

# Censos de Población y Vivienda, 1962 - IPUMS Subset

**Departamento de los Censos Nacionales, IPUMS**

report\_generated\_on: September 3, 2025

visit\_data\_catalog\_at: <http://catalog.ihsn.org/>

## Identification

---

### SURVEY ID NUMBER

ECU\_1962\_PHC\_v01\_M\_v7.5\_A\_IPUMS

### TITLE

Censos de Población y Vivienda, 1962 - IPUMS Subset

### ABBREVIATION OR ACRONYM

PHC Ecuador 1962 (IPUMS Harmonized Subset)

### COUNTRY

Name	Country code
Ecuador	ECU

### STUDY TYPE

Population and Housing Census [hh/popcen] IPUMS International

### SERIES INFORMATION

DOI:10.18128/D020.V7.5

### KIND OF DATA

Population and Housing Census [hh/popcen]

### UNIT OF ANALYSIS

Persons Persons not organized into households

### UNITS IDENTIFIED:

- Dwellings: yes
- Vacant Units: no
- Households: no
- Individuals: yes
- Group quarters: yes

### UNIT DESCRIPTIONS:

- Dwellings: Any fixed or mobile, structurally separate or independent premises or enclosure that has been built or made, converted or prepared for the purpose of permanently or temporarily housing a census household.
- Households: Census Family.- A group of people, generally related, who live together under a family system. It is made up in most cases by a Head of Family, their relatives (spouse or consensual union partner, children, grandchildren, etc.), close friends, guests, domestic servants and any occupant who lives in the same dwelling and shares the same food. Any person who lives alone in a family dwelling also makes up a census family.
- Group quarters: Unrelated Group- A group of generally unrelated people who live together for reasons of discipline, health, teaching, religious or military life, work, or other reasons and who reside in non-family dwellings such as: hospitals, clinics, hotels, guesthouses, jails, reformatories, barracks, convents, etc.

## Version

---

### VERSION DESCRIPTION

Version 7.5. The datasets contain selected variables from the original census microdata plus harmonized variables from the IPUMS-International database.

### VERSION DATE

2024-10-05

## Scope

---

## NOTES

Additional notes on a sample that is part of this study: Ecuador 1962

Note: Persons not organized into households

## TOPICS

Topic	Vocabulary
Demographic Variables -- PERSON	IPUMS
Geography: Global Variables -- HOUSEHOLD	IPUMS
Nativity and Birthplace Variables -- PERSON	IPUMS
Work Variables -- PERSON	IPUMS
Technical Household Variables -- HOUSEHOLD	IPUMS
Education Variables -- PERSON	IPUMS
Utilities Variables -- HOUSEHOLD	IPUMS
Dwelling Characteristics Variables -- HOUSEHOLD	IPUMS

Migration: A-E Variables -- PERSON	IPUMS
Household Economic Variables -- HOUSEHOLD	IPUMS
Technical Person Variables -- PERSON	IPUMS
Constructed Household Variables -- HOUSEHOLD	IPUMS
Work: Occupation Variables -- PERSON	IPUMS
Work: Industry Variables -- PERSON	IPUMS

## Coverage

## GEOGRAPHIC UNIT

Canton

## UNIVERSE

Everyone who spent the night of November 24 to November 25 in a Dwelling in Ecuador. Including individuals that spent the night away for special reasons (e.g. away for a party or a funeral, physicians, guards).

## Producers and sponsors

## PRIMARY INVESTIGATORS

Name	Affiliation
Departamento de los Censos Nacionales	
IPUMS	University of Minnesota

## Sampling

## SAMPLING PROCEDURE

MICRODATA SOURCE: Departamento de los Censos Nacionales

SAMPLE SIZE (person records): 136443.

SAMPLE DESIGN:

WEIGHTING

Self-weighting. Expansion factor = 33.

## Data collection

### DATES OF DATA COLLECTION

Start	End
1962-11-25	1962-11-25

### TIME PERIODS

Start date	End date
1962-11-25	1962-11-25

### DATA COLLECTION MODE

Face-to-face [f2f]

### DATA COLLECTION NOTES

de facto, CENSUS DAY: November 25, 1962 at 0 hours

## questionnaires

### QUESTIONNAIRES

Single enumeration form that requested information on dwellings and individuals.

## Access policy

### CONTACTS

Name
Departamento de los Censos Nacionales

### CONFIDENTIALITY

IPUMS International distributes integrated microdata of individuals and households only by agreement of collaborating national statistical offices and under the strictest of confidence. Before data may be distributed to an individual researcher, an electronic license agreement must be signed and approved. To gain access to the data, a researcher must agree to the following: (1) Implement security measures to prevent unauthorized access to census microdata. Under IPUMS International agreements with collaborating agencies, redistribution of the data to third parties is prohibited. (2) Use the microdata for the exclusive purposes of scholarly research and education. Researchers must explicitly agree to not use microdata acquired for any commercial or income-generating venture. (3) Maintain the confidentiality of persons, households, and other entities. Any attempt to ascertain the identity of persons or households from the microdata is prohibited. Alleging that a person or household has been identified is also prohibited. (4) Report all publications based on these data to IPUMS International, which will in turn pass the information on to the relevant national statistical agencies. Once a project is approved, a password is issued and data may be acquired through the Internet. Penalties for violating the license include: revocation of the license, recall of all microdata acquired, filing of a motion of censure to the appropriate professional organizations, and civil prosecution under the relevant national or international statutes. These safeguards mirror the principles from the Joint ECE/Eurostat Work Session on Statistical Data Confidentiality. Employees of the Minnesota Population Center who work with the census microdata to produce the harmonized database also sign agreements to respect the confidentiality of the data. IPUMS International works with each country's statistical office to minimize the risk of disclosure of respondent information. The details of the confidentiality protections vary across countries, but in all cases, names and detailed geographic information are suppressed and top-codes are imposed on variables such as income that might identify specific persons. In

addition, IPUMS International uses a variety of technical procedures to enhance confidentiality protection. These include the following: (1) Swapping an undisclosed fraction of records from one administrative district to another to make positive identification of individuals impossible. (2) Randomizing the placement of households within districts to disguise the order in which individuals were enumerated or the data processed. (3) Aggregating codes of sensitive characteristics (e.g., grouping together very small ethnic categories) (4) Top- and bottom-coding continuous variables to prevent identification of extreme cases. The safety record for public-use census microdata is apparently perfect. In almost four decades of use, there has not been a single verified breach of statistical confidentiality. The measures implemented by the IPUMS International are designed to extend this record.

#### ACCESS CONDITIONS

An adapted version of the dataset, harmonized for international comparability, is available from IPUMS International (<https://international.ipums.org/international/>) under the following conditions:

IPUMS International distributes integrated microdata of individuals and households only by agreement of collaborating national statistical offices and under the strictest of confidence. Before data may be distributed to an individual researcher, an electronic license agreement must be signed and approved. To gain access to the data, a researcher must agree to the following:

- (1) Implement security measures to prevent unauthorized access to census microdata. Under IPUMS International agreements with collaborating agencies, redistribution of the data to third parties is prohibited.
- (2) Use the microdata for the exclusive purposes of scholarly research and education. Researchers must explicitly agree to not use microdata acquired for any commercial or income-generating venture.
- (3) Maintain the confidentiality of persons, households, and other entities. Any attempt to ascertain the identity of persons or households from the microdata is prohibited. Alleging that a person or household has been identified is also prohibited.
- (4) Report all publications based on these data to IPUMS International, which will in turn pass the information on to the relevant national statistical agencies.

Once a project is approved, a password is issued and data may be acquired through the Internet. Penalties for violating the license include: revocation of the license, recall of all microdata acquired, filing of a motion of censure to the appropriate professional organizations, and civil prosecution under the relevant national or international statutes.

These safeguards mirror the principles from the Joint ECE/Eurostat Work Session on Statistical Data Confidentiality. Employees of the Minnesota Population Center who work with the census microdata to produce the harmonized database also sign agreements to respect the confidentiality of the data.

#### CITATION REQUIREMENTS

Steven Ruggles, Lara Cleveland, Rodrigo Lovaton, Sula Sarkar, Matthew Sobek, Derek Burk, Dan Ehrlich, Quinn Heimann, Jane Lee. Integrated Public Use Microdata Series, International: Version 7.5 [dataset]. Minneapolis, MN: IPUMS, 2024. <https://doi.org/10.1> [dataset]. ### DDI DOCUMENT VERSION

Version 7.5 October 2024. NEW FEATURES.

--Historical data from NAPP project now available from IPUMS-International.

--Historical census data from Canada, Denmark, the United Kingdom, Germany, Iceland, Norway, Sweden, and the United States for the period 1703 to 1911 are now available from IPUMS-International. The complete count and sample datasets were previously disseminated by the North Atlantic Population Project (NAPP). Where possible, the data have been integrated into existing IPUMS-International variable coding schema. Some new variables have been created that are available only for these pre-1960 datasets. NAPP data users should note that many NAPP variables are available from IPUMS-International by different names. For a complete list of NAPP variables that have been renamed in IPUMS-International, refer to the crosswalk.

--Individual country shapefiles for the third-level administrative level of geography are now available for a few IPUMS samples.

--New spatially harmonized previous-residence variables at the second administrative level of geography are available for several samples in this data release. More information is available [here](#). Users should note that many older migration variables are available by different names. Refer to this table for a crosswalk of old and corresponding new migration variables.

--IPUMS now hosts the Census Mosaic data collection. Census Mosaic identifies, gathers, harmonizes, and distributes surviving historical census microdata from regions of Continental Europe where complete centralized records are not available. The Mosaic project was founded by a consortium of historical social scientists in Europe. Data can be downloaded as static files from the Census Mosaic website. Although the data are not yet integrated fully into IPUMS International, variables have been standardized and harmonized to be roughly compatible with IPUMS coding structures.

### NEW SAMPLES.

--Full-count datasets for Great Britain 1851, 1861, 1871 (Scotland only), 1891, and 1901.

--Full-count dataset for Sweden 1910. Denmark (1845, 1880, and 1885)

--Labor force surveys from Spain and eight new labor force surveys from Italy added to the series.

### Newly added countries:

Benin, Cote d'Ivoire, Finland, Guatemala, Honduras, Laos, Lesotho, Mauritius, Myanmar, Papua New Guinea, Russia, Slovak Republic, Suriname, Togo, and Zimbabwe

### New samples for:

Bolivia, Cambodia, Chile, Cuba, Cote d'Ivoire, Egypt (1848 and 1868, historical samples), Fiji, Guinea, Ireland, Israel, Italy, Lao PDR, Mexico, Morocco, Nepal, Netherlands, Palestine, Peru, Philippines, Puerto Rico, Rwanda, Senegal, Sierra Leone, South Africa, Switzerland, Uganda, United States, United Kingdom, United States, Vietnam, and Zimbabwe

#### SUPPLEMENTAL DATA.

Data from censuses from Benin and Lesotho that record individual fertility and/or mortality events were made available in IPUMS-International. These files can be downloaded and linked to data produced by the extract system.

#### NEW VARIABLES.

--IPUMS-International now provides harmonized and year-specific geography variables for all countries including 13 new samples from Dominican Republic, Germany, Indonesia, Israel, Malaysia, Mongolia, Nicaragua, Nigeria, Palestine, Paraguay, Thailand, United Kingdom, and Uruguay. First-level and second-level year specific geography variables are also available for all countries. IPUMS provides corresponding, downloadable GIS boundary files for all harmonized and year specific geography variables. More information about IPUMS geography variables is available [here](#).

--IPUMS International now provides spatially harmonized previous-residence variables at the first administrative level of geography. The codes for the spatially harmonized previous-residence variables match the spatially harmonized place of current residence. More information is available [here](#).

--IPUMS International provides spatially harmonized previous-residence variables at the first administrative level of geography for all samples; previously available country-specific migration variables at the first administrative level that were not fully harmonized spatially have been phased out. Spatially harmonized previous-residence variables at the second administrative level of geography are available for selected samples. More information is available [here](#). Users should note that many older migration variables are available by different names. Refer to this table for a crosswalk of old and corresponding new migration variables.

--IPUMS International now provides spatially harmonized previous-residence variables at the first administrative level of geography for all samples. Spatially harmonized previous-residence variables at the second administrative level of geography are available for several samples in this data release. More information is available [here](#). Users should note that many older migration variables are available by different names. Refer to this table for a crosswalk of old and corresponding new migration variables.

--Lower (third) level geography codes and GIS files have been added for Bangladesh, China, Ethiopia, Mali, Rwanda, and Zimbabwe. Some geography codes and labels might have changed for these countries to accommodate the newer lower level geography.

--Added more detailed 3-digit industry and occupation variables for China 2000.

#### EDITED SAMPLES.

--Revised full-count data for Great Britain 1881

--Revised full-count datasets for Sweden 1890 and 1900. The revision includes the following changes that improve comparability across Sweden datasets:

--Revisions to certain ethnicity and work variables (and the underlying source data): ORIGIN, LABFORCE, OCCHISCO, OCRELATE, OCSTATUS.

--Revisions to unharmonized source variables: SE1890A\_HISCOSE, SE1890A\_HISCRELSE, SE1890A\_HISCSTATSE, SE1890A\_OCCMULTISE, SE1900A\_HISCOSE, SE1900A\_HISCRELSE, SE1900A\_HISCSTATSE, SE1900A\_OCCMULTISE.

--A new United States 1850 full-count dataset now matches the corresponding dataset distributed by the USA IPUMS data project. The source variable US1850A\_0502 (HISTID) provides a linking key to match person records to the USA version of the data. The IPUMS International version of the data contains names, which the USA version cannot distribute.

#### EDITED VARIABLES.

An error affecting HHWT for South Africa 2007 was corrected. The existing values were adjusted by a factor of 0.01.

AGEMARR was edited to add data for Hungary 1980 and 1990.

Harmonized and year-specific geography variables for Brazil and Colombia have been edited to accommodate for the availability of refined municipal boundaries. Users should be aware that codes and labels have changed in all harmonized and year specific geography variables for these two countries.

Errors affecting BPLSE2 (formerly BPLPARSE) for Sweden 1890 and the underlying source variable were corrected. Several thousand cases were incorrectly coded as 258101000. These cases have been updated with the correct code: 258171000.

Harmonized geography variables for Italy, Philippines, Rwanda, and United States have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year specific geography

variables for these countries. More information about IPUMS geography variables is available [here](#).

The codes for the source variable RW2002A\_0419 were corrected to include 0 and 8 as possible responses, which were previously identified as 'unknown years' within primary education.

Errors affecting EDUCFJ for Fiji 2006 were corrected.

A problem with PERWT for Tanzania 2012 was corrected. The previous weights were adjusted to properly reflect population totals.

MOMLOC, POPLOC, and PARRULE were updated for the United States 2010 and 2015 samples to include additional information on subfamilies. Prior to this correction, persons above age 17 were not receiving links to their co-resident mothers and fathers.

An error affecting codes for the URBAN variable in Egypt 1986 for Cairo, Alexandria, Port-Said, and Suez was corrected.

An error in INCEARN affecting Venezuela 2001 was corrected. Earned income in the source variable VE2001A\_0440 is interpreted as a monthly amount, thus adjustments previously applied to convert data from daily or weekly income were suppressed.

All the six Brazil samples in IPUMS International were replaced with higher density samples.

An edited version of the Chile 2017 sample was introduced to correct an error in household breaks.

Errors affecting codes for GEO1\_ZA in South Africa 2011 and ENUTS1 in United Kingdom 1991 were corrected.

Harmonized geography variables for Cambodia, Fiji, and Nepal have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year-specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

An error in PERWT affecting Nepal 2001 was corrected.

Errors affecting a code in GQ for Brazil 2010 and Indonesia 2010 were corrected. Both census samples now identify 1-person units created by splitting a large household.

An error in MARRNUM affecting Indonesia 1976 was corrected. Some codes for GEO1\_EG2006 and GEO2\_EG2006 were edited.

Harmonized geography variables for Bolivia, Cuba, Guinea, Ireland, Morocco, Palestine, Senegal, South Africa, and Uganda have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year-specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

An error in INCEARN affecting Brazil 1980 was corrected.

An error in EDATTAIN affecting Ireland 1971 and 1981 was corrected.

A small proportion of person records in Mexico 1960 were re-classified in MIGRATEP based on information about their current and previous residence. These were previously coded to 'different major administrative unit', even though their place of residence suggests that their last move was within the same major administrative unit.

The second-level technician (higher) degrees for Spain 1991, 2001, and 2011 were re-classified into post-secondary technical education in EDATTAIN.

An error affecting codes for SEX for Egypt 1848 and 1868 was corrected. The values for male and female had been reversed.

A problem with HHWT and PERWT for Canada 2011 was corrected. The previous weights were adjusted to properly reflect population totals.

Harmonized geography variables for Cambodia, Lao PDR, Mexico, Peru, Switzerland, Vietnam, Puerto Rico, United Kingdom, and United States have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year-specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

Harmonized geography variables for Chile and Sierra Leone have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year-specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

An error affecting codes for COMPUTER for Senegal 2013 was corrected.

An error affecting labels available in IND for Peru 1993 was corrected.

An error affecting codes for persons previously residing abroad for MIG1\_5\_BO in Bolivia 2001 and 2012 was corrected.

EDUCAR, EDATTAIN, and YRSCHOOL were adjusted in the Argentina samples to incorporate information on completion of

education levels in the data harmonization.

HHWT and PERWT were calibrated in Kenya 1979 to properly reflect the population distribution by province.

In GQ (group quarters status), persons residing in hospitals of all types were reclassified to 'institutional group quarters' from 'other group quarters,' making their treatment consistent with GQTYPE.

Errors affecting codes for BPLBJ2 in Benin 1979, 1992, and 2002 were corrected.

Errors affecting codes for GEO2\_BR1970 in Brazil 1970 were corrected.

## description

---

DEFINITION

GQ identifies households as vacant dwellings, group quarters, or private households. Group quarters -- collective dwellings -- are generally institutions and other group living arrangements such as rooming houses and boarding schools.

Institutions often retain persons under formal supervision or custody, such as correctional institutions, military barracks, asylums, or nursing homes. Educational and religious group dwellings (e.g., boarding schools, convents, monasteries, etc.) are also included in the institutional classification.

Group quarter designations are often useful for understanding the universe of households that answered questions about household characteristics. Censuses will often exclude group quarters from such questions.

## description

### DEFINITION

GQTYPE identifies the type of group quarters -- collective dwellings -- which are broadly classified into institutional and non-institutional types.

Institutions are a place of residence where people are subject to a common authority or bound by a common objective or personal interest. The definition encompasses correctional facilities, health institutions, retirement homes, orphanages, shelters (social welfare institutions), military or police establishments, boarding schools, and religious group dwellings.

Non-institutional group quarters comprise refugee and workers' camps (temporary accommodation), hotels, pensions, and all types of boarding or lodging houses. The "floating population" is included as a category within the non-institutional group quarters, when identified by the corresponding sample. This group refers to outdoor sleepers, homeless persons, travelers, and persons in ships, boats, or other mobile dwellings.

A more general classification of households between private and group quarters is available in GQ.

### ■ HHWT: Household weight

**Data file:** ECU1962\_PHC-H-H

#### Overview

Type: Continuous    Decimal: 2    Width: 8    Range: -    Format: Numeric

#### description

---

##### DEFINITION

HHWT indicates the number of households in the population represented by the household in the sample.

For the samples that are truly weighted (see the comparability discussion), HHWT must be used to yield accurate household-level statistics.

NOTE: HHWT has 2 implied decimal places. That is, the last two digits of the eight-digit variable are decimal digits, but there is no actual decimal in the data.

## concept

---

CONCEPT

#### Imputation and derivation

---

##### DERIVATION

HHWT is an 8-digit numeric variable with 2 implied decimal places. See the variable description.

---

### ■ PERSONS: Number of person records in the household

**Data file:** ECU1962\_PHC-H-H

#### Overview

Type: Continuous    Width: 4    Range: -    Format: Numeric

#### description

---

##### DEFINITION

PERSONS indicates how many person records are included in the household (i.e., the number of person records associated with the household record in the sample). These person records will all have the same serial number (SERIAL) as the household record. The information contained in the household record will normally apply to all of these persons.

**concept**

CONCEPT

**Imputation and derivation**

DERIVATION

PERSONS is a 4-digit numeric variable.

**RECTYPE: Record type****Data file:** ECU1962\_PHC-H-H**Overview**

Type: Continuous    Width: 1    Range: -    Format: character

**Questions and instructions**

CATEGORIES

Value	Category
H	Household
P	Person

**description**

DEFINITION

RECTYPE identifies the type of record for the case: household or person.

NOTE: RECTYPE is an alphabetic (character string) variable with a value of 'H' for household records and 'P' for person records. RECTYPE will not appear as a variable in the default rectangular extracts produced by the data extract system. It is only available in hierarchical extracts, to distinguish between the two record types.

## description

### DEFINITION

SAMPLE identifies the IPUMS sample from which the case is drawn. Each sample receives a unique 9-digit code. The code is structured as follows:

The first 3 digits are the ISO/UN codes used in COUNTRY

The next 4 digits are the year of the census/survey

The final 2 digits identify the sample within the year. For the last two digits, censuses or large census-like surveys have a value "0" (e.g, 01) in the second-to-last digit, household surveys have a value of "2" (e.g., 21), and employment surveys have a value of "4" (e.g., 41).

### DEFINITION

SERIAL is an identifying number unique to each household in a given sample. All person records are assigned the same serial number as the household record that they follow. (Person records also have their own unique identifiers -- see PERNUM.) The combination of SAMPLE and SERIAL provides a unique identifier for every household in the IPUMS-International database; SAMPLE, SERIAL and PERNUM uniquely identify every person in the database.

SERIAL can be used to identify dwellings in some samples. In these samples, the first 7 digits of SERIAL provide the dwelling number common to all households that were sampled from the same structure. The last three digits give the sequence of the household within the dwelling. The following is a list of samples in which dwellings can be inferred:

Chile 1970, 1992, 2002Colombia 1993, 2005Costa Rica 1984, 2000Cuba 2002Dominican Republic 1981, 2002, 2010Ecuador 1990, 2001Germany 1971Hungary 1980, 1990, 2001Jamaica 1982, 1991, 2001Malaysia 1970, 1991, 2000Mexico 1995, 1990, 2000, 2005Nigeria 2006Panama 2000Peru 1993, 2007Portugal 1981, 1991, 2001Spain 1991Uruguay 2011Venezuela 1990, 2001Vietnam 1989In all other samples, the last 3 digits are always zeroes.

SERIAL was constructed for IPUMS-International, and has no relation to the serial number in the original datasets.

The U.S. 1900 sample and 1880 10% sample have multi-household dwellings that can be identified using the last 3 digits of SERIAL.

## concept

---

### CONCEPT

## Imputation and derivation

---

### DERIVATION

SERIAL is a 10-digit numeric variable.

The last 3 digits of SERIAL indicate household number within dwelling for selected samples noted in the variable description. In all other samples, the last 3 digits are always zeroes.

### DEFINITION

SUBSAMP allocates each case to one of 100 subsample replicates, randomly numbered from 0 to 99. Each subsample is nationally representative and preserves any stratification of the sample from which it is drawn. Users who need a representative subset of a sample can use SUBSAMP to select their cases. For example, to randomly extract 10% of the cases from a sample, select any 10 of the 100 subsamples.

## AREAMOLLWGEO1: Area of GEOLEV1 unit in square kilometers

**Data file:** ECU1962\_PHC-H-H

### Overview

Type: Continuous    Width: 10    Range: -    Format: Numeric

## description

---

### DEFINITION

AREAMOLLWGEO1 indicates the area in square kilometers of the major administrative unit in which the household was enumerated. The major administrative unit of the household is identified by the GEOLEV1 variable.

The area of units in GEOLEV1 is calculated using Mollweide's equal area projection. For a full set of geography variables refer to IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1 and GEOLEV2. More information on IPUMS-International geography can be found [here](#).

## concept

---

### CONCEPT

---

## Imputation and derivation

---

### DERIVATION

AREAMOLLWGEO1 is a 10-digit string variable listing the area in square kilometers.

---

**AREAMOLLWGE02: Area of GEOLEV2 unit in square kilometers****Data file:** ECU1962\_PHC-H-H**Overview**

Type: Continuous    Width: 10    Range: -    Format: Numeric

**description**

## DEFINITION

AREAMOLLWGE02 indicates the area in square kilometers of the second major administrative unit in which the household was enumerated. The second major administrative unit of the household is identified by the GEOLEV2 variable.

The area of units in GEOLEV2 is calculated using Mollweide's equal area projection. For a full set of geography variables refer to IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1 and GEOLEV2. More information on IPUMS-International geography can be found here.

## description

### DEFINITION

GEO1\_EC identifies the household's province within Ecuador in all sample years. Provinces are the first level administrative units of the country. GEO1\_EC is spatially harmonized accounting for political boundary changes across census years. Some detail is lost in harmonization; see the comparability discussion. A GIS map (in shapefile format), corresponding to GEO1\_EC can be downloaded from the GIS Boundary files page in the IPUMS International web site.

The full set of geography variables for Ecuador can be found in the IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1, and GEOLEV2. More information on IPUMS-International geography can be found here.

### CONCEPT

#### **GEOLEV1: 1st subnational geographic level, world [consistent boundaries over time]**

**Data file: ECU1962\_PHC-H-H**

### Overview

Type: Continuous    Width: 6    Range: -    Format: Numeric

## description

### DEFINITION

GEOLEV1 indicates the major administrative unit in which the household was enumerated. The variable incorporates the geographies for every country, to enable cross-national geographic analysis over time. First administrative units in GEOLEV1 have been spatiotemporally harmonized to provide spatially consistent boundaries across samples in each country.

## concept

### CONCEPT

## Imputation and derivation

---

### DERIVATION

GEOLEV1 is a 6-digit numeric variable.

GEOLEV1 codes and labels can be found [here](#).

Codes, labels, frequencies, and information about boundary changes for each country can be found in the country specific harmonized variable e.g. GEO1\_BR.

---

## **GEOLEV2: 2nd subnational geographic level, world [consistent boundaries over time]**

**Data file:** ECU1962\_PHC-H-H

### Overview

Type: Continuous    Width: 9    Range: -    Format: Numeric

### description

---

### DEFINITION

GEOLEV2 indicates the second major administrative unit in which the household was enumerated. The variable incorporates the geographies for every country, to enable cross-national geographic analysis over time. Second administrative units in GEOLEV2 have been spatio-temporally harmonized to provide spatially consistent boundaries across samples in each country.

### concept

---

### CONCEPT

## Imputation and derivation

---

### DERIVATION

GEOLEV2 is a 9-digit numeric variable.

GEOLEV2 codes and labels can be found [here](#).

Codes, labels, frequencies, and information about boundary changes for each country can be found in the country specific harmonized variable e.g. GEO2\_BR.

---

## **POPDENSGEO1: Population density of GEOLEV1 unit, in persons per square kilometer**

**Data file:** ECU1962\_PHC-H-H

### Overview

Type: Continuous    Width: 8    Range: -    Format: Numeric

### description

---

**DEFINITION**

POPDENSGEO1 indicates the population density in persons per square kilometer of the major administrative unit in which the household was enumerated. The major administrative unit of the household is identified by the GEOLEV1 variable.

The area of units in GEOLEV1 is calculated using Mollweide's equal area projection. For a full set of geography variables refer to IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1 and GEOLEV2. More information on IPUMS-International geography can be found here.

**concept**

---

## CONCEPT

**Imputation and derivation**

---

**DERIVATION**

POPDENSGEO1 is an 8-digit string variable listing the population density in persons per square kilometer.

**POPDENSGEO2: Population density of GEOLEV2 unit, in persons per square kilometer**

**Data file:** ECU1962\_PHC-H-H

**Overview**

Type: Continuous    Width: 12    Range: -    Format: Numeric

**description**

---

**DEFINITION**

POPDENSGEO2 indicates the population density in persons per square kilometer of the second major administrative unit in which the household was enumerated. The second major administrative unit of the household is identified by the GEOLEV2 variable.

The area of units in GEOLEV2 is calculated using Mollweide's equal area projection. For a full set of geography variables refer to IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1 and GEOLEV2. More information on IPUMS-International geography can be found here.

**concept**

---

## CONCEPT

**Imputation and derivation**

---

**DERIVATION**

POPDENSGEO2 is a 12-digit string variable listing the population density in persons per square kilometer.

**REGIONW: Continent and region of country**

## DEFINITION

GEO2\_EC identifies the household's canton within Ecuador in all sample years. Cantons are the second level administrative units of the country, after provinces. GEO2\_EC is spatially harmonized to account for political boundary changes across census years. Some detail is lost in harmonization; see the comparability discussion. A GIS map (in shapefile format), corresponding to GEO2\_EC can be downloaded from the GIS Boundary files page in the IPUMS International web site.

The full set of geography variables for Ecuador can be found in the IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1, and GEOLEV2. More information on IPUMS-International geography can be found here.

## description

### DEFINITION

GEO2\_EC1962 identifies the household's canton within Ecuador in 1962. Cantons are the second level administrative units of the country, after provinces. A GIS map (in shapefile format), corresponding to GEO2\_EC1962 can be downloaded from the

GIS Boundary files page in the IPUMS International web site.

The full set of geography variables for Ecuador can be found in the IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1, and GEOLEV2. More information on IPUMS-International geography can be found here.

9	Unknown

**description**

## DEFINITION

OWNERSHIP indicates whether a member of the household owned the housing unit. Households that acquired their unit with a mortgage or other lending arrangement were understood to "own" their unit even if they had not yet completed repayment. For those that did not own their housing unit, several options were possible: renting (from various types of owners), subletting, usufruct, and de facto occupation.

## CATEGORIES

Value	Category
1	Yes, in consensual union
2	No, married
8	Unknown
9	NIU (not in universe)

**description**

## DEFINITION

CONSENS indicates whether the respondent was in a consensual union -- a de facto marriage.

**concept**

## CONCEPT

**MARST: Marital status [general version]**

Data file: ECU1962\_PHC-P-H

**Overview**

Type: Discrete    Width: 1    Range: -    Format: Numeric

## Questions and instructions

### CATEGORIES

Value	Category
	NIU (not in universe)
1	Single/never married
2	Married/in union
3	Separated/divorced/spouse absent
4	Widowed
9	Unknown/missing

### description

#### DEFINITION

MARST describes the person's current marital status according to law or custom. Individuals who remarried should report the status relevant to their most recent marriage. Census instructions rarely explicitly limit marital status to strictly legal unions.

Note regarding universe: The lowest age at which a person can be anything but "never married" varies among samples.

### DEFINITION

MARST describes the person's current marital status according to law or custom. Individuals who remarried should report the status relevant to their most recent marriage. Census instructions rarely explicitly limit marital status to strictly legal unions.

Note regarding universe: The lowest age at which a person can be anything but "never married" varies among samples.

## concept

### CONCEPT

#### **PERNUM: Person number**

**Data file: ECU1962\_PHC-P-H**

**Overview**

Type: Continuous    Width: 4    Range: -    Format: Numeric

**description**

---

## DEFINITION

PERNUM numbers all persons within each household consecutively (starting with "1" for the first person record of each household). When combined with SAMPLE and SERIAL, PERNUM uniquely identifies each person in the IPUMS-International database.

**concept**

---

## CONCEPT

**Imputation and derivation**

---

## DERIVATION

PERNUM is a 4-digit numeric variable.

---

**PERWT: Person weight**

**Data file:** ECU1962\_PHC-P-H

**Overview**

Type: Continuous    Decimal: 2    Width: 8    Range: -    Format: Numeric

**description**

---

## DEFINITION

PERWT indicates the number of persons in the actual population represented by the person in the sample.

For the samples that are truly weighted (see the comparability discussion), PERWT must be used to yield accurate statistics for the population.

NOTE: PERWT has 2 implied decimal places. That is, the last two digits of the eight-digit variable are decimal digits, but there is no actual decimal in the data.

**concept**

---

## CONCEPT

**Imputation and derivation**

---

## DERIVATION

PERWT is an 8-digit numeric variable with 2 implied decimal places. See the variable description.

---

2	Primary completed
3	Secondary completed
4	University completed
9	Unknown

**description**

## DEFINITION

EDATTAIN records the person's educational attainment in terms of the level of schooling completed (degree or other milestone). The emphasis on level completed is critical: a person attending the final year of secondary education receives the code for having completed lower secondary only -- and in some samples only primary.

EDATTAIN does not necessarily reflect any particular country's definition of the various levels of schooling in terms of terminology or the number of years of schooling. EDATTAIN is an attempt to merge -- into a single, roughly comparable variable -- samples that provide degrees, ones that provide actual years of schooling, and those that have some of both. In addition to EDATTAIN, a country-specific education classification is provided which loses no information and reflects the particular educational system of that country (for example EDUCBR for Brazil, EDUCCL for Chile, and EDUCUS for the United States). As always, users can refer to the original education source variables for each sample, if they wish.

Many samples also give single years of schooling completed, recorded in YRSCHOOL. Some samples provide educational information in a form that could not be incorporated into EDATTAIN.

## concept

### CONCEPT

**EMPSTAT: Activity status (employment status) [general version]****Data file:** ECU1962\_PHC-P-H**Overview**

Type: Discrete    Width: 1    Range: -    Format: Numeric

**Questions and instructions**

## CATEGORIES

Value	Category
	NIU (not in universe)
1	Employed
2	Unemployed
3	Inactive
9	Unknown/missing

**description**

## DEFINITION

EMPSTAT indicates whether or not the respondent was part of the labor force -- working or seeking work -- over a specified period of time. Depending on the sample, EMPSTAT can also convey further information.

The first digit of EMPSTAT is fully comparable, and classifies the population into three groups: employed, unemployed, and inactive. The combination of employed and unemployed yields the total labor force. The second and third digits of EMPSTAT preserve additional information available for some countries and census years but not for others.

Employment status is sometimes referred to in other sources as "activity status".

## description

### DEFINITION

YRSCHOOL indicates the highest grade/level of schooling the person had completed, in years. Only formal schooling is counted. YRSCHOOL accounts for the number of years of study, regardless of the track or kind of study. Information on degree and/or technical track is available in EDATTAIN. Years of schooling for Israel, categorized into intervals, are given in YRSCHOOL2.

Users should pay close attention to the top-codes in each sample, as discussed in the comparability section.

### description

#### DEFINITION

CLASSWK refers to the status of an economically active person with respect to his or her employment -- that is, the type of explicit or implicit contract of employment with other persons or organizations that the person has in his/her job. In general, the variable indicates whether a person was self-employed, or worked for someone else, either for pay or as an unpaid family worker. CLASSWK is related to EMPSTAT, which is used to define the universe in many samples.

Class of worker is often referred to as "status in employment" in other sources.

999	Unknown

## description

---

### DEFINITION

INDGEN recodes the industrial classifications of the various samples into twelve groups that can be fairly consistently identified across all available samples. The groupings roughly conform to the International Standard Industrial Classification (ISIC). The third digit of INDGEN retains important detail among the service industries that could not be consistently distinguished in all samples.

"Industry" refers to the activity or product of the establishment or sector in which a person worked.

## LABFORCE: Labor force participation

**Data file:** ECU1962\_PHC-P-H

### Overview

Type: Discrete    Width: 1    Range: -    Format: Numeric

## Questions and instructions

---

### CATEGORIES

Value	Category
1	No, not in the labor force
2	Yes, in the labor force
8	Unknown
9	NIU (not in universe)

## description

---

### DEFINITION

LABFORCE is a dichotomous variable identifying whether a person participated in the labor force. Labor force participation generally means working or seeking work within a specified reference period.

For most samples LABFORCE is a recode of EMPSTAT (employment status). A consistent lower age universe of 15 or older has been applied to increase comparability across samples. Full detail is retained in EMPSTAT, which should be used for any study of child labor.

## description

### DEFINITION

MIGCTryp indicates the country of previous residence of international migrants.

Persons who never lived abroad are coded to the "non-migrant" category.

DEFINITION

MIGRATEP indicates whether the person's most recent move (if any) was between minor administrative units, major units, or countries.

## concept

---

CONCEPT

---

### **OCC: Occupation, unrecoded**

**Data file:** ECU1962\_PHC-P-H

#### **Overview**

Type: Continuous    Width: 4    Range: -    Format: Numeric

## description

---

### DEFINITION

OCC records the person's primary occupation, classified according to the system used by the respective national census office at the time. For someone with more than one job, the primary occupation is usually the one in which the person spent the most time or earned the most money, although this may not have been explicit in the instructions for a specific census.

To ensure confidentiality, very small occupations are recoded to a residual category indicating the persons had an occupation, but the job title is not identified. The number of cases recoded should be too small to affect analyses.

## concept

---

### CONCEPT

## Imputation and derivation

---

### DERIVATION

OCC is a 4-digit numeric variable.

Some samples use fewer than 4 digits. In those cases, the data are right-justified, and the extra leading digits are padded with zeroes.

98	Unknown
99	NIU (not in universe)

## description

### DEFINITION

OCCISCO records the person's primary occupation, coded according to the major categories in the International Standard Classification of Occupations (ISCO) scheme for 1988. For someone with more than one job, the primary occupation is typically the one in which the person had spent the most time or earned the most money.

## description

### DEFINITION

GEOMIG1\_P indicates the major administrative unit in which the person previously resided prior to the survey. Only intra-national migrations are recorded; however, the variable incorporates geographies for every country that lists place of previous residence, to enable comparative analysis of subnational migration. Foreign migrants are coded 097 or 997. Codes for GEOMIG1\_1 match the geographic codes in GEOLEV1 (current place of residence).

For similar information for different time intervals since migration, see variables GEOMIG1\_1, GEOMIG1\_5, and GEOMIG1\_10. More on migration and geography can be found [here](#).

1230	Construction contractors
1240	Directors, managers of banks, bonds, insurance and real estate
1270	Directors and managers of transportation and storage
1280	Director, managers of communications and public services

1290	Directors, managers of companies of services and supplies (water, gas, electricity, tourism, show business, etc.)
1291	Other directors, managers, not in another category
2000	Accountants, auditors, public weighers and licensed accounts
2100	Accountant aids, bookkeepers
2110	Chargers and payers (official payers, treasurers)
2120	Account collectors
2200	Typists and shorthand clerks, secretaries in general, (and other office workers of public and private administration)
2300	Operators of office machinery (IBM computers, calculators, mimeographs)
2400	Transit inspectors, controllers and transportation dispatchers
2500	Mailmen
2510	Telegraph messengers, office senders and other messengers in general
2520	Classifiers of correspondence, mail office (post office)
2590	Other persons (in occupations related to communications)
2600	Telephone operators
2610	Telegraph operators
2620	Radio communication operators
2710	Fare collectors (buses, minibuses and other means of transportation)
2800	Registrars of entrances and exits of merchandise shops, handlers of correspondence, wine producers, storage guarding
2810	Aids in libraries, medical and dental consulting firms and other professional services
2820	Other office workers and persons in related occupations, not in another category, such as proofreaders, print correctors, scribes, bank employees
3000	Vendors-store owners of wholesale commerce
3010	Vendors-store owners of retail commerce
3100	Vendors and salesclerks in shops and department stores
3110	Sellers of newspapers, magazines and lottery tickets
3120	Street vendors, order solicitors, and demonstrators (peddlers, town criers etc.)
3200	Commercial traveling salesmen
3210	Representatives of factories or commercial houses
3220	Commisionists in general
3300	Insurance agents and brokers
3330	Auctioneers
3340	Vendors of tickets and fares (box office clerks) and other vendors (advertising agents)
4000	Agricultural and livestock workers (owners, for their own account, producers, etc)
4010	Administrators (foremen, clerks and administrators)
4100	Agricultural and livestock workers dedicated to the cultivation of general work of farms (agricultural workers) milkers
4110	Agricultural and livestock workers (family workers)
4120	Operators of agricultural machinery and vehicles (tractor drivers within the lands of a farm)

4130	Gardeners, caretakers of lands, greenhouse workers, seeders and similar workers and caretakers of land for recreation and sports (excluding retail florists)
4200	Fishermen and persons who work in fishing farms and those who belong to fishing boat crews
4210	Other persons in related occupations not in another category
4410	Persons working in the production of wood coal
5010	Miners in deposits of gold, silver, copper, lead, steel, zinc and other metallic deposits
5300	Quarrymen
5310	Persons in the occupation of the extraction of sand, sulfur, slate, clay, gravel and salt
5500	Workers in quarries
5510	Workers in mines of sand, sulfur, slate, clay, gravel and salt
5600	Drillers, fitters and operators of petroleum and gas wells
5700	Workers in oil wells and workers in occupations of extraction of other liquid, semi-liquid and natural gas minerals
6000	Chauffeurs and taxi drivers
6010	Truck drivers
6020	Drivers of buses and minibuses
6030	Cart drivers and coachmen (and drivers by animal power) mule drivers
6100	Locomotive operators
6200	Deck officers and pilots of ships (merchant)
6300	Sailors (merchant)
6310	Shipmen and boatmen (rowboats)
6400	Pilots and air navigators (commercial companies)
6500	Brakemen on trains
6600	Switchmen
7000	Preparers of fibers, carders and workers in related occupations
7010	Spinners and winders in general
7020	Weavers, adjustors and preparers of looms in general
7030	Weavers and adjustors of sewing machines (sewing machines and sewing by hand)
7040	Bleachers, dyers and finishers of textile products, steam pressers and pressers, finishers and waterproofers of textile products
7050	Carpet makers and other persons in the making of related products (in factories or by hand)
7051	Persons in occupations related to the making of textile products and related occupations not in another category
7100	Tailors and furriers in general
7110	Couturiers, seamstresses, hat makers not in factories, embroiderers
7120	Other persons in occupations related to the making of hats
7130	Clothes cutters, sewers and other persons working in the making of articles of clothing
7140	Upholsterers, mattress makers and other persons working in the making of products with a cloth base
7160	Helpers and apprentices of tailoring, clothes, fur, etc.
7200	Shoemakers not in a factory
7210	Cutters, shoe molders and other persons working in the making of footwear in factories
7230	Saddlers, leatherworkers and other persons working in the making of leather products

7240	Aids and apprentices of footwear and saddles, etc.
7300	Carpenters and assemblers
7310	Cabinet makers and platers
7320	Sawmill operators and finishers
7330	Other craftsmen and operators of wood
7340	Aids and apprentices of carpentry and assembly
7400	Bricklayers, stone masons and pavers
7500	Painters in general and wallpaperers in construction work and maintenance
7600	Plumbers and pipe fitters, riveters and steel structure assemblers
7610	Body shop workers, tinsmiths, boilermakers and other persons with jobs with metal sheets
7620	Welders by hand, arch, or welding torch
7700	Electricians and electrical repairmen
7710	Inspectors and repairers of telephone, telegraph, and electrical lines and splicers of electric cables
7720	Electrician repairmen of radio and television
7740	Other electricians and persons in related occupations
7800	Mechanics and automobile repairmen in general
7810	Mechanics
7820	Operators of tooling machines and mechanics in general
7830	Aids and apprentices of mechanics
7900	Mechanics of precision instruments and persons in related occupations (opticians)
7910	Watchmakers
7920	Jewelers and goldsmiths (silversmiths, enamellers, nickellers, etc)
7980	Machine operators of immobile motors and operators in generator plants
7981	Operators of cranes, winches, construction machinery and workers in related occupations
7990	Typographers and print setters, linotypists, printers (armers and compositors)
7991	Lithographers, recorder, photorecorders, electotypists, stereotypists and related craftsmen
7992	Bookbinders
7993	Other persons in related occupations (mechanics, adjusters, printing machinery workers)
8000	Smelters, molders, heaters, temperers and operators in related occupations
8010	Blacksmiths, forgers and hammerers
8100	Potters and ceramic makers
8200	Heaters, toasters, grinders, distillers and related occupations
8240	Operators in the impermeabilization of mainly rubber textiles
8300	Slaughtermen, butchers and operators in related operations
8310	Millers and mill operators
8320	Bread and pastry makers ( and pasta makers)
8330	Confectioners, chocolate makers, and operators in related occupations (operators in the making of chewing gum)
8340	Butter and cheese makers and other operators related to the making of dairy products
8350	Operators in other occupations related to the preparation and conservation of food products

8360	Operators in the making of wine, beer and non alcoholic drinks, natural water and soft drinks
8420	Other operators in the manufacture of tobacco products
8500	Separators, peelers, tanners and other operators in related occupations
8900	Stone cutters
8920	Operators in occupations related to the process of making footwear primarily of rubber, plant materials, and other plastic fibers and materials
8981	Packers of manufactured products and bottlers of drinks
8990	Cleaners in factories
9000	Chainers, markers, preparers of stakes, topography assistants, day laborers and workers
9010	Aids and apprentices of carpentry, masonry and other crafts related to the construction industry
9020	Daily workers-construction and maintenance of buildings
9030	Daily workers-construction and maintenance of bridges, tunnels, dams, sewers, airports, recreational land, communication systems and other special works
9100	Stevedores and daily workers on piers
9110	Other daily workers in transportation and storage (packers)
9300	Daily workers not in another category: commerce
9350	Daily workers not in another category: public and communication services, street cleaners and related workers (workers in hygiene, health, rat catchers, gravediggers, etc.)
9500	Firemen
9510	Policemen and detectives in general
9520	Other public employees who work for the compliance of the law
9530	Guards, store detectives, and similar workers (agents and guards in tobacco and stamp stands and customs)
9600	Cooks
9610	Servants in the service of the dining room
9620	Servants in the service of domestic cleaning and servants in general
9630	Housekeepers, (nannies and wet-nurses)
9700	Launderers in private homes
9720	Pressers in private homes
9730	Self-employed launderers
9731	Self-employed pressers
9740	Servers in restaurants and cafes (waiters)
9741	Bartenders
9742	Other servers and workers in clubs and similar places
9750	Mangers of pensions
9752	Cooks (excluding private homes)
9753	Servers in general (excluding private homes)
9754	Persons who prepare or sell food in the street or in other public places
9755	Trust fund managers, providers, paymasters
9760	Hairdressers and barbers
9770	Doormen and concierges

9772	Workers and cleaners and workers in related occupations (floor polishers, floor cleaners, workers in public bathrooms)
9780	Athletes and sportspersons
9781	Referees of sporting events, trainers and monitors of physical culture
9790	Photographers
9791	Operators of movie cameras for movies and television
9850	Ushers in entertainment venues
9852	Bankers in game rooms and professional gamblers
9853	Other jobs in occupations related to the provision of personal or collective services
9854	Shoe shiners
9900	Members of the army (official, general troop and recruit)
9910	Members of the navy (official, general troop and recruit)
9920	Members of the air force (official, general troop)
9960	Non-identifiable occupations
9970	New workers seeking a job for the first time
9980	Undocumented
9999	NIU (not in universe)

## description

### DEFINITION

This variable indicates the occupation of the person who is economically active.

### UNIVERSE

Ecuador 1962: Persons age 12+ who were employed, unemployed or looking for a job. [discrepancies: type 1 0.2%; type II trace]
