## Identification

---

SURVEY ID NUMBER  
SOM\_2025\_L2S\_v01\_M

TITLE  
Listening to Somalia - Waves 1 and 2, 2025

ABBREVIATION OR ACRONYM  
L2S 2025

COUNTRY

Name	Country code
Federal Republic of Somalia	SOM

STUDY TYPE  
Other Household Survey [hh/oth]

SERIES INFORMATION  
Wave 1 and 2 of the Listening 2 Somalia Phone Survey conducted in 2025

ABSTRACT  
Utilizing a random digit dialing approach, a sample of 3,000 households was targeted for the first wave of the L2S, with results being representative at the regional level. Data collection for the first wave ran from the 13th of April 2025 until the 27th of May 2025. The achieved sample for wave 1 was 3,110 households, with the desired sample being met in all regions except Middle Juba. The second wave then attempted to re-contact these 3,110 households, with data collection starting on the 12th of July 2025 and running until the 13th of August 2025. Of the wave 1 sample, 60 percent were successfully contacted and participated in wave 2. Once the wave 1 sample had been exhausted, new phone numbers were targeted until the regional quotas were achieved. The L2S collected a household roster, exposure to climatic shocks, educational aspirations, perceptions on governance and tax, overall well-being, and questions on social assistance in response to the aid cuts.

KIND OF DATA  
Sample survey data [ssd]

UNIT OF ANALYSIS  
Households and individuals

## Version

---

VERSION DESCRIPTION  
Version 1: Cleaned, anonymized dataset for public distribution.

VERSION DATE  
2025-11-10

## Coverage

---

GEOGRAPHIC COVERAGE  
National and of the 18 pre-war regions.

## Producers and sponsors

---

PRIMARY INVESTIGATORS

Name
World Bank

## PRODUCERS

Name	Role
GeoPoll	Survey Firm

## FUNDING AGENCY/SPONSOR

Name
The Somalia Multi-Partner Fund

## Sampling

## SAMPLING PROCEDURE

Data collection for Wave 1 was conducted using Random Digit Dialing (RDD), where mobile numbers were randomly generated using prefixes assigned by Somalia's national telecommunications agency. GeoPoll's Random Digit Dialing process involved 2 key steps: i) Mobile number generation; and ii) Mobile number validation. Respondents aged below 18 years were screened out of the survey. The 3,000 household sample was distributed across the regions based on the population shares from the IPC population estimates from January to March 2025.

Data collection for Wave 2 was conducted using panel (targeting repeat respondents that participated in Wave 1) and new respondents were contacted using RDD sample due to attrition cases in Wave 1 thus ensuring the full sample target was achieved. Panel respondents were prioritized at the beginning of the survey by ensuring that all numbers were contacted at least five times before the number was removed from the sample.

## RESPONSE RATE

Wave 1 completion rate (Completes/Call Attempts) stood at 3 percent.

## WEIGHTING

To ensure that estimates derived from the survey data are representative of the target population, post-stratification weighting were applied. This process adjusts the contribution of each responding unit to align the marginal and joint distributions of key stratifying variables in the sample with those from the national census. The weighting corrects for sampling disproportionalities and nonresponse bias within defined subpopulations.

Two separate sets of weights were computed:

- Household-level weight, to be applied in analyses where the unit of inference is the household
- Individual-level weight, to be used when analyzing characteristics of individuals within households

Post-stratification will be based on the following categorical variables, each of which was available in both the survey and census datasets:

- Region
- Urban-Rural Residence
- Age Group

These variables form a post-stratification grid across which both sample and population distributions were matched.

## Data collection

## DATES OF DATA COLLECTION

Start	End	Cycle
2025-04-13	2025-05-27	Wave 1

## CONFIDENTIALITY

Before being granted access to the dataset, all users have to formally agree: 1. To make no copies of any files or portions of files to which s/he is granted access except those authorized by the data depositor. 2. Not to use any technique in an attempt to learn the identity of any person, establishment, or sampling unit not identified on public use data files. 3. To hold in strictest confidence the identification of any establishment or individual that may be inadvertently revealed in any documents or discussion, or analysis. Such inadvertent identification revealed in her/his analysis will be immediately brought to the attention of the data depositor.

## CITATION REQUIREMENTS

Use of the dataset must be acknowledged using a citation which would include:

- the Identification of the Primary Investigator
- the title of the survey (including country, acronym and year of implementation)
- the survey reference number
- the source and date of download

## Data Dictionary

Data file	Cases	Variables
<b>hh_microdata_w1</b> Household/Respondent Level data from wave 1. This contains questions on household characteristics, perceptions, well-being, displacement, employment, and livestock.	3110	283
<b>hhm_microdata_w1</b> Household member data from wave 1 containing information on age, gender, education, and marital status.	37320	18
<b>shocks_microdata_w1</b> Household level data on exposure to climatic shocks from wave 1. Questions include the impact of the shock, the extent of income loss, the household's response to the shock, and any adaptations undertaken.	3110	259
<b>aspu10_microdata_w1</b> Data on the educational aspirations for children under 10. Questions include how much education the caregiver desires for the child, why they desire the level of education, and potential obstacles to obtaining it.	1815	54
<b>hh_microdata_w2</b> Household/Respondent Level data from wave 2. This contains questions on household characteristics, perceptions, well-being, displacement, employment, and livestock.	3110	339
<b>hhm_microdata_w2</b> Household member data from wave 2 containing information on age, gender, education, and marital status.	20146	23
<b>shocks_microdata_w2</b> Household level data on exposure to climatic shocks from wave 2. Questions include the impact of the shock, the amount of income loss, the response to the shock, and any adaptation undertaken by the household. There are also some questions about exposure to non-climatic shocks.	3110	295
<b>asp1524_microdata_w2</b> Data on the educational aspirations for members aged between 15 and 24. Questions include how much education the members desired to obtain, why they desire the level of education, the potential barriers, and how much education they realistically think they'll obtain.	199	69

**Data file: hh\_microdata\_w1**

Household/Respondent Level data from wave 1. This contains questions on household characteristics, perceptions, well-being, displacement, employment, and livestock.
