STUDY TYPE

Individual Food Consumption/Dietary Survey [hh/ifcs]

ABSTRACT

Conducted by a team of researchers from the United States and the Philippines, the Cebu Longitudinal Health and Nutrition Survey (CLHNS) is part of an ongoing study of a cohort of Filipino women who gave birth between 1 May 1983 and 30 April 1984. The CLHNS was originally conceptualized as an interdisciplinary study of infant-feeding patterns, particularly focusing on the overall sequencing of feeding events (milks and complementary foods), on the factors affecting feeding decisions, and on how feeding patterns affect the infant, the mother, and the household. The study was subsequently expanded to cover a wide range of maternal and child health as well as demographic issues that could be well studied using a prospective, community-based sample.

The cohort of children born during the 1983-1984 period, their mothers, other caretakers, and selected siblings were interviewed for the first time in the 1983-1986 survey and have been followed through the surveys conducted in 1991-1992, 1994, 1998, 2002, 2005, 2012 and 2015. Research is now focused on the long-term effects of prenatal and early childhood nutrition and health on later adult outcomes, including education and work outcomes and development of chronic disease risk factors. This metadata refers to the follow-up survey of 2005.

KIND OF DATA

Sample survey data [ssd]

UNIT OF ANALYSIS

Individuals

Scope

NOTES

The survey collected information on:

- SUBJECTS: information on the participants, such as age, sex, and geographical location
- CONSUMPTION: information on all foods consumed by each participant in each survey day, including quantities and nutrient values

Coverage

GEOGRAPHIC COVERAGE

Sub-national coverage, both rural and urban areas.

UNIVERSE

The population groups covered in this follow-up survey were mothers and their sons/daughters.

Sampling

SAMPLING PROCEDURE

At the baseline survey conducted in 1983, a single-stage cluster-sampling procedure was used to randomly select 17 urban and 16 rural barangays from the 243 barangays of Metro Cebu identified in the 1980 census. The selected barangays, representing approximately 28 000 households, were surveyed to locate all pregnant women, who were asked, in person, to join the study. The 2005 survey was a follow-up of the mothers enrolled at Baseline and their children born between 1 May 1983 and 30 April 1984 (birth cohort).

WEIGHTING

No survey weights were used in this survey.

Data collection

DATES OF DATA COLLECTION

| Start | End |
|------------|------------|
| 2005-01-05 | 2005-08-23 |

DATA COLLECTION MODE

Face-to-face [f2f]

DATA COLLECTION NOTES

The methods used to collect the 24-hour dietary recall data were designed to reflect standard practice and were not validated in the sample. Mothers and the Birth Cohort (who were already adults) were asked to recall each food they had eaten the previous day from the time they woke up to the time they went to bed. Prompts were included (e.g., "before breakfast", "breakfast", "morning snack", "lunch") help participants recall each individual meal and snack. Meals and snacks eaten outside of the home were also recalled and recorded.

CONFIDENTIALITY

The users shall not take any action with the purpose of identifying any individual entity (i.e. person, household, enterprise, etc.) in the micro dataset(s). If such a disclosure is made inadvertently, no use will be made of the information, and it will be reported immediately to FAO.

ACCESS CONDITIONS

Micro datasets disseminated by FAO shall only be allowed for research and statistical purposes. Any user which requests access working for a commercial company will not be granted access to any micro dataset regardless of their specified purpose. Users requesting access to any datasets must agree to the following minimal conditions:

- The micro dataset will only be used for statistical and/or research purposes;
- Any results derived from the micro dataset will be used solely for reporting aggregated information, and not for any specific individual entities or data subjects;
- The users shall not take any action with the purpose of identifying any individual entity (i.e. person, household, enterprise, etc.) in the micro dataset(s). If such a disclosure is made inadvertently, no use will be made of the information, and it will be reported immediately to FAO;
- The micro dataset cannot be re-disseminated by users or shared with anyone other than the individuals that are granted access to the micro dataset by FAO.
