## Identification

### SURVEY ID NUMBER

ZWE\_2023\_DIEM-HS-R8\_v01\_M\_v01\_A\_ESS

### TITLE

Data in Emergencies Monitoring - Household Survey 2023, Round 8

### ABBREVIATION OR ACRONYM

DIEM-HS-R8 2023

### COUNTRY

Name	Country code
Zimbabwe	ZWE

### STUDY TYPE

Agricultural Survey [ag/oth]

### ABSTRACT

The Food and Agriculture Organization of the United Nations (FAO) has developed a monitoring system in 26 food crisis countries to better understand the impacts of various shocks on agricultural livelihoods, food security and local value chains. The Monitoring System consists of primary data collected from households on a periodic basis (more or less every four months, depending on seasonality). FAO launched an eighth round of DIEM household survey in Zimbabwe to monitor agricultural livelihoods and food security. This survey is representative at admin 1 level (Provincial level) and reached 1474 households in 8 out of 10 provinces excluding Harare and Bulawayo metropolitan provinces. Data was collected via computer-assisted telephone interviews between 12 and 29 July 2023.

For more information, see <https://data-in-emergencies.fao.org/pages/monitoring>.

### KIND OF DATA

Sample survey data [ssd]

### UNIT OF ANALYSIS

Households

## Scope

### NOTES

The survey collected information on:

- HOUSEHOLD: household information
- INCOME SOURCES, SHOCKS: income changes, shocks experienced by households
- CROP PRODUCTION: crops planted, area planted, area harvested, crop production difficulties
- CROP MARKETING: crop sale difficulties, crop sale price
- LIVESTOCK PRODUCTION: types of livestock present on holding, number of livestock, livestock production difficulties
- LIVESTOCK MARKETING: livestock sale, livestock sale difficulties, livestock sale price
- FISHERIES PRODUCTION: fish activity, comparison of fish production
- FISHERIES MARKETING: fish sale, fish sale difficulties, fish sale price
- FOOD SECURITY AND CONSUMPTION: food consumption, food utilization, coping strategies
- NEEDS ASSISTANCE: needs for assistance

## Sampling

### SAMPLING PROCEDURE

The sample was designed to provide representative estimates at Admin 1 (provincial) level. Eight out of 10 provinces, excluding Harare and Bulawayo metropolitan provinces, were surveyed.

A fixed number of 160 agricultural households were targeted at the provincial level and quotas were set on agricultural households following the proportion observed in the population. This resulted in a sample target of 1280 agricultural households.

Variable targets for non-agricultural households were set following the proportion observed in the population, which resulted in a sample target of 161 non-agricultural households.

Actual samples for agricultural and non-agricultural households were 1306 and 168, respectively. Samples for crop and livestock producers were 1160 and 831, respectively.

The sample design and size aim to achieve a 10 percent margin of error, a 95 percent confidence level, administrative-level granularity, and sufficient sample sizes for key variables within target populations, including agricultural households.

### WEIGHTING

Three types of weights were calculated to ensure that the survey results accurately reflect the structure of the population:

- base weights to correct for selection probabilities,
- quota weights to adjust the sample to match the share of agricultural versus non-agricultural households, and
- wealth weights where "access to electricity" was used as a proxy for household wealth.

These were combined to produce the final weight at the admin 1 level.

## Data collection

### DATES OF DATA COLLECTION

Start	End
2023-07-12	2023-07-29

### DATA COLLECTION MODE

Computer Assisted Telephone Interview [cati]

## questionnaires

### QUESTIONNAIRES

A link to the questionnaire has been provided in the documentations tab.

## data\_processing

### DATA EDITING

The datasets have been edited and processed for analysis by the Data in Emergencies Hub (DIEM) team at the Office of Emergencies and Resilience, FAO, with some dashboards and visualizations produced. For more information, see <https://data-in-emergencies.fao.org/pages/countries>.

### \*\*STATISTICAL DISCLOSURE CONTROL (SDC)\*\*

The dataset was anonymized by the Food and Agriculture Organization of the United Nations, Data in Emergencies (DIEM) Hub and reviewed by the Statistics Division, using Statistical Disclosure methods in accordance with FAO Corporate Statistical Disclosure Control Protocol. All direct identifiers have been removed prior to data submission. For more information, see <https://openknowledge.fao.org/server/api/core/bitstreams/833ee200-0484-4f87-8f5c-b3fed4a3722b/content>.

## Access policy

### CONTACTS

Name	Affiliation	Email	URL

### CONFIDENTIALITY

The users shall not take any action with the purpose of identifying any individual entity (i.e. person, household, enterprise, etc.) in the micro dataset(s). If such a disclosure is made inadvertently, no use will be made of the information, and it will be reported immediately to FAO.

### ACCESS CONDITIONS

Micro datasets disseminated by FAO shall only be allowed for research and statistical purposes. Any user which requests access working for a commercial company will not be granted access to any micro dataset regardless of their specified purpose. Users requesting access to any datasets must agree to the following minimal conditions:

- The micro dataset will only be used for statistical and/or research purposes;
- Any results derived from the micro dataset will be used solely for reporting aggregated information, and not for any specific individual entities or data subjects;
- The users shall not take any action with the purpose of identifying any individual entity (i.e. person, household, enterprise, etc.) in the micro dataset(s). If such a disclosure is made inadvertently, no use will be made of the information, and it will be reported immediately to FAO;
- The micro dataset cannot be re-disseminated by users or shared with anyone other than the individuals that are granted access to the micro dataset by FAO.
