TITLE

Data in Emergencies Monitoring System - Household Survey 2023, Round 8

ABBREVIATION OR ACRONYM

DIEM-HS-R8 2023

COUNTRY

Name	Country code
Yemen, Rep.	YEM

STUDY TYPE

Agricultural Survey [ag/oth]

ABSTRACT

The Food and Agriculture Organization of the United Nations (FAO) through its Country Office in Yemen, with technical support from the Data in Emergencies (DIEM) Hub, conducted the third round of its high-frequency monitoring (HFM) survey, marking the eighth survey overall, to track rapidly evolving indicators related to shocks and food security. Data collection was carried out between 25 and 31 May 2023, reaching 2 524 households across all 22 governorates of Yemen through computer-assisted telephone interviews (CATI) using the random digit dialing (RDD) method. The HFM survey is a rapid assessment of the food security situation in Yemen aimed at informing early warning systems and decision-makers. It did not collect any data on agriculture, agricultural livelihoods, or needs.

For more information, see <https://data-in-emergencies.fao.org/pages/monitoring>.

KIND OF DATA

Sample survey data [ssd]

UNIT OF ANALYSIS

Households

Scope

NOTES

The survey collected information on the following areas:

- HOUSEHOLD: household information
- INCOME SOURCES, SHOCKS: income changes, shocks experienced by households
- FOOD SECURITY AND CONSUMPTION: food consumption, food utilization, coping strategies

Sampling

SAMPLING PROCEDURE

Data collection took place from 25 to 31 May 2023 and reached 2 524 households in all 22 governorates of Yemen via CATI and using the RDD method. The sample is representative at the national and governorate levels with a 95 percent confidence level and a 10 percent precision.

WEIGHTING

Data were weighted at the analytical stage to ensure a proportionate representation of the population. Weights were computed based on population size and wealth proxies (access to drinkable water and education level of the heads of the household).

data_processing

DATA EDITING

The datasets have been edited and processed for analysis by the Data in Emergencies Hub at the Office of Emergencies and Resilience, FAO, with some dashboards and visualizations produced. For more information, see <https://data-in-emergencies.fao.org/pages/countries>.

****STATISTICAL DISCLOSURE CONTROL (SDC)****

The dataset was anonymized using Statistical Disclosure methods by the Data in Emergencies Hub and reviewed by the Statistics Division of FAO. All direct identifiers have been removed prior to data submission.

CONFIDENTIALITY

The users shall not take any action with the purpose of identifying any individual entity (i.e. person, household, enterprise, etc.) in the micro dataset(s). If such a disclosure is made inadvertently, no use will be made of the information, and it will be reported immediately to FAO.

ACCESS CONDITIONS

Micro datasets disseminated by FAO shall only be allowed for research and statistical purposes. Any user which requests access working for a commercial company will not be granted access to any micro dataset regardless of their specified purpose. Users requesting access to any datasets must agree to the following minimal conditions:

- The micro dataset will only be used for statistical and/or research purposes;
- Any results derived from the micro dataset will be used solely for reporting aggregated information, and not for any specific individual entities or data subjects;
- The users shall not take any action with the purpose of identifying any individual entity (i.e. person, household, enterprise, etc.) in the micro dataset(s). If such a disclosure is made inadvertently, no use will be made of the information, and it will be reported immediately to FAO;
- The micro dataset cannot be re-disseminated by users or shared with anyone other than the individuals that are granted access to the micro dataset by FAO.
