## Identification

---

### SURVEY ID NUMBER

PRT\_2011\_PHC\_v01\_M\_v7.5\_A\_IPUMS

### TITLE

Censos 2011: XV Recenseamento Geral da População; V Recenseamento Geral da Habitação - IPUMS Subset

### ABBREVIATION OR ACRONYM

PHC Portugal 2011 (IPUMS Harmonized Subset)

### COUNTRY

Name	Country code
Portugal	PRT

### STUDY TYPE

Population and Housing Census [hh/popcen] IPUMS International

### SERIES INFORMATION

DOI:10.18128/D020.V7.5

### KIND OF DATA

Population and Housing Census [hh/popcen]

### UNIT OF ANALYSIS

Persons, households, and dwellings

### UNITS IDENTIFIED:

- Dwellings: yes
- Vacant Units: no
- Households: yes
- Individuals: yes
- Group quarters: yes

### UNIT DESCRIPTIONS:

- Dwellings: A dwelling is an enclosed and independent place that is built, rebuilt, expanded, transformed or used exclusively for living purposes during the reference period.
- Households: A conventional household is a group of people who reside in the same dwelling and have legal or de facto relationships with each other, and occupy an entire dwelling or part of a dwelling. Additionally, one independent person who occupies part of or the entire dwelling constitutes a conventional household.
- Group quarters: An institutional household is a group of people residing within a collective dwelling whom, regardless of family relationships between them, observe a common discipline, are beneficiaries of the objectives of an institution, and are governed by an internal or external entity of the group. Only individuals who had lived in the institution for more than a year, or were going to live there for at least 12 months were enumerated in the institution.

## Version

---

### VERSION DESCRIPTION

Version 7.5. The datasets contain selected variables from the original census microdata plus harmonized variables from the IPUMS-International database.

### VERSION DATE

2024-10-05

## Scope

---

## NOTES

Additional notes on a sample that is part of this study: Portugal 2011

## Coverage

### GEOGRAPHIC UNIT

Eurostat NUTS3 region

### UNIVERSE

All persons who were in the country at 12am on 21 March 2011

## Producers and sponsors

### PRIMARY INVESTIGATORS

Name	Affiliation
Instituto Nacional de Estatística (INE)	
IPUMS	University of Minnesota

## Sampling

### SAMPLING PROCEDURE

MICRODATA SOURCE: Instituto Nacional de Estatística (INE)

SAMPLE SIZE (person records): 528870.

SAMPLE DESIGN: Systematic sample of every 20th household with a random start, drawn by the country

### WEIGHTING

Self-weighting (expansion factor = 20).

## Data collection

### DATES OF DATA COLLECTION

Start	End
2011-03-21	2011-04-24

### TIME PERIODS

Start date	End date
1911-03-21	1911-03-21

### DATA COLLECTION MODE

Face-to-face [f2f]

### DATA COLLECTION NOTES

both, CENSUS DAY: March 21, 2011

## questionnaires

### QUESTIONNAIRES

Three separate enumeration forms were used to collect information on the dwelling, household, and individuals.

## Access policy

### CONTACTS

Name
Instituto Nacional de Estatística (INE)

### CONFIDENTIALITY

IPUMS International distributes integrated microdata of individuals and households only by agreement of collaborating national statistical offices and under the strictest of confidence. Before data may be distributed to an individual researcher, an electronic license agreement must be signed and approved. To gain access to the data, a researcher must agree to the following: (1) Implement security measures to prevent unauthorized access to census microdata. Under IPUMS International agreements with collaborating agencies, redistribution of the data to third parties is prohibited. (2) Use the microdata for the exclusive purposes of scholarly research and education. Researchers must explicitly agree to not use microdata acquired for any commercial or income-generating venture. (3) Maintain the confidentiality of persons, households, and other entities. Any attempt to ascertain the identity of persons or households from the microdata is prohibited. Alleging that a person or household has been identified is also prohibited. (4) Report all publications based on these data to IPUMS International, which will in turn pass the information on to the relevant national statistical agencies. Once a project is approved, a password is issued and data may be acquired through the Internet. Penalties for violating the license include: revocation of the license, recall of all microdata acquired, filing of a motion of censure to the appropriate professional organizations, and civil prosecution under the relevant national or international statutes. These safeguards mirror the principles from the Joint ECE/Eurostat Work Session on Statistical Data Confidentiality. Employees of the Minnesota Population Center who work with the census microdata to produce the harmonized database also sign agreements to respect the confidentiality of the data. IPUMS International works with each country's statistical office to minimize the risk of disclosure of respondent information. The details of the confidentiality protections vary across countries, but in all cases, names and detailed geographic information are suppressed and top-codes are imposed on variables such as income that might identify specific persons. In addition, IPUMS International uses a variety of technical procedures to enhance confidentiality protection. These include the following: (1) Swapping an undisclosed fraction of records from one administrative district to another to make positive identification of individuals impossible. (2) Randomizing the placement of households within districts to disguise the order in which individuals were enumerated or the data processed. (3) Aggregating codes of sensitive characteristics (e.g., grouping together very small ethnic categories) (4) Top- and bottom-coding continuous variables to prevent identification of extreme cases. The safety record for public-use census microdata is apparently perfect. In almost four decades of use, there has not been a single verified breach of statistical confidentiality. The measures implemented by the IPUMS International are designed to extend this record.

### ACCESS CONDITIONS

An adapted version of the dataset, harmonized for international comparability, is available from IPUMS International (<https://international.ipums.org/international/>) under the following conditions:

IPUMS International distributes integrated microdata of individuals and households only by agreement of collaborating national statistical offices and under the strictest of confidence. Before data may be distributed to an individual researcher, an electronic license agreement must be signed and approved. To gain access to the data, a researcher must agree to the following:

- (1) Implement security measures to prevent unauthorized access to census microdata. Under IPUMS International agreements with collaborating agencies, redistribution of the data to third parties is prohibited.
- (2) Use the microdata for the exclusive purposes of scholarly research and education. Researchers must explicitly agree to not use microdata acquired for any commercial or income-generating venture.
- (3) Maintain the confidentiality of persons, households, and other entities. Any attempt to ascertain the identity of persons or households from the microdata is prohibited. Alleging that a person or household has been identified is also prohibited.
- (4) Report all publications based on these data to IPUMS International, which will in turn pass the information on to the

relevant national statistical agencies.

Once a project is approved, a password is issued and data may be acquired through the Internet. Penalties for violating the license include: revocation of the license, recall of all microdata acquired, filing of a motion of censure to the appropriate professional organizations, and civil prosecution under the relevant national or international statutes.

These safeguards mirror the principles from the Joint ECE/Eurostat Work Session on Statistical Data Confidentiality. Employees of the Minnesota Population Center who work with the census microdata to produce the harmonized database also sign agreements to respect the confidentiality of the data.

#### CITATION REQUIREMENTS

## DDI DOCUMENT VERSION

Version 7.5 October 2024. NEW FEATURES.

--Historical data from NAPP project now available from IPUMS-International.

--Historical census data from Canada, Denmark, the United Kingdom, Germany, Iceland, Norway, Sweden, and the United States for the period 1703 to 1911 are now available from IPUMS-International. The complete count and sample datasets were previously disseminated by the North Atlantic Population Project (NAPP). Where possible, the data have been integrated into existing IPUMS-International variable coding schema. Some new variables have been created that are available only for these pre-1960 datasets. NAPP data users should note that many NAPP variables are available from IPUMS-International by different names. For a complete list of NAPP variables that have been renamed in IPUMS-International, refer to the crosswalk.

--Individual country shapefiles for the third-level administrative level of geography are now available for a few IPUMS samples.

--New spatially harmonized previous-residence variables at the second administrative level of geography are available for several samples in this data release. More information is available here. Users should note that many older migration variables are available by different names. Refer to this table for a crosswalk of old and corresponding new migration variables.

--IPUMS now hosts the Census Mosaic data collection. Census Mosaic identifies, gathers, harmonizes, and distributes surviving historical census microdata from regions of Continental Europe where complete centralized records are not available. The Mosaic project was founded by a consortium of historical social scientists in Europe. Data can be downloaded as static files from the Census Mosaic website. Although the data are not yet integrated fully into IPUMS International, variables have been standardized and harmonized to be roughly compatible with IPUMS coding structures.

## NEW SAMPLES.

--Full-count datasets for Great Britain 1851, 1861, 1871 (Scotland only), 1891, and 1901.

--Full-count dataset for Sweden 1910. Denmark (1845, 1880, and 1885)

--Labor force surveys from Spain and eight new labor force surveys from Italy added to the series.

## Newly added countries:

Benin, Cote d'Ivoire, Finland, Guatemala, Honduras, Laos, Lesotho, Mauritius, Myanmar, Papua New Guinea, Russia, Slovak Republic, Suriname, Togo, and Zimbabwe

## New samples for:

Bolivia, Cambodia, Chile, Cuba, Cote d'Ivoire, Egypt (1848 and 1868, historical samples), Fiji, Guinea, Ireland, Israel, Italy, Lao PDR, Mexico, Morocco, Nepal, Netherlands, Palestine, Peru, Philippines, Puerto Rico, Rwanda, Senegal, Sierra Leone, South Africa, Switzerland, Uganda, United States, United Kingdom, United States, Vietnam, and Zimbabwe

## SUPPLEMENTAL DATA.

Data from censuses from Benin and Lesotho that record individual fertility and/or mortality events were made available in IPUMS-International. These files can be downloaded and linked to data produced by the extract system.

## NEW VARIABLES.

--IPUMS-International now provides harmonized and year-specific geography variables for all countries including 13 new samples from Dominican Republic, Germany, Indonesia, Israel, Malaysia, Mongolia, Nicaragua, Nigeria, Palestine, Paraguay, Thailand, United Kingdom, and Uruguay. First-level and second-level year specific geography variables are also available for all countries. IPUMS provides corresponding, downloadable GIS boundary files for all harmonized and year specific geography variables. More information about IPUMS geography variables is available here.

--IPUMS International now provides spatially harmonized previous-residence variables at the first administrative level of geography. The codes for the spatially harmonized previous-residence variables match the spatially harmonized place of current residence. More information is available here.

--IPUMS International provides spatially harmonized previous-residence variables at the first administrative level of geography for all samples; previously available country-specific migration variables at the first administrative level that were not fully harmonized spatially have been phased out. Spatially harmonized previous-residence variables at the second administrative level of geography are available for selected samples. More information is available here. Users should note that many older migration variables are available by different names. Refer to this table for a crosswalk of old and corresponding new migration variables.

--IPUMS International now provides spatially harmonized previous-residence variables at the first administrative level of geography for all samples. Spatially harmonized previous-residence variables at the second administrative level of geography are available for several samples in this data release. More information is available here. Users should note that

many older migration variables are available by different names. Refer to this table for a crosswalk of old and corresponding new migration variables.

--Lower (third) level geography codes and GIS files have been added for Bangladesh, China, Ethiopia, Mali, Rwanda, and Zimbabwe. Some geography codes and labels might have changed for these countries to accommodate the newer lower level geography.

--Added more detailed 3-digit industry and occupation variables for China 2000.

#### EDITED SAMPLES.

--Revised full-count data for Great Britain 1881

--Revised full-count datasets for Sweden 1890 and 1900. The revision includes the following changes that improve comparability across Sweden datasets:

--Revisions to certain ethnicity and work variables (and the underlying source data): ORIGIN, LABFORCE, OCCHISCO, OCRELATE, OCSTATUS.

--Revisions to unharmonized source variables: SE1890A\_HISCOSE, SE1890A\_HISCRELSE, SE1890A\_HISCSTATSE, SE1890A\_OCCMULTISE, SE1900A\_HISCOSE, SE1900A\_HISCRELSE, SE1900A\_HISCSTATSE, SE1900A\_OCCMULTISE.

--A new United States 1850 full-count dataset now matches the corresponding dataset distributed by the USA IPUMS data project. The source variable US1850A\_0502 (HISTID) provides a linking key to match person records to the USA version of the data. The IPUMS International version of the data contains names, which the USA version cannot distribute.

#### EDITED VARIABLES.

An error affecting HHWT for South Africa 2007 was corrected. The existing values were adjusted by a factor of 0.01.

AGEMARR was edited to add data for Hungary 1980 and 1990.

Harmonized and year-specific geography variables for Brazil and Colombia have been edited to accommodate for the availability of refined municipal boundaries. Users should be aware that codes and labels have changed in all harmonized and year specific geography variables for these two countries.

Errors affecting BPLSE2 (formerly BLPARSE) for Sweden 1890 and the underlying source variable were corrected. Several thousand cases were incorrectly coded as 258101000. These cases have been updated with the correct code: 258171000.

Harmonized geography variables for Italy, Philippines, Rwanda, and United States have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

The codes for the source variable RW2002A\_0419 were corrected to include 0 and 8 as possible responses, which were previously identified as 'unknown years' within primary education.

Errors affecting EDUCFJ for Fiji 2006 were corrected.

A problem with PERWT for Tanzania 2012 was corrected. The previous weights were adjusted to properly reflect population totals.

MOMLOC, POPLOC, and PARRULE were updated for the United States 2010 and 2015 samples to include additional information on subfamilies. Prior to this correction, persons above age 17 were not receiving links to their co-resident mothers and fathers.

An error affecting codes for the URBAN variable in Egypt 1986 for Cairo, Alexandria, Port-Said, and Suez was corrected.

An error in INCEARN affecting Venezuela 2001 was corrected. Earned income in the source variable VE2001A\_0440 is interpreted as a monthly amount, thus adjustments previously applied to convert data from daily or weekly income were suppressed.

All the six Brazil samples in IPUMS International were replaced with higher density samples.

An edited version of the Chile 2017 sample was introduced to correct an error in household breaks.

Errors affecting codes for GEO1\_ZA in South Africa 2011 and ENUTS1 in United Kingdom 1991 were corrected.

Harmonized geography variables for Cambodia, Fiji, and Nepal have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year-specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

An error in PERWT affecting Nepal 2001 was corrected.

Errors affecting a code in GQ for Brazil 2010 and Indonesia 2010 were corrected. Both census samples now identify 1-person units created by splitting a large household.

An error in MARRNUM affecting Indonesia 1976 was corrected. Some codes for GEO1\_EG2006 and GEO2\_EG2006 were edited.

Harmonized geography variables for Bolivia, Cuba, Guinea, Ireland, Morocco, Palestine, Senegal, South Africa, and Uganda have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year-specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

An error in INCEARN affecting Brazil 1980 was corrected.

An error in EDATTAIN affecting Ireland 1971 and 1981 was corrected.

A small proportion of person records in Mexico 1960 were re-classified in MIGRATEP based on information about their current and previous residence. These were previously coded to 'different major administrative unit', even though their place of residence suggests that their last move was within the same major administrative unit.

The second-level technician (higher) degrees for Spain 1991, 2001, and 2011 were re-classified into post-secondary technical education in EDATTAIN.

An error affecting codes for SEX for Egypt 1848 and 1868 was corrected. The values for male and female had been reversed.

A problem with HHWT and PERWT for Canada 2011 was corrected. The previous weights were adjusted to properly reflect population totals.

Harmonized geography variables for Cambodia, Lao PDR, Mexico, Peru, Switzerland, Vietnam, Puerto Rico, United Kingdom, and United States have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year-specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

Harmonized geography variables for Chile and Sierra Leone have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year-specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

An error affecting codes for COMPUTER for Senegal 2013 was corrected.

An error affecting labels available in IND for Peru 1993 was corrected.

An error affecting codes for persons previously residing abroad for MIG1\_5\_BO in Bolivia 2001 and 2012 was corrected.

EDUCAR, EDATTAIN, and YRSCHOOL were adjusted in the Argentina samples to incorporate information on completion of education levels in the data harmonization.

HHWT and PERWT were calibrated in Kenya 1979 to properly reflect the population distribution by province.

In GQ (group quarters status), persons residing in hospitals of all types were reclassified to 'institutional group quarters' from 'other group quarters,' making their treatment consistent with GQTYPE.

Errors affecting codes for BPLBJ2 in Benin 1979, 1992, and 2002 were corrected.

Errors affecting codes for GEO2\_BR1970 in Brazil 1970 were corrected.

20	Group quarters (collective), n.s.
21	Institutions
22	Other group quarters
29	1-person unit created by splitting large household
99	Unknown/group quarters not identified

## description

### DEFINITION

GQ identifies households as vacant dwellings, group quarters, or private households. Group quarters -- collective dwellings -- are generally institutions and other group living arrangements such as rooming houses and boarding schools.

Institutions often retain persons under formal supervision or custody, such as correctional institutions, military barracks, asylums, or nursing homes. Educational and religious group dwellings (e.g., boarding schools, convents, monasteries, etc.) are also included in the institutional classification.

Group quarter designations are often useful for understanding the universe of households that answered questions about household characteristics. Censuses will often exclude group quarters from such questions.

**description**

## DEFINITION

QTYPE identifies the type of group quarters -- collective dwellings -- which are broadly classified into institutional and non-institutional types.

Institutions are a place of residence where people are subject to a common authority or bound by a common objective or personal interest. The definition encompasses correctional facilities, health institutions, retirement homes, orphanages,

shelters (social welfare institutions), military or police establishments, boarding schools, and religious group dwellings.

Non-institutional group quarters comprise refugee and workers' camps (temporary accommodation), hotels, pensions, and all types of boarding or lodging houses. The "floating population" is included as a category within the non-institutional group quarters, when identified by the corresponding sample. This group refers to outdoor sleepers, homeless persons, travelers, and persons in ships, boats, or other mobile dwellings.

A more general classification of households between private and group quarters is available in GQ.

### CONCEPT

var_concept.title	Vocabulary
Group Quarters Variables -- HOUSEHOLD	IPUMS

## HHWT: Household weight

Data file: PRT2011\_PHC-H-H.dat

### Overview

Type: Continuous    Decimal: 2    Width: 8    Range: -    Format: Numeric

### description

#### DEFINITION

HHWT indicates the number of households in the population represented by the household in the sample.

For the samples that are truly weighted (see the comparability discussion), HHWT must be used to yield accurate household-level statistics.

NOTE: HHWT has 2 implied decimal places. That is, the last two digits of the eight-digit variable are decimal digits, but there is no actual decimal in the data.

## concept

### CONCEPT

var_concept.title	Vocabulary
Technical Household Variables -- HOUSEHOLD	IPUMS

### Imputation and derivation

#### DERIVATION

HHWT is an 8-digit numeric variable with 2 implied decimal places. See the variable description.

## PERSONS: Number of person records in the household

Data file: PRT2011\_PHC-H-H.dat

## Overview

Type: Continuous    Decimal: 0    Width: 4    Range: -    Format: Numeric

## description

### DEFINITION

PERSONS indicates how many person records are included in the household (i.e., the number of person records associated with the household record in the sample). These person records will all have the same serial number (SERIAL) as the household record. The information contained in the household record will normally apply to all of these persons.

## concept

### CONCEPT

var_concept.title	Vocabulary
Technical Household Variables -- HOUSEHOLD	IPUMS

## Imputation and derivation

### DERIVATION

PERSONS is a 4-digit numeric variable.

## RECTYPE: Record type

Data file: PRT2011\_PHC-H-H.dat

## Overview

Type: Continuous    Decimal: 0    Width: 1    Range: -    Format: character

## Questions and instructions

### CATEGORIES

Value	Category
H	Household
P	Person

## description

### DEFINITION

RECTYPE identifies the type of record for the case: household or person.

NOTE: RECTYPE is an alphabetic (character string) variable with a value of 'H' for household records and 'P' for person records. RECTYPE will not appear as a variable in the default rectangular extracts produced by the data extract system. It is only available in hierarchical extracts, to distinguish between the two record types.

## description

### DEFINITION

SAMPLE identifies the IPUMS sample from which the case is drawn. Each sample receives a unique 9-digit code. The code is structured as follows:

The first 3 digits are the ISO/UN codes used in COUNTRY

The next 4 digits are the year of the census/survey

The final 2 digits identify the sample within the year. For the last two digits, censuses or large census-like surveys have a value "0" (e.g, 01) in the second-to-last digit, household surveys have a value of "2" (e.g., 21), and employment surveys have a value of "4" (e.g., 41).

## SERIAL: Household serial number

Data file: PRT2011\_PHC-H-H.dat

### Overview

Type: Continuous    Decimal: 0    Width: 12    Range: -    Format: Numeric

### description

#### DEFINITION

SERIAL is an identifying number unique to each household in a given sample. All person records are assigned the same serial number as the household record that they follow. (Person records also have their own unique identifiers -- see PERNUM.) The combination of SAMPLE and SERIAL provides a unique identifier for every household in the IPUMS-International database; SAMPLE, SERIAL and PERNUM uniquely identify every person in the database.

SERIAL can be used to identify dwellings in some samples. In these samples, the first 7 digits of SERIAL provide the dwelling number common to all households that were sampled from the same structure. The last three digits give the sequence of the household within the dwelling. The following is a list of samples in which dwellings can be inferred:

Chile 1970, 1992, 2002Colombia 1993, 2005Costa Rica 1984, 2000Cuba 2002Dominican Republic 1981, 2002, 2010Ecuador 1990, 2001Germany 1971Hungary 1980, 1990, 2001Jamaica 1982, 1991, 2001Malaysia 1970, 1991, 2000Mexico 1995, 1990, 2000, 2005Nigeria 2006Panama 2000Peru 1993, 2007Portugal 1981, 1991, 2001Spain 1991Uruguay 2011Venezuela 1990, 2001Vietnam 1989In all other samples, the last 3 digits are always zeroes.

SERIAL was constructed for IPUMS-International, and has no relation to the serial number in the original datasets.

The U.S. 1900 sample and 1880 10% sample have multi-household dwellings that can be identified using the last 3 digits of SERIAL.

## concept

### CONCEPT

var_concept.title	Vocabulary
Technical Household Variables -- HOUSEHOLD	IPUMS

## Imputation and derivation

#### DERIVATION

SERIAL is a 10-digit numeric variable.

The last 3 digits of SERIAL indicate household number within dwelling for selected samples noted in the variable description. In all other samples, the last 3 digits are always zeroes.

## description

### DEFINITION

SUBSAMP allocates each case to one of 100 subsample replicates, randomly numbered from 0 to 99. Each subsample is nationally representative and preserves any stratification of the sample from which it is drawn. Users who need a

representative subset of a sample can use SUBSAMP to select their cases. For example, to randomly extract 10% of the cases from a sample, select any 10 of the 100 subsamples.

## description

### DEFINITION

ENUTS1 identifies the Nomenclature of Territorial Units for Statistics (NUTS) within Europe in which the household was enumerated. NUTS1 is the first level territorial units within countries. NUTS is a standard administrative division of the European Union, and was developed by the EU. The European Free Trade Association extends the NUTS system to several additional countries outside of the EU, and they are also incorporated into this variable.

ENUTS1 corresponds to the 2010 version of NUTS1 released by Eurostat. IPUMS has added ENUTS1\_2013 for the more recent samples. ENUTS1\_2013 is an amendment to the annexes to the ENUTS1 classification.

The last 2-digits of the ENUTS1 variable provide the NUTS1 code. The labels include the standard code for the NUTS1 system and the name of the NUTS1 region, separated by a slash.

Smaller sub-national units are available for most countries in ENUTS2 and ENUTS3. The full set of geography variables for the countries can be found in the IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1, and GEOLEV2. More information on IPUMS-International geography can be found here.

## description

### DEFINITION

ENUTS1\_2013 is the third regular amendment to the annexes to the ENUTS1 classification. ENUTS1\_2013 was enforced on 31 December 2013 and was applied from 1 January 2015. ENUTS1\_2013 identifies the Nomenclature of Territorial Units for Statistics (NUTS) within Europe in which the household was enumerated. NUTS1 is the first level territorial units within countries. NUTS is a standard administrative division of the European Union, and was developed by the EU. The European Free Trade Association extends the NUTS system to several additional countries outside of the EU (e.g. Turkey), and they are also incorporated into this variable.

The first 3-digits of ENUTS1\_2013 variable provide the COUNTRY code followed by the 2-digit NUTS1 code. The labels include the standard code for the NUTS1 (2013) system and the name of the NUTS1 region, separated by a slash.

Smaller sub-national units are available for most countries in ENUTS2\_2013 and ENUTS3\_2013.

The full set of geography variables for the countries can be found in the IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1, and GEOLEV2. More information on IPUMS-International geography can be found here.

## description

### DEFINITION

ENUTS2 identifies the Nomenclature of Territorial Units for Statistics (NUTS) within Europe in which the household was enumerated. NUTS2 is the second level territorial units within countries. NUTS is a standard administrative division of the European Union, and was developed by the EU. The European Free Trade Association extends the NUTS system to several additional countries outside of the EU, and they are also incorporated into this variable.

ENUTS2 corresponds to the 2010 version of NUTS2 released by Eurostat.

The code labels include the standard code for the NUTS2 system and the name of the NUTS2 region, separated by a slash.

The full set of geography variables for the countries can be found in the IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1, and GEOLEV2. More information on IPUMS-International geography can be found here.

## description

### DEFINITION

ENUTS2\_2013 is the third regular amendment to the annexes to the ENUTS2 classification. ENUTS2\_2013 was enforced on 31 December 2013 and was applied from 1 January 2015. ENUTS2\_2013 identifies the Nomenclature of Territorial Units for Statistics (NUTS) within Europe in which the household was enumerated. NUTS2 is the second level territorial units within countries. NUTS is a standard administrative division of the European Union, and was developed by the EU. The European Free Trade Association extends the NUTS system to several additional countries outside of the EU (e.g. Turkey), and they are also incorporated into this variable.

The first 3-digits of ENUTS2\_2013 variable provide the COUNTRY code followed by the 3-digit NUTS2 code. The labels include the standard code for the NUTS1 (2013) system and the name of the NUTS2 region, separated by a slash.

Smaller sub-national units are available for most countries in ENUTS3\_2013. Larger sub-national units are available for most countries in ENUTS1\_2013. The full set of geography variables for the countries can be found in the IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1, and GEOLEV2. More information on IPUMS-International geography can be found here.

## description

### DEFINITION

ENUTS3 identifies the Nomenclature of Territorial Units for Statistics (NUTS) within Europe in which the household was enumerated. NUTS3 is the third level territorial units within countries. NUTS is a standard administrative division of the European Union, and was developed by the EU. The European Free Trade Association extends the NUTS system to several additional countries outside of the EU, and they are also incorporated into this variable.

ENUTS3 corresponds to the 2010 version of NUTS3 released by Eurostat.

The code labels include the standard code for the NUTS3 system and the name of the NUTS3 region, separated by a slash.

The full set of geography variables for the countries can be found in the IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1, and GEOLEV2. More information on IPUMS-International geography can be found [here](#).

Geography: Global Variables -- HOUSEHOLD	IPUMS

## **GEOLEV1: 1st subnational geographic level, world [consistent boundaries over time]**

**Data file: PRT2011\_PHC-H-H.dat**

### Overview

Type: Continuous    Decimal: 0    Width: 6    Range: -    Format: Numeric

### description

#### DEFINITION

GEOLEV1 indicates the major administrative unit in which the household was enumerated. The variable incorporates the geographies for every country, to enable cross-national geographic analysis over time. First administrative units in GEOLEV1 have been spatiotemporally harmonized to provide spatially consistent boundaries across samples in each country.

## concept

### CONCEPT

var_concept.title	Vocabulary
Geography: Global Variables -- HOUSEHOLD	IPUMS

### Imputation and derivation

#### DERIVATION

GEOLEV1 is a 6-digit numeric variable.

GEOLEV1 codes and labels can be found [here](#).

Codes, labels, frequencies, and information about boundary changes for each country can be found in the country specific harmonized variable e.g. GEO1\_BR.

## **POPDENSGEO1: Population density of GEOLEV1 unit, in persons per square kilometer**

**Data file: PRT2011\_PHC-H-H.dat**

### Overview

Type: Continuous    Decimal: 0    Width: 8    Range: -    Format: Numeric

## description

### DEFINITION

POPDENSGEO1 indicates the population density in persons per square kilometer of the major administrative unit in which the household was enumerated. The major administrative unit of the household is identified by the GEOLEV1 variable.

The area of units in GEOLEV1 is calculated using Mollweide's equal area projection. For a full set of geography variables refer to IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1 and GEOLEV2. More information on IPUMS-International geography can be found [here](#).

## description

### DEFINITION

GEO1\_PT identifies the household's sub-region within Portugal in all sample years. Sub-regions are the first level administrative units of the country. Sub-regions follow the geographic divisions of the Nomenclature of Territorial Units for Statistics (NUTS). They are statistical rather than administrative units, composed of municipalities in Portugal. GEO1\_PT is spatially harmonized accounting for political boundary changes across census years. Some detail is lost in harmonization. A GIS map (in shapefile format), corresponding to GEO1\_PT can be downloaded from the GIS Boundary files page in the IPUMS International web site.

The full set of geography variables for Portugal can be found in the IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level of any country refer to GEOLEV1, and GEOLEV2. More information on IPUMS-International geography can be found here.

### DEFINITION

NFAMS is a constructed variable that indicates the number of families within each household. Family membership is defined by FAMUNIT. A "family" is any group of persons related by blood, adoption, or marriage. An unrelated individual within the household is considered a separate family. Thus, a household consisting of a widow and a domestic employee contains two families; a household consisting of a large, multi-generation extended family with no persons unrelated to the head counts as a single family.

NFAMS is constructed from information in RELATE (relationship to head) and from the constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father). See those variable descriptions for more detail.

## INTERVIEWER INSTRUCTIONS

7.2.2.1. Filling out the Single Dwelling questionnaire

I- Type of dwelling

[There is an image of the section in the questionnaire]

[p. 89]

Conventional Dwelling

A conventional dwelling is a place that has a room or many rooms in a permanent fixed building or structure that has an independent entrance with direct access to a front yard or pathway in the interior of the building (staircase, corridor, or passage among others).

Include: isolated rooms built with enough space or transformed to house conventional families are considered part of it.

Non-conventional dwelling

Shacks/rudimentary wooden houses- non-conventional dwelling built independently with old, used or rustic materials.

Mobile housing units- non-conventional dwelling not fixed in a location or that it is mobile (boat, trailer, among others). These include trailers, tents, trailer home, etc.

Improvised within a building- a non-conventional single-family dwelling situated within a permanent structure (mill, barn, garage, among others) that was not remodeled or altered to accommodate living;

Other inhabited places- these include places that have people living, without any direct human effort to make it inhabitable. These include caves and natural shelters.

SA [acronym in Portuguese for homeless] (Homeless)- in case that a person is found homeless, you must indicate the code SA and proceed as mentioned in chapter 2.

Consider a person homeless if he/she, during the census period, is found living in the street or other public space such as gardens, metro stations, parking ramps, bridges or overpasses, building arches, or the person that, even though she/he spent the night in a homeless shelter (overnight shelter) is forced to spend a number of hours a day in a public area. In the previously mentioned situation, such a person even though he/she might eat and sleep in a homeless shelter, he/she would have to leave the following morning.

Situations that would be excluded from the concept of homeless:

- People who live in abandoned buildings
- People who, though not having a dwelling that could be classified as regular residence, during the census period were found present in collective dwellings such as hospitals, shelters with residential validity, residential shelters, etc?
- People who, although lacking a permanent residence, at the moment of the census period were found in dwellings of friends or family;
- People who live in natural shelters, for example caves.

For operational purposes, people who do not possess a dwelling that can be considered permanent, but during the census period reside in hospitals, pension rooms paid by social security, reintegration apartments, shelters that function as residential units or in the house of a friend or family, cannot be considered under the concept of homeless. In such cases, these people would be considered residents of the places where they are found in the census period.

2	Collective dwelling

#### INTERVIEWER INSTRUCTIONS

<span class="em">What is a "dwelling"?</span>

<br />A dwelling is an enclosed and independent place that is built, rebuilt, expanded or transformed or is used for living purposes with the condition of not being used for other means during the period of reference.

<br />It is enclosed because it is delimited by conventional walls or of other type, and it is covered and allows an individual or a group of individuals room for sleeping, cooking or as a shelter separated of other collective members.

<br />It is independent because its members do not have to go through any other dwellings to enter or leave the place where they live.

<br />Dwellings are also those shared rooms for living purposes by (a) family(ies) that inhabit the space or isolated rooms close to it that where built next to a dwelling for living purposes and are destined to a family (rooms, kitchen, bathroom, etc.).

<br /><span class="pg">[p. 87]</span>

<br />Dwellings are also:</p>
</div>
<div class="i1">Mobile homes (tents, boats, caravans, containers, etc.), barracks and improvised constructions in places not destined for housing, but that during the census period were used as a housing facility by at least one family;<br />Constructions that were not built with the purpose for housing, but that have been rebuilt or transformed for housing purposes and that during the census period are occupied as such;<br />Collective dwellings (hotels, pensions and the like, homes, convents, prisons, etc.) functioning as such during the census period. As we will see below, these dwellings are collective dwellings and will be enumerated with the Collective Dwelling Questionnaire.</div>
<span class="em">What is not considered a dwelling?</span>
<br />Sites built for housing but that at the census period are not being used for living purposes, such as, for example, an apartment built for housing but that is completely use as a doctor's office, or office, etc..
<br />There are two types of dwellings for the census: single family dwelling and collective dwelling!
<br />A dwelling is defined by:</p>
<div class="i1">-- the group of individuals that inhabit it<br />-- by its own characteristics.</div>
<span class="em">Single Family Dwelling</span>
<br />A single-family dwelling is destined to house, usually, one family and it is not use for other means during the census period.
<br /><span class="em">Single-family dwellings can be of two types</span>:
<br /><span class="em">Conventional dwelling</span>- is a place that has a room or many rooms in a permanent fixed building or structure that has an independent entrance with direct access to a front yard or pathway in the interior of the building (staircase, corridor, or passage among others). Isolated rooms built with enough space or transformed to house conventional families are considered part of it.
<br /><span class="em">Non-conventional dwellings</span>- is a place that does not satisfy entirely the conditions of a conventional dwelling because of the precarious conditions of its construction, or because it is mobile or improvised or was not destined for housing but functions as a permanent residence of at least one family during the census period.
<br />These should only be considered if they are occupied during the period of reference.
<br />In this group are included shacks/rudimentary wooden houses, mobile housing units, improvised within a building or

other inhabited place.

<br /><span class="pg">[p. 88]</span>

<br /><span class="em">Collective Dwellings</span>

<br />These are dwellings that house a big number of people or more people than one family and that during the census period are functioning, occupied or not by at least one or more individuals, independently if they are residents or are only present.

<br />If a collective dwelling is used seasonally but during the census period is not functioning then it should not be enumerated.

<br /><span class="em">Collective dwellings can be of two types:</span>

<br /><span class="em">Dwellings such as hotels and the like</span>- a collective dwelling that in its entirety or in part has a fixed structure or a group of structures that are destined to lodge more than one family with no common goals and as per fee such as a hotel, a pension or guesthouse among others.

<br /><span class="em">Communal quarters</span>- a collective dwelling that in its entirety or in part has a fixed structure or a group of structures and it is inhabited by a larger group of people under the guide of an authority or common law, linked by a common objective or personal interest.

<br />In this group are included institutions of social services (nursing homes, orphanages), education (boarding schools), health (hospitals, health centers), work, religion (convents, monasteries, etc.), military, prisons and other types (not mentioned before such as those of humanitarian character).

## INTERVIEWER INSTRUCTIONS

7.2.2.1. Filling out the Single Dwelling questionnaire

Question 7- What is the main type of heating available in this dwelling?

[There is an image of box for question 7]

In case there is more than one type of heating device used you should choose the one that is most frequently used.

Consider central heating as a system that diffuses or distributes heat by means of a network of hot water pipes or hot air, produced by centralized heater (air conditioner, boiler, heat exchange, heat pump, etc.).

The heat recuperator can be considered as central heating or non-central heating, depending on whether or not it is connected to a system of hot-air distribution. Hence, for a heat recuperator that is installed in a fireplace, not connected to a hot-air distribution system you must choose the option "Heat Recuperator". In cases where the heat recuperator is connected to a hot-air distribution system it must be considered as central heating.

The air conditioner can also be considered as central heating or not (as mobile or fixed units).

[If the option is "none", go to question 9]

#### INTERVIEWER INSTRUCTIONS

**Question 13- Do you pay financial charges resulting from the purchase of this dwelling?**

[There is an image of box for question 13]

This question should only be filled out for dwellings occupied by the owners. If the dwelling is rented or sublet or falls into some other category this question does not require a response.

The option "No" applies to dwellings that, despite the method of acquisition (purchase, inheritance or other), are completely paid.

For dwellings where there is finance charges from the purchase must be recorded per the respective scale of monthly charges.

Consider the dwelling owner as having finance charges from the purchase of the dwelling when:

The dwelling is the property of persons who live there and acquired it by means of a bank loan or other source that has not been liquidated: in this case the individual immediately becomes the owner of the property, however, as collateral for the loan, the dwelling itself is mortgaged, with the finance charges constituting the amortization of the capital and interest paid by the debtors;

The dwelling is the property of persons who acquired it through resolvable ownership, in which people have the right to occupy and live in a dwelling after a quantitative payment over a period of various years, which at the end they become owners of the property. This applies to dwellings built or acquired for social housing by the State, its autonomous organizations, public institutions, municipalities, private institutions who have social obligations or housing cooperatives.

You must consider the monthly cost of principal and interest as a debt payment of a loan for the acquisition of one's own house. The value of the monthly loan paid for purchase should be reported for the month immediately prior to the census period.

Any other type of charges related to housing whatever it may be, for example insurance, and loans for repairs done within the dwelling must not be counted.

In case the charge is not quite defined by the financial institution, the enumerator must record what she/he calculates it to be.

[p. 98]

If the dwelling is occupied by the owner or co-owner: Stop filling out the dwelling questionnaire here!

**Question 16- Which group corresponds to the monthly rental value of this dwelling?**

[There is an image of box for question 16]

This question is only filled out for rented, let or sublet dwellings.

The term rent means the monthly amount paid in exchange for occupying a dwelling, per contract, in other words, a monthly quantity given to a landlord in exchange for a place to live.

The different groups of monthly rent value refer to the monthly amount given by the renter.

As such, if the lease is not on a monthly basis, you must convert the amount to a monthly value.

## INTERVIEWER INSTRUCTIONS

7.2.2.1. Filling out the Single Dwelling questionnaire

Question 10 - Indicate the number of rooms of the dwelling

[There is an image of box for question 10]

[p. 95]

Keep in mind that a room is a space, within a dwelling, bounded by walls, with an area of at least 4sq. m and a height of 2m, for the most part. The following are considered within the definition of room, the bedrooms, the dining rooms and living rooms, rooms in a basement or inhabited cellars, etc.

Although the following might comply with the definition of a room they are not considered as such:

The kitchen; Hallways, porches, balconies; Bathrooms, pantries, or entranceways; Spaces designated exclusively for commercial activities.   
 Rooms designated for the sole purpose of commercial activities should not be counted as such (for example: in a dwelling with 5 rooms, 2 are used for a doctor's office or office, you should only count 3 rooms).

Mixed rooms, or rather, rooms used for another activity, but also used for living purposes must be counted as rooms

in the dwelling (for example: a living room that is used simultaneously as a workspace for a seamstress).

<br />External rooms, attached to or separate from the dwelling and intended to be integral parts of the dwelling, must always be considered as long as they are used for living purposes by the household, for example like a room.

<br />If the dwelling is non-conventional (barracks, mobile, improvised or other): Stop filling out the dwelling questionnaire here!

## INTERVIEWER INSTRUCTIONS

<span class="em">Question 12- What is your occupancy status concerning this dwelling?</span>

<br />[There is an image of box for question 12]

<br />This question is related to the occupancy status of the dwelling's residents in its totality or in part.

<br /><span class="em">Owner or co-owner</span>: this includes situations in which a dwelling is occupied completely or partially by the owner, likewise in situations where the dwelling is property of more than one person.

<br /><span class="em">Owner</span>- deed holder of the dwelling property and has total and exclusive rights to its use, attainment and sale.

<br /><span class="em">Co-Owner</span>- deed holder of the property for a dwelling, collectively with one or more people.

<br /><span class="em">Owner under a collective property regime of a housing </span>cooperative - situations where the ownership is collective with maintenance done by the members of the housing cooperative within the dwellings.

<br />A member of a housing cooperative is someone who is given rights to live in a dwelling in exchange for dues and maintenance to the property of the cooperative dwelling.

<br /><span class="em">Tenant or sub-tenant </span>- Situations in which a written or verbal agreement exists that allows a person to occupy, all or part of, a dwelling in exchange for a regular payment.

<br /><span class="em">Tenant</span> - household member who is given the right to temporary use of the dwelling, in whole or part, in exchange for a regular rent payment.

<br /><span class="em">Sub-tenant </span>- a household member that rents the dwelling in whole or part, in exchange for a payment from another entity or person who does not belong to the household but who is a tenant of the dwelling.

<br />[There is an image of bottom of question 12: Tenant or Sub-tenant and go to question 14]

<br /><span class="em">Other situation </span>(granted free of charge, caretaker) - situations in which the space is granted for use free of charge, or in cases where occupancy of the dwelling is associated with a contract in which, directly or indirectly, a value is attributed, for example, caretaker, security guard, etc.

<br />[There is an image of option for other situation and go to question 17]

<br />In situations where a dwelling occupancy status is composed of people with different conditions, the ownership must be determined by the dwelling representative, or rather the household representative.

<br />When, in the same dwelling, there is more than one household, the ownership will be considered as the representative of the "primary" household (household number 1).

4	No toilet is available
9	NIU (not in universe)

### INTERVIEWER INSTRUCTIONS

7.2.2.1. Filling out the Single Dwelling questionnaire

Question 3 - Does the dwelling have a toilet?

[There is an image of the box for question 3]

The term discharge mechanism refers to the flush valve, flow meter, etc., or rather the mechanical system for flushing water inside the toilet.

Dwellings with outdoor toilets or buildings whose landings have a toilet for exclusive use by the dwelling are considered as having a toilet, choosing either "Yes, with a discharge mechanism" or "Yes, without a discharge mechanism" depending on the situation.

On the other hand, there could be a building whose toilet is on the landing for use by two dwellings, in which case the answer should be "No, but there is running water in the building".

4	No running water is available
9	NIU (not in universe)

## INTERVIEWER INSTRUCTIONS

7.2.2.1. Filling out the Single Dwelling questionnaire

Question 2 - Does the dwelling have running water?

[There is an image of box for question 2]

The difference between the public and private water supply systems is based on the ownership of the system. A public water supply system normally requires a payment based on water use as read by a meter.

Public water supply - when water is supplied in exchange for payment based on the consumption indicated on the meter.

Private water supply - when the water is property of a particular person(s);

When the dwelling has water piped in to only an outside installation, for example, a kitchen or bathhouse located in the patio you must record in one of the "yes" options depending upon it being public or private.

No, but there is running water in the building - when the dwelling does not have running water within it, but it does exist within the building. This could include situations in which the dwelling has running water in the patio, but not within any of the rooms (kitchen, bathroom, ?);

No running water is available - when there is no running water in the dwelling or the building.

## INTERVIEWER INSTRUCTIONS

**7.2.1.1. Filling out the Building questionnaire**

**Question 9 - What year was the building constructed?**

[There is an image of box for question 9]

The year refers to the period corresponding to:

The actual construction of the building; Construction of the main part of the building (when different parts of the building were made at different times) Or remodeling of the building, in case of buildings that have undergone transformations.

A building that has undergone a complete transformation refers to a remodel (preserving the front or not). That is, remodeling after a total or partial demolition of the existing building, that results in upkeep of the building's exterior, the height and a number of floors.

To tell the year that the building was constructed, you should find out from the owner, the doorman, or one of the residents about the year of construction or an approximate age.

In case of doubt, decide which seems the most appropriate, depending on the structure of the building or comparison with other neighboring buildings of similar characteristics.

## LITERAL QUESTION

Dwelling questionnaire

[Question 8 is asked of households with any source of heating available to them.]

8. What is the main source of energy used for heating this dwelling?  
 Indicate only one - the one used most frequently.  
 1 Electricity  
 2 Wood, coal or other solid fuels  
 3 Petrol, diesel or other liquid fuels  
 4 Natural gas, propane, butane or other gaseous fuels  
 5 Other (solar energy, geothermal,...)

## CATEGORIES

Value	Category
1	Electricity
2	Wood, coal or other solid fuels
3	Petrol, diesel or other liquid fuels
4	Natural gas, propane, butane or other gaseous fuels
5	Other
9	NIU (not in universe)

## INTERVIEWER INSTRUCTIONS

7.2.2.1. Filling out the Single Dwelling questionnaire

Question 8 - What is the main source of energy used for heating this dwelling?

[There is an image of box for question 8]

In case the dwelling uses more than one type of energy, you must choose the type that is used most frequently.

**description**

## DEFINITION

This variable indicates the main source of energy used for heating by the household.

**MOMLOC: Mother's location in household****Data file:** PRT2011\_PHC-P-H.dat**Overview**

Type: Continuous    Decimal: 0    Width: 3    Range: -    Format: Numeric

**description**

## DEFINITION

MOMLOC is a constructed variable that indicates whether or not the person's mother lived in the same household and, if so, gives the person number of the mother (see PERNUM). MOMLOC makes it easy for researchers to link the characteristics of children and their (probable) mothers.

The method by which probable child-mother links are identified is described in PARRULE.

The general design of MOMLOC and other constructed variables follows the methods developed for IPUMS-USA "Family Interrelationships," but the details vary significantly. For more details on the construction of MOMLOC, see the Comparability section of PARRULE and this paper on IPUMSI family linking methodology.

Note: MOMLOC identifies social relationships (such as stepmother and adopted mother) as well as biological relationships. The variable STEPMOM is designed to identify some of these social relationships. To restrict MOMLOC to biological mothers, such as for own children fertility estimation, MOMLOC should be reset to zero when STEPMOM is greater than zero.

51	Non-Relatives, within empirical child cap
52	Non-Relatives, within constructed child cap

## description

### DEFINITION

PARRULE describes the criteria by which the IPUMS International variables MOMLOC and POPLOC linked the person to a probable mother and/or father.

IPUMS International establishes child-parent links according to five basic rules, and PARRULE gives the number of the rule that applied to the link in question. A link to any parent automatically generates a second link to that parent's spouse or partner, so only one rule is needed to describe both MOMLOC and POPLOC.

The design of the interrelationship variables is described in this paper on IPUMSI family linking methodology.

## PERNUM: Person number

Data file: PRT2011\_PHC-P-H.dat

### Overview

Type: Continuous    Decimal: 0    Width: 4    Range: -    Format: Numeric

## description

### DEFINITION

PERNUM numbers all persons within each household consecutively (starting with "1" for the first person record of each household). When combined with SAMPLE and SERIAL, PERNUM uniquely identifies each person in the IPUMS-International database.

**concept**

## CONCEPT

var_concept.title	Vocabulary
Technical Person Variables -- PERSON	IPUMS

**Imputation and derivation**

## DERIVATION

PERNUM is a 4-digit numeric variable.

**PERWT: Person weight**

**Data file:** PRT2011\_PHC-P-H.dat

**Overview**

Type: Continuous    Decimal: 2    Width: 8    Range: -    Format: Numeric

**description**

## DEFINITION

PERWT indicates the number of persons in the actual population represented by the person in the sample.

For the samples that are truly weighted (see the comparability discussion), PERWT must be used to yield accurate statistics for the population.

NOTE: PERWT has 2 implied decimal places. That is, the last two digits of the eight-digit variable are decimal digits, but there is no actual decimal in the data.

**concept**

## CONCEPT

var_concept.title	Vocabulary
Technical Person Variables -- PERSON	IPUMS

**Imputation and derivation**

## DERIVATION

PERWT is an 8-digit numeric variable with 2 implied decimal places. See the variable description.

**POLYMAL: Man with more than one wife linked**

**Data file:** PRT2011\_PHC-P-H.dat

## Overview

Type: Discrete    Decimal: 0    Width: 1    Range: -    Format: Numeric

## Questions and instructions

### CATEGORIES

Value	Category
0	No more than one wife linked via SPLOC
1	More than one wife linked via SPLOC

## description

### DEFINITION

POLYMAL indicates if a man had more than one wife linked to him in the constructed IPUMS variable SPLOC -- Spouse's Location in Household.

The point of POLYMAL is to facilitate using SPLOC in samples that identify polygamy. Some statistical matching procedures expect to find only one matching record for each subject record.

Data file: PRT2011\_PHC-P-H.dat

## Overview

Type: Continuous    Decimal: 0    Width: 3    Range: -    Format: Numeric

## description

### DEFINITION

POPLOC is a constructed variable that indicates whether or not the person's father lived in the same household and, if so, gives the person number of the father (see PERNUM). POPLOC makes it easy for researchers to link the characteristics of children and their (probable) fathers.

The method by which probable child-father links are identified is described in PARRULE.

The general design of POPLOC and other constructed variables follows the methods developed for IPUMS-USA "Family Interrelationships," but the details vary significantly. For more details on the construction of POPLOC, see the Comparability section of PARRULE and this paper on IPUMSI family linking methodology.

Note: POPLOC identifies social relationships (such as stepfather and adopted father) as well as biological relationships. The variable STEPPPOP is designed to identify some of these social relationships. To restrict POPLOC to biological mothers, such as for own children fertility estimation, POPLOC should be reset to zero when STEPPPOP is greater than zero.

**concept**

## CONCEPT

## SPRULE: Rule for linking spouse

Data file: PRT2011\_PHC-P-H.dat

### Overview

Type: Discrete    Decimal: 0    Width: 2    Range: -    Format: Numeric

### Questions and instructions

#### CATEGORIES

Value	Category
00	No spouse present
01	Rule 1: strong relationship pairing, couple adjacent
02	Rule 2: strong relationship pairing, couple not adjacent
03	Rule 3: weak relationship pairing, couple adjacent
04	Rule 4: weak relationship pairing, couple not adjacent
05	Rule 5: weak consensual union pairings
06	Rule 6: sample-specific rules (usually child-to-child)

### description

#### DEFINITION

SPRULE explains the criteria by which the IPUMS-International variable SPLOC linked the person to his/her probable spouse.

IPUMS International establishes spouse-spouse links according to five basic rules, and SPRULE gives the number of the rule that applied to the link in question. A sixth rule identifies sample-specific linking procedures only imposed in selected instances.

The design of the interrelationship variables is described in this paper on IPUMSI family linking methodology.

Constructed Family Interrelationship Variables -- PERSON	IPUMS

## STEPMOM: Probable stepmother

Data file: PRT2011\_PHC-P-H.dat

### Overview

Type: Discrete    Decimal: 0    Width: 1    Range: -    Format: Numeric

## Questions and instructions

### CATEGORIES

Value	Category
0	Biological mother or no mother present
1	Mother has no children born or surviving
2	Child reports mother is deceased
3	Explicitly identified step relationship
4	Mother reports no children in the home
5	Age difference implausible
6	Child exceeds known fertility of mother

### description

#### DEFINITION

STEPMOM indicates whether a person's mother, as identified by MOMLOC, was most probably not the person's biological mother. Non-zero values of STEPMOM explain why it is probable that the person's mother was a step- or adopted mother. A value of 0 indicates no likely stepmother because (1) the mother identified in MOMLOC was probably the biological mother or (2) there is no mother of this person present in the household.

The codes for STEPMOM are as follows:

- 0 = Biological mother or no mother of this person present in household.
- 1 = Mother has no children born or surviving.
- 2 = Child reports mother is deceased.
- 3 = Explicitly identified relationship (stepchild, adopted child, child of unmarried partner, stepchild/child-in-law).
- 4 = Mother reports no children in the home.
- 5 = Age difference between mother and child was less than 12 or greater than 54 years.
- 6 = Child exceeds known fertility of mother.

In cases where more than one criterion for a likely stepmother is met, STEPMOM will take the value of the criterion with the lowest code. See PARRULE for a description of the linking process.

Users should note that there are many stepmothers and adopted mothers in the population that cannot be identified with information available in the censuses. Therefore, STEPMOM will always under-represent their actual number in the population.

### STEPPOP: Probable stepfather

Data file: PRT2011\_PHC-P-H.dat

## Overview

Type: Discrete    Decimal: 0    Width: 1    Range: -    Format: Numeric

## Questions and instructions

### CATEGORIES

Value	Category
0	Biological father or no father present
1	Child reports father is deceased
2	Explicitly identified step relationship
3	Age difference implausible
4	Spouse of mother
5	Identified as adopted
6	Surname difference -- male child or never-married female

## description

### DEFINITION

STEPPOP indicates whether a person's father, as identified by POPLOC, was most probably not the person's biological father. Non-zero values of STEPPPOP explain why it is probable that the person's father was a step- or adopted father. A value of 0 indicates no likely stepfather because (1) the father identified in POPLOC was probably the biological father or (2) there is no father of this person present in the household.

The codes for STEPPPOP are as follows:

0 = Biological father or no father of this person present in household.

1 = Child reports father is deceased.

2 = Explicitly identified relationship (stepchild, adopted child, child of unmarried partner; stepchild/child-in-law).

3 = Age difference between father and child was less than 12 or greater than 54 years.

In cases where more than one criterion for a likely stepfather is met, STEPPPOP will take the value of the criterion with the lowest code. See PARRULE for a description of the linking process.

Users should note that there are many stepfathers and adopted fathers in the population that cannot be identified with information available in the censuses. Therefore, STEPPPOP will always under-represent their actual number in the population.

## description

### DEFINITION

FAMSIZE counts the number of the person's own family members living in the household with her/him, including the person her/himself. These include all persons related to the person by blood, adoption, or marriage as indicated by the census forms or inferred from them.

FAMSIZE is calculated from the units identified in the IPUMS constructed variable FAMUNIT (family unit membership). The primary family is defined as all persons related to the head in the RELATE variable. Secondary families are individuals or groups of persons linked together by the IPUMS constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father).

## POLY2ND: Woman is second or higher order wife

Data file: PRT2011\_PHC-P-H.dat

### Overview

Type: Discrete    Decimal: 0    Width: 1    Range: -    Format: Numeric

### Questions and instructions

### CATEGORIES

Value	Category
0	Person is not the 2nd or higher order wife linked via SPLOC
1	Person is the 2nd or higher order wife linked via SPLOC

## description

### DEFINITION

POLY2ND indicates if a woman was the second or higher order wife linked to a husband in the constructed IPUMS variable SPLOC -- Spouse's Location in Household. The variable does not suggest the actual marital order of wives, only their relative positions in the person order of the household as it was enumerated.

The point of POLY2ND is to facilitate using SPLOC in samples that identify polygamy. Some statistical matching procedures expect to find only one matching record for each subject record.

## description

### DEFINITION

YNGCH gives the age of the person's youngest own child living in the household with her or him. These include all children

linked to the person via the constructed IPUMS pointer variables MOMLOC or POPLOC -- mother's and father's location in the household.

YNGCH is top-coded at age 50 or older.

## description

### DEFINITION

EMARST describes for the European samples the person's current marital status according to law or custom. Individuals who remarried should report the status relevant to their most recent marriage. European census instructions generally limit marital status to legal unions, but there are exceptions.

EMARST has been classified according to the recommendations given by the Conference of European Statisticians for the 2010 Population and Housing Censuses.

## description

### DEFINITION

MARST describes the person's current marital status according to law or custom. Individuals who remarried should report the status relevant to their most recent marriage. Census instructions rarely explicitly limit marital status to strictly legal unions.

Note regarding universe: The lowest age at which a person can be anything but "never married" varies among samples.

## description

### DEFINITION

EBPLNT1 indicates the NUTS1 region in which the person was born. The Nomenclature of Territorial Units for Statistics (NUTS) is a standard administrative division of the European Union, and was developed by the EU. The European Free Trade Association extends the NUTS system to several additional countries outside of the EU, and they are also incorporated into this variable. NUTS1 identifies the largest territorial units within countries.

EBPLNT1 only identifies regions within the person's country of residence; it does not identify birthplaces of international migrants.

The code labels include the standard code for the NUTS1 system and the name of the NUTS1 region, separated by a slash.

## description

### DEFINITION

EBPLNT2 indicates the NUTS2 region of Europe in which the person was born. The Nomenclature of Territorial Units for Statistics (NUTS) is a standard administrative division of the European Union, and was developed by the EU. NUTS2 identifies intermediate territorial units: the second level within countries.

EBPLNT2 only identifies regions within the person's country of residence; it does not identify birthplaces of international migrants.

The code labels include the standard code for the NUTS2 system and the name of the NUTS2 region, separated by a slash.

## description

### DEFINITION

EBPLNT3 indicates the NUTS3 region of Europe in which the person was born. The Nomenclature of Territorial Units for Statistics (NUTS) is a standard administrative division of the European Union, and was developed by the EU. NUTS3 identifies small territorial units: the third level within countries.

EBPLNT3 only identifies regions within the person's country of residence; it does not identify birthplaces of international migrants.

The code labels include the standard code for the NUTS3 system and the name of the NUTS3 region, separated by a slash.

9	Unknown

## description

### DEFINITION

EDATTAIN records the person's educational attainment in terms of the level of schooling completed (degree or other milestone). The emphasis on level completed is critical: a person attending the final year of secondary education receives the code for having completed lower secondary only -- and in some samples only primary.

EDATTAIN does not necessarily reflect any particular country's definition of the various levels of schooling in terms of terminology or the number of years of schooling. EDATTAIN is an attempt to merge -- into a single, roughly comparable variable -- samples that provide degrees, ones that provide actual years of schooling, and those that have some of both. In addition to EDATTAIN, a country-specific education classification is provided which loses no information and reflects the particular educational system of that country (for example EDUCBR for Brazil, EDUCCL for Chile, and EDUCUS for the United States). As always, users can refer to the original education source variables for each sample, if they wish.

Many samples also give single years of schooling completed, recorded in YRSCHOOL. Some samples provide educational information in a form that could not be incorporated into EDATTAIN.

## description

### DEFINITION

EEDATTAIN records the person's educational attainment in terms of the level of schooling completed (degree or other milestone) for the European samples. The emphasis on level completed is critical: a person attending the final year of secondary education receives the code for having completed lower secondary only -- and in some samples only primary. All education that was relevant to the completion of a level should be taken into account even if it was provided outside of

schools and universities.

EEDATTAIN does not necessarily reflect any particular country's definition of the various levels of schooling in terms of terminology or the number of years of schooling. EEDATTAIN is an attempt to merge -- into a single, roughly comparable variable -- samples that provide degrees, ones that provide actual years of schooling, and those that have some of both. In addition to EEDATTAIN, a country-specific education classification is provided which loses no information and reflects the particular educational system of that country.

Hungary 1980 and 1990 also give single years of schooling completed, recorded in YRSCHOOL.

EEDATTAIN has been classified according to the recommendations of the Conference of European Statisticians for the 2010 Population and Housing Censuses. EEDATTAIN presents a less detailed version of EDATTAIN for the European Samples.

## description

### DEFINITION

EEMPSTAT indicates for the European samples whether or not the respondent was part of the labor force -- working or seeking work -- over a specified period of time. Depending on the sample, EEMPSTAT can also convey further information.

EMPSTAT has been classified according to the recommendations given by the Conference of European Statisticians for the 2010 Population and Housing Censuses. "Employment Status" is referred to as "Activity Status" in the CES recommendations, but the former term is used to maintain consistency with IPUMS practices.

The economically active population constitutes the total labor force: employed and unemployed persons.

## concept

## EMPSTAT: Activity status (employment status) [general version]

Data file: PRT2011\_PHC-P-H.dat

### Overview

Type: Discrete    Decimal: 0    Width: 1    Range: -    Format: Numeric

### Questions and instructions

### CATEGORIES

Value	Category
0	NIU (not in universe)
1	Employed
2	Unemployed
3	Inactive
9	Unknown/missing

## description

### DEFINITION

EMPSTAT indicates whether or not the respondent was part of the labor force -- working or seeking work -- over a specified period of time. Depending on the sample, EMPSTAT can also convey further information.

The first digit of EMPSTAT is fully comparable, and classifies the population into three groups: employed, unemployed, and inactive. The combination of employed and unemployed yields the total labor force. The second and third digits of EMPSTAT preserve additional information available for some countries and census years but not for others.

Employment status is sometimes referred to in other sources as "activity status".

## description

### DEFINITION

EMPSTAT indicates whether or not the respondent was part of the labor force -- working or seeking work -- over a specified period of time. Depending on the sample, EMPSTAT can also convey further information.

The first digit of EMPSTAT is fully comparable, and classifies the population into three groups: employed, unemployed, and inactive. The combination of employed and unemployed yields the total labor force. The second and third digits of EMPSTAT preserve additional information available for some countries and census years but not for others.

Employment status is sometimes referred to in other sources as "activity status".

## DERIVATION

IND is a 5-digit numeric variable.

Some samples use fewer than 5 digits. In those cases, the data are right-justified, and the extra leading digits are padded with zeroes.

998	Response suppressed
999	Unknown

## description

### DEFINITION

INDGEN recodes the industrial classifications of the various samples into twelve groups that can be fairly consistently identified across all available samples. The groupings roughly conform to the International Standard Industrial Classification (ISIC). The third digit of INDGEN retains important detail among the service industries that could not be consistently distinguished in all samples.

"Industry" refers to the activity or product of the establishment or sector in which a person worked.

## LABFORCE: Labor force participation

Data file: PRT2011\_PHC-P-H.dat

### Overview

Type: Discrete    Decimal: 0    Width: 1    Range: -    Format: Numeric

## Questions and instructions

### CATEGORIES

Value	Category
1	No, not in the labor force
2	Yes, in the labor force
8	Unknown
9	NIU (not in universe)

## description

---

### DEFINITION

LABFORCE is a dichotomous variable identifying whether a person participated in the labor force. Labor force participation generally means working or seeking work within a specified reference period.

For most samples LABFORCE is a recode of EMPSTAT (employment status). A consistent lower age universe of 15 or older has been applied to increase comparability across samples. Full detail is retained in EMPSTAT, which should be used for any study of child labor.

## OCC: Occupation, unrecoded

**Data file:** PRT2011\_PHC-P-H.dat

### Overview

Type: Continuous    Decimal: 0    Width: 4    Range: -    Format: Numeric

## description

---

### DEFINITION

OCC records the person's primary occupation, classified according to the system used by the respective national census office at the time. For someone with more than one job, the primary occupation is usually the one in which the person spent the most time or earned the most money, although this may not have been explicit in the instructions for a specific census.

To ensure confidentiality, very small occupations are recoded to a residual category indicating the persons had an occupation, but the job title is not identified. The number of cases recoded should be too small to affect analyses.

99	NIU (not in universe)

### description

#### DEFINITION

OCCISCO records the person's primary occupation, coded according to the major categories in the International Standard Classification of Occupations (ISCO) scheme for 1988. For someone with more than one job, the primary occupation is typically the one in which the person had spent the most time or earned the most money.

0	NIU (not in universe)
1	Self-employed
2	Wage/salary worker
3	Unpaid worker
4	Other
9	Unknown/missing

**description**

## DEFINITION

CLASSWK refers to the status of an economically active person with respect to his or her employment -- that is, the type of explicit or implicit contract of employment with other persons or organizations that the person has in his/her job. In general, the variable indicates whether a person was self-employed, or worked for someone else, either for pay or as an unpaid family worker. CLASSWK is related to EMPSTAT, which is used to define the universe in many samples.

Class of worker is often referred to as "status in employment" in other sources.

**description**

## DEFINITION

ECLASSWK refers in European Samples to the status of an economically active person with respect to his or her employment -- that is, the type of explicit or implicit contract of employment with other persons or organizations that the person has in his/her job. In general, the variable indicates whether a person was self-employed, or worked for someone else, either for pay or as an unpaid family worker.

ECLASSWK is related to EEMPSTAT (employment status), which is used to define the universe for the variable in many samples.

ECLASSWK has been classified according to the recommendations given by the Conference of European Statisticians for the 2010 Population and Housing Censuses. "Class of worker" is referred to as "Status in Employment" in the CES recommendations. The former term is used to maintain concordance with IPUMS practice.

## description

### DEFINITION

GEOMIG1\_5 indicates the major administrative unit in which the person resided five years prior to the survey. Only intra-national migrations are recorded; however, the variable incorporates geographies for every country that lists place of residence five years ago, to enable comparative analysis of subnational migration. Foreign migrants are coded 097 or 997. Codes for GEOMIG1\_5 match the geographic codes in GEOLEV1 (current place of residence). For similar information for different time intervals since migration, see variables GEOMIG1\_P, GEOMIG1\_1, and GEOMIG1\_10. More on migration and geography can be found here.

## description

### DEFINITION

MIG1\_1\_PT indicates the person's subregion of residence one year ago within Portugal using the Eurostat NUTS-3 classification, slightly modified.

Click on the Source Variables tab for information on place of residence for each sample year. Source variables may contain more geographic unit detail but are not suitable for cross-temporal comparison.

## INTERVIEWER INSTRUCTIONS

7.2.4. Individual

Question 5- Date of Birth

[There is an image of question 5]

The answer to this question is very important.

If the person does not remember his/her date of birth, the enumerator must ask about other member's date of birth or important events to obtain it.

## description

## DEFINITION

This variable indicates the age of the person.

2	Married
3	Separated, but still legally married

4	Divorced
5	Widowed

## INTERVIEWER INSTRUCTIONS

7.2.4. Individual

Question 6- What is your legal marital status?

[There is an image of question 6]

You need to record the legal marital status of the person, regardless of their marital situation.

Married- Someone legally married and lives with the respective spouse.

Separated, but still legally married- All people who, after getting married have separated but still have not recognized the separation legally or divorce in court or by the Civil Registry.

Divorced- Someone who after being married opted to dissolve the marriage in court or by the Civil Registry (divorce).

[p. 119]

Examples:

If a person is still legally married but is separated from his/her partner without a legal divorce, you should choose "Separated, but still legally married";

If a person lives in a consensual union and their marital status is single, you should choose the option "Single".

### INTERVIEWER INSTRUCTIONS

7.2.4. Individual

Question 8- Nationality (indicate the place of residence of your mother when you were born)

[There is an image of question 8]

This question asks about the nationality of the population, having as reference the place of residence of the mother on the individual's date of birth and not the place corresponding to health center where the person was born.

If the mother lived in Portugal, you must indicate the corresponding municipality:

If it coincides with a parish or the municipality where the individual actually resides you must choose the respective option;

If it is some other, indicate the name of the respective municipality.

[p. 120]

If the mother lived abroad:

In a country mentioned on the questionnaire, mark the corresponding country;

If she lived in a foreign country not mentioned in the questionnaire, you must indicate the country writing in capital letters in the boxes provided.

Indicating the country should be done with reference to currently existing borders and designations.

Example: An individual that was born in the ex-colony of Mozambique in 1966 (a place where the mother held residence), you must respond Mozambique.

### INTERVIEWER INSTRUCTIONS

7.2.4. Individual

Question 8- Nationality (indicate the place of residence of your mother when you were born)

[There is an image of question 8]

This question asks about the nationality of the population, having as reference the place of residence of the mother on the individual's date of birth and not the place corresponding to health center where the person was born.

If the mother lived in Portugal, you must indicate the corresponding municipality:

If it coincides with a parish or the municipality where the individual actually resides you must choose the respective option;

If it is some other, indicate the name of the respective municipality.

[p. 120]

If the mother lived abroad:

In a country mentioned on the questionnaire, mark the corresponding country;

If she lived in a foreign country not mentioned in the questionnaire, you must indicate the country writing in capital letters in the boxes provided.

Indicating the country should be done with reference to currently existing borders and designations.

Example: An individual that was born in the ex-colony of Mozambique in 1966 (a place where the mother held residence), you must respond Mozambique.

Question 9-What is your nationality?

[There is an image of question 9]

If the individual has foreign nationality, and only one, you must write the nationality in the space provided.

If the individual has more than one nationality (double nationality) you must distinguish if any one of them is Portuguese. If this is the case, you must mark "Portuguese and another".

If the individual has double nationality both foreign, you need to distinguish if any of them pertains to a country in the European Union. If this is the case, you must fill out the option "Two foreign nationalities, one of which is from a European Union country, indicate the EU country".

If neither of the nationalities pertains to a country in the European Union, you must indicate a country in the option "Two foreign nationalities, none from a European Union country, indicate a country".

If the individual does not have any nationality you must choose "Stateless". Stateless means someone who does not hold citizenship of any nation, or rather a person that is not considered a national by any State.

If the individual is in a naturalization process, indicate the nationality that currently have and not the one pending.

The indication of the country must be given considering the borders and designations that currently exist.

## INTERVIEWER INSTRUCTIONS

7.2.4. Individual

Question 13- Where was your place of usual residence on 31 December 2005?

[There is an image of question 13]

If the individual resided in the same dwelling where she/he currently lives choose the option "In the same residence".

If the individual resided in another dwelling you must choose the appropriate option for whether or not it coincides with the parish or municipality of the current residence - "In another residence in the parish where you live" in the first case or "In another residence in another parish of the municipality where you live" in the second case.

If the individual resided in another municipality you must indicate the respective municipality in the space provided.

If the individual resided abroad you must indicate the country of residence, according to the designation of the current country.

#### LITERAL QUESTION

Individual questionnaire

Answer the questions 29 to 35 if you are employed, if you are unemployed and have already worked (use as reference the last occupation held. If you are not in one of the previous situations, go to question 36.

32. Indicate your professional status in the occupation indicated

1 Employer  
2 Self-employed  
3 Employee  
4 Family worker  
5 Active member of a producers' co-operative  
7 Other situation

#### CATEGORIES

Value	Category
1	Employer
2	Self-employer
3	Employee
4	Family worker
5	Active member of a producer's co-operative
6	Other situation
9	NIU (not in universe)

#### INTERVIEWER INSTRUCTIONS

7.2.4. Individual

Questions 29-35 must be answer with reference to the same job

Question 32- Indicate your professional status in the occupation indicated?

[There is an image of question 32]

This question attempts to know the condition of the person who works in their occupation or rather relate the work to the dependence on the person who performs it.

If the person has more than one role, during the week in reference, indicate what took up the most time.

**Employer**- this is the owner, partner, or main stockholder of the business in which he/she mainly works, and typically has one or more paid employees under his/her supervision.

**Self-employed**- is a person who works for his/her own accord, or in association with another person and does not have paid employees.

**Employee**- is a person who works for an employer, business, State, etc. receiving a wage.

A person that does military service, voluntarily or by contract are considered employees.

**Family worker**- is considered work done for a family member and is not paid, all people who work at least 15 hours during the reference week and that directly contributed to the operation of a family business,

farm, or professional office that produced profit and belongs to a relative.

<br /><span class="em">Active member of a producers' co-operative</span>- if the person is a member of a producers' co-operative of goods or services in which his/her main occupation is that must choose this option. This also includes workers for self-managed businesses. Paid employees of a cooperative that were not members must choose the option "employee".

<br /><span class="em">Other situation</span>- This includes all situations not previously mentioned.

<br />For situations in which the difference between employee and self-employed is not clear, you must determine which one is the best fit, according to the work conditions (when and where the job is performed, how much pays, etc.).

<br />In case that the person defines these conditions for themselves, the person is considered self-employed, in cases where the employer defines the conditions, the person is considered an employee.

<br />Therefore, people that receive the so-called "green receipts" even if they are self-employed, must be classified with the option "employee" since they verify the following conditions: set work place

<br /><span class="pg">[p. 141]</span>

<br />within an organization, set hierarchy, and defined schedule. In case these conditions are not verifiable, then the answer should be "self-employed".

<br />If a person was unemployed and was looking for work during the week in reference, you must indicate the situation in which the person last worked.

05	Secondary education
06	Post-secondary education
07	Bachelor
08	University degree (Licentiate)
09	Masters
10	PhD

## INTERVIEWER INSTRUCTIONS

7.2.4. Individual

Question 17- What is the highest level of education that you have completed?

[There is an image of question 17]

To record the level of education completed, implies that the person has completed the last year of school for that level.

Examples:

The person that is in 12th year and marked "10th, 11th, or 12th" in the previous question, must respond in this question "3rd stage of basic education" since that person has not concluded the final year of that level.

If the individual is studying to attain a Master's degree regardless of the year, you must record "Master" for the answer to Question 16- What is the level of education you are currently attending, or the highest level you have attended, even if not complete? This means that the answer to question 17 -What is the highest level of education that you have completed?

"Secondary education" or licentiate for situations in which the first cycle of studies has been completed and the person has obtained the number of required credits. In order to facilitate the equivalencies of education levels for the current and former systems, see the following table.

[There is an image of table with level equivalences.]

## INTERVIEWER INSTRUCTIONS

7.2.4. Individual

Questions 29-35 must be answer with reference to the same job

Question 31- Indicate the number of hours you usually work per week in the occupation indicated?

[There is an image of question 31]

Whenever a person has more than one occupation you must respond according to the main profession.

You should choose the option with the number of hours corresponding to the number of hours the person works in one week in their main job.

You must count the weekly hours that the person works regularly, including extra hours, whenever they occur regularly. Also include time spent at work performing tasks such as preparing work equipment, preparation and maintenance of tools.

If the person was unemployed or looking for work during the week of reference, you should indicate the number of hours that the person worked in their last job.

**description**

## DEFINITION

This variable indicates the number of hours the respondent usually works in a week.

## INTERVIEWER INSTRUCTIONS

7.2.4. Individual

Question 23- In the last 12 months, what was your main source of income?

<br />[There is an image of page 23]

<br />If the person has more than one source of income, you must indicate only one taking into consideration the main source of income.

<br /><span class="pg">[p. 133]</span>

<br /><span class="em">Work</span>- This comprises all people who live primarily from a job whether it is remunerated or not.

<br />The people that work with non-remuneration for a family member, must select this option as long as they consider the work sufficient to cover the family costs (a worker that works for a family-member with no salary but is supported by the family).

<br />A non-remunerated job for a family member is considered a job of at least 15 hours during the week in reference which contributes directly to a business, farm, or office that earn profit and is owned by a family member.

<br /><span class="em">Retirement/Pension</span>- All the people who live mainly from a pension or retirement due to aging, savings, disabilities, due to an accident on the job, social pension, etc...

<br /><span class="em">Unemployment benefit</span>- This includes all people who are unemployed and live mainly from unemployment benefits, in other words, subsidies from the government such as total or partial unemployment benefits, among others.

<br />If the person is an employee, but does not receive any type of unemployment benefit, you must record the answer according to the main source of income.

<br /><span class="em">Benefit in respect of an accident at work or occupational disease </span>- This includes all individuals who are unable to work and receive benefits due to an accident at work or an occupational disease.

<br /><span class="em">Social integration income </span>- This integrated income belongs to the system of solidarity (non-contributable) as part of the integration program in which a benefit is attributed to someone in need due to some economic or social need and can work thereby assisting with any integration in a professional, social or work environment.

<br /><span class="em">Other temporary benefits </span>- This includes temporary benefits due to accidents, illness, maternity leave, etc.; and are not included in any of the previously mentioned benefits.

<br /><span class="em">Property or entrepreneurial income</span>- Includes individuals whose principal income consists of rent from property, interest, profit, dividends, ownership rights, etc.

<br /><span class="em">Social support </span>- Includes people whose principal mean of subsistence is provided by the State, Public Organizations or Private Institutions of Social Welfare, by means of social programs or other, or rather, individuals whose main mode of survival is from public assistance, that may or may not come in form of shelter;

<br /><span class="em">Supported by household</span>- includes people who live with the support of their own family.

<br /><span class="em">Example:</span>

<br />Housewife who only works on household chores and does not have any other type of income, younger children or those that do not work and that have no other source of income (whether they are students or not), etc?

<br />Other- Only classify here people who are not included in any of the previous situations, for example, those who live off of gifts, scholarships, etc.

<br />You must keep in mind that the Scholarships of Social Action, are not considered as payment for work, in this case the beneficiaries must choose the option "Other", however, a Research Scholarship given by a private or public entity who subsidizes research of scientific, technological or specific nature must be considered as remunerated work.

999	NIU (not in universe)

## INTERVIEWER INSTRUCTIONS

7.2.4. Individual

Questions 29-35 must be answer with reference to the same job

Question 29- What is your main occupation?

[There is an image of question 29]

Occupation is the profession or type of work, paid or not, that corresponds to a particular title or professional degree, constituted by a group of tasks that make up the work toward the same goal and that require similar knowledge.

An occupation is a complex notion, in which you should consider the function or professional category inherent in the tasks that are performed in the respective occupation.

An occupation should be indicated in a clear and precise manner.

Examples: Painter, First grade teacher, an agricultural machine operator, paper maker, HVAC technician, etc.

Many times after obtaining an answer there remains a difficulty to clearly identify and classify (codify) the occupation. Sometimes the title used for the occupation can refer merely to the sector of activity or a professional task.

<br />For example:

<br />Public Servant- could include administrative assistant, technical director, janitor, etc.

<br />Construction Worker- could be a carpenter, painter, bricklayer, scaffolding operator, mason, etc.

<br />Textile Worker- could be a textile dyer, weaver, sewing machine operator, bobbin worker, etc.

<br />If the person prefers more than one occupation you must indicate the one that took up most of his/her time during the census week, or if the same amount of time was spent indicate the one that generated more income.

<br />If during this week the person performed an activity that was very different from his/her regular job (due to vacation, etc.), you must indicate his/her regular job.

<br />If the person was unemployed and looking for work during the reference week you should respond according to the last occupation that the person had.

Question 15- Are you attending or have you ever attended the education system?

[There is an image of question 15]

The education system is the system under the Ministry of Education and the preparation systems that give certifications recognized by the Ministry of Education that is equivalent to different levels of schooling in the education system.

The frequency of professional courses is considered as long as the course is recognized by the Ministry of Education and has an equivalent level in the education system.

The validation system and certification of competencies (RVCC) in the New Opportunity Programs is normally considered part of the educational system. In some cases, for example Senior Universities and language institutes, since they do not have an equivalent in the educational system's level of schooling are not considered to be part of it.

Attending - In order to mark this option, the person not only has to be enrolled in school, but also must attend classes regularly and perform work at the appropriate grade level.

You must also mark this answer for children in pre-school (from 3 years or age).

Attended, but no longer - Choose this option if the person does not attend school either because he/she has finished studying or has dropped out.

Never attended - This option must be marked for individuals who have never attended school.

Regularly this situation refers to the person who has never registered to enroll in school. Additionally, it applies to children who are not of age to attend and have not started pre-school.

[There is an image of the zoomed in Never Attended answer with skip to question 19]

Children who have not started entered the formal educational system must end their individual questionnaire here.

## INTERVIEWER INSTRUCTIONS

7.2.4. Individual

Question 19- Where is your place of work or study?

[There is an image of question 19]

If the person is a worker/student (works and studies) you must answer according to the place of work.

The option "at home" includes the following situations:

The person works in a professional activity within his/her own home, for example, a seamstress/tailor, an accountant, a doctor or a lawyer that have an office out of their home, etc.

The person works for their own business in an establishment within their own home (store/shop, coffee shop, office).

For example, in the same building the person lives on the first floor above a coffee shop that the person owns.

An agricultural laborer that resides that resides and works in his/her own farm.

In this category, you must not consider people linked to domestic chores or activities, or studying at home after class.

[p. 131]

People with no fixed or permanent job who at the beginning of the census period do not have one, must consider the place of employment. If they work for their own business with no established place of work, you must answer the last place where they worked.

## INTERVIEWER INSTRUCTIONS

7.2.4. Individual

Questions 29-35 must be answer with reference to the same job

Question 35 - Indicate the number of persons regularly working in the company or organization where you practice the occupation indicated?

[There is an image of question 35]

You must count the people that regularly work in the establishments or its branches.

If a person is self-employed, mark that there is one worker. In case that the person works in association with one or more people, though self-employed, you must indicate the number of workers including the person themselves.

If the person works for a private business/organization or a public business or institution, you must indicate the range that corresponds to the total number of employees for that business or institution.

Example: a person that works for a business with four branches, each one with 5 employees, must consider 20 workers and mark the respective range.

[p. 143]

If the person is a clerk of Public Administration, you must indicate the range that corresponds to the number of employees according to the General Administration.

People who work in security or cleaning businesses must consider the total number of employees of the business in which they work, and not the place where they perform their duties.

Temporary workers must consider the number of workers in the temporary services company and not the number in their temporary positions.

If during the week in reference the person was unemployed but looking for a new job, you must indicate the total number of employees that were in the last job the person had.

## INTERVIEWER INSTRUCTIONS

7.2.4. Individual

Questions 29-35 must be answer with reference to the same job

Question 33 - What is the main activity of the company or organization where you practiced the occupation indicated?

[There is an image of question 33]

Main activity is the type of economic activity developed in a business or establishment in which the individual performs his/her main activity during the week in reference.

The description of main activity must be precise: instead of "Public servant" you must indicate, for example Financial Distributor, Hospital, Middle School, Court, Social Security, etc. Instead of "Industry" you must indicate shoe factory, textile factory, woven goods factory and instead of "Business" indicate bulk sales, or specialty dealer, etc.

If a person works in a business with many establishments, you need to indicate the activity of the establishment or workplace, and not the main activity of the business.

Example: a person works in a shoe store (a salesperson) that belongs to a business whose main activity is the production of that product, you must indicate specialty dealer and not shoe factory.

If the person is self-employed, you must indicate the type of activity that the person does.

Example: accounting, furniture retailer, mechanic auto-repair shop, etc.

If the person works as an employee, you must indicate the activity of the business.

Example: merchandise shipping business, auto body painting garage, hotel, restaurant, textile mill, secondary school, Municipal City Hall, etc.

If the person is a business administrative assistant, but mainly provides services to another business, you must answer according to the activity of the business that the person works for.

People who work for security or cleaning services, must be considered as part of the establishment for which they render services, and not the place where they perform their duties.

Example: A security guard works for a security services business and works at a mall, you must answer private security and not a mall.

[p. 142]

Temporary workers must be considered as doing the economic activity of the company who hired them and not the temporary work company.

If during the week of reference, the person was unemployed but looking for a new job, you need to record the last job they had.

### INTERVIEWER INSTRUCTIONS

Introductory Note

This manual is a tool for the necessary work of the enumerator. In this manual he/she will find all clarification needed in order to complete his/her job successfully.

This volume contains a compilation of concepts that the enumerator must know, the various work procedures the enumerator must do, the material for work that the enumerator will use during his/her different tasks. Additionally, he/she will find some advice about the way to act in order to resolve complicated situations.

This manual is composed of 9 chapters organized in order to facilitate its consultation.

Chapter 1. The Census

[This provides] a brief description of the general aspects of the Population and Housing Census, its importance, the obligatory procedures and the confidentiality of the answers, as well as the methodology and scheduling of its main phases.

Chapter 2. The role of the enumerator: functions, planning, and working material

This is a presentation of the enumerator's functions and the way his/her work should be planned. This chapter describes the material necessary for an accurate performance of the functions to prepare for the fieldwork.

The goal of this chapter is that the enumerator understands the importance of his/her role and the way his/her performance influences the final results.

Chapter 3. Cartography

This chapter contains the main concepts related to the theme.

Chapter 4. Identification system/Questionnaire numeration

The aspects regarding the sequential and integrated numeration of the various questionnaires is explained, and the importance that this action has.

[p. 2]

Chapter 5. Geographical location of buildings

This chapter illustrates the concepts and principles to observe when geographically locating the buildings.

Chapter 6. E-Census: data collection via Internet

This chapter calls the attention of the enumerator to proceed with the population to facilitate their answers via the Internet.

This refers to the procedures implied by this way of answering, its influence in the enumerator's work and how he/she

should act.

<br /><span class="em">Chapter 7. Filling out additional pages for questionnaires and related concepts </span>

<br />This chapter focuses on the essential aspects that the enumerator must understand to continue filling out from the building coversheet, the subsection coversheet, from the location point, and the docket of the subsection.

<br />For each questionnaire, ask the question, explain the inherent concepts and the specifics of filling them out.

<br /><span class="em">Chapter 8. Approaching techniques and ways to resolve special situations</span>

<br />This chapter describes the way the enumerator should act when facing certain situations.

<br /><span class="em">Chapter 9. Frequently asked questions (FAQ's)</span>

<br />This chapter has a compilation of questions that are most often asked of the enumerator by the general population.</p>

<p><span class="em">Household Identification</span>

<br />Proceed as indicated in chapter 4.

<br />The questions in part a, b and c must be filled out by the household representative or a resident of the dwelling that belongs to the household!</p>

<p><span class="em">B-Write the name of everyone in the household who resides in this dwelling and answer questions 2, 3, 4 and 5</span>

## INTERVIEWER INSTRUCTIONS

<span class="em">Household Identification</span>

<br />Proceed as indicated in chapter 4.

<br />The questions in part a, b and c must be filled out by the household representative or a resident of the dwelling that belongs to the household!</p>

<p><span class="em">B-Write the name of everyone in the household who resides in this dwelling and answer questions 2, 3, 4 and 5</span></p>

<p><span class="em">2. What is the relationship of person X with the household reference person?</span>

<br />For each person, you need to mark the kinship relation to the household reference person (person 1) according to the options listed.

<br />In case that the kinship relation does not appear on the list, you need to choose "Another relative", for example, in case of an uncle, cousin, brother-in-law, step-mother/father, or the option "Another non-relative" when there is no kinship relation with the respective person, for example, the domestic worker who lives in the household.

<br />[There is an image of question 2]

<br />Kinship relations are considered to be family relations by blood, for example, if a mother of one of the partners in a consensual union resides in the dwelling, she must be considered as the mother-in-law of the household reference person's partner.

**Questions and instructions**

## LITERAL QUESTION

Individual questionnaire

Answer the questions 29 to 35 if you are employed, if you are unemployed and have already worked (use as reference the last occupation held. If you are not in one of the previous situations, go to question 36.

33. What is the main activity of the company or organization where you practise the occupation indicated?  
If you work in a company with several establishments, please indicate the economic activity of the establishment where you work. If you work for a company, but are currently assigned to work in another company, please indicate the economic activity of your employer  
 Be clear and precise (avoid using "of the", "of", "and")  
 For example: instead of trade, education or textile industry, be more precise and indicate footwear retail trade, secondary school or clothing manufacture factory.
