NOTES

Overview

ABSTRACT
This data is on 76 partial credit guarantee schemes across 46 developed and developing countries.

Based on theory, we discuss different organizational features of credit guarantee schemes and their variation across countries. We focus on the respective role of government and private sector and different pricing and risk reduction tools and how they are correlated across countries.

We find that government has an important role to play in funding and management, but less so in risk assessment and recovery. There is a surprisingly low use of risk-based pricing and limited use of risk management mechanisms.

KIND OF DATA
Sample survey data [ssd]

UNITS OF ANALYSIS

Scope

NOTES
The scope of WLD 2007 PCGS includes:

- General characteristics of partial credit guarantee funds (assets, employees, type of guarantee, tax regime, responsibilities)

- Operational characteristics (eligibility, guarantee limit and coverage, pricing structure, information requirements, risk management)

- Monitoring
