TITLE

Welfare Monitoring Survey Round I, 2024

SUBTITLE

Monitoring Food Insecurity, Displacement, and Mental Health in Sudan

ABBREVIATION OR ACRONYM

SWMS R1 2024

COUNTRY

Name	Country code
Sudan	SDN

STUDY TYPE

Other Household Survey [hh/oth]

SERIES INFORMATION

This survey marks the first round of a series of mobile phone surveys

ABSTRACT

Household living conditions in Sudan have been evolving rapidly, necessitating timely monitoring. In response, the World Bank conducted the first round of a welfare monitoring phone surveys between October and November 2024, nearly 18 months after the conflict began. The survey focuses on four key themes: food insecurity, displacement, household assets, and mental health. It is based on a probability sample of 1,323 respondents across 13 states, excluding the five Darfur states due to unstable network coverage during data collection.

KIND OF DATA

Sample survey data [ssd]

Sampling

SAMPLING PROCEDURE

The survey is based on a probability sample of adult Sudanese (aged 18 and above) with mobile phones, spanning 13 states: Al Jazirah, Blue Nile, Gedaref, Kassala, Khartoum, North Kordofan, Northern, Red Sea, River Nile, Sennar, South Kordofan, West Kordofan, and White Nile. Respondents were selected through a one-stage random sampling process from a frame comprising 45,000 phone numbers from all over Sudan provided by the implementation partner, supplemented by approximately 1,000 numbers gathered during household listings in focus group discussions. The implementation partner made up to seven call attempts per number when initial contact was unsuccessful—whether due to unanswered calls, missed connections, or respondents being unavailable to complete the interview.

DEVIATIONS FROM THE SAMPLE DESIGN

The survey achieved sufficiently large sample sizes in 13 of Sudan's 18 states. However, due to unstable or limited network coverage, the sample size in the five Darfur states was too small to allow meaningful analysis.

WEIGHTING

To account for the survey design and correct for unequal selection probabilities, household and individual weights were constructed using a maximum entropy approach. The 2022 Labor Force Survey serves as the reference dataset, with its geographic distribution adjusted to reflect displacement patterns based on the International Organization for Migration's Displacement Tracking Matrix (October 2024 update).

Data collection

DATES OF DATA COLLECTION

Start	End
2024-10-13	2024-11-04

DATA COLLECTION MODE

Computer Assisted Telephone Interview [cati]

SUPERVISION

Voluntas organized supervision using interval recording and random call back of a sub-sample. There were 23 data collectors and 4 office supervisors.

DATA COLLECTION NOTES

1. Organization of the fieldwork: The survey was implemented using Kobo's CATI (Computer-Assisted Telephone Interviewing) platform by a dedicated team of trained Voluntas enumerators operating from a centralized call center. The team comprised 23 enumerators and 4 supervisors, with each enumerator conducting individual phone interviews.
2. Data: Data from completed and partially completed interviews were uploaded daily to ensure timely monitoring and quality control.
3. Respondents: Each household interview was conducted with a single respondent (typically a knowledgeable adult or the head of households) who could consult other household members when needed to provide accurate responses.

DATA COLLECTORS

Name	Abbreviation
Voluntas	Voluntas

questionnaires

QUESTIONNAIRES

The first-round questionnaire incorporated standardized tools to ensure data quality and comparability. Food insecurity questions were adapted from the World Food Program's established indicators, while the mental health module was based on the PHQ-8 (Patient Health Questionnaire) and GAD-7 (Generalized Anxiety Disorder) scales. The survey instrument was initially developed in English, then translated and administered in Arabic. It covered four core sections: food insecurity, displacement, household assets, and mental health.

CONFIDENTIALITY

The dataset has been anonymized and is available as a Public Use Dataset.

CITATION REQUIREMENTS

Use of the dataset must be acknowledged using a citation which would include:

- the Identification of the Primary Investigator
- the title of the survey (including country, acronym and year of implementation)
- the survey reference number
- the source and date of download
