask the persons with the "No" option checked off the following sub-question:

1. Indicate the year since which you have been continually residing here.

Put down the year (in digits) reported by the respondent since which he/she has been continually residing in the given town or rural area of the district. For those who left this population center for permanent residence in other places, indicate the year since which they have been living here upon their return. For example, if a person was born in this locality in 1945, left it to study in another town in 1962, and came back in 1967, you should indicate " 1967".

If you indicated years from 1989 to 2002, ask another sub-question:

2. Where did you reside in January of 1989? (Children born after January 1989 do not have to answer the question).

a) Name of the autonomous republic, autonomous region, territory, region, autonomous area of the Russian Federation, republic of the former Soviet Union or another state.

[p. 65]

For those who in January of 1989 resided in the Russian Federation, put down in writing the name of the autonomous republic (territory, region, autonomous region or area, cities of Moscow or Leningrad) in the respective field (box). For those who in 1989 lived outside the Russian Federation, indicate the name of the state (including republics of the former Soviet Union).

Administrative and territorial changes which took place after January 1989 are disregarded.

Do not complete the field for digits located after the entry of the place of residence made in writing.

b) Type of the population center you were residing in.

Check off the prompt corresponding to the type of population center where the respondent lived in January of 1989. If he, she lived in a town or urban-type community (industrial or resort community), check off the "Urban" option, if he/she lived in a rural locality - check off the "Rural" option. The administrative and territorial changes which took place after the departure of the respondent from the former place of residence are disregarded. For example, if the status of a rural population center where a respondent resided before departure to the present locality was later upgraded to the status of an urban community or incorporated into a town, choose the "Rural" option.

description

INTERVIEWER INSTRUCTIONS

Question 12. Have you been living continuously in this city (urban settlement or rural area of the district) since birth?

The continuity of residence does not depend on the registration or its type (permanent or provisional).

The "Yes" prompt should be checked off for those who have been living in this population center since birth.

The continuity of residence is not deemed disrupted by:

- The movement from one rural population center to another within the boundaries of the same administrative district;

- The movement within the boundaries of the same city (town);

- All departures from the given locality not implying a change of the place of permanent residence (on vacation, visit to friends or relatives etc.).

Check off the "No" option for those who have not been living in a population center or rural area of the district since birth, including those who were born here but left the locality for permanent residence elsewhere for some time. For example, a respondent went to study at an institute and lived at the place of learning, or served a sentence in a penal institution. The "No" option should be chosen for those who moved from urban population centers to rural areas (or the opposite) within one and the same administrative district.

Ask the persons with the "No" option checked off the following sub-question:

1. Indicate the year since which you have been continually residing here.

Put down the year (in digits) reported by the respondent since which he/she has been continually residing in the given town or rural area of the district. For those who left this population center for permanent residence in other places, indicate the year since which they have been living here upon their return. For example, if a person was born in this locality in 1945, left it to study in another town in 1962, and came back in 1967, you should indicate " 1967".

If you indicated years from 1989 to 2002, ask another sub-question:

2. Where did you reside in January of 1989? (Children born after January 1989 do not have to answer the question).

a) Name of the autonomous republic, autonomous region, territory, region, autonomous area of the Russian Federation, republic of the former Soviet Union or another state.

[p. 65]

For those who in January of 1989 resided in the Russian Federation, put down in writing the name of the autonomous republic (territory, region, autonomous region or area, cities of Moscow or Leningrad) in the respective field (box). For those who in 1989 lived outside the Russian Federation, indicate the name of the state (including republics of the former Soviet Union).

Administrative and territorial changes which took place after January 1989 are disregarded.

Do not complete the field for digits located after the entry of the place of residence made in writing.

b) Type of the population center you were residing in.

Check off the prompt corresponding to the type of population center where the respondent lived in January of 1989. If he, she lived in a town or urban-type community (industrial or resort community), check off the "Urban" option, if he/she lived in a rural locality - check off the "Rural" option. The administrative and territorial changes which took place after the departure of the respondent from the former place of residence are disregarded. For example, if the status of a rural population center where a respondent resided before departure to the present locality was later upgraded to the status of an urban community or incorporated into a town, choose the "Rural" option.

INTERVIEWER INSTRUCTIONS

Question 11.4. Is the place of your primary job located in your city (town, district)?
 The answer to this question should be recorded only for those who had a job a week before the census, i.e. those with the "Yes" option checked off in question 11.1.
 The "Yes" option is chosen for those working on the territory of his/her administrative area or town.
 If a respondent lives and works in different town districts, check off the "Yes" option.
 If a respondent lives and works in different population centers, while both belong to the same district, check off the "Yes" option.
 The following should be added to the "No" option:
 - Check off "on the territory of your region (autonomous area, territory, republic)" option - for those working in a different administrative district or different town within the boundaries of his/her region, territory or republic;
 - Check off "on another territory" - for those who worked outside his/her region, autonomous area, territory or republic. In such instances put down the name of the autonomous area, region, territory or republic of the Russian Federation, or name of the state where the respondent worked (in writing).
 For example, if a respondent lives in the Tver Region -and works in the Moscow Region, he/she would be identified by the options "No " and "On another territory" with the "Moscow Region" written in words.
 Do not complete the field for digits located after the entry of the place of work.

INTERVIEWER INSTRUCTIONS

Question 11.4. Is the place of your primary job located in your city (town, district)?

The answer to this question should be recorded only for those who had a job a week before the census, i.e. those with the "Yes" option checked off in question 11.1.

The "Yes" option is chosen for those working on the territory of his/her administrative area or town.

If a respondent lives and works in different town districts, check off the "Yes" option.

If a respondent lives and works in different population centers, while both belong to the same district, check off the "Yes" option.

The following should be added to the "No" option:

- Check off "on the territory of your region (autonomous area, territory, republic)" option - for those working in a different administrative district or different town within the boundaries of his/her region, territory or republic;
 - Check off "on another territory" - for those who worked outside his/her region, autonomous area, territory or republic. In such instances put down the name of the autonomous area, region, territory or republic of the Russian Federation, or name of the state where the respondent worked (in writing).
 For example, if a respondent lives in the Tver Region -and works in the Moscow Region, he/she would be identified by the options "No " and "On another territory" with the "Moscow Region" written in words.

Do not complete the field for digits located after the entry of the place of work.

Questions and instructions

LITERAL QUESTION

20. Were you seeking work last month?<div class="i1">Question 20 is only for those aged 15-64 who answered "no" to question 15.
[] 1 Yes</div><div class="i2">If you were offered a suitable job, were you able to start within two weeks?
[] 1 Yes
[] 2 No</div><div class="i1">[] 2 No.</div><div class="i2">Indicate the main reason:
[] a Found a job and will start work within the next two weeks
[] b Applied for a job and awaiting a reply
[] c Awaiting the beginning of the season
[] d Unable to find work
[] e Occupied with housework
[] f Other reason</div>

CATEGORIES

Value	Category
11	Looking for work, able to start within two weeks
12	Looking for work, but not able to start within two weeks
23	Not looking for work, found a job and will start work within the next two weeks
24	Not looking for work, applied for a job and awaiting a reply
25	Not looking for work, awaiting beginning of the season
26	Not looking for work, occupied with housework
27	Not looking for work, unspecified reason
98	Unknown
99	NIU (not in universe)

INTERVIEWER INSTRUCTIONS

Question 11.6. If you were out of work, have you been seeking employment over the last month?

The answer to this question should be recorded only for people between 15-64 years old with the "No" option checked

off in question 11.1, i.e. those who did not have a job or paying occupation a week before the census.

For those who were actively looking for a job or tried to establish an own enterprise- check off the "Yes" option.

Seeking employment means applying/or a job to:</p>
<div class="i1">- Governmental or commercial employment service;
- Management of enterprises, institutions and organizations, entrepreneur;
- Turning for help to friends, acquaintances and relatives; as well as:
- Publication of appropriate ads in the media, response to announced job vacancies; establishment of an own enterprise (obtaining of an authorization or license, selection of the location, selection of machines and equipment etc.).</div>[p. 63]

Ask those who have been looking for a Job (with the "Yes" option checked off) whether they could start working within the next two weeks and check off the appropriate prompt - "Yes" or "No".

The "No" option in response to question 11.6 is recorded for the respondents who did not have work or a paying job and is not seeking it. Then check off one of the prompts identifying one main reason why they are not looking for a job:

"I was accepted for employment and will start working within next 2 weeks" - if a respondent was accepted for employment and has an agreement to start working within two weeks from the beginning of the census;

"I found a job and am now waiting for the confirmation" - if a respondent has found a job and is waiting for the answer from the management, if the period of waiting does not exceed four weeks;

"I am waiting for the beginning of the season" - if a respondent was employed in seasonal work (e.g., peatery, water transport, fishery- spring or summer) and was not employed during the reference week because of the season is over, and intends to work in seasonal operations next year;

"No opportunity to find a job" - if a respondent is not looking for a job because of unavailability of vacancies in his/her profession, and if there is no opportunity to acquire a new profession;

"I am engaged in housekeeping" if a respondent is not looking for a job because he/she attends to household duties in the own household without pay (e.g., cooking, cleaning, child care or care of other family members);

"Different reason" if a respondent is not looking for a job through a different reason (e.g., no need to work, because of health condition, attending full-time educational institutions, retirement or old age etc.).

Please, remember: the question should not be put to people under 15 and over 64 years.
