Overview

ABSTRACT

The 2007 Kenya AIDS Indicator Survey (KAIS) is Kenya's first survey of its type and provides comprehensive information on HIV and other sexually transmitted infections (STIs). These data provide the information needed for advocacy and for planning appropriate interventions for HIV prevention, treatment and care. The 2007 KAIS builds upon previous national-level HIV estimates from the first population-based survey with HIV testing, the 2003 Kenya Demographic and Health Survey (KDHS); this allows us to compare prevalence estimates and important behavioural indicators between 2003 and 2007.

KIND OF DATA

Sample survey data [ssd]

UNITS OF ANALYSIS

Person aged 15-64

Scope

NOTES

The 2007 Kenya AIDS Indicator Survey covered the following topics:

HOUSEHOLD LEVEL

- Household census
- Parental survivorship
- Household characteristics
- Mosquito net use
- Support to households for sick and recently deceased adults, and OVCs

INDIVIDUAL LEVEL

- Socio-demographic characteristics
- HIV/STI knowledge and attitudes
- Marriage and sexual partnerships
- Fertility and family planning
- Uptake of HIV prevention, care and treatment services

TOPICS

Topic	Vocabulary	URI

Topic	Vocabulary	URI
HIV/AIDS	World Bank	
Health	World Bank	

Coverage

GEOGRAPHIC COVERAGE

The survey covered all the districts in Kenya. The data representativeness are at the following levels: national, urban/rural, provincial, district.

UNIVERSE

All women and men aged 15-64 years in selected households who were either usual residents or visitors present the night before the survey were eligible to participate in the individual interview and blood draw, provided they gave informed consent. For minors aged 15-17 years, parental consent and minor assent were both required for participation. Participants could consent to the interview and blood draw or to the interview alone. The inclusion criteria may have captured non-Kenyans living as usual residents or visitors in a sampled household. Military personnel and the institutionalized population (e.g. imprisoned) are typically not captured in household-based surveys, but may have been included in the 2007 KAIS if at home during the survey.

Sampling

Sampling Procedure

Administratively, Kenya is divided into eight provinces. Each province is divided into districts, each district into divisions, each division into locations, each location into sub-locations, and each sublocation into villages. For the 1999 Population and Household Census, the Kenya National Bureau of Statistics (KNBS) delineated sub-locations into small units called Enumeration Areas (EAs) that constituted a village, a part of a village, or a combination of villages. The primary sampling unit for Kenya's master sampling frame, and for the 2007 KAIS, is a cluster, which is constituted as one or more EAs, with an average of 100 households per cluster. The master sampling frame for the 2007 KAIS was the National Sample Survey and Evaluation Programme IV (NASSEP IV) created and maintained by KNBS. The NASSEP IV frame was developed in 2002 based on the 1999 Census. The frame has 1800 clusters, comprised of 1,260 rural and 540 urban clusters. Of these, 294 (23%) rural and 121 (22%) urban clusters were selected for KAIS.

The 2007 KAIS was conducted among a representative sample of households selected from all eight provinces in the country, covering both rural and urban areas. A household was defined as a person or group of people related or unrelated to each other who live together in the same dwelling unit or compound (a group of dwelling units), share similar cooking arrangements, and identify the same person as the head of household. The household questionnaire was administered to consenting heads of sampled, occupied households. All women and men aged 15-64 years in selected households who were either usual residents or visitors present the night before the survey were eligible to participate in the individual interview and blood draw, provided they gave informed consent. For minors aged 15-17 years, parental consent and minor assent were both required for participation. Participants could consent to the interview and blood draw or to the interview alone. The inclusion criteria may have captured non-Kenyans living as usual residents or visitors in a sampled household. Military personnel and the institutionalized population (e.g. imprisoned) are typically not captured in household-based surveys, but may have been included in the 2007 KAIS if at home during the survey.

The overall design for the 2007 KAIS was a stratified, two-stage cluster sample for comparability to the 2003 KDHS. The first stage involved selecting 415 clusters from NASSEP IV and the second stage involved the selection of households per cluster with equal probability of selection in the rural-urban strata within each district. The target of the 2007 KAIS sample was to obtain approximately 9,000 completed household interviews. Based on the level of household nonresponse reported in the 2003 KDHS (13.2% of selected households), 10,375 households in 415 clusters were selected for potential participation in the 2007 KAIS. Table 1.4 shows the provincial distribution of households and clusters originally sampled for the 2007 KAIS.

Deviations from Sample Design

Of the original 415 clusters, 402 were accessed and surveyed. Thirteen clusters were inaccessible due to impassable roads or tenuous security situations. All reported estimates and design weights for households, individual interviews, and blood draws are based on data from the 402 clusters.

Response Rate

Overall, participation rates in the 2007 KAIS were high. We calculated household response rate as the number of households consenting to the household interview divided by the total number of sampled households that were located and occupied. The individual interview response rate was calculated as the number of individuals who completed interviews divided by the number of individuals eligible for the individual interview based on the household census. Only those participating in the individual interview were eligible to participate in the blood draw. We calculated blood draw coverage as the number of blood draws divided by the number of all individuals eligible for the individual interview; the blood draw response rate reflects the number of successful blood draws divided by the number of individuals who completed individual interviews.

Weighting

The final weights were derived from the design weights of the NASSEP IV sampling frame and subsequently adjusted for non-response. Three weights were calculated for analyses: a household weight, an individual interview weight and a blood draw weight.

Questionnaires

Overview

Two questionnaires were used: a household questionnaire and an individual questionnaire. The content of the questionnaires was adapted from standard AIDS Indicator Survey questionnaires developed by ORC Macro, the 2003 KDHS HIV Module and previous surveys conducted in Africa. Various stakeholders in NACC, the National AIDS and STI Control Programme (NASCO) and other HIV/AIDS organizations working in Kenya met to determine the key HIV program information needs and gaps. The KAIS Technical Working Group (TWG) modified existing questions and designed new questions to reflect current and emerging issues in HIV/AIDS in the country. The final questionnaires were translated from English into Kiswahili and 11 vernacular languages and back-translated into English to ensure accuracy. The questionnaires were further refined after a pilot study prior to distribution of the final versions to field staff.

The household questionnaire gathered basic information from the head of the household on usual members and visitors in the household, including age, sex, education, relationship to the head of household, and orphanhood among children. Information was collected on characteristics of the household's dwelling unit, such as the source of water, type of toilet facilities, materials used for the floor of the house, property ownership, and mosquito nets. Heads of household were also asked whether the household had received specific types of care and support in the 12 months prior to the survey for any chronically ill adults, any household members who died, and any orphans and vulnerable children (OVC). The household questionnaire was also used to record the respondents' consent for blood collection and testing.

The individual questionnaire collected information from eligible women and men aged 15-64 years on basic demographic characteristics, marriage, sexual activity, fertility, and family planning. In addition, the tool included questions regarding HIV and STI knowledge, attitudes and behaviours, HIV testing, HIV care and treatment uptake, and other health issues, such as tuberculosis, blood donation and medical injections.

Data Collection

Data Collection Dates

Start	End	Cycle
2007-08-01	2007-12	N/A

Data Collection Mode

Face-to-face [f2f]

Data Collection Notes

In July 2007, 204 skilled interviewers, laboratory technicians, laboratory scientists and field supervisors were recruited and trained for two weeks in the 2007 KAIS procedures. The training involved didactic presentations, small group discussions and practical sessions, such as mock interviews and blood draws.

Interviewers were trained to identify eligible households and individuals, seek informed consent, educate participants about HIV, HSV-2 and syphilis, and administer questionnaires using objective interview techniques. Field laboratory technicians and scientists were trained in preparing respondents for the blood draw and in specimen collection, processing, storage and transportation to the central laboratory in Nairobi. Laboratory training emphasized ways to minimise risks in handling biological specimens. Laboratory technicians were trained to process and analyse specimens in the laboratory and to issue return of results vouchers for participants to retrieve their test results.

Questionnaires

Two questionnaires were used: a household questionnaire and an individual questionnaire. The content of the questionnaires was adapted from standard AIDS Indicator Survey questionnaires developed by ORC Macro, the 2003 KDHS HIV Module and previous surveys conducted in Africa. Various stakeholders in NACC, the National AIDS and STI Control Programme (NASCO) and other HIV/AIDS organizations working in Kenya met to determine the key HIV program information needs and gaps. The KAIS Technical Working Group (TWG) modified existing questions and designed new questions to reflect current and emerging issues in HIV/AIDS in the country. The final questionnaires were translated from English into Kiswahili and 11 vernacular languages and back-translated into English to ensure accuracy. The questionnaires were further refined after a pilot study prior to distribution of the final versions to field staff.

The household questionnaire gathered basic information from the head of the household on usual members and visitors in the household, including age, sex, education, relationship to the head of household, and orphanhood among children. Information was collected on characteristics of the household's dwelling unit, such as the source of water, type of toilet facilities, materials used for the floor of the house, property ownership, and mosquito nets. Heads of household were also asked whether the household had received specific types of care and support in the 12 months prior to the survey for any chronically ill adults, any household members who died, and any orphans and vulnerable children (OVC). The household questionnaire was also used to record the respondents' consent for blood collection and testing.

The individual questionnaire collected information from eligible women and men aged 15-64 years on basic demographic characteristics, marriage, sexual activity, fertility, and family planning. In addition, the tool included questions regarding HIV and STI knowledge, attitudes and behaviours, HIV testing, HIV care and treatment uptake, and other health issues, such as tuberculosis, blood donation and medical injections.

Supervision

Six teams of supervisors representing different KAIS collaborating institutions routinely visited field teams during data collection. Supervision teams travelled throughout the country to assess mobilisation efforts, perform quality checks on questionnaires and field laboratory procedures, deliver additional survey supplies, troubleshoot challenges and provide psychosocial support to field teams. Supervision reports were disseminated among the KAIS leadership and key issues were addressed immediately.

Data Processing

Data Editing

Data processing included a number of steps to prepare data collected in the field for analysis. The initial steps included editing questionnaires, both in the field and at KNBS, and double-data entry of all questionnaire responses to minimise errors. Data were entered using Census and Survey Processing System (CSPro) version 3.3.3. Once all survey responses were transferred to electronic format, the next step was to ensure full concordance between the two data entry databases, using paper questionnaires to resolve any discrepancies in transcription. A series of internal consistency and range checks helped to identify any illogical responses and to verify that responses adhered to skip patterns in the questionnaire. Data validation programs for data cleaning were written in Stata version 8.04 and corrections were entered directly in CSPro at KNBS.

A concurrent process of cleaning the raw laboratory data was conducted at the NHRL. The final, cleaned questionnaire database at KNBS was merged with the laboratory results database at the NHRL using unique survey identification numbers to ensure accurate matches (>99.9% of identification numbers were matched). After successfully merging the questionnaire and laboratory results databases, cluster and household identification numbers were serialized from 1-402 and from 1-25, respectively. Original cluster and household numbers, barcodes, and individual survey identification numbers were stripped from the database prior to weighting and analysis to ensure anonymity of survey participants.

Other Processing

Data analysis was conducted using Statistical Analysis System (SAS) version 9.135, which has procedures to account for multi-stage stratified sampling designs and can produce reliable standard errors and confidence intervals.

ID	Name	Label	Type	Format	Question
V81	qh13	Has mother very sick for the last three months	discrete	numeric	Has (NAME)'s mother been very sick for at least 3 months during the past 12 months, that is she was too sick to work or do normal activities?
V82	qh14	Father alive	discrete	numeric	Is (NAME)'s natural father alive?
V83	qh15	Father's line number	discrete	numeric	
V84	qh16	Has father been very sick for the last three months	discrete	numeric	Has (NAME)'s father been very sick for at least 3 months during the past 12 months, that is he was too sick to work or do normal activities?
V85	qh17	Mother/Father dead/sick	discrete	numeric	
V86	qh18	Both parents alive	discrete	numeric	
V87	qh19	Has brothers/sister under age 18 has same mother, same father	discrete	numeric	Does (NAME) have any brothers or sisters under age 18 who have the same mother and the same father?
V88	qh20	Any of the brothers/sister under age 18 not live in the house	discrete	numeric	Do any of these brothers and sisters under age 18 not live in this household?
V89	qh21	Ever attended school	discrete	numeric	Has (NAME) ever attended school?
V90	q22x	Level of education	discrete	numeric	What is the highest level of school (NAME) has attended?
V91	qh22a	Level of education attended	discrete	numeric	
V92	qh22b	Highest grade completed	discrete	numeric	What is the highest grade (NAME) completed at that level?
V93	qh23	Currently attending school	discrete	numeric	Did (NAME) attend school at any time during the current school year?
V94	qh24	Does have a blanket	discrete	numeric	Does (NAME) have a blanket?
V95	qh25	Has at least two sets of clothes	discrete	numeric	Does (NAME) have at least two sets of clothes?
V96	qh26	Does have a birth certificate	discrete	numeric	Does (NAME) have a birth certificate? IF NO, PROBE: Has (NAME)'s birth ever been registered with the civil authority? 1 = HAS CERTIFICATE 2 = REGISTERED 3 = NEITHER 8 = DON'T KNOW
V97	qh28	Was sick in the last four weeks	discrete	numeric	Did (NAME) seek any outpatient care for the last four weeks?
V98	qh28a	How many outpatient visits made last four weeks	contin	numeric	How many outpatient visits did (NAME) make in the last four weeks?
V99	qh28b_1	visit 1	discrete	numeric	In the most recent (first, second, third, and fourth most recent) visit, where did (NAME) go for outpatient care?
V100	qh28b_2	Visit 2	discrete	numeric	In the most recent (first, second, third, and fourth most recent) visit, where did (NAME) go for outpatient care?
V101	qh28b_3	Visit 3	discrete	numeric	In the most recent (first, second, third, and fourth most recent) visit, where did (NAME) go for outpatient care?
V102	qh28b_4	Visit 4	discrete	numeric	In the most recent (first, second, third, and fourth most recent) visit, where did (NAME) go for outpatient care?

ID	Name	Label	Type	Format	Question
V103	qh28c_1	How much spent in the most recent visit (visit 1)	contin	numeric	How much did (NAME) spend in the most recent (second, third, and fourth most recent) outpatient visit? In KShs.
V104	qh28c_2	How much spent in the most recent visit (visit 2)	contin	numeric	How much did (NAME) spend in the most recent (second, third, and fourth most recent) outpatient visit? In KShs.
V105	qh28c_3	How much spent in the most recent visit (visit 3)	contin	numeric	How much did (NAME) spend in the most recent (second, third, and fourth most recent) outpatient visit? In KShs.
V106	qh28c_4	How much spent in the most recent visit (visit 4)	contin	numeric	How much did (NAME) spend in the most recent (second, third, and fourth most recent) outpatient visit? In KShs.
V107	qh29	Number of times admitted for overnight stay	contin	numeric	How many times was (NAME) admitted for an overnight stay in a health facility in the last 6 months?
V108	qh29a_1	Last admission	discrete	numeric	How long was (NAME) admitted during the last and second last admission?
V109	qh29a_2	2nd Last admission	discrete	numeric	How long was (NAME) admitted during the last and second last admission?
V110	qh29b_1	Last admission	discrete	numeric	How much did (NAME) spend during the last and second last admission. in KShs.
V111	qh29b_2	2nd to last admission	discrete	numeric	How much did (NAME) spend during the last and second last admission. in KShs.
V112	qh29c_1	Last admission	discrete	numeric	Where was (NAME) admitted during the last and second last time he/she was admitted?
V113	qh29c_2	2nd to last admission	discrete	numeric	Where was (NAME) admitted during the last and second last time he/she was admitted?
V114	qh204	Household received any support	discrete	numeric	Now I would like to ask you about any support you received for (NAME). In the last 12 months, has your household received any medical support for (NAME), such as medical care, supplies or medicine, for which you did not have to pay?
V115	qh205	Does household receive this support at least once a month	discrete	numeric	Did your household receive any of this medical support at least once a month while (NAME) was sick?
V116	qh206	Has the household received any emotional or psychological s	discrete	numeric	In the last 12 months, has your household received any emotional or psychological support for (NAME), such as companionship, counseling from a trained counselor, or spiritual support, for which you did not have to pay?
V117	qh207	Did the household receive any of these emotional or psycholo	discrete	numeric	Did your household receive any of this emotional or psychological support in the past 30 days?
V118	qh208	In the past 12 months has the household has received any material	discrete	numeric	In the last 12 months, has your household received any material support for (NAME), such as clothing, food, or financial support, for which you did not have to pay?
V119	qh209	Did the household receive any of these material supports in t	discrete	numeric	Did your household receive any of this material support in the past 30 days?

ID	Name	Label	Type	Format	Question
V120	qh210	In the past 12 months did the household receive any social su	discrete	numeric	In the last 12 months, has your household received any social support for (NAME), such as help in household work, training for a caregiver, or legal services, for which you did not have to pay?
V121	qh211	Did the the household receive any of the social supports	discrete	numeric	Did your household receive any of this social support in the past 30 days?
V122	qh212	Had severe, mild, or no pain at all	discrete	numeric	Now I would like to ask about health problems (NAME) may have recently had. In the last 30 days, has (NAME) had severe pain, mild pain, or no pain at all?
V123	qh213	When in pain was able to reduce or stop the pain most of the	discrete	numeric	When (NAME) was in pain, was he/she able to reduce or stop the pain most of the time, some of the time, or not at all?
V124	qh214	Last 30 days, suffered from nausea, coughing, diarrhea, or co	discrete	numeric	In the last 30 days, did (NAME) suffer from nausea, coughing, diarrhea, or constipation? IF YES: Was this problem (were any of these problems) ever severe?
V125	qh215	Was able to reduce or stop these problems most of the time,	discrete	numeric	Was (NAME) able to reduce or stop this (these) problem(s) most of the time, some of the time, or not at all?
V126	qh301	Any deaths in the past 12 months	discrete	numeric	Now I would like to ask you a few more questions about your household. Think back over the past 12 months. Has any usual member of your household died in the last 12 months?
V127	qh401	Number of children aged 0-17	contin	numeric	
V128	qh402	Any sick adults in the household	discrete	numeric	ANY SICK ADULT AGE 18-64?
V129	qh403	Any adults aged 18-64 who died in the past 12months	discrete	numeric	ANY ADULT AGE 18-64 WHO DIED IN PAST 12 MONTHS?
V130	qh404	Any child whose mother and/or father has died or whose mothe	discrete	numeric	ANY CHILD WHOSE MOTHER AND/OR FATHER HAS DIED OR WHOSE MOTHER AND/OR FATHER IS NOT LISTED IN THE HOUSEHOLD SCHEDULE AND IS VERY SICK?
V131	qh406b	Age of child	contin	numeric

Reports

Kenya AIDS Indicator Survey KAIS - 2007 Final Report

Title	Kenya AIDS Indicator Survey KAIS - 2007 Final Report
Author(s)	National AIDS/STI Control Programme (NAS COP)
Date	2009-09-01
Country	Kenya
Language	English
Description	Final report (including questionnaire) of KAIS 2007 survey

Figures and Tables	XVI
Abbreviations	XIV
Foreword	XVI
Map of Kenya	XVII
Executive Summary	XVIII
CHAPTER 1 Introduction, Overview of Methods and Response Rates	
1.1 Background	1
1.2 National policy on HIV/AIDS	2
1.3 Purpose and objectives of the survey	2
1.4 Survey design and sample frame	3
1.5 Data collection tools	4
1.6 Return of test results to participants	6
1.7 Survey implementation	7
1.8 Laboratory logistics	8
1.9 Data processing and analysis	8
1.10 Comparison of the 2003 KDHS and the 2007 KAIS	9
1.11 Response rates	11
1.12 Chapter summary	14
CHAPTER 2 Prevalence of HIV	
2.1 Key findings	15
2.2 Introduction	15
2.3 HIV prevalence by age group and sex	16
2.4 HIV prevalence among youth	17
2.5 HIV prevalence among older adults (50-64 years old)	18
2.6 HIV prevalence by rural/urban residence	18
2.7 HIV prevalence by province	20
2.8 HIV prevalence by marital status	22
2.9 HIV prevalence by education level	23
2.10 HIV prevalence by wealth index and employment status	24
2.11 HIV prevalence by time away from home	26
2.12 HIV prevalence by religious affiliation	27
2.13 Male circumcision and association with HIV infection	28
2.14 Gaps and unmet needs	31
CHAPTER 3 Comparison of HIV Prevalence in the 2003 KDHS and 2007 KAIS	
3.1 Key findings	32
3.2 Introduction	32
3.3 Sex	34
3.4 Age Group	35
3.5 Youth	36
3.6 Residence	37
3.7 Province	38
3.8 Marital status	38
3.9 Education level	40
3.10 Wealth index	40
IV PRELIMINARY	
3.11 Age of sexual debut	41
3.12 Gaps and unmet needs	42
CHAPTER 4 HIV Testing	
4.1 Key findings	43
4.2 Introduction	43
4.3 HIV testing behavior	44
4.4 Testing experiences among persons who had ever been tested for HIV	50
4.5 Reasons for not testing	51
4.6 Attitudes toward home testing	53
4.6 Gaps and unmet needs	53
CHAPTER 5 Knowledge and Disclosure of HIV Status	
5.1 Key findings	55
5.2 Introduction	55
5.3 Knowledge of HIV infection	56
5.4 Disclosure of HIV status to sexual partners	59
5.5 Knowledge of HIV infection in partnerships	60
5.6 HIV-concordance and -discordance among married and cohabiting couples	64
5.7 Gaps and unmet needs	67
CHAPTER 6 Sexual Partners, Sexual Debut and Circumcision	
6.1 Key findings	68
6.2 Introduction	68
6.3 Number of lifetime sexual partners	69
6.4 Condom use	73
6.5 Age at first sex among youth aged 15-24 years	76
6.6 Male circumcision	79
6.7 Gaps and unmet needs	81
CHAPTER 7 Knowledge, Attitudes and Beliefs about HIV/AIDS	
7.1 Key findings	82
7.2 Introduction	82
7.3 Knowledge of HIV/AIDS	83
7.4 Stigma and accepting attitudes toward HIV-infected persons	91
7.5 Perceived risk of HIV infection	93
7.6 Attitudes toward women's roles in sexual decision making	96
7.7 Gaps and unmet needs	99
CHAPTER 8 Prevention of Mother-to-Child Transmission and Family Planning	
8.1 Key findings	100
8.2 Introduction	100
8.3 Antenatal clinic attendance, 2003 - 2007	102
8.4 Knowledge of mother-to-child transmission and antiretroviral therapy for PMTCT	103
8.5 HIV counseling and testing at ANC clinics, 2003 - 2007	105
8.6 Breastfeeding practices	109
8.7 Currently pregnant women: ANC clinic attendance	109
8.8 Currently pregnant women: HIV testing, HIV status and CD4 cell counts	110
8.9 Currently pregnant women: HIV, HSV-2 and syphilis	110
8.10 HIV status and sexual partnerships	112
8.11 Fertility desires	113
8.12 Contraceptive use	115
8.13 Gaps and unmet needs	118
PRELIMINARY V	
CHAPTER 9 Blood and Injection Safety	
9.1 Key findings	119
9.2 Introduction	119
9.3 Blood donations	120
9.4 Blood transfusions	126
9.5 Medical injections	127
9.6 Gaps and unmet needs	130
CHAPTER 10 Care and Treatment of Adults Infected with HIV	
10.1 Key findings	131
10.2 Introduction	131
10.3 Cotrimoxazole prophylaxis for HIV-infected adults	132
10.4 ARV eligibility, coverage and access	136
10.5 Gaps and unmet needs	141
CHAPTER 11 Health Care Utilization, Tuberculosis and Preventive Services among HIV-infected Adults	
11.1 Key findings	142
11.2 Introduction	143
11.3 Health care utilization	144
11.4 Co-infection with tuberculosis and HIV	146
11.5 Preventive services for people with HIV: clean water	149
11.6 Preventive services for people with HIV: bednets	153
11.7 Preventive services for people with HIV: nutritional supplements	153
11.8 Gaps and unmet needs	154
CHAPTER 12 Prevalence of Herpes Simplex Virus-2 (HSV-2) and Co-infection with HIV and HSV-2	
12.1 Key findings	155
12.2 Introduction	155
12.3 HSV-2 prevalence	156
12.4 Acquiring and transmitting HSV-2	161
12.5 Co-infection with HIV and HSV-2	161
12.6 HSV-2 prevalence and perceived risk of HIV, STI symptoms, STI treatment-seeking behavior, and condom use	163
12.7 Gaps and unmet needs	165
CHAPTER 13 Prevalence of Syphilis and Co-infection with HIV and Syphilis	
13.1 Key findings	166
13.2 Introduction	166
13.3 Syphilis prevalence	168
13.4 Acquiring and transmitting syphilis	171
13.5 HIV and HSV-2 prevalence by syphilis status	172
13.6 Gaps and unmet needs	173
CHAPTER 14 Household Characteristics and Impact of HIV on Households	
14.1 Key findings	174
14.2 Introduction	174
14.3 Household composition	175
14.4 Birth registration	177
14.5 Prevalence of HIV-affected households	178
14.6 Drinking water and toilet facilities	180
14.7 Household ownership of mosquito bednets and insecticide-treated nets	184
14.8 Children's living arrangements and orphanhood	188
14.9 Care and support for orphans and vulnerable children	190
VI PRELIMINARY	
14.10 Care and support for chronically ill adults	192
14.11 Gaps and unmet needs	194
CHAPTER 15 Returning Test Results	
15.1 Key findings	195
15.2 Introduction	195
15.3 Participants who returned for test results by socio-demographic characteristics	197
15.4 Returning to receive test results by HIV testing behaviour and HIV status	201
15.5 Uptake of results by pregnancy status	202
15.6 Gaps and unmet needs	203
GLOSSARY OF TERMS	204
APPENDIX A Methods of the 2007 KAIS	
A.1 Survey methods	209
A.2 Field methods	211
A.3 Human subjects	214
A.4 Laboratory methods	214
A.5 Returning laboratory test results to participants	217
A.6 Weighting, non-response adjustment and statistical analysis	223
APPENDIX B Chapter Data Tables	
B.1 Background Characteristics of KAIS Respondents	228
B.2 Chapter 2 - Prevalence of HIV	230
B.3 Chapter 3 - Comparison of HIV Prevalence of 2003 KDHS and 2007 KAIS	234
B.4 Chapter 4 - HIV Testing	237
B.5 Chapter 5 - Knowledge and Disclosure of HIV Status	240
B.6 Chapter 6 - Sexual Partners, Sexual Debut and Circumcision	244
B.7 Chapter 7 - Attitudes, Knowledge & Beliefs	247
B.8 Chapter 8 - Prevention of Mother-to-Child Transmission and Family Planning	251
B.9 Chapter 9 - Blood and Injection Safety	257
B.10 Chapter 10 - Care and Treatment of Adults Infected with HIV	261
B.11 Chapter 11 - Health Care Utilization, Tuberculosis and Basic Prevention among HIV-infected Persons	266
B.12 Chapter 12 - Prevalence of Herpes Simplex Virus-2 (HSV-2)	271
B.13 Chapter 13 - Prevalence of Syphilis and Co-infection with HIV & HSV-2	274
B.14 Chapter 14 - Household Characteristics and Impact of HIV on Households	276
B.15 Chapter 15 - Collection of Test Results	280
APPENDIX C Estimates of Sampling Errors	282
APPENDIX D Persons Involved in the 2007 KAIS	295
APPENDIX E 2007 KAIS Household Questionnaire	299
APPENDIX F 2007 KAIS Individual Questionnaires	324
