Identification

SURVEY ID NUMBER

FRA_1975_PHC_v01_M_v7.5_A_IPUMS

TITLE

General Population Census of 1975 - IPUMS Subset

ABBREVIATION OR ACRONYM

PHC France 1975 (IPUMS Harmonized Subset)

COUNTRY

Name	Country code
France	FRA

STUDY TYPE

Population and Housing Census [hh/popcen] IPUMS International

SERIES INFORMATION

DOI:10.18128/D020.V7.5

KIND OF DATA

Population and Housing Census [hh/popcen]

UNIT OF ANALYSIS

Persons, households, and dwellings

UNITS IDENTIFIED:

- Dwellings: yes*
- Vacant Units: No
- Households: yes
- Individuals: yes
- Group quarters: yes*

UNIT DESCRIPTIONS:

- Dwellings: no
- Households: Yes
- Group quarters: A collective household is a group of persons that does not live in an ordinary household, but lives in a collective establishment, sharing meal times.

Version

VERSION DESCRIPTION

Version 7.5. The datasets contain selected variables from the original census microdata plus harmonized variables from the IPUMS-International database.

VERSION DATE

2024-10-05

Scope

NOTES

Additional notes on a sample that is part of this study: France 1975

Coverage

GEOGRAPHIC UNIT
Region

UNIVERSE

Residents in France, of any nationality. Does not include French citizens living in other countries, foreign tourists, or people passing through. Reintegrated persons: Persons living in group quarters or without a fixed address but having a usual home elsewhere (i.e., enumerated away from their usual residence). During data processing, most of these people are reintegrated into their usual households, except in the case of persons in psychiatric hospitals and prisons. Legal population refers to de jure population plus population compte a part.

Sampling

SAMPLING PROCEDURE

MICRODATA SOURCE: INSEE (Institut National de la Statistique et des Etudes Economiques)

SAMPLE SIZE (person records): 2629456.

SAMPLE DESIGN: Systematic manual sorting into lots with different sample units according to target population. Lots divide the population into different samples (1/5 and 4/5). 1/20 sample is selected from 1/5 sample.

Reintegrated persons: Persons living in group quarters or without a fixed address but having a usual home elsewhere (i.e., enumerated away from their usual residence). During data processing, most of these people are reintegrated into their usual households, except in the case of persons in psychiatric hospitals and prisons. Legal population refers to de jure population plus population compte a part.

WEIGHTING

Self-weighting. Expansion factor = 20.

Data collection

Face-to-face [f2f]

DATA COLLECTION NOTES

de jure, CENSUS DAY: February 20, 1975

questionnaires

QUESTIONNAIRES

Separate forms for buildings, group quarters (collective households), group quarters (compte a part), private households,

and boats. Four forms for individuals (living in group quarters and private dwellings; two different forms for people compte a part; living in boats).

Access policy

CONFIDENTIALITY

IPUMS International distributes integrated microdata of individuals and households only by agreement of collaborating national statistical offices and under the strictest of confidence. Before data may be distributed to an individual researcher, an electronic license agreement must be signed and approved. To gain access to the data, a researcher must agree to the following: (1) Implement security measures to prevent unauthorized access to census microdata. Under IPUMS International agreements with collaborating agencies, redistribution of the data to third parties is prohibited. (2) Use the microdata for the exclusive purposes of scholarly research and education. Researchers must explicitly agree to not use microdata acquired for any commercial or income-generating venture. (3) Maintain the confidentiality of persons, households, and other entities. Any attempt to ascertain the identity of persons or households from the microdata is prohibited. Alleging that a person or household has been identified is also prohibited. (4) Report all publications based on these data to IPUMS International, which will in turn pass the information on to the relevant national statistical agencies. Once a project is approved, a password is issued and data may be acquired through the Internet. Penalties for violating the license include: revocation of the license, recall of all microdata acquired, filing of a motion of censure to the appropriate professional organizations, and civil prosecution under the relevant national or international statutes. These safeguards mirror the principles from the Joint ECE/Eurostat Work Session on Statistical Data Confidentiality. Employees of the Minnesota Population Center who work with the census microdata to produce the harmonized database also sign agreements to respect the confidentiality of the data. IPUMS International works with each country's statistical office to minimize the risk of disclosure of respondent information. The details of the confidentiality protections vary across countries, but in all cases, names and detailed geographic information are suppressed and top-codes are imposed on variables such as income that might identify specific persons. In addition, IPUMS International uses a variety of technical procedures to enhance confidentiality protection. These include the following: (1) Swapping an undisclosed fraction of records from one administrative district to another to make positive identification of individuals impossible. (2) Randomizing the placement of households within districts to disguise the order in which individuals were enumerated or the data processed. (3) Aggregating codes of sensitive characteristics (e.g., grouping together very small ethnic categories) (4) Top- and bottom-coding continuous variables to prevent identification of extreme cases. The safety record for public-use census microdata is apparently perfect. In almost four decades of use, there has not been a single verified breach of statistical confidentiality. The measures implemented by the IPUMS International are designed to extend this record.

ACCESS CONDITIONS

An adapted version of the dataset, harmonized for international comparability, is available from IPUMS International (<https://international.ipums.org/international/>) under the following conditions:

IPUMS International distributes integrated microdata of individuals and households only by agreement of collaborating national statistical offices and under the strictest of confidence. Before data may be distributed to an individual researcher, an electronic license agreement must be signed and approved. To gain access to the data, a researcher must agree to the following:

(1) Implement security measures to prevent unauthorized access to census microdata. Under IPUMS International agreements with collaborating agencies, redistribution of the data to third parties is prohibited.

(2) Use the microdata for the exclusive purposes of scholarly research and education. Researchers must explicitly agree to not use microdata acquired for any commercial or income-generating venture.

(3) Maintain the confidentiality of persons, households, and other entities. Any attempt to ascertain the identity of persons or households from the microdata is prohibited. Alleging that a person or household has been identified is also prohibited.

(4) Report all publications based on these data to IPUMS International, which will in turn pass the information on to the relevant national statistical agencies.

Once a project is approved, a password is issued and data may be acquired through the Internet. Penalties for violating the

license include: revocation of the license, recall of all microdata acquired, filing of a motion of censure to the appropriate professional organizations, and civil prosecution under the relevant national or international statutes.

These safeguards mirror the principles from the Joint ECE/Eurostat Work Session on Statistical Data Confidentiality. Employees of the Minnesota Population Center who work with the census microdata to produce the harmonized database also sign agreements to respect the confidentiality of the data.

DDI DOCUMENT VERSION

Version 7.5 October 2024. NEW FEATURES.

--Historical data from NAPP project now available from IPUMS-International.

--Historical census data from Canada, Denmark, the United Kingdom, Germany, Iceland, Norway, Sweden, and the United States for the period 1703 to 1911 are now available from IPUMS-International. The complete count and sample datasets were previously disseminated by the North Atlantic Population Project (NAPP). Where possible, the data have been integrated into existing IPUMS-International variable coding schema. Some new variables have been created that are available only for these pre-1960 datasets. NAPP data users should note that many NAPP variables are available from IPUMS-International by different names. For a complete list of NAPP variables that have been renamed in IPUMS-International, refer to the crosswalk.

--Individual country shapefiles for the third-level administrative level of geography are now available for a few IPUMS samples.

--New spatially harmonized previous-residence variables at the second administrative level of geography are available for several samples in this data release. More information is available here. Users should note that many older migration variables are available by different names. Refer to this table for a crosswalk of old and corresponding new migration variables.

--IPUMS now hosts the Census Mosaic data collection. Census Mosaic identifies, gathers, harmonizes, and distributes surviving historical census microdata from regions of Continental Europe where complete centralized records are not available. The Mosaic project was founded by a consortium of historical social scientists in Europe. Data can be downloaded as static files from the Census Mosaic website. Although the data are not yet integrated fully into IPUMS International, variables have been standardized and harmonized to be roughly compatible with IPUMS coding structures.

NEW SAMPLES.

--Full-count datasets for Great Britain 1851, 1861, 1871 (Scotland only), 1891, and 1901.

--Full-count dataset for Sweden 1910. Denmark (1845, 1880, and 1885)

--Labor force surveys from Spain and eight new labor force surveys from Italy added to the series.

Newly added countries:

Benin, Cote d'Ivoire, Finland, Guatemala, Honduras, Laos, Lesotho, Mauritius, Myanmar, Papua New Guinea, Russia, Slovak Republic, Suriname, Togo, and Zimbabwe

New samples for:

Bolivia, Cambodia, Chile, Cuba, Cote d'Ivoire, Egypt (1848 and 1868, historical samples), Fiji, Guinea, Ireland, Israel, Italy, Lao PDR, Mexico, Morocco, Nepal, Netherlands, Palestine, Peru, Philippines, Puerto Rico, Rwanda, Senegal, Sierra Leone, South Africa, Switzerland, Uganda, United States, United Kingdom, United States, Vietnam, and Zimbabwe

SUPPLEMENTAL DATA.

Data from censuses from Benin and Lesotho that record individual fertility and/or mortality events were made available in IPUMS-International. These files can be downloaded and linked to data produced by the extract system.

NEW VARIABLES.

--IPUMS-International now provides harmonized and year-specific geography variables for all countries including 13 new samples from Dominican Republic, Germany, Indonesia, Israel, Malaysia, Mongolia, Nicaragua, Nigeria, Palestine, Paraguay, Thailand, United Kingdom, and Uruguay. First-level and second-level year specific geography variables are also available for all countries. IPUMS provides corresponding, downloadable GIS boundary files for all harmonized and year specific geography variables. More information about IPUMS geography variables is available here.

--IPUMS International now provides spatially harmonized previous-residence variables at the first administrative level of geography. The codes for the spatially harmonized previous-residence variables match the spatially harmonized place of current residence. More information is available here.

--IPUMS International provides spatially harmonized previous-residence variables at the first administrative level of geography for all samples; previously available country-specific migration variables at the first administrative level that were not fully harmonized spatially have been phased out. Spatially harmonized previous-residence variables at the second administrative level of geography are available for selected samples. More information is available here. Users should note that many older migration variables are available by different names. Refer to this table for a crosswalk of old and corresponding new migration variables.

--IPUMS International now provides spatially harmonized previous-residence variables at the first administrative level of geography for all samples. Spatially harmonized previous-residence variables at the second administrative level of geography are available for several samples in this data release. More information is available here. Users should note that many older migration variables are available by different names. Refer to this table for a crosswalk of old and corresponding new migration variables.

--Lower (third) level geography codes and GIS files have been added for Bangladesh, China, Ethiopia, Mali, Rwanda, and

Zimbabwe. Some geography codes and labels might have changed for these countries to accommodate the newer lower level geography.

--Added more detailed 3-digit industry and occupation variables for China 2000.

EDITED SAMPLES.

--Revised full-count data for Great Britain 1881

--Revised full-count datasets for Sweden 1890 and 1900. The revision includes the following changes that improve comparability across Sweden datasets:

--Revisions to certain ethnicity and work variables (and the underlying source data): ORIGIN, LABFORCE, OCCHISCO, OCRELATE, OCSTATUS.

--Revisions to unharmonized source variables: SE1890A_HISCOSE, SE1890A_HISCRELSE, SE1890A_HISCSTATSE, SE1890A_OCCMULTISE, SE1900A_HISCOSE, SE1900A_HISCRELSE, SE1900A_HISCSTATSE, SE1900A_OCCMULTISE.

--A new United States 1850 full-count dataset now matches the corresponding dataset distributed by the USA IPUMS data project. The source variable US1850A_0502 (HISTID) provides a linking key to match person records to the USA version of the data. The IPUMS International version of the data contains names, which the USA version cannot distribute.

EDITED VARIABLES.

An error affecting HHWT for South Africa 2007 was corrected. The existing values were adjusted by a factor of 0.01.

AGEMARR was edited to add data for Hungary 1980 and 1990.

Harmonized and year-specific geography variables for Brazil and Colombia have been edited to accommodate for the availability of refined municipal boundaries. Users should be aware that codes and labels have changed in all harmonized and year specific geography variables for these two countries.

Errors affecting BPLSE2 (formerly BLPARSE) for Sweden 1890 and the underlying source variable were corrected. Several thousand cases were incorrectly coded as 258101000. These cases have been updated with the correct code: 258171000.

Harmonized geography variables for Italy, Philippines, Rwanda, and United States have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

The codes for the source variable RW2002A_0419 were corrected to include 0 and 8 as possible responses, which were previously identified as 'unknown years' within primary education.

Errors affecting EDUCFJ for Fiji 2006 were corrected.

A problem with PERWT for Tanzania 2012 was corrected. The previous weights were adjusted to properly reflect population totals.

MOMLOC, POPLOC, and PARRULE were updated for the United States 2010 and 2015 samples to include additional information on subfamilies. Prior to this correction, persons above age 17 were not receiving links to their co-resident mothers and fathers.

An error affecting codes for the URBAN variable in Egypt 1986 for Cairo, Alexandria, Port-Said, and Suez was corrected.

An error in INCEARN affecting Venezuela 2001 was corrected. Earned income in the source variable VE2001A_0440 is interpreted as a monthly amount, thus adjustments previously applied to convert data from daily or weekly income were suppressed.

All the six Brazil samples in IPUMS International were replaced with higher density samples.

An edited version of the Chile 2017 sample was introduced to correct an error in household breaks.

Errors affecting codes for GEO1_ZA in South Africa 2011 and ENUTS1 in United Kingdom 1991 were corrected.

Harmonized geography variables for Cambodia, Fiji, and Nepal have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year-specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

An error in PERWT affecting Nepal 2001 was corrected.

Errors affecting a code in GQ for Brazil 2010 and Indonesia 2010 were corrected. Both census samples now identify 1-person units created by splitting a large household.

An error in MARRNUM affecting Indonesia 1976 was corrected. Some codes for GEO1_EG2006 and GEO2_EG2006 were edited.

Harmonized geography variables for Bolivia, Cuba, Guinea, Ireland, Morocco, Palestine, Senegal, South Africa, and Uganda have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year-specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

An error in INCEARN affecting Brazil 1980 was corrected.

An error in EDATTAIN affecting Ireland 1971 and 1981 was corrected.

A small proportion of person records in Mexico 1960 were re-classified in MIGRATEP based on information about their current and previous residence. These were previously coded to 'different major administrative unit', even though their place of residence suggests that their last move was within the same major administrative unit.

The second-level technician (higher) degrees for Spain 1991, 2001, and 2011 were re-classified into post-secondary technical education in EDATTAIN.

An error affecting codes for SEX for Egypt 1848 and 1868 was corrected. The values for male and female had been reversed.

A problem with HHWT and PERWT for Canada 2011 was corrected. The previous weights were adjusted to properly reflect population totals.

Harmonized geography variables for Cambodia, Lao PDR, Mexico, Peru, Switzerland, Vietnam, Puerto Rico, United Kingdom, and United States have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year-specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

Harmonized geography variables for Chile and Sierra Leone have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year-specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

An error affecting codes for COMPUTER for Senegal 2013 was corrected.

An error affecting labels available in IND for Peru 1993 was corrected.

An error affecting codes for persons previously residing abroad for MIG1_5_BO in Bolivia 2001 and 2012 was corrected.

EDUCAR, EDATTAIN, and YRSCHOOL were adjusted in the Argentina samples to incorporate information on completion of education levels in the data harmonization.

HHWT and PERWT were calibrated in Kenya 1979 to properly reflect the population distribution by province.

In GQ (group quarters status), persons residing in hospitals of all types were reclassified to 'institutional group quarters' from 'other group quarters,' making their treatment consistent with GQTYPE.

Errors affecting codes for BPLBJ2 in Benin 1979, 1992, and 2002 were corrected.

Errors affecting codes for GEO2_BR1970 in Brazil 1970 were corrected.

GQ: Group quarters (collective dwelling) status

Data file: FRA1975_PHC-H-H.dat

Overview

Type: Discrete Decimal: 0 Width: 2 Range: - Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
00	Vacant
10	Households
20	Group quarters (collective), n.s.
21	Institutions
22	Other group quarters
29	1-person unit created by splitting large household
99	Unknown/group quarters not identified

description

DEFINITION

GQ identifies households as vacant dwellings, group quarters, or private households. Group quarters -- collective dwellings -- are generally institutions and other group living arrangements such as rooming houses and boarding schools.

Institutions often retain persons under formal supervision or custody, such as correctional institutions, military barracks, asylums, or nursing homes. Educational and religious group dwellings (e.g., boarding schools, convents, monasteries, etc.) are also included in the institutional classification.

Group quarter designations are often useful for understanding the universe of households that answered questions about household characteristics. Censuses will often exclude group quarters from such questions.

CONCEPT

var_concept.title	Vocabulary
Group Quarters Variables -- HOUSEHOLD	IPUMS

HHWT: Household weight**Data file: FRA1975_PHC-H-H.dat****Overview**

Type: Continuous Decimal: 2 Width: 8 Range: - Format: Numeric

description

DEFINITION

HHWT indicates the number of households in the population represented by the household in the sample.

For the samples that are truly weighted (see the comparability discussion), HHWT must be used to yield accurate household-level statistics.

NOTE: HHWT has 2 implied decimal places. That is, the last two digits of the eight-digit variable are decimal digits, but there is no actual decimal in the data.

concept

CONCEPT

var_concept.title	Vocabulary
Technical Household Variables -- HOUSEHOLD	IPUMS

Imputation and derivation

DERIVATION

HHWT is an 8-digit numeric variable with 2 implied decimal places. See the variable description.

PERSONS: Number of person records in the household**Data file: FRA1975_PHC-H-H.dat****Overview**

Type: Continuous Decimal: 0 Width: 4 Range: - Format: Numeric

description

DEFINITION

PERSONS indicates how many person records are included in the household (i.e., the number of person records associated with the household record in the sample). These person records will all have the same serial number (SERIAL) as the household record. The information contained in the household record will normally apply to all of these persons.

concept

CONCEPT

var_concept.title	Vocabulary
Technical Household Variables -- HOUSEHOLD	IPUMS

Imputation and derivation

DERIVATION

PERSONS is a 4-digit numeric variable.

RECTYPE: Record type

Data file: FRA1975_PHC-H-H.dat

Overview

Type: Continuous Decimal: 0 Width: 1 Range: - Format: character

Questions and instructions

CATEGORIES

Value	Category
H	Household
P	Person

description

DEFINITION

RECTYPE identifies the type of record for the case: household or person.

NOTE: RECTYPE is an alphabetic (character string) variable with a value of 'H' for household records and 'P' for person records. RECTYPE will not appear as a variable in the default rectangular extracts produced by the data extract system. It is only available in hierarchical extracts, to distinguish between the two record types.

description

DEFINITION

SAMPLE identifies the IPUMS sample from which the case is drawn. Each sample receives a unique 9-digit code. The code is structured as follows:

The first 3 digits are the ISO/UN codes used in COUNTRY

The next 4 digits are the year of the census/survey

The final 2 digits identify the sample within the year. For the last two digits, censuses or large census-like surveys have a value "0" (e.g, 01) in the second-to-last digit, household surveys have a value of "2" (e.g., 21), and employment surveys have a value of "4" (e.g., 41).

Technical Household Variables -- HOUSEHOLD	IPUMS

SERIAL: Household serial number**Data file:** FRA1975_PHC-H-H.dat**Overview**

Type: Continuous Decimal: 0 Width: 12 Range: - Format: Numeric

description

DEFINITION

SERIAL is an identifying number unique to each household in a given sample. All person records are assigned the same serial number as the household record that they follow. (Person records also have their own unique identifiers -- see PERNUM.) The combination of SAMPLE and SERIAL provides a unique identifier for every household in the IPUMS-International database; SAMPLE, SERIAL and PERNUM uniquely identify every person in the database.

SERIAL can be used to identify dwellings in some samples. In these samples, the first 7 digits of SERIAL provide the dwelling number common to all households that were sampled from the same structure. The last three digits give the sequence of the household within the dwelling. The following is a list of samples in which dwellings can be inferred:

Chile 1970, 1992, 2002Colombia 1993, 2005Costa Rica 1984, 2000Cuba 2002Dominican Republic 1981, 2002, 2010Ecuador 1990, 2001Germany 1971Hungary 1980, 1990, 2001Jamaica 1982, 1991, 2001Malaysia 1970, 1991, 2000Mexico 1995, 1990, 2000, 2005Nigeria 2006Panama 2000Peru 1993, 2007Portugal 1981, 1991, 2001Spain 1991Uruguay 2011Venezuela 1990, 2001Vietnam 1989In all other samples, the last 3 digits are always zeroes.

SERIAL was constructed for IPUMS-International, and has no relation to the serial number in the original datasets.

The U.S. 1900 sample and 1880 10% sample have multi-household dwellings that can be identified using the last 3 digits of SERIAL.

concept

CONCEPT

var_concept.title	Vocabulary
Technical Household Variables -- HOUSEHOLD	IPUMS

Imputation and derivation

DERIVATION

SERIAL is a 10-digit numeric variable.

The last 3 digits of SERIAL indicate household number within dwelling for selected samples noted in the variable description. In all other samples, the last 3 digits are always zeroes.

description

DEFINITION

SUBSAMP allocates each case to one of 100 subsample replicates, randomly numbered from 0 to 99. Each subsample is nationally representative and preserves any stratification of the sample from which it is drawn. Users who need a representative subset of a sample can use SUBSAMP to select their cases. For example, to randomly extract 10% of the cases from a sample, select any 10 of the 100 subsamples.

AREAMOLLWGEO1: Area of GEOLEV1 unit in square kilometers

Data file: FRA1975_PHC-H-H.dat

Overview

Type: Continuous Decimal: 0 Width: 10 Range: - Format: Numeric

description

DEFINITION

AREAMOLLWGEO1 indicates the area in square kilometers of the major administrative unit in which the household was enumerated. The major administrative unit of the household is identified by the GEOLEV1 variable.

The area of units in GEOLEV1 is calculated using Mollweide's equal area projection. For a full set of geography variables refer to IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1 and GEOLEV2. More information on IPUMS-International geography can be found here.

description

DEFINITION

ENUTS1 identifies the Nomenclature of Territorial Units for Statistics (NUTS) within Europe in which the household was enumerated. NUTS1 is the first level territorial units within countries. NUTS is a standard administrative division of the European Union, and was developed by the EU. The European Free Trade Association extends the NUTS system to several additional countries outside of the EU, and they are also incorporated into this variable.

ENUTS1 corresponds to the 2010 version of NUTS1 released by Eurostat. IPUMS has added ENUTS1_2013 for the more recent samples. ENUTS1_2013 is an amendment to the annexes to the ENUTS1 classification.

The last 2-digits of the ENUTS1 variable provide the NUTS1 code. The labels include the standard code for the NUTS1 system and the name of the NUTS1 region, separated by a slash.

Smaller sub-national units are available for most countries in ENUTS2 and ENUTS3. The full set of geography variables for the countries can be found in the IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1, and GEOLEV2. More information on IPUMS-International geography can be found [here](#).

description

DEFINITION

ENUTS2 identifies the Nomenclature of Territorial Units for Statistics (NUTS) within Europe in which the household was enumerated. NUTS2 is the second level territorial units within countries. NUTS is a standard administrative division of the European Union, and was developed by the EU. The European Free Trade Association extends the NUTS system to several additional countries outside of the EU, and they are also incorporated into this variable.

ENUTS2 corresponds to the 2010 version of NUTS2 released by Eurostat.

The code labels include the standard code for the NUTS2 system and the name of the NUTS2 region, separated by a slash.

The full set of geography variables for the countries can be found in the IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1, and GEOLEV2. More information on IPUMS-International geography can be found here.

description

DEFINITION

GEO1_FR identifies the household's region within France in all sample years. Regions are the first level administrative units of the country. GEO1_FR is spatially harmonized to account for political boundary changes across census years. Some detail is lost in harmonization; see the comparability discussion. A GIS map (in shapefile format), corresponding to GEO1_FR can be downloaded from the GIS Boundary files page in the IPUMS International web site.

The full set of geography variables for France can be found in the IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1, and GEOLEV2. More information on IPUMS-International geography can be found here.

description

DEFINITION

GEO1_FR1975 identifies the household's region within France in 1975. Regions are the first level administrative units of the country. A GIS map (in shapefile format), corresponding to GEO1_FR1975 can be downloaded from the GIS Boundary files page in the IPUMS International web site.

The full set of geography variables for France can be found in the IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level of any country refer to GEOLEV1, and GEOLEV2. More information on IPUMS-International geography can be found here.

GEOLEV1: 1st subnational geographic level, world [consistent boundaries over time]

Data file: FRA1975_PHC-H-H.dat

Overview

Type: Continuous Decimal: 0 Width: 6 Range: - Format: Numeric

description

DEFINITION

GEOLEV1 indicates the major administrative unit in which the household was enumerated. The variable incorporates the geographies for every country, to enable cross-national geographic analysis over time. First administrative units in GEOLEV1 have been spatiotemporally harmonized to provide spatially consistent boundaries across samples in each country.

concept

CONCEPT

var_concept.title	Vocabulary
Geography: Global Variables -- HOUSEHOLD	IPUMS

Imputation and derivation

DERIVATION

GEOLEV1 is a 6-digit numeric variable.

GEOLEV1 codes and labels can be found here.

Codes, labels, frequencies, and information about boundary changes for each country can be found in the country specific harmonized variable e.g. GEO1_BR.

OWNERSHIP: Ownership of dwelling [general version]

Data file: FRA1975_PHC-H-H.dat

0	NIU (not in universe)
1	Owned
2	Not owned
9	Unknown

description

DEFINITION

OWNERSHIP indicates whether a member of the household owned the housing unit. Households that acquired their unit with a mortgage or other lending arrangement were understood to "own" their unit even if they had not yet completed repayment. For those that did not own their housing unit, several options were possible: renting (from various types of owners), subletting, usufruct, and de facto occupation.

POPDENSGEO1: Population density of GEOLEV1 unit, in persons per square kilometer

Data file: FRA1975_PHC-H-H.dat

Overview

Type: Continuous Decimal: 0 Width: 8 Range: - Format: Numeric

description

DEFINITION

POPDENSGEO1 indicates the population density in persons per square kilometer of the major administrative unit in which the household was enumerated. The major administrative unit of the household is identified by the GEOLEV1 variable.

The area of units in GEOLEV1 is calculated using Mollweide's equal area projection. For a full set of geography variables refer to IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1 and GEOLEV2. More information on IPUMS-International geography can be found [here](#).

08	Non-family household
09	Unclassified subfamily
10	Other relative or non-relative household
11	Group quarters
99	Unclassifiable

description

DEFINITION

HHTYPE is a constructed variable that describes the composition of households.

HHTYPE is constructed from information in RELATE (relationship to head), from the constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father), and from information on group quarters status, GQ.

2	2 families

3	3 families
4	4 families
5	5 families
6	6 families
7	7 families
8	8 families
9	9 or more families

description

DEFINITION

NFAMS is a constructed variable that indicates the number of families within each household. Family membership is defined by FAMUNIT. A "family" is any group of persons related by blood, adoption, or marriage. An unrelated individual within the household is considered a separate family. Thus, a household consisting of a widow and a domestic employee contains two families; a household consisting of a large, multi-generation extended family with no persons unrelated to the head counts as a single family.

NFAMS is constructed from information in RELATE (relationship to head) and from the constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father). See those variable descriptions for more detail.

FR1975A_BLDGTYP: Type of building

Data file: FRA1975_PHC-H-H.dat

Overview

Type: Discrete Decimal: 0 Width: 1 Range: - Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
0	Collective dwellings, mobile homes, marines, non-reintegrable persons, persons who do not belong to a dwelling
1	Farm, agricultural buildings
2	Makeshift home (train car, shantytown home, building in ruins, etc.)
3	Temporary structure used for living
4	Hotel, boarding home, furnished apartment (occupying all or part of the building)
5	Private house or residential building totally or mainly used for living
6	Building mainly for industrial, commercial, administrative or public use

INTERVIEWER INSTRUCTIONS

<sva a="all" v="FR75A007">3.3.1. Question 1: Type of building.
You will check one and only one of the six boxes.
Type 1: farm, agricultural buildings. You will classify the buildings used for a farm in this section.
Type 2: Make- shift dwellings: This type of dwelling consists of shelters not meant to be used for housing or totally unfit to be lived in but nevertheless are used as abodes. This includes wagons or other immobilized vehicles, immobilized boats impossible to navigate (1), blockhouses, fortifications, shanty town shacks, houses falling into ruin, etc.
Do not count these places unless they are lived in. In the same way, only count the dwellings within them which are occupied.
Warning: The buildings built as dwellings but which have become more or less unfit to live in as a normal abode, either through dilapidation or insufficient maintenance, must be classified in sections 5 and 6 as long as they have not fallen into ruin, even if their facility installations do no longer hold up to the modern norms for building facilities.
Type 3: Temporary structure. This means structures destined for habitation but having a temporary nature: shacks constructed from devastated dwellings, workers on a temporary building site, etc.
[Footnote] (1) Barges and tug boats of inland navigation will be counted by agents of navigable waters. You should only count boats which are no longer licensed.
[p.32]
Type 4: Only enter in this category buildings for which the whole thing or the largest part of it is reserved for this use. A private house where the rooms are rented out occasionally to people on vacation during holiday times should be classified in 5.
Type 5 and 6: The buildings which do not fit into types 1 to 4 will be classified in 5 or 6 provided that they are mainly used as abodes or, on the other hand, mainly used for industrial, commercial, administrative use.
Usually, the houses consisting at the same time of a single dwelling and a single professional location (store, shop, artisan's workshop) will be classified in category of type 6.
N.B. For buildings of types 2 or 6, don't omit to specify the kind of structure in as much detail as possible.
If you are worried by a special case, describe it at the end of question and you might want to point it out to the delegate.</sva>

4	Temporary structure used for living
5	Makeshift home

INTERVIEWER INSTRUCTIONS

<sva a="all" v="FR75A026">4.2.1 Category 1 - regular dwelling (see 4.2.6 below)
[p.39]
4.2.2 Category 2 - Independent rooms rented, sublet, or leased to certain people
Some dwelling sometimes have an independent annex, that is to say which has access to the outside, either directly, or by the intermediary of shared parts of the building, without it being necessary to go through places occupied by other people. This is the case, for example, for dwellings having a maid's room situated on another floor (frequently the case in the Parisian neighborhoods).
If the owner of the main dwelling has such an annex for himself (in order to shelter a member of his family, a maid, etc) or if the independent room is unoccupied at the time of the census, it is not necessary to establish a distinct form number 1 for the room.
If, on the other hand, the annex is rented, sublet or leased to particular people, you should establish a distinct number one form for it by checking box 2 of the category of dwelling and by adding the name of the owner of the main dwelling . (This information will possibly permit considering the main dwelling and its annex as a single unit, in some uses of the census.
The rooms classified in category 2 should always join up to a main dwelling.
4.2.3 Category 3 - Furnished rooms in a hotel, a boarding house, a furnished room, etc.
Some clients of these establishments reside there for most of the year (for example, students residing for the whole school year in a hotel room); some have no other residence (for example, young married couples not having found a place to live elsewhere).
In such a case, you will establish dwelling form for each bedroom (or possibly apartments) occupied by a household or a person living alone.
You will check box 3 of the category of dwelling and, in question 4 on page 4 of the dwelling form, it's box 5 which should be checked.
For people passing through in hotels, Refer to 6.3.1. C2.
[p.40]
Note: Dwelling category 3 should be used only for bedrooms or furnished apartments of hotels, youth hostels, boarding houses, furnished rooms (building type 4 on question 1 of the house form).
It should certainly not be used either for students living in university dorms or homes, or for workers residing in hostels (see 6.2 page 60).
4.2.4 Category 4 - Temporary structure used as a habitation
This category will naturally be used for all main residences of a type 3 building (question 1 of the house form) Exceptionally, you will be about to use it for a type 1 type 5, or type 6 building, of which one part alone would be a temporary structure. If you encounter such a case describe it on the bottom of the section on page one in as much detail as possible.
4.2.5 Category 5 - Make- shift dwelling
This category will naturally be used for all abodes of type 2 (question 1 of the house form).
You will classify as well in category 5 an impromptu shelter in an place unfit for habitation, situated inside of an ordinary building (cellar, attic, shop, barn, workshop, etc.) Specify the characteristics of the place in as much detail as possible.
Note: The preceding explanations show the close relationship which exists between question 1 of page 4 of the house form and page one of the dwelling form.
4.2.6 Category 1 - Regular dwelling
This category is

comprised of all the dwellings with the exception of special cases listed in categories 2 to 5, provided that they are occupied as the main residence.

4.2.7 Category 7 - Secondary residence This category will consist of regular dwellings used as secondary residences: country houses, villas and vacation dwellings, etc. You will classify here as well the dwellings or furnished apartments, rented or to be rented during tourist seasons in the seaside and health resorts, winter sports resorts, etc.

Important note: A dwelling used as a secondary residence should obviously be the subject of a housing form. On the other hand, there does not have to be an individual form of the people who may occupy it at the time of the census: Indeed, these people already appear in List A of the housing form established at the place of their main residence, that is to say there where they living usually (see 4.4. page 47). The only exception is when these people would be absent from their regular residence during the whole operation of the census and where no one will be able to fill out their forms in their place. In this case, you will consider them as people passing through and you will classify the individual forms collected in that capacity in folder number 20, while checking that there is no one written down in list A of the housing form established for this secondary residence (see 4.4.2).

4.2.8 Category 6 - Vacant dwelling This category consists of vacant regular dwellings, meaning not occupied either as a main residence or as a secondary residence. Usually, such a dwelling is available for sale or for rent ; but it also can be neither. For example, you will check box 6 for a brand new dwelling, already attributed, but not yet occupied by its renter or its owner. In such a case, you will not establish any individual forms for the future occupants.

Note: For secondary residences and vacant residences: No person should be written down in Lists A and B - No individual form should be filed in the housing form

4.2.9 Category 8 - Trailer, Gypsy wagon, mobile home You should count this category on a set date, that is to say during the day on February 20, 1975, in order to avoid omissions or successive interrogations by several census agents (see 6.3 page 61).

INTERVIEWER INSTRUCTIONS

<sva a="all" v="FR75A017">3.3.8 Question 10: Farms
You will define a farm as any group of cultivated earth with the purpose of agricultural production (with the exception of woods, moors, building land, parks and flower gardens) having:
[p.35]
- at least one hectare of land if this is about mixed farming (workable lands, prairies, crops),
- or at least 20 acres if this is about specialized crops (marketable crops, fruit trees, flowers, vines, etc.)
and that no matter what the main activity of the person who farms it.
Virtually a building (or a group of buildings) of type 1 building (farm, agricultural buildings) is always the center of agricultural production (answer "yes" to question 10) if the farmer resides in this building (or this group of buildings).

9	NIU (not in universe)

INTERVIEWER INSTRUCTIONS

<sva a="all" v="FR75A019">3.3.3. Question 3: Year the construction was finished.
This information is very important.
You will be obtain it by questioning the owner, the concierge, the people who have lived in the house for a long time, the neighborhood or the community. Some buildings bear the year of completion engraved on the side.
For the four first sections, it often suffices to know the date of completion within a certain number of years in order to answer without it being considered an error. In the absence of direct information, you will sometimes be able to classify buildings by comparing them to others, typical with some time periods. City hall might be able to tell you if, in your district, there some important apartment building complexes constructed in well- determined time periods.

3	Kitchen of more than 12 square meters
5	No kitchen but appliances for cooking
6	No kitchen and no appliances for cooking
9	NIU (not in universe)

INTERVIEWER INSTRUCTIONS

<sva a="all" v="FR75A027 FR75A038">4.3.1 Questions 1 to 3.
Taking a census of the rooms
- The same room should never be counted at the same time in response to question 1, in the answer to question 2 and in the answer to question 3. It should be counted only:
- in question 1 if it is considered a kitchen (answer YES to question 1);
- in question 2 if it is considered as a room exclusively for professional use ;
- in question 3 if it is considered as a room in a dwelling.
Separated rooms
In some dwellings, there is no separation (or there is a removable partition) between the two "rooms", for example the dining room and the living room. In such a case, you will count:
- two rooms if there is a partition
- one room if there is no partition
[p.43]
Dwelling not consisting of one single room
It in the country, you may often encounter some regular dwellings (dwelling category 1) made up of one single room serving as a shared room, with some kitchen facilities (sink, stove, etc.). In the city, it is frequent to find some places (furnished bedrooms, for example) made up of a single room (dwelling category 2 or 3).
In all these cases, you will answer 1 for question 3 (number of rooms in the dwelling) and you will check box No (no kitchen) for question 1 ("Do you have a kitchen?").
In the case of the furnished bedroom where someone has installed a simple portable stove and where there is no sink, you will complete the answer to question 1 by checking the numbered box 6 (No) and not box numbered 5.
According to the rules above, for all dwellings consisting of at least one room for living:
You should never have a blank response to question 3.

INTERVIEWER INSTRUCTIONS

<sva a="all" v="FR75A028">4.3.2. Question 4: Occupational status.
Question 4 should receive one single answer among the five answer choices proposed.
Box 1:
Are in this case:
- the owners of a private house living there;
- the owners of the whole residential building of in which they live in one of the apartments;
- people who live in a dwelling in which they are co- owner or member in partial ownership of a building in a business. (1);
- The beneficiaries of a succession who live in a property in joint ownership.
Among the owners you must include the people who had the building constructed on advanced credit by a construction company, whether the payment has been completed or not.
[Footnote] (1) In the case of a building belonging to a business, the actions give right to the life interest of a dwelling.
[p.44]
Box 2: They are only to include in this category people who work and who are sheltered there by their employer, for free or through payments, and for which the dwelling is a requisite of the work contract linking the employer and the employee (that is to say that, if the person changes employer, he must leave his dwelling). Examples: teacher having professional accommodations, stationmaster, concierge or caretaker of a factory living within factory property, etc.
These especially are to be excluded and classified in box 4:
- people, for example, retirees, having kept their former professional accommodation.
- renters of a dwelling belonging to their employer, but for which the dwelling is not mentioned in the work contract and which could be, as a consequence, kept when changing employer.
Box 4: You will check box 4 for all the renters or persons who sublet an empty rented place, with the exception of those who are sheltered by their employer (box 2).

INTERVIEWER INSTRUCTIONS

<sva a="all" v="FR75A027 FR75A038">4.3.1 Questions 1 to 3.
Taking a census of the rooms
- The same room should never be counted at the same time in response to question 1, in the answer to question 2 and in the answer to question 3. It should be counted only:
- in question 1 if it is considered a kitchen (answer YES to question 1);
- in question 2 if it is considered as a room exclusively for professional use ;
- in question 3 if it is considered as a room in a dwelling.
Separated rooms
In some dwellings, there is no separation (or there is a removable partition) between the two "rooms", for example the dining room and the living room. In such a case, you will count:
- two rooms

if there is a partition
- one room if there is no partition
[p.43]
Dwelling not consisting of one single room
It in the country, you may often encounter some regular dwellings (dwelling category 1) made up of one single room serving as a shared room, with some kitchen facilities (sink, stove, etc.). In the city, it is frequent to find some places (furnished bedrooms, for example) made up of a single room (dwelling category 2 or 3).
In all these cases, you will answer 1 for question 3 (number of rooms in the dwelling) and you will check box No (no kitchen) for question 1 ("Do you have a kitchen?").
In the case of the furnished bedroom where someone has installed a simple portable stove and where there is no sink, you will complete the answer to question 1 by checking the numbered box 6 (No) and not box numbered 5.
According to the rules above, for all dwellings consisting of at least one room for living:
You should never have a blank response to question 3.

MOMLOC: Mother's location in household**Data file:** FRA1975_PHC-P-H.dat**Overview**

Type: Continuous Decimal: 0 Width: 3 Range: - Format: Numeric

description

DEFINITION

MOMLOC is a constructed variable that indicates whether or not the person's mother lived in the same household and, if so, gives the person number of the mother (see PERNUM). MOMLOC makes it easy for researchers to link the characteristics of children and their (probable) mothers.

The method by which probable child-mother links are identified is described in PARRULE.

The general design of MOMLOC and other constructed variables follows the methods developed for IPUMS-USA "Family Interrelationships," but the details vary significantly. For more details on the construction of MOMLOC, see the Comparability section of PARRULE and this paper on IPUMSI family linking methodology.

Note: MOMLOC identifies social relationships (such as stepmother and adopted mother) as well as biological relationships. The variable STEPMOM is designed to identify some of these social relationships. To restrict MOMLOC to biological mothers, such as for own children fertility estimation, MOMLOC should be reset to zero when STEPMOM is greater than zero.

concept

41	Other Relatives, within empirical child cap
42	Other Relatives, within constructed child cap
51	Non-Relatives, within empirical child cap
52	Non-Relatives, within constructed child cap

description

DEFINITION

PARRULE describes the criteria by which the IPUMS International variables MOMLOC and POPLOC linked the person to a probable mother and/or father.

IPUMS International establishes child-parent links according to five basic rules, and PARRULE gives the number of the rule that applied to the link in question. A link to any parent automatically generates a second link to that parent's spouse or partner, so only one rule is needed to describe both MOMLOC and POPLOC.

The design of the interrelationship variables is described in this paper on IPUMSI family linking methodology.

Constructed Family Interrelationship Variables -- PERSON	IPUMS

PERNUM: Person number

Data file: FRA1975_PHC-P-H.dat

Overview

Type: Continuous Decimal: 0 Width: 4 Range: - Format: Numeric

description

DEFINITION

PERNUM numbers all persons within each household consecutively (starting with "1" for the first person record of each household). When combined with SAMPLE and SERIAL, PERNUM uniquely identifies each person in the IPUMS-International database.

concept

CONCEPT

var_concept.title	Vocabulary
Technical Person Variables -- PERSON	IPUMS

Imputation and derivation

DERIVATION

PERNUM is a 4-digit numeric variable.

PERWT: Person weight

Data file: FRA1975_PHC-P-H.dat

Overview

Type: Continuous Decimal: 2 Width: 8 Range: - Format: Numeric

description

DEFINITION

PERWT indicates the number of persons in the actual population represented by the person in the sample.

For the samples that are truly weighted (see the comparability discussion), PERWT must be used to yield accurate statistics for the population.

NOTE: PERWT has 2 implied decimal places. That is, the last two digits of the eight-digit variable are decimal digits, but there is no actual decimal in the data.

concept

CONCEPT

var_concept.title	Vocabulary
Technical Person Variables -- PERSON	IPUMS

04	Rule 4: weak relationship pairing, couple not adjacent
05	Rule 5: weak consensual union pairings
06	Rule 6: sample-specific rules (usually child-to-child)

description

DEFINITION

SPRULE explains the criteria by which the IPUMS-International variable SPLOC linked the person to his/her probable spouse.

IPUMS International establishes spouse-spouse links according to five basic rules, and SPRULE gives the number of the rule that applied to the link in question. A sixth rule identifies sample-specific linking procedures only imposed in selected instances.

The design of the interrelationship variables is described in this paper on IPUMSI family linking methodology.

STEPMOM: Probable stepmother

Data file: FRA1975_PHC-P-H.dat

Overview

Type: Discrete Decimal: 0 Width: 1 Range: - Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
0	Biological mother or no mother present
1	Mother has no children born or surviving
2	Child reports mother is deceased
3	Explicitly identified step relationship
4	Mother reports no children in the home
5	Age difference implausible
6	Child exceeds known fertility of mother

description

DEFINITION

STEPMOM indicates whether a person's mother, as identified by MOMLOC, was most probably not the person's biological mother. Non-zero values of STEPMOM explain why it is probable that the person's mother was a step- or adopted mother. A value of 0 indicates no likely stepmother because (1) the mother identified in MOMLOC was probably the biological mother or (2) there is no mother of this person present in the household.

The codes for STEPMOM are as follows:

- 0 = Biological mother or no mother of this person present in household.
- 1 = Mother has no children born or surviving.
- 2 = Child reports mother is deceased.
- 3 = Explicitly identified relationship (stepchild, adopted child, child of unmarried partner, stepchild/child-in-law).
- 4 = Mother reports no children in the home.
- 5 = Age difference between mother and child was less than 12 or greater than 54 years.
- 6 = Child exceeds known fertility of mother.

In cases where more than one criterion for a likely stepmother is met, STEPMOM will take the value of the criterion with the lowest code. See PARRULE for a description of the linking process.

Users should note that there are many stepmothers and adopted mothers in the population that cannot be identified with information available in the censuses. Therefore, STEPMOM will always under-represent their actual number in the population.

STEPPOP: Probable stepfather

Data file: FRA1975_PHC-P-H.dat

Overview

Type: Discrete Decimal: 0 Width: 1 Range: - Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
0	Biological father or no father present
1	Child reports father is deceased
2	Explicitly identified step relationship
3	Age difference implausible
4	Spouse of mother
5	Identified as adopted
6	Surname difference -- male child or never-married female

description

DEFINITION

STEPPOP indicates whether a person's father, as identified by POPLOC, was most probably not the person's biological father. Non-zero values of STEPPPOP explain why it is probable that the person's father was a step- or adopted father. A value of 0 indicates no likely stepfather because (1) the father identified in POPLOC was probably the biological father or (2) there is no father of this person present in the household.

The codes for STEPPPOP are as follows:

- 0 = Biological father or no father of this person present in household.
- 1 = Child reports father is deceased.
- 2 = Explicitly identified relationship (stepchild, adopted child, child of unmarried partner; stepchild/child-in-law).
- 3 = Age difference between father and child was less than 12 or greater than 54 years.

In cases where more than one criterion for a likely stepfather is met, STEPPPOP will take the value of the criterion with the lowest code. See PARRULE for a description of the linking process.

Users should note that there are many stepfathers and adopted fathers in the population that cannot be identified with information available in the censuses. Therefore, STEPPPOP will always under-represent their actual number in the population.

description

DEFINITION

FAMSIZE counts the number of the person's own family members living in the household with her/him, including the person her/himself. These include all persons related to the person by blood, adoption, or marriage as indicated by the census forms or inferred from them.

FAMSIZE is calculated from the units identified in the IPUMS constructed variable FAMUNIT (family unit membership). The primary family is defined as all persons related to the head in the RELATE variable. Secondary families are individuals or groups of persons linked together by the IPUMS constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father).

concept

CONCEPT

var_concept.title	Vocabulary
Constructed Family Interrelationship Variables -- PERSON	IPUMS

FAMUNIT: Family unit membership**Data file:** FRA1975_PHC-P-H.dat**Overview**

Type: Continuous Decimal: 0 Width: 4 Range: - Format: Numeric

description

DEFINITION

FAMUNIT is a constructed variable indicating to which family within the household a person belongs.

All persons related to the household head receive a 1 (see RELATE). Each secondary family or secondary individual receives a higher code. For purposes of FAMUNIT, secondary families are individuals or groups of persons linked together by the IPUMS constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father).

concept

CONCEPT

var_concept.title	Vocabulary
Constructed Family Interrelationship Variables -- PERSON	IPUMS

Imputation and derivation

DERIVATION

FAMUNIT is a 4-digit numeric variable.

CodesIf there is only one group of related individuals within the household, all of them will be coded "1;" if there is a second, separate such group listed on the form, all of them will be coded "2," and so on.

POLY2ND: Woman is second or higher order wife

Data file: FRA1975_PHC-P-H.dat

Overview

Type: Discrete Decimal: 0 Width: 1 Range: - Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
0	Person is not the 2nd or higher order wife linked via SPLOC
1	Person is the 2nd or higher order wife linked via SPLOC

description

DEFINITION

POLY2ND indicates if a woman was the second or higher order wife linked to a husband in the constructed IPUMS variable SPLOC -- Spouse's Location in Household. The variable does not suggest the actual marital order of wives, only their relative positions in the person order of the household as it was enumerated.

The point of POLY2ND is to facilitate using SPLOC in samples that identify polygamy. Some statistical matching procedures expect to find only one matching record for each subject record.

0	NIU (not in universe)
1	Never married
2	Married
3	Widowed and not remarried
4	Divorced/separated and not remarried
5	Widowed or divorced
9	Unknown / missing

description

DEFINITION

EMARST describes for the European samples the person's current marital status according to law or custom. Individuals who remarried should report the status relevant to their most recent marriage. European census instructions generally limit marital status to legal unions, but there are exceptions.

EMARST has been classified according to the recommendations given by the Conference of European Statisticians for the 2010 Population and Housing Censuses.

MARST: Marital status [general version]

Data file: FRA1975_PHC-P-H.dat

Overview

Type: Discrete Decimal: 0 Width: 1 Range: - Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
0	NIU (not in universe)
1	Single/never married

2	Married/in union
3	Separated/divorced/spouse absent
4	Widowed
9	Unknown/missing

description

DEFINITION

MARST describes the person's current marital status according to law or custom. Individuals who remarried should report the status relevant to their most recent marriage. Census instructions rarely explicitly limit marital status to strictly legal unions.

Note regarding universe: The lowest age at which a person can be anything but "never married" varies among samples.

description

DEFINITION

EBPLNT1 indicates the NUTS1 region in which the person was born. The Nomenclature of Territorial Units for Statistics (NUTS) is a standard administrative division of the European Union, and was developed by the EU. The European Free Trade Association extends the NUTS system to several additional countries outside of the EU, and they are also incorporated into this variable. NUTS1 identifies the largest territorial units within countries.

EBPLNT1 only identifies regions within the person's country of residence; it does not identify birthplaces of international migrants.

The code labels include the standard code for the NUTS1 system and the name of the NUTS1 region, separated by a slash.

description

DEFINITION

EBPLNT2 indicates the NUTS2 region of Europe in which the person was born. The Nomenclature of Territorial Units for Statistics (NUTS) is a standard administrative division of the European Union, and was developed by the EU. NUTS2 identifies intermediate territorial units: the second level within countries.

EBPLNT2 only identifies regions within the person's country of residence; it does not identify birthplaces of international migrants.

The code labels include the standard code for the NUTS2 system and the name of the NUTS2 region, separated by a slash.

2	Primary completed
3	Secondary completed
4	University completed
9	Unknown

description

DEFINITION

EDATTAIN records the person's educational attainment in terms of the level of schooling completed (degree or other milestone). The emphasis on level completed is critical: a person attending the final year of secondary education receives the code for having completed lower secondary only -- and in some samples only primary.

EDATTAIN does not necessarily reflect any particular country's definition of the various levels of schooling in terms of terminology or the number of years of schooling. EDATTAIN is an attempt to merge -- into a single, roughly comparable variable -- samples that provide degrees, ones that provide actual years of schooling, and those that have some of both. In addition to EDATTAIN, a country-specific education classification is provided which loses no information and reflects the particular educational system of that country (for example EDUCBR for Brazil, EDUCCL for Chile, and EDUCUS for the United States). As always, users can refer to the original education source variables for each sample, if they wish.

Many samples also give single years of schooling completed, recorded in YRSCHOOL. Some samples provide educational information in a form that could not be incorporated into EDATTAIN.

99	Unknown/missing

description

DEFINITION

EEDATTAIN records the person's educational attainment in terms of the level of schooling completed (degree or other milestone) for the European samples. The emphasis on level completed is critical: a person attending the final year of secondary education receives the code for having completed lower secondary only -- and in some samples only primary. All education that was relevant to the completion of a level should be taken into account even if it was provided outside of schools and universities.

EEDATTAIN does not necessarily reflect any particular country's definition of the various levels of schooling in terms of terminology or the number of years of schooling. EEDATTAIN is an attempt to merge -- into a single, roughly comparable variable -- samples that provide degrees, ones that provide actual years of schooling, and those that have some of both. In addition to EEDATTAIN, a country-specific education classification is provided which loses no information and reflects the particular educational system of that country.

Hungary 1980 and 1990 also give single years of schooling completed, recorded in YRSCHOOL.

EEDATTAIN has been classified according to the recommendations of the Conference of European Statisticians for the 2010 Population and Housing Censuses. EEDATTAIN presents a less detailed version of EDATTAIN for the European Samples.

EMPSTAT: Activity status (employment status) [general version]

Data file: FRA1975_PHC-P-H.dat

Overview

Type: Discrete Decimal: 0 Width: 1 Range: - Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
0	NIU (not in universe)
1	Employed
2	Unemployed

3	Inactive
9	Unknown/missing

description

DEFINITION

EMPSTAT indicates whether or not the respondent was part of the labor force -- working or seeking work -- over a specified period of time. Depending on the sample, EMPSTAT can also convey further information.

The first digit of EMPSTAT is fully comparable, and classifies the population into three groups: employed, unemployed, and inactive. The combination of employed and unemployed yields the total labor force. The second and third digits of EMPSTAT preserve additional information available for some countries and census years but not for others.

Employment status is sometimes referred to in other sources as "activity status".

Type: Discrete Decimal: 0 Width: 1 Range: - Format: Numeric

Questions and instructions

CATEGORIES

Value	Category
0	NIU (not in universe)
1	Self-employed
2	Wage/salary worker
3	Unpaid worker
4	Other
9	Unknown/missing

description

DEFINITION

CLASSWK refers to the status of an economically active person with respect to his or her employment -- that is, the type of explicit or implicit contract of employment with other persons or organizations that the person has in his/her job. In general,

the variable indicates whether a person was self-employed, or worked for someone else, either for pay or as an unpaid family worker. CLASSWK is related to EMPSTAT, which is used to define the universe in many samples.

Class of worker is often referred to as "status in employment" in other sources.

description

DEFINITION

CLASSWK refers to the status of an economically active person with respect to his or her employment -- that is, the type of explicit or implicit contract of employment with other persons or organizations that the person has in his/her job. In general, the variable indicates whether a person was self-employed, or worked for someone else, either for pay or as an unpaid family worker. CLASSWK is related to EMPSTAT, which is used to define the universe in many samples.

Class of worker is often referred to as "status in employment" in other sources.

description

DEFINITION

ECLASSWK refers in European Samples to the status of an economically active person with respect to his or her employment -- that is, the type of explicit or implicit contract of employment with other persons or organizations that the person has in his/her job. In general, the variable indicates whether a person was self-employed, or worked for someone else, either for pay or as an unpaid family worker.

ECLASSWK is related to EEMPSTAT (employment status), which is used to define the universe for the variable in many samples.

ECLASSWK has been classified according to the recommendations given by the Conference of European Statisticians for the 2010 Population and Housing Censuses. "Class of worker" is referred to as "Status in Employment" in the CES recommendations. The former term is used to maintain concordance with IPUMS practice.

description

DEFINITION

EEMPSTAT indicates for the European samples whether or not the respondent was part of the labor force -- working or seeking work -- over a specified period of time. Depending on the sample, EEMPSTAT can also convey further information.

EEMPSTAT has been classified according to the recommendations given by the Conference of European Statisticians for the 2010 Population and Housing Censuses. "Employment Status" is referred to as "Activity Status" in the CES recommendations, but the former term is used to maintain consistency with IPUMS practices.

The economically active population constitutes the total labor force: employed and unemployed persons.

description

DEFINITION

INDGEN recodes the industrial classifications of the various samples into twelve groups that can be fairly consistently identified across all available samples. The groupings roughly conform to the International Standard Industrial Classification (ISIC). The third digit of INDGEN retains important detail among the service industries that could not be consistently distinguished in all samples.

"Industry" refers to the activity or product of the establishment or sector in which a person worked.

Questions and instructions

CATEGORIES

Value	Category
1	No, not in the labor force
2	Yes, in the labor force
8	Unknown
9	NIU (not in universe)

description

DEFINITION

LABFORCE is a dichotomous variable identifying whether a person participated in the labor force. Labor force participation generally means working or seeking work within a specified reference period.

For most samples LABFORCE is a recode of EMPSTAT (employment status). A consistent lower age universe of 15 or older has been applied to increase comparability across samples. Full detail is retained in EMPSTAT, which should be used for any study of child labor.

Work Variables -- PERSON	IPUMS

OCC: Occupation, unrecoded

Data file: FRA1975_PHC-P-H.dat

Overview

Type: Continuous Decimal: 0 Width: 4 Range: - Format: Numeric

description

DEFINITION

OCC records the person's primary occupation, classified according to the system used by the respective national census office at the time. For someone with more than one job, the primary occupation is usually the one in which the person spent the most time or earned the most money, although this may not have been explicit in the instructions for a specific census.

To ensure confidentiality, very small occupations are recoded to a residual category indicating the persons had an occupation, but the job title is not identified. The number of cases recoded should be too small to affect analyses.

description

DEFINITION

OCCISCO records the person's primary occupation, coded according to the major categories in the International Standard Classification of Occupations (ISCO) scheme for 1988. For someone with more than one job, the primary occupation is

typically the one in which the person had spent the most time or earned the most money.

description

DEFINITION

GEOMIG1_P indicates the major administrative unit in which the person previously resided prior to the survey. Only intra-national migrations are recorded; however, the variable incorporates geographies for every country that lists place of previous residence, to enable comparative analysis of subnational migration. Foreign migrants are coded 097 or 997. Codes for GEOMIG1_1 match the geographic codes in GEOLEV1 (current place of residence).

For similar information for different time intervals since migration, see variables GEOMIG1_1, GEOMIG1_5, and GEOMIG1_10. More on migration and geography can be found [here](#).

description

DEFINITION

MIG1_P_FR indicates the person's region of residence on January 1 in the year of the previous census. For children not born by January 1 of the year of the last census, their region of birth is given.

Click on the Source Variables tab for information on place of residence for each sample year. Source variables may contain more geographic unit detail but are not suitable for cross-temporal comparison.

<sva v="FR75A405 FR75A406 FR75A408 FR75A409 FR75A410 FR75A412 FR75A418 FR75A419 FR75A422 FR75A425 FR75A426 FR75A427 FR75A428 FR75A432 FR75A433 FR75A435 FR75A438 FR75A439 FR75A440 FR75A441">[Questions 8 - 18 are for persons age 16 or older]</sva></p>

<p><sva a="all" v="FR75A418 FR75A440">Question 12: People working to help another person in their profession without being paid.
It sometimes happens that some people - especially women - work by helping another person in his profession, without receiving a salary for it. These people will answer "yes" to question 12, even if they only work part time in these situations.
For example, this question effects the wife of a farmer who participates in the work of the farm, the wife or daughter of a merchant who spends several hours per day in the shop to ensure the sales or to operate the cash register.
These people should indicate the profession which they practice on question 11.</sva></p>

<p><sva a="FR75A441" v="FR75A418 FR75A419 FR75A441">Question 13: Professional status.
Category 5: "Worker at home for a total of one or more businesses" does not allow for people who work at their home for their own business (artisans, sewers, stylists). This category applies on the other hand to people who do work at their home, often as they will, for the affairs of an industrial or commercial establishment who reimburses them for this. Such is the case, for example of some newspapers designers, of people working for clothing industries or performing secretarial work for the affairs of some administrations, etc.
Paid managers should check box 7 even when they are partially reimbursed in the form of commiseration.</sva></p>

<p><sva a="FR75A409 FR75A412" v="FR75A409 FR75A412 FR75A418 FR75A419 FR75A439 FR75A440 FR75A441">Question 17: The case of the unemployed and those who are looking for work.
This question concerns all people having or having not already worked, who fulfill the following conditions simultaneously:
a) do not have a job:
b) are actively looking for work.
Do not apply to these people the label "unemployed" which is sometimes judged offensive and which has a slightly different connotation.</sva>

This question affects each person who has declared a profession in question 11, including employees of public services, of local communities and government employees who should indicate in 16b the name of the administration which employs them.
Some people have several employers (housemaids working for several individuals). In this case, indicate the main employer (this is to say the individual where the person completes the most number of hours).
In some cases, the address of the workplace (question 16a) can coincide with that of the home (merchants especially): it is necessary nevertheless to write it down again.

INTERVIEWER INSTRUCTIONS

<sva r v="FR75A405 FR75A406 FR75A408 FR75A409 FR75A410 FR75A412 FR75A418 FR75A419 FR75A422 FR75A425 FR75A426 FR75A427 FR75A428 FR75A432 FR75A433 FR75A435 FR75A438 FR75A439 FR75A440 FR75A441">[Questions 8 - 18 are for persons age 16 or older]</sva r></p>

<p><sva r a="all" v="FR75A419 FR75A439">Question 11: Main profession.
Attentively read the explanations and the examples given on the individual forms, as well as the instructions hereafter.
Note:
a) If a profession has been declared on question 11:
- make sure that one of the six boxes of question 13a has been checked, at least box 1 of question 12 has not been;
- make sure that the salaried people (answer 7 of question 13) have answered correctly questions 14a, 14b, or 14c ;
- make sure that question 16 has been correctly filled out (see question 16 page 57): especially make sure that questions 16a, 16b, and 16 are always filled out, even for people who work in an administrative service and especially for government employees.
b) If no profession has been declared for question 11 and if the person concerned is 16 or older:
Refer to questions 17 and 18 to see if there is an answer indicated there.
If none of questions 17 to 18 have received an answer, Make sure that is the real situation of the person concerned and:
- if there is no professional activity, mention in great detail "without profession" on question 11.
- if he currently practices a profession which he would have forgotten to declare it, ask him to answer questions 11 to 16 of his individual form.
[p.55]
Examples of bad answers not to accept in any situation. [left column] / Remarks [right column]
1) Bad answers because they aren't specific enough.
Employee, worker, building worker, engineer, executive, director / Indicate exactly the job of the person concerned, for example: salesperson at a department store, bank employee, lathe operator, chemical engineer, plasterer, expert forester, business director.
government employee, SNCF employee, EDF employee / For government employees and public service employees, specify the rank or the job, for example: representative of the prefecture, clerk of the PTT, second class stationmaster, driver of a diesel locomotive, EDF dispatcher.
Merchant, industrialist, farmer, entrepreneur, craftsman, administrator / Answer, for example: retail grocer, wholesaler in pharmaceutical products, masonry entrepreneur, residential building director, movie theater employee
2) Bad answers because they are incomplete.
O.S., O.P., Qualified worker, team leader, foreman / These labels indicate the situation in the professional hierarchy, but do not give any information on the individual profession of the person concerned. On the other hand, the following answers are satisfactory:
O.S. (ouvrier spécialisé) in rope or yarn winding, textile mill foreman
</sva r></p>

<p><sva r a="FR75A441" v="FR75A418 FR75A419 FR75A441">Question 13: Professional status.
Category 5: "Worker at home for a total of one or more businesses" does not allow for people who work at their home for their own business (artisans, sewers, stylists). This category applies on the other hand to people who

do work at their home, often as they will, for the affairs of an industrial or commercial establishment who reimburses them for this. Such is the case, for example of some newspapers designers, of people working for clothing industries or performing secretarial work for the affairs of some administrations, etc. Paid managers should check box 7 even when they are partially reimbursed in the form of commiseration.

Question 14: Certification
Make sure that the people who have declared to be salaried on question 13 specify their certification, rank or hierarchical position on questions 14a, 14b or 14c, according to the situation.

Question 17: The case of the unemployed and those who are looking for work.
This question concerns all people having or having not already worked, who fulfill the following conditions simultaneously:
a) do not have a job;
b) are actively looking for work.
Do not apply to these people the label "unemployed" which is sometimes judged offensive and which has a slightly different connotation.

Questions and instructions

LITERAL QUESTION

7. Where were you living on January 1, 1968? (for all people born before January 1, 1968)
If, on January 1st, 1968, you were in the military or were a boarding student or under treatment in a care facility, indicate the address of your personal residence at this date and not the address of the institution (barrack, boarding school, sanatorium, etc.)
1 In the same dwelling as now
2 In the same city (or the same city neighborhood for Paris, Lyon or Marseille)
3 In another city (or another district for Paris, Lyon or Marseille)
Indicate this other city:
City (For Paris, Lyon, Marseille, specify the city neighborhood [arrondissement])
County (Country for the foreigner, territory for the T.O.M.)
If, on January 1, 1968, you were living abroad or in an overseas territory or department, in which year did you come (or return) to live in Metropolitan France?

INTERVIEWER INSTRUCTIONS

<sva a="all" v="FR75A420 FR75A429 FR75A430 FR75A434 FR75A442">Question 7: Residence on January 1st, 1968.
Make sure that the answer is complete.
The people who have not changed dwellings since January 1st 1968 do not have to check anything but box 1. However, if boxes 1 and 2 have been checked, you should not make any correction to the forms.
[p.53]
Keep track of the people who were living outside of France on January 1st, 1968 have correctly indicated the year of their arrival in France. This applies as well to French citizens as well as foreigners who were living outside of Metropolitan France on January 1st, 1968.
In the situation where some people would have made several visits since 1968 in France, it will be necessary to indicate the corresponding year at the beginning of the current visit. However, you should keep track of the absences from Metropolitan France which have lasted more than 3 months.
Example: A house servant who was living in Spain on January 1st, 1968 came to work in France during the whole year of 1968. Returning to Spain at the beginning of 1970, she comes back to France in September 1972. She has spent her vacation of 1973 (August) in Spain. In this situation, answer: 1972.

LITERAL QUESTION

<svar a="all" v="FR75A423 FR75A430 FR75A436 FR75A437">6. Nationality

<div class="i1">[] 1 French by birth (including by reintegration 1
[] 2 French through naturalization, marriage, declaration
Indicate your previous nationality ___

[] 3 Foreigner
Indicate your nationality ___</div>
</svar>

CATEGORIES

Value	Category
1	Born in France, residing in France on January 1, 1968
2	Born outside of France, residing in France on January 1, 1968
3	Residing outside of France January 1, 1968

INTERVIEWER INSTRUCTIONS

<svar a="all" v="FR75A420 FR75A429 FR75A430 FR75A434 FR75A442">Question 7: Residence on January 1st, 1968.
Make sure that the answer is complete.
The people who have not changed dwellings since January 1st 1968 do not have to check anything but box 1. However, if boxes 1 and 2 have been checked, you should not make any correction to the forms.
[p.53]
Keep track of the people who were living outside of France on January 1st, 1968 have correctly indicated the year of their arrival in France. This applies as well to French citizens as well as foreigners who were living outside of Metropolitan France on January 1st, 1968.
In the

situation where some people would have made several visits since 1968 in France, it will be necessary to indicate the corresponding year at the beginning of the current visit. However, you should keep track of the absences from Metropolitan France which have lasted more than 3 months.
Example: A house servant who was living in Spain on January 1st, 1968 came to work in France during the whole year of 1968. Returning to Spain at the beginning of 1970, she comes back to France in September 1972. She has spent her vacation of 1973 (August) in Spain. In this situation, answer: 1972.

This question affects each person who has declared a profession in question 11, including employees of public services, of local communities and government employees who should indicate in 16b the name of the administration which employs them.
Some people have several employers (housemaids working for several individuals). In this case, indicate the main employer (this is to say the individual where the person completes the most number of hours).
In some cases, the address of the workplace (question 16a) can coincide with that of the home (merchants especially): it is necessary nevertheless to write it down again.

INTERVIEWER INSTRUCTIONS

<sva a="all" v="FR75A420 FR75A429 FR75A430 FR75A434 FR75A442">Question 7: Residence on January 1st, 1968.
Make sure that the answer is complete.
The people who have not changed dwellings since January 1st 1968 do not have to check anything but box 1. However, if boxes 1 and 2 have been checked, you should

not make any correction to the forms.Keep track of the people who were living outside of France on January 1st, 1968 have correctly indicated the year of their arrival in France. This applies as well to French citizens as well as foreigners who were living outside of Metropolitan France on January 1st, 1968. In the situation where some people would have made several visits since 1968 in France, it will be necessary to indicate the corresponding year at the beginning of the current visit. However, you should keep track of the absences from Metropolitan France which have lasted more than 3 months. Example: A house servant who was living in Spain on January 1st, 1968 came to work in France during the whole year of 1968. Returning to Spain at the beginning of 1970, she comes back to France in September 1972. She has spent her vacation of 1973 (August) in Spain. In this situation, answer: 1972.

Questions and instructions

LITERAL QUESTION

For all people 16 years of age or older [Applies to questions 8 -18]

11. Main profession
Indicate the profession or the career that you currently practice (even if you still only an apprentice or if you work by helping a member of your family in his or her profession). A woman who only takes care of her home will answer "without profession".
Be specific: Examples: mechanic (automobile repairman, clothing maker, carpenter in iron, fitter in central heating, building painter, industrial designer, electrical engineer, wine-grower, driver of heavy loads, shorthand typist, whole-sale drugs, etc.

17. If you are currently without work and if you are looking for some:
a. For how long have you been looking for work?
[] 1 less than 3 months
[] 2 3 to less than 6 months
[] 3 6 months to less than a year
[] 4 one year or more
b. Have you already worked?
[] Yes
[] No
c. What is your career?

<p><sva r v="FR75A409 FR75A419 FR75A439 FR75A441">18. If you do not work anymore:

(You are, for example, retired from public service, a retired worker, retired executive, former farmer, retired from business, etc.)

<div class="i1">What was your principal profession? ____</div>

<sva r v="FR75A405 FR75A406 FR75A408 FR75A409 FR75A410 FR75A412 FR75A418 FR75A419 FR75A422 FR75A425 FR75A426 FR75A427 FR75A428 FR75A432 FR75A433 FR75A435 FR75A438 FR75A439 FR75A440 FR75A441">[Questions 8 - 18 are for persons age 16 or older]
</sva r></p>

<p><sva r a="all" v="FR75A419 FR75A439">Question 11: Main profession.
Attentively read the explanations and the examples given on the individual forms, as well as the instructions hereafter.
Note:
a) If a profession has been declared on question 11:
- make sure that one of the six boxes of question 13a has been checked, at least box 1 of question 12 has not been;
- make sure that the salaried people (answer 7 of question 13) have answered correctly questions 14a, 14b, or 14c ;
- make sure that question 16 has been correctly filled out (see question 16 page 57): especially make sure that questions 16a, 16b, and 16 are always filled out, even for people who work in an administrative service and especially for government employees.
b) If no profession has been declared for question 11 and if the person concerned is 16 or older:
Refer to questions 17 and 18 to see if there is an answer indicated there.
If none of questions 17 to 18 have received an answer, Make sure that is the real situation of the person concerned and:
- if there is no professional activity, mention in great detail "without profession" on question 11.
- if he currently practices a profession which he would have forgotten to declare it, ask him to answer questions 11 to 16 of his individual form.
[p.55]
Examples of bad answers not to accept in any situation. [left column] / Remarks [right column]
1) Bad answers because they aren't specific enough.
Employee, worker, building worker, engineer, executive, director / Indicate exactly the job of the person concerned, for example: salesperson at a department store, bank employee, lathe operator, chemical engineer, plasterer, expert forester, business director.
government employee, SNCF employee, EDF employee / For government employees and public service employees, specify the rank or the job, for example: representative of the prefecture, clerk of the PTT, second class stationmaster, driver of a diesel locomotive, EDF dispatcher.
Merchant, industrialist, farmer, entrepreneur, craftsman, administrator / Answer, for example: retail grocer, wholesaler in pharmaceutical products, masonry entrepreneur, residential building director, movie theater employee
2) Bad answers because they are incomplete.
O.S., O.P., Qualified worker, team leader, foreman / These labels indicate the situation in the professional hierarchy, but do not give any information on the individual profession of the person concerned. On the other hand, the following answers are satisfactory:
O.S. (ouvrier spécialisé) in rope or yarn winding, textile mill foreman
</sva r></p>

<p><sva r a="FR75A409 FR75A412" v="FR75A409 FR75A412 FR75A418 FR75A419 FR75A439 FR75A440 FR75A441">Question 17: The case of the unemployed and those who are looking for work.
This question concerns all people having or having not already worked, who fulfill the following conditions simultaneously:
a) do not have a job:
b) are actively looking for work.
Do not apply to these people the label "unemployed" which is sometimes judged offensive and which has a slightly different connotation.
