

# Censo Nacional de Población y Viviendas, 1982 - IPUMS Subset

**General Directorate of Statistics and Censuses (DGEC), IPUMS**

report\_generated\_on: September 3, 2025

visit\_data\_catalog\_at: <http://catalog.ihsn.org/>

## Identification

---

### SURVEY ID NUMBER

PRY\_1982\_PHC\_v01\_M\_v7.5\_A\_IPUMS

### TITLE

Censo Nacional de Población y Viviendas, 1982 - IPUMS Subset

### ABBREVIATION OR ACRONYM

PHC Paraguay 1982 (IPUMS Harmonized Subset)

### COUNTRY

Name	Country code
Paraguay	PRY

### STUDY TYPE

Population and Housing Census [hh/popcen] IPUMS International

### SERIES INFORMATION

DOI:10.18128/D020.V7.5

### KIND OF DATA

Population and Housing Census [hh/popcen]

### UNIT OF ANALYSIS

Persons, households, and dwellings

### UNITS IDENTIFIED:

- Dwellings: yes
- Vacant Units: no
- Households: yes
- Individuals: yes
- Group quarters: yes

### UNIT DESCRIPTIONS:

- Dwellings: Any structurally separate and independent shelter constructed for the accommodation of one or more households. Any shelter that was not intended for habitation but was used to accommodate persons at the time of the census is also considered a dwelling.
- Households: A private household is a group of people, with or without family ties, that occupy part or the whole of a dwelling and share food and in the provision of other basic needs.
- Group quarters: A special type of residence whose residents live under a common administrative authority. For example, hospitals, prisons, boarding schools, etc.

## Version

---

### VERSION DESCRIPTION

Version 7.5. The datasets contain selected variables from the original census microdata plus harmonized variables from the IPUMS-International database.

### VERSION DATE

2024-10-05

## Scope

---

### NOTES

Additional notes on a sample that is part of this study: Paraguay 1982

## TOPICS

<b>Topic</b>	<b>Vocabulary</b>
Fertility and Mortality Variables -- PERSON	IPUMS

## Coverage

### GEOGRAPHIC UNIT

District

### UNIVERSE

All persons who were in the country at 12am on 11 July 1982

## Producers and sponsors

### PRIMARY INVESTIGATORS

Name	Affiliation
General Directorate of Statistics and Censuses (DGEC)	
IPUMS	University of Minnesota

## Sampling

### SAMPLING PROCEDURE

MICRODATA SOURCE: General Directorate of Statistics and Censuses (DGEC)

SAMPLE SIZE (person records): 301582.

SAMPLE DESIGN: Systematic sample of every tenth private dwelling drawn by the Minnesota Population Center from 100% microdata

### WEIGHTING

Self-weighting (expansion factor = 10).

## Data collection

### DATES OF DATA COLLECTION

Start	End
1982-07-11	1982-07-25

### TIME PERIODS

Start date	End date
1982-07-11	1982-07-11

### DATA COLLECTION MODE

Face-to-face [f2f]

### DATA COLLECTION NOTES

de facto, CENSUS DAY: July 11, 1982

## questionnaires

### QUESTIONNAIRES

A single enumeration form requested information on the dwelling and individuals.

## Access policy

### CONTACTS

Name
General Directorate of Statistics and Censuses (DGEC)

### CONFIDENTIALITY

IPUMS International distributes integrated microdata of individuals and households only by agreement of collaborating national statistical offices and under the strictest of confidence. Before data may be distributed to an individual researcher, an electronic license agreement must be signed and approved. To gain access to the data, a researcher must agree to the following: (1) Implement security measures to prevent unauthorized access to census microdata. Under IPUMS International agreements with collaborating agencies, redistribution of the data to third parties is prohibited. (2) Use the microdata for the exclusive purposes of scholarly research and education. Researchers must explicitly agree to not use microdata acquired for any commercial or income-generating venture. (3) Maintain the confidentiality of persons, households, and other entities. Any attempt to ascertain the identity of persons or households from the microdata is prohibited. Alleging that a person or household has been identified is also prohibited. (4) Report all publications based on these data to IPUMS International, which will in turn pass the information on to the relevant national statistical agencies. Once a project is approved, a password is issued and data may be acquired through the Internet. Penalties for violating the license include: revocation of the license, recall of all microdata acquired, filing of a motion of censure to the appropriate professional organizations, and civil prosecution under the relevant national or international statutes. These safeguards mirror the principles from the Joint ECE/Eurostat Work Session on Statistical Data Confidentiality. Employees of the Minnesota Population Center who work with the census microdata to produce the harmonized database also sign agreements to respect the confidentiality of the data. IPUMS International works with each country's statistical office to minimize the risk of disclosure of respondent information. The details of the confidentiality protections vary across countries, but in all cases, names and detailed geographic information are suppressed and top-codes are imposed on variables such as income that might identify specific persons. In addition, IPUMS International uses a variety of technical procedures to enhance confidentiality protection. These include the following: (1) Swapping an undisclosed fraction of records from one administrative district to another to make positive identification of individuals impossible. (2) Randomizing the placement of households within districts to disguise the order in which individuals were enumerated or the data processed. (3) Aggregating codes of sensitive characteristics (e.g., grouping together very small ethnic categories) (4) Top- and bottom-coding continuous variables to prevent identification of extreme cases. The safety record for public-use census microdata is apparently perfect. In almost four decades of use, there has not been a single verified breach of statistical confidentiality. The measures implemented by the IPUMS International are designed to extend this record.

### ACCESS CONDITIONS

An adapted version of the dataset, harmonized for international comparability, is available from IPUMS International (<https://international.ipums.org/international/>) under the following conditions:

IPUMS International distributes integrated microdata of individuals and households only by agreement of collaborating national statistical offices and under the strictest of confidence. Before data may be distributed to an individual researcher, an electronic license agreement must be signed and approved. To gain access to the data, a researcher must agree to the following:

(1) Implement security measures to prevent unauthorized access to census microdata. Under IPUMS International agreements with collaborating agencies, redistribution of the data to third parties is prohibited.

(2) Use the microdata for the exclusive purposes of scholarly research and education. Researchers must explicitly agree to not use microdata acquired for any commercial or income-generating venture.

(3) Maintain the confidentiality of persons, households, and other entities. Any attempt to ascertain the identity of persons or households from the microdata is prohibited. Alleging that a person or household has been identified is also prohibited.

(4) Report all publications based on these data to IPUMS International, which will in turn pass the information on to the relevant national statistical agencies.

Once a project is approved, a password is issued and data may be acquired through the Internet. Penalties for violating the license include: revocation of the license, recall of all microdata acquired, filing of a motion of censure to the appropriate professional organizations, and civil prosecution under the relevant national or international statutes.

These safeguards mirror the principles from the Joint ECE/Eurostat Work Session on Statistical Data Confidentiality. Employees of the Minnesota Population Center who work with the census microdata to produce the harmonized database also sign agreements to respect the confidentiality of the data.

#### CITATION REQUIREMENTS

## DDI DOCUMENT VERSION

Version 7.5 October 2024. NEW FEATURES.

--Historical data from NAPP project now available from IPUMS-International.

--Historical census data from Canada, Denmark, the United Kingdom, Germany, Iceland, Norway, Sweden, and the United States for the period 1703 to 1911 are now available from IPUMS-International. The complete count and sample datasets were previously disseminated by the North Atlantic Population Project (NAPP). Where possible, the data have been integrated into existing IPUMS-International variable coding schema. Some new variables have been created that are available only for these pre-1960 datasets. NAPP data users should note that many NAPP variables are available from IPUMS-International by different names. For a complete list of NAPP variables that have been renamed in IPUMS-International, refer to the crosswalk.

--Individual country shapefiles for the third-level administrative level of geography are now available for a few IPUMS samples.

--New spatially harmonized previous-residence variables at the second administrative level of geography are available for several samples in this data release. More information is available here. Users should note that many older migration variables are available by different names. Refer to this table for a crosswalk of old and corresponding new migration variables.

--IPUMS now hosts the Census Mosaic data collection. Census Mosaic identifies, gathers, harmonizes, and distributes surviving historical census microdata from regions of Continental Europe where complete centralized records are not available. The Mosaic project was founded by a consortium of historical social scientists in Europe. Data can be downloaded as static files from the Census Mosaic website. Although the data are not yet integrated fully into IPUMS International, variables have been standardized and harmonized to be roughly compatible with IPUMS coding structures.

## NEW SAMPLES.

--Full-count datasets for Great Britain 1851, 1861, 1871 (Scotland only), 1891, and 1901.

--Full-count dataset for Sweden 1910. Denmark (1845, 1880, and 1885)

--Labor force surveys from Spain and eight new labor force surveys from Italy added to the series.

## Newly added countries:

Benin, Cote d'Ivoire, Finland, Guatemala, Honduras, Laos, Lesotho, Mauritius, Myanmar, Papua New Guinea, Russia, Slovak Republic, Suriname, Togo, and Zimbabwe

## New samples for:

Bolivia, Cambodia, Chile, Cuba, Cote d'Ivoire, Egypt (1848 and 1868, historical samples), Fiji, Guinea, Ireland, Israel, Italy, Lao PDR, Mexico, Morocco, Nepal, Netherlands, Palestine, Peru, Philippines, Puerto Rico, Rwanda, Senegal, Sierra Leone, South Africa, Switzerland, Uganda, United States, United Kingdom, United States, Vietnam, and Zimbabwe

## SUPPLEMENTAL DATA.

Data from censuses from Benin and Lesotho that record individual fertility and/or mortality events were made available in IPUMS-International. These files can be downloaded and linked to data produced by the extract system.

## NEW VARIABLES.

--IPUMS-International now provides harmonized and year-specific geography variables for all countries including 13 new samples from Dominican Republic, Germany, Indonesia, Israel, Malaysia, Mongolia, Nicaragua, Nigeria, Palestine, Paraguay, Thailand, United Kingdom, and Uruguay. First-level and second-level year specific geography variables are also available for all countries. IPUMS provides corresponding, downloadable GIS boundary files for all harmonized and year specific geography variables. More information about IPUMS geography variables is available here.

--IPUMS International now provides spatially harmonized previous-residence variables at the first administrative level of geography. The codes for the spatially harmonized previous-residence variables match the spatially harmonized place of current residence. More information is available here.

--IPUMS International provides spatially harmonized previous-residence variables at the first administrative level of geography for all samples; previously available country-specific migration variables at the first administrative level that were not fully harmonized spatially have been phased out. Spatially harmonized previous-residence variables at the second administrative level of geography are available for selected samples. More information is available here. Users should note that many older migration variables are available by different names. Refer to this table for a crosswalk of old and corresponding new migration variables.

--IPUMS International now provides spatially harmonized previous-residence variables at the first administrative level of

geography for all samples. Spatially harmonized previous-residence variables at the second administrative level of geography are available for several samples in this data release. More information is available [here](#). Users should note that many older migration variables are available by different names. Refer to this [table](#) for a crosswalk of old and corresponding new migration variables.

--Lower (third) level geography codes and GIS files have been added for Bangladesh, China, Ethiopia, Mali, Rwanda, and Zimbabwe. Some geography codes and labels might have changed for these countries to accommodate the newer lower level geography.

--Added more detailed 3-digit industry and occupation variables for China 2000.

#### EDITED SAMPLES.

--Revised full-count data for Great Britain 1881

--Revised full-count datasets for Sweden 1890 and 1900. The revision includes the following changes that improve comparability across Sweden datasets:

--Revisions to certain ethnicity and work variables (and the underlying source data): ORIGIN, LABFORCE, OCCHISCO, OCRELATE, OCSTATUS.

--Revisions to unharmonized source variables: SE1890A\_HISCOSE, SE1890A\_HISCRELSE, SE1890A\_HISCSTATSE, SE1890A\_OCCMULTISE, SE1900A\_HISCOSE, SE1900A\_HISCRELSE, SE1900A\_HISCSTATSE, SE1900A\_OCCMULTISE.

--A new United States 1850 full-count dataset now matches the corresponding dataset distributed by the USA IPUMS data project. The source variable US1850A\_0502 (HISTID) provides a linking key to match person records to the USA version of the data. The IPUMS International version of the data contains names, which the USA version cannot distribute.

#### EDITED VARIABLES.

An error affecting HHWT for South Africa 2007 was corrected. The existing values were adjusted by a factor of 0.01.

AGEMARR was edited to add data for Hungary 1980 and 1990.

Harmonized and year-specific geography variables for Brazil and Colombia have been edited to accommodate for the availability of refined municipal boundaries. Users should be aware that codes and labels have changed in all harmonized and year specific geography variables for these two countries.

Errors affecting BPLSE2 (formerly BLPARSE) for Sweden 1890 and the underlying source variable were corrected. Several thousand cases were incorrectly coded as 258101000. These cases have been updated with the correct code: 258171000.

Harmonized geography variables for Italy, Philippines, Rwanda, and United States have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

The codes for the source variable RW2002A\_0419 were corrected to include 0 and 8 as possible responses, which were previously identified as 'unknown years' within primary education.

Errors affecting EDUCFJ for Fiji 2006 were corrected.

A problem with PERWT for Tanzania 2012 was corrected. The previous weights were adjusted to properly reflect population totals.

MOMLOC, POPLOC, and PARRULE were updated for the United States 2010 and 2015 samples to include additional information on subfamilies. Prior to this correction, persons above age 17 were not receiving links to their co-resident mothers and fathers.

An error affecting codes for the URBAN variable in Egypt 1986 for Cairo, Alexandria, Port-Said, and Suez was corrected.

An error in INCEARN affecting Venezuela 2001 was corrected. Earned income in the source variable VE2001A\_0440 is interpreted as a monthly amount, thus adjustments previously applied to convert data from daily or weekly income were suppressed.

All the six Brazil samples in IPUMS International were replaced with higher density samples.

An edited version of the Chile 2017 sample was introduced to correct an error in household breaks.

Errors affecting codes for GEO1\_ZA in South Africa 2011 and ENUTS1 in United Kingdom 1991 were corrected.

Harmonized geography variables for Cambodia, Fiji, and Nepal have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year-specific geography variables for these

countries. More information about IPUMS geography variables is available [here](#).

An error in PERWT affecting Nepal 2001 was corrected.

Errors affecting a code in GQ for Brazil 2010 and Indonesia 2010 were corrected. Both census samples now identify 1-person units created by splitting a large household.

An error in MARRNUM affecting Indonesia 1976 was corrected. Some codes for GEO1\_EG2006 and GEO2\_EG2006 were edited.

Harmonized geography variables for Bolivia, Cuba, Guinea, Ireland, Morocco, Palestine, Senegal, South Africa, and Uganda have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year-specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

An error in INCEARN affecting Brazil 1980 was corrected.

An error in EDATTAIN affecting Ireland 1971 and 1981 was corrected.

A small proportion of person records in Mexico 1960 were re-classified in MIGRATEP based on information about their current and previous residence. These were previously coded to 'different major administrative unit', even though their place of residence suggests that their last move was within the same major administrative unit.

The second-level technician (higher) degrees for Spain 1991, 2001, and 2011 were re-classified into post-secondary technical education in EDATTAIN.

An error affecting codes for SEX for Egypt 1848 and 1868 was corrected. The values for male and female had been reversed.

A problem with HHWT and PERWT for Canada 2011 was corrected. The previous weights were adjusted to properly reflect population totals.

Harmonized geography variables for Cambodia, Lao PDR, Mexico, Peru, Switzerland, Vietnam, Puerto Rico, United Kingdom, and United States have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year-specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

Harmonized geography variables for Chile and Sierra Leone have been edited to accommodate new samples. Users should be aware that codes and labels have changed in all harmonized and year-specific geography variables for these countries. More information about IPUMS geography variables is available [here](#).

An error affecting codes for COMPUTER for Senegal 2013 was corrected.

An error affecting labels available in IND for Peru 1993 was corrected.

An error affecting codes for persons previously residing abroad for MIG1\_5\_BO in Bolivia 2001 and 2012 was corrected.

EDUCAR, EDATTAIN, and YRSCHOOL were adjusted in the Argentina samples to incorporate information on completion of education levels in the data harmonization.

HHWT and PERWT were calibrated in Kenya 1979 to properly reflect the population distribution by province.

In GQ (group quarters status), persons residing in hospitals of all types were reclassified to 'institutional group quarters' from 'other group quarters,' making their treatment consistent with GQTYPE.

Errors affecting codes for BPLBJ2 in Benin 1979, 1992, and 2002 were corrected.

Errors affecting codes for GEO2\_BR1970 in Brazil 1970 were corrected.

20	Group quarters (collective), n.s.
21	Institutions
22	Other group quarters
29	1-person unit created by splitting large household
99	Unknown/group quarters not identified

## description

### DEFINITION

GQ identifies households as vacant dwellings, group quarters, or private households. Group quarters -- collective dwellings -- are generally institutions and other group living arrangements such as rooming houses and boarding schools.

Institutions often retain persons under formal supervision or custody, such as correctional institutions, military barracks, asylums, or nursing homes. Educational and religious group dwellings (e.g., boarding schools, convents, monasteries, etc.) are also included in the institutional classification.

Group quarter designations are often useful for understanding the universe of households that answered questions about household characteristics. Censuses will often exclude group quarters from such questions.

399	1-person unit created by splitting large household
998	Unknown
999	NIU (not in universe)

**description**

## DEFINITION

QTYPE identifies the type of group quarters -- collective dwellings -- which are broadly classified into institutional and non-institutional types.

Institutions are a place of residence where people are subject to a common authority or bound by a common objective or personal interest. The definition encompasses correctional facilities, health institutions, retirement homes, orphanages,

shelters (social welfare institutions), military or police establishments, boarding schools, and religious group dwellings.

Non-institutional group quarters comprise refugee and workers' camps (temporary accommodation), hotels, pensions, and all types of boarding or lodging houses. The "floating population" is included as a category within the non-institutional group quarters, when identified by the corresponding sample. This group refers to outdoor sleepers, homeless persons, travelers, and persons in ships, boats, or other mobile dwellings.

A more general classification of households between private and group quarters is available in GQ.

## HHWT: Household weight

Data file: PRY1982\_PHC-H-H.dat

### Overview

Type: Continuous    Decimal: 2    Width: 8    Range: -    Format: Numeric

### description

#### DEFINITION

HHWT indicates the number of households in the population represented by the household in the sample.

For the samples that are truly weighted (see the comparability discussion), HHWT must be used to yield accurate household-level statistics.

NOTE: HHWT has 2 implied decimal places. That is, the last two digits of the eight-digit variable are decimal digits, but there is no actual decimal in the data.

## concept

### CONCEPT

var_concept.title	Vocabulary
Technical Household Variables -- HOUSEHOLD	IPUMS

### Imputation and derivation

#### DERIVATION

HHWT is an 8-digit numeric variable with 2 implied decimal places. See the variable description.

## PERSONS: Number of person records in the household

Data file: PRY1982\_PHC-H-H.dat

## Overview

Type: Continuous    Decimal: 0    Width: 4    Range: -    Format: Numeric

## description

### DEFINITION

PERSONS indicates how many person records are included in the household (i.e., the number of person records associated with the household record in the sample). These person records will all have the same serial number (SERIAL) as the household record. The information contained in the household record will normally apply to all of these persons.

## concept

### CONCEPT

var_concept.title	Vocabulary
Technical Household Variables -- HOUSEHOLD	IPUMS

## Imputation and derivation

### DERIVATION

PERSONS is a 4-digit numeric variable.

## RECTYPE: Record type

Data file: PRY1982\_PHC-H-H.dat

## Overview

Type: Continuous    Decimal: 0    Width: 1    Range: -    Format: character

## Questions and instructions

### CATEGORIES

Value	Category
H	Household
P	Person

## description

### DEFINITION

RECTYPE identifies the type of record for the case: household or person.

NOTE: RECTYPE is an alphabetic (character string) variable with a value of 'H' for household records and 'P' for person records. RECTYPE will not appear as a variable in the default rectangular extracts produced by the data extract system. It is only available in hierarchical extracts, to distinguish between the two record types.

## description

### DEFINITION

SAMPLE identifies the IPUMS sample from which the case is drawn. Each sample receives a unique 9-digit code. The code is structured as follows:

The first 3 digits are the ISO/UN codes used in COUNTRY

The next 4 digits are the year of the census/survey

The final 2 digits identify the sample within the year. For the last two digits, censuses or large census-like surveys have a value "0" (e.g, 01) in the second-to-last digit, household surveys have a value of "2" (e.g., 21), and employment surveys have a value of "4" (e.g., 41).

Technical Household Variables -- HOUSEHOLD	IPUMS

## SERIAL: Household serial number

Data file: PRY1982\_PHC-H-H.dat

### Overview

Type: Continuous    Decimal: 0    Width: 12    Range: -    Format: Numeric

### description

#### DEFINITION

SERIAL is an identifying number unique to each household in a given sample. All person records are assigned the same serial number as the household record that they follow. (Person records also have their own unique identifiers -- see PERNUM.) The combination of SAMPLE and SERIAL provides a unique identifier for every household in the IPUMS-International database; SAMPLE, SERIAL and PERNUM uniquely identify every person in the database.

SERIAL can be used to identify dwellings in some samples. In these samples, the first 7 digits of SERIAL provide the dwelling number common to all households that were sampled from the same structure. The last three digits give the sequence of the household within the dwelling. The following is a list of samples in which dwellings can be inferred:

Chile 1970, 1992, 2002Colombia 1993, 2005Costa Rica 1984, 2000Cuba 2002Dominican Republic 1981, 2002, 2010Ecuador 1990, 2001Germany 1971Hungary 1980, 1990, 2001Jamaica 1982, 1991, 2001Malaysia 1970, 1991, 2000Mexico 1995, 1990, 2000, 2005Nigeria 2006Panama 2000Peru 1993, 2007Portugal 1981, 1991, 2001Spain 1991Uruguay 2011Venezuela 1990, 2001Vietnam 1989In all other samples, the last 3 digits are always zeroes.

SERIAL was constructed for IPUMS-International, and has no relation to the serial number in the original datasets.

The U.S. 1900 sample and 1880 10% sample have multi-household dwellings that can be identified using the last 3 digits of SERIAL.

## concept

### CONCEPT

var_concept.title	Vocabulary
Technical Household Variables -- HOUSEHOLD	IPUMS

## Imputation and derivation

#### DERIVATION

SERIAL is a 10-digit numeric variable.

The last 3 digits of SERIAL indicate household number within dwelling for selected samples noted in the variable description. In all other samples, the last 3 digits are always zeroes.

## SUBSAMP: Subsample number

## description

### DEFINITION

SUBSAMP allocates each case to one of 100 subsample replicates, randomly numbered from 0 to 99. Each subsample is nationally representative and preserves any stratification of the sample from which it is drawn. Users who need a

representative subset of a sample can use SUBSAMP to select their cases. For example, to randomly extract 10% of the cases from a sample, select any 10 of the 100 subsamples.

Technical Household Variables -- HOUSEHOLD	IPUMS

## AREAMOLLWGE01: Area of GEOLEV1 unit in square kilometers

Data file: PRY1982\_PHC-H-H.dat

## Overview

Type: Continuous    Decimal: 0    Width: 10    Range: -    Format: Numeric

## description

### DEFINITION

AREAMOLLWGE01 indicates the area in square kilometers of the major administrative unit in which the household was enumerated. The major administrative unit of the household is identified by the GEOLEV1 variable.

The area of units in GEOLEV1 is calculated using Mollweide's equal area projection. For a full set of geography variables refer to IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1 and GEOLEV2. More information on IPUMS-International geography can be found here.

## Imputation and derivation

### DERIVATION

AREAMOLLWGE01 is a 10-digit string variable listing the area in square kilometers.

## AREAMOLLWGE02: Area of GEOLEV2 unit in square kilometers

Data file: PRY1982\_PHC-H-H.dat

## Overview

Type: Continuous    Decimal: 0    Width: 10    Range: -    Format: Numeric

## description

### DEFINITION

AREAMOLLWGE02 indicates the area in square kilometers of the second major administrative unit in which the household was enumerated. The second major administrative unit of the household is identified by the GEOLEV2 variable.

The area of units in GEOLEV2 is calculated using Mollweide's equal area projection. For a full set of geography variables refer to IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1 and GEOLEV2. More information on IPUMS-International geography can be found here.

### description

#### DEFINITION

GEO1\_PY identifies the household's department within Paraguay in all sample years. Departments are the first level administrative units of the country. GEO1\_PY is spatially harmonized accounting for political boundary changes across census years. Some detail is lost in harmonization; see the comparability discussion. A GIS map (in shapefile format), corresponding to GEO1\_PY can be downloaded from the GIS Boundary files page in the IPUMS International web site.

The full set of geography variables for Paraguay can be found in the IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1, and GEOLEV2. More information on IPUMS-International geography can be found here.

Geography: O-Z Variables -- HOUSEHOLD	IPUMS

**GEOLEV1: 1st subnational geographic level, world [consistent boundaries over time]****Data file: PRY1982\_PHC-H-H.dat****Overview**

Type: Continuous    Decimal: 0    Width: 6    Range: -    Format: Numeric

**description**

## DEFINITION

GEOLEV1 indicates the major administrative unit in which the household was enumerated. The variable incorporates the geographies for every country, to enable cross-national geographic analysis over time. First administrative units in GEOLEV1 have been spatiotemporally harmonized to provide spatially consistent boundaries across samples in each country.

**concept**

## CONCEPT

var_concept.title	Vocabulary
Geography: Global Variables -- HOUSEHOLD	IPUMS

**Imputation and derivation**

## DERIVATION

GEOLEV1 is a 6-digit numeric variable.

GEOLEV1 codes and labels can be found here.

Codes, labels, frequencies, and information about boundary changes for each country can be found in the country specific harmonized variable e.g. GEO1\_BR.

**GEOLEV2: 2nd subnational geographic level, world [consistent boundaries over time]****Data file: PRY1982\_PHC-H-H.dat****Overview**

Type: Continuous    Decimal: 0    Width: 9    Range: -    Format: Numeric

**description**

## DEFINITION

GEOLEV2 indicates the second major administrative unit in which the household was enumerated. The variable incorporates the geographies for every country, to enable cross-national geographic analysis over time. Second administrative units in GEOLEV2 have been spatio-temporally harmonized to provide spatially consistent boundaries across samples in each country.

## concept

### CONCEPT

### DEFINITION

GEO2\_PY1982 indicates the household's districts within Paraguay in 1982. Districts are the second level administrative units of the country, after departments. A GIS map (in shapefile format), corresponding to GEO2\_PY1982 can be downloaded from the GIS Boundary files page in the IPUMS International web site

The full set of geography variables for Paraguay can be found in the IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level of any country refer to GEOLEV1, and GEOLEV2. More information on IPUMS-International geography can be found here.

2	Not owned
9	Unknown

## description

### DEFINITION

OWNERSHIP indicates whether a member of the household owned the housing unit. Households that acquired their unit with a mortgage or other lending arrangement were understood to "own" their unit even if they had not yet completed repayment. For those that did not own their housing unit, several options were possible: renting (from various types of owners), subletting, usufruct, and de facto occupation.

2	2 families
3	3 families
4	4 families
5	5 families
6	6 families
7	7 families
8	8 families
9	9 or more families

## description

### DEFINITION

NFAMS is a constructed variable that indicates the number of families within each household. Family membership is defined by FAMUNIT. A "family" is any group of persons related by blood, adoption, or marriage. An unrelated individual within the household is considered a separate family. Thus, a household consisting of a widow and a domestic employee contains two families; a household consisting of a large, multi-generation extended family with no persons unrelated to the head counts as a single family.

NFAMS is constructed from information in RELATE (relationship to head) and from the constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father). See those variable descriptions for more detail.

**MOMLOC: Mother's location in household****Data file:** PRY1982\_PHC-P-H.dat**Overview**

Type: Continuous    Decimal: 0    Width: 3    Range: -    Format: Numeric

**description**

## DEFINITION

MOMLOC is a constructed variable that indicates whether or not the person's mother lived in the same household and, if so, gives the person number of the mother (see PERNUM). MOMLOC makes it easy for researchers to link the characteristics of children and their (probable) mothers.

The method by which probable child-mother links are identified is described in PARRULE.

The general design of MOMLOC and other constructed variables follows the methods developed for IPUMS-USA "Family Interrelationships," but the details vary significantly. For more details on the construction of MOMLOC, see the Comparability section of PARRULE and this paper on IPUMSI family linking methodology.

Note: MOMLOC identifies social relationships (such as stepmother and adopted mother) as well as biological relationships. The variable STEPMOM is designed to identify some of these social relationships. To restrict MOMLOC to biological mothers, such as for own children fertility estimation, MOMLOC should be reset to zero when STEPMOM is greater than zero.

**concept**

32	Specified Other Relatives, within constructed child cap
33	Specified Other Relatives, exceeds child cap
41	Other Relatives, within empirical child cap
42	Other Relatives, within constructed child cap
51	Non-Relatives, within empirical child cap
52	Non-Relatives, within constructed child cap

## description

### DEFINITION

PARRULE describes the criteria by which the IPUMS International variables MOMLOC and POPLOC linked the person to a probable mother and/or father.

IPUMS International establishes child-parent links according to five basic rules, and PARRULE gives the number of the rule that applied to the link in question. A link to any parent automatically generates a second link to that parent's spouse or partner, so only one rule is needed to describe both MOMLOC and POPLOC.

The design of the interrelationship variables is described in this paper on IPUMSI family linking methodology.

## concept

### CONCEPT

var_concept.title	Vocabulary
Constructed Family Interrelationship Variables -- PERSON	IPUMS

## PERNUM: Person number

Data file: PRY1982\_PHC-P-H.dat

### Overview

Type: Continuous    Decimal: 0    Width: 4    Range: -    Format: Numeric

## description

### DEFINITION

PERNUM numbers all persons within each household consecutively (starting with "1" for the first person record of each household). When combined with SAMPLE and SERIAL, PERNUM uniquely identifies each person in the IPUMS-International database.

**concept**

## CONCEPT

var_concept.title	Vocabulary
Technical Person Variables -- PERSON	IPUMS

**Imputation and derivation**

## DERIVATION

PERNUM is a 4-digit numeric variable.

**PERWT: Person weight**

**Data file:** PRY1982\_PHC-P-H.dat

**Overview**

Type: Continuous    Decimal: 2    Width: 8    Range: -    Format: Numeric

**description**

## DEFINITION

PERWT indicates the number of persons in the actual population represented by the person in the sample.

For the samples that are truly weighted (see the comparability discussion), PERWT must be used to yield accurate statistics for the population.

NOTE: PERWT has 2 implied decimal places. That is, the last two digits of the eight-digit variable are decimal digits, but there is no actual decimal in the data.

**concept**

## CONCEPT

var_concept.title	Vocabulary
Technical Person Variables -- PERSON	IPUMS

**Imputation and derivation**

## DERIVATION

PERWT is an 8-digit numeric variable with 2 implied decimal places. See the variable description.

**POLYMAL: Man with more than one wife linked**

**Data file:** PRY1982\_PHC-P-H.dat

## Overview

Type: Discrete    Decimal: 0    Width: 1    Range: -    Format: Numeric

## Questions and instructions

### CATEGORIES

Value	Category
0	No more than one wife linked via SPLOC
1	More than one wife linked via SPLOC

## description

### DEFINITION

POLYMAL indicates if a man had more than one wife linked to him in the constructed IPUMS variable SPLOC -- Spouse's Location in Household.

The point of POLYMAL is to facilitate using SPLOC in samples that identify polygamy. Some statistical matching procedures expect to find only one matching record for each subject record.

Constructed Family Interrelationship Variables -- PERSON	IPUMS

## POPLOC: Father's location in household

Data file: PRY1982\_PHC-P-H.dat

## Overview

Type: Continuous    Decimal: 0    Width: 3    Range: -    Format: Numeric

## description

### DEFINITION

POPLOC is a constructed variable that indicates whether or not the person's father lived in the same household and, if so, gives the person number of the father (see PERNUM). POPLOC makes it easy for researchers to link the characteristics of children and their (probable) fathers.

The method by which probable child-father links are identified is described in PARRULE.

The general design of POPLOC and other constructed variables follows the methods developed for IPUMS-USA "Family Interrelationships," but the details vary significantly. For more details on the construction of POPLOC, see the Comparability section of PARRULE and this paper on IPUMSI family linking methodology.

Note: POPLOC identifies social relationships (such as stepfather and adopted father) as well as biological relationships. The variable STEPPPOP is designed to identify some of these social relationships. To restrict POPLOC to biological mothers, such as for own children fertility estimation, POPLOC should be reset to zero when STEPPPOP is greater than zero.

**concept**

## CONCEPT

<b>var_concept.title</b>	<b>Vocabulary</b>

**Imputation and derivation**

## DERIVATION

POPLOC is a 3-digit numeric variable.

Codes0 = No father of this person present in the household.  
1 or higher = The person number of this person's father

**SPLOC: Spouse's location in household**

**Data file:** PRY1982\_PHC-P-H.dat

**Overview**

Type: Continuous    Decimal: 0    Width: 3    Range: -    Format: Numeric

**description**

## DEFINITION

SPLOC is a constructed variable that indicates whether or not the person's spouse lived in the same household and, if so, gives the person number (PERNUM) of the spouse. SPLOC makes it easy for researchers to link the characteristics of (probable) spouses.

The method by which probable spouse-spouse links are identified is described in SPRULE.

The general design of SPLOC and other constructed variables is modeled on the methods developed for IPUMS-USA "Family Interrelationships", but the details vary significantly. For more details on the construction of SPLOC, see the Comparability section of SPRULE and this paper on IPUMSI family linking methodology.

## SPRULE: Rule for linking spouse

Data file: PRY1982\_PHC-P-H.dat

### Overview

Type: Discrete    Decimal: 0    Width: 2    Range: -    Format: Numeric

### Questions and instructions

#### CATEGORIES

Value	Category
00	No spouse present
01	Rule 1: strong relationship pairing, couple adjacent
02	Rule 2: strong relationship pairing, couple not adjacent
03	Rule 3: weak relationship pairing, couple adjacent
04	Rule 4: weak relationship pairing, couple not adjacent
05	Rule 5: weak consensual union pairings
06	Rule 6: sample-specific rules (usually child-to-child)

### description

#### DEFINITION

SPRULE explains the criteria by which the IPUMS-International variable SPLOC linked the person to his/her probable spouse.

IPUMS International establishes spouse-spouse links according to five basic rules, and SPRULE gives the number of the rule that applied to the link in question. A sixth rule identifies sample-specific linking procedures only imposed in selected instances.

The design of the interrelationship variables is described in this paper on IPUMSI family linking methodology.

### concept

#### CONCEPT

var_concept.title	Vocabulary
Constructed Family Interrelationship Variables -- PERSON	IPUMS

## STEPMOM: Probable stepmother

Data file: PRY1982\_PHC-P-H.dat

### Overview

Type: Discrete    Decimal: 0    Width: 1    Range: -    Format: Numeric

## Questions and instructions

### CATEGORIES

Value	Category
0	Biological mother or no mother present
1	Mother has no children born or surviving
2	Child reports mother is deceased
3	Explicitly identified step relationship
4	Mother reports no children in the home
5	Age difference implausible
6	Child exceeds known fertility of mother

### description

#### DEFINITION

STEPMOM indicates whether a person's mother, as identified by MOMLOC, was most probably not the person's biological mother. Non-zero values of STEPMOM explain why it is probable that the person's mother was a step- or adopted mother. A value of 0 indicates no likely stepmother because (1) the mother identified in MOMLOC was probably the biological mother or (2) there is no mother of this person present in the household.

The codes for STEPMOM are as follows:

- 0 = Biological mother or no mother of this person present in household.
- 1 = Mother has no children born or surviving.
- 2 = Child reports mother is deceased.
- 3 = Explicitly identified relationship (stepchild, adopted child, child of unmarried partner, stepchild/child-in-law).
- 4 = Mother reports no children in the home.
- 5 = Age difference between mother and child was less than 12 or greater than 54 years.
- 6 = Child exceeds known fertility of mother.

In cases where more than one criterion for a likely stepmother is met, STEPMOM will take the value of the criterion with the lowest code. See PARRULE for a description of the linking process.

Users should note that there are many stepmothers and adopted mothers in the population that cannot be identified with information available in the censuses. Therefore, STEPMOM will always under-represent their actual number in the population.

### STEPPOP: Probable stepfather

Data file: PRY1982\_PHC-P-H.dat

## Overview

Type: Discrete    Decimal: 0    Width: 1    Range: -    Format: Numeric

## Questions and instructions

### CATEGORIES

Value	Category
0	Biological father or no father present
1	Child reports father is deceased
2	Explicitly identified step relationship
3	Age difference implausible
4	Spouse of mother
5	Identified as adopted
6	Surname difference -- male child or never-married female

## description

### DEFINITION

STPEPOP indicates whether a person's father, as identified by POPLOC, was most probably not the person's biological father. Non-zero values of STEPPPOP explain why it is probable that the person's father was a step- or adopted father. A value of 0 indicates no likely stepfather because (1) the father identified in POPLOC was probably the biological father or (2) there is no father of this person present in the household.

The codes for STEPPPOP are as follows:

- 0 = Biological father or no father of this person present in household.
- 1 = Child reports father is deceased.
- 2 = Explicitly identified relationship (stepchild, adopted child, child of unmarried partner; stepchild/child-in-law).
- 3 = Age difference between father and child was less than 12 or greater than 54 years.

In cases where more than one criterion for a likely stepfather is met, STEPPPOP will take the value of the criterion with the lowest code. See PARRULE for a description of the linking process.

Users should note that there are many stepfathers and adopted fathers in the population that cannot be identified with information available in the censuses. Therefore, STEPPPOP will always under-represent their actual number in the population.

## description

### DEFINITION

FAMSIZE counts the number of the person's own family members living in the household with her/him, including the person her/himself. These include all persons related to the person by blood, adoption, or marriage as indicated by the census forms or inferred from them.

FAMSIZE is calculated from the units identified in the IPUMS constructed variable FAMUNIT (family unit membership). The primary family is defined as all persons related to the head in the RELATE variable. Secondary families are individuals or groups of persons linked together by the IPUMS constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father).

## concept

### CONCEPT

var_concept.title	Vocabulary
Constructed Family Interrelationship Variables -- PERSON	IPUMS

## FAMUNIT: Family unit membership

Data file: PRY1982\_PHC-P-H.dat

### Overview

Type: Continuous    Decimal: 0    Width: 4    Range: -    Format: Numeric

### description

#### DEFINITION

FAMUNIT is a constructed variable indicating to which family within the household a person belongs.

All persons related to the household head receive a 1 (see RELATE). Each secondary family or secondary individual receives a higher code. For purposes of FAMUNIT, secondary families are individuals or groups of persons linked together by the IPUMS constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father).

## concept

### Imputation and derivation

#### DERIVATION

FAMUNIT is a 4-digit numeric variable.

CodesIf there is only one group of related individuals within the household, all of them will be coded "1;" if there is a second, separate such group listed on the form, all of them will be coded "2," and so on.

## NCHILD: Number of own children in household

Data file: PRY1982\_PHC-P-H.dat

**Overview**

Type: Discrete    Decimal: 0    Width: 2    Range: -    Format: Numeric

**Questions and instructions**

## POLY2ND: Woman is second or higher order wife

Data file: PRY1982\_PHC-P-H.dat

### Overview

Type: Discrete    Decimal: 0    Width: 1    Range: -    Format: Numeric

## Questions and instructions

### CATEGORIES

Value	Category
0	Person is not the 2nd or higher order wife linked via SPLOC
1	Person is the 2nd or higher order wife linked via SPLOC

## description

### DEFINITION

POLY2ND indicates if a woman was the second or higher order wife linked to a husband in the constructed IPUMS variable

SPLOC -- Spouse's Location in Household. The variable does not suggest the actual marital order of wives, only their relative positions in the person order of the household as it was enumerated.

The point of POLY2ND is to facilitate using SPLOC in samples that identify polygamy. Some statistical matching procedures expect to find only one matching record for each subject record.

### DEFINITION

CHDEADFEM indicates the number of female children ever born to a woman who are no longer living. Stillbirths are not counted.

It is possible to calculate total child deaths for samples that have both the "Female children ever born" and "Female children surviving" variables. That is not done in CHDEADFEM, which includes only the samples that directly reported the information in the appropriate form.

2	Primary completed
3	Secondary completed

4	University completed
9	Unknown

## description

### DEFINITION

EDATTAIN records the person's educational attainment in terms of the level of schooling completed (degree or other milestone). The emphasis on level completed is critical: a person attending the final year of secondary education receives the code for having completed lower secondary only -- and in some samples only primary.

EDATTAIN does not necessarily reflect any particular country's definition of the various levels of schooling in terms of terminology or the number of years of schooling. EDATTAIN is an attempt to merge -- into a single, roughly comparable variable -- samples that provide degrees, ones that provide actual years of schooling, and those that have some of both. In addition to EDATTAIN, a country-specific education classification is provided which loses no information and reflects the particular educational system of that country (for example EDUCBR for Brazil, EDUCCL for Chile, and EDUCUS for the United States). As always, users can refer to the original education source variables for each sample, if they wish.

Many samples also give single years of schooling completed, recorded in YRSCHOOL. Some samples provide educational information in a form that could not be incorporated into EDATTAIN.

2	Unemployed
3	Inactive
9	Unknown/missing

### description

#### DEFINITION

EMPSTAT indicates whether or not the respondent was part of the labor force -- working or seeking work -- over a specified period of time. Depending on the sample, EMPSTAT can also convey further information.

The first digit of EMPSTAT is fully comparable, and classifies the population into three groups: employed, unemployed, and inactive. The combination of employed and unemployed yields the total labor force. The second and third digits of EMPSTAT preserve additional information available for some countries and census years but not for others.

Employment status is sometimes referred to in other sources as "activity status".

## description

### DEFINITION

EMPSTAT indicates whether or not the respondent was part of the labor force -- working or seeking work -- over a specified period of time. Depending on the sample, EMPSTAT can also convey further information.

The first digit of EMPSTAT is fully comparable, and classifies the population into three groups: employed, unemployed, and inactive. The combination of employed and unemployed yields the total labor force. The second and third digits of EMPSTAT preserve additional information available for some countries and census years but not for others.

Employment status is sometimes referred to in other sources as "activity status".

998	Response suppressed
999	Unknown

## description

### DEFINITION

INDGEN recodes the industrial classifications of the various samples into twelve groups that can be fairly consistently identified across all available samples. The groupings roughly conform to the International Standard Industrial Classification (ISIC). The third digit of INDGEN retains important detail among the service industries that could not be consistently distinguished in all samples.

"Industry" refers to the activity or product of the establishment or sector in which a person worked.

## LABFORCE: Labor force participation

Data file: PRY1982\_PHC-P-H.dat

### Overview

Type: Discrete    Decimal: 0    Width: 1    Range: -    Format: Numeric

### Questions and instructions

### CATEGORIES

Value	Category
1	No, not in the labor force
2	Yes, in the labor force
8	Unknown
9	NIU (not in universe)

## description

### DEFINITION

LABFORCE is a dichotomous variable identifying whether a person participated in the labor force. Labor force participation generally means working or seeking work within a specified reference period.

For most samples LABFORCE is a recode of EMPSTAT (employment status). A consistent lower age universe of 15 or older has been applied to increase comparability across samples. Full detail is retained in EMPSTAT, which should be used for any study of child labor.

IPUMS

**OCC: Occupation, unrecoded****Data file:** PRY1982\_PHC-P-H.dat**Overview**

Type: Continuous    Decimal: 0    Width: 4    Range: -    Format: Numeric

**description**

## DEFINITION

OCC records the person's primary occupation, classified according to the system used by the respective national census office at the time. For someone with more than one job, the primary occupation is usually the one in which the person spent the most time or earned the most money, although this may not have been explicit in the instructions for a specific census.

To ensure confidentiality, very small occupations are recoded to a residual category indicating the persons had an occupation, but the job title is not identified. The number of cases recoded should be too small to affect analyses.

## description

### DEFINITION

OCCISCO records the person's primary occupation, coded according to the major categories in the International Standard Classification of Occupations (ISCO) scheme for 1988. For someone with more than one job, the primary occupation is typically the one in which the person had spent the most time or earned the most money.

## description

### DEFINITION

YRSCHOOL indicates the highest grade/level of schooling the person had completed, in years. Only formal schooling is counted. YRSCHOOL accounts for the number of years of study, regardless of the track or kind of study. Information on degree and/or technical track is available in EDATTAIN. Years of schooling for Israel, categorized into intervals, are given in YRSCHOOL2.

Users should pay close attention to the top-codes in each sample, as discussed in the comparability section.

## CATEGORIES

Value	Category
0	NIU (not in universe)
1	Self-employed
2	Wage/salary worker
3	Unpaid worker
4	Other
9	Unknown/missing

**description**

## DEFINITION

CLASSWK refers to the status of an economically active person with respect to his or her employment -- that is, the type of explicit or implicit contract of employment with other persons or organizations that the person has in his/her job. In general, the variable indicates whether a person was self-employed, or worked for someone else, either for pay or as an unpaid family worker. CLASSWK is related to EMPSTAT, which is used to define the universe in many samples.

Class of worker is often referred to as "status in employment" in other sources.

## description

### DEFINITION

GEOMIG1\_5 indicates the major administrative unit in which the person resided five years prior to the survey. Only intra-national migrations are recorded; however, the variable incorporates geographies for every country that lists place of residence five years ago, to enable comparative analysis of subnational migration. Foreign migrants are coded 097 or 997. Codes for GEOMIG1\_5 match the geographic codes in GEOLEV1 (current place of residence). For similar information for different time intervals since migration, see variables GEOMIG1\_P, GEOMIG1\_1, and GEOMIG1\_10. More on migration and geography can be found [here](#).

## INTERVIEWER INSTRUCTIONS

I. For all persons. General characteristics

Question 4. What is the attained age? Write the age on the line for "attained age." [A drawing of people and depiction of question 3 is omitted here.]  
 [P. 39]  
 If the person giving the information does not know their age help them in some of the following ways:  
 Ask some of the other members of the household about their age.  
 Ask for their birth years and make the corresponding calculation. If they say that they were born in 1932, they will be 50 years old (1982-1932 = 50 years). Ask them for a personal identification document (I.D. card, baja [dismissal], election card, proof of conscription, etc.) or deduce their age, in the way done in the previous example.  
 By making a relation to certain historic, national, local or family events, such as: their age at the time of the revolution of 47, age when they were married and how many years of marriage they have, age when their oldest child was born and the actual age of that person, etc.  
 If it impossible to determine their age through these resources, estimate the age by simple observation.

## description

### DEFINITION

This variable identifies the person's age.

## INTERVIEWER INSTRUCTIONS

I. For all persons. General characteristics

Question 7. In what year did you settle in Paraguay?  
Write down the year that they settled in Paraguay  
[A depiction of question 7 to the right of the preceding text and a drawing of a man below the text is omitted here.]  
The date of arrival of foreigners to the country refers to the date on which they came to settle in Paraguay. Other trips that they might have made, for reasons of business, tourist visits, or to visit relatives, do not count.

## description

## DEFINITION

This variable identifies the person's district or country of birth. District is the second-largest-scale identifier available in the Paraguay samples.

## INTERVIEWER INSTRUCTIONS

I. For all persons. General characteristics

Question 8. Where did you live in July of 1977?  
 Don't forget that this question is only asked of persons age 5 and older. [A depiction of question 8 to the right of the preceding text and a drawing of a man below the text is omitted here.]  
 [P. 41]  
 If the person lived in that district in 1977, or in one of its colonies or companies, etc. make an X in the box corresponding to the answer "here."   
 If the person lived in another district, write down the name of the District and make an X in the box corresponding to urban area or rural area, depending on the case.   
 If they do not remember the name of the district, write down the name of the Department.   
 If they were in a foreign country, write down the name of the country.

**description**

## DEFINITION

This variable identifies the district or country of residence 5 years ago. District is the second-largest-scale geographic identifier available in the Paraguay samples

## UNIVERSE

## INTERVIEWER INSTRUCTIONS

Question 10

[A depiction of question 10 to the right of the preceding text is omitted here.]

If the answer is no or do not know, annul the rest of the questions in this box. If the answer is yes, ask the following questions.

How many children born alive have you had in total?

On the corresponding line write the total number of children born alive; the number of men and women, including those who are absent or who have died.

[A depiction of the question to the right of the preceding text and a drawing below the text are omitted here.]

How many of them currently live in Paraguay?

Write down the total number of men and women children who currently live in Paraguay, be it in the place of enumeration or in another district.

[A depiction of question to the right of the preceding text and a drawing below the text is omitted here.]

[P. 43]

How many of them currently live outside of the country?

Write down the total number of men and women children who currently reside outside of the country. Do not include those who are outside of the country on a visit or for business.

[A depiction of question and a drawing to the right of the preceding text is omitted here.]

How many children have died?

[A depiction of question below the preceding text and a drawing to the left of the text is omitted here.]

Write down the total number of children, men and/or women, who have died. Do not include those born dead.

On what date was your last child born? Is that child still alive?

On the corresponding line write the day, month, and year of birth of the last child born alive.

Make an X in the corresponding box, indicating if this child is alive or dead.

[A depiction of question to the right of the preceding text is omitted here.]

## INTERVIEWER INSTRUCTIONS

Question 10

[A depiction of question 10 to the right of the preceding text is omitted here.]

If the answer is no or do not know, annul the rest of the questions in this box. If the answer is yes, ask the following questions.

How many children born alive have you had in total?

On the corresponding line write the total number of children born alive; the number of men and women, including those who are absent or who have died.

[A depiction of the question to the right of the preceding text and a drawing below the text are omitted here.]

How many of them currently live in Paraguay?

Write down the total number of men and women children who currently live in Paraguay, be it in the place of enumeration or in another district.

[A depiction of question to the right of the preceding text and a drawing below the text is omitted here.]

[P. 43]

How many of them currently live outside of the country?

Write down the total number of men and women children who currently reside outside of the country. Do not include those who are outside of the country on a visit or for business.

[A depiction of question and a drawing to the right of the preceding text is omitted here.]

How many children have died?

[A depiction of question below the preceding text and a drawing to the left of the text is omitted here.]

Write down the total number of children, men and/or women, who have died. Do not include those born dead.

On what date was your last child born? Is that child still alive?

On the corresponding line write the day, month, and year of birth of the last child born alive.

Make an X in the corresponding box, indicating if this child is alive or dead.

[A depiction of question to the right of the preceding text is omitted here.]

## INTERVIEWER INSTRUCTIONS

**II. For persons age 7 and older. Educational characteristics**

Question 13. What is the last grade or course attained in regular instruction?  
 Read each of the options. Write down the grade or course in the corresponding life. Make an X in the box corresponding to none if the person did not attain any grade. Make an X in the box corresponding to unknown if the person giving the information does not know the level of instruction of the person. [A depiction of Question 13 to the right of the preceding text is omitted here.]  
 Regular instruction means the instruction imparted in schools, high schools [*colegios*], and Universities (public or private), and the instruction imparted by other institutions that offer equivalent titles, even if they are of a distinct nature: military academies, religious schools [*Salesianos*], technical and vocational schools, agricultural school, etc.  
 For those persons who have completed adult literacy courses, use the following equivalencies:  
 Adult literacy :  
 1st course attained  
 2nd course attained  
 3rd course attained  
 Regular instruction:  
 3rd grade attained  
 5th grade attained  
 6th grade attained  
 Titles obtained: On this line, write the titles obtained by the person in the institutions of regular teaching.  
 Example: Bachelor of commerce, bachelor of humanities, lawyer, civil engineer, etc.

### INTERVIEWER INSTRUCTIONS

III. For people 12 years old and older. Economic characteristics.

Question 17. What did you do with most of your time last week?  
 Read each of the options until receiving an affirmative answer and make an X in the corresponding box.  
 If it is a case not specified, specify the case on the line "other situation."  
 [A depiction of question 17 to the right of the preceding text is omitted here.]  
 If you have marked the boxes corresponding to 1, 2, or 3, continue with questions 18, 19, and 20. If you have marked the boxes corresponding to 4, 5, 6, 7, 8, 9 or "other situation," end the interview, unless dealing with the head of household, who should answer question 21.  
 Keep in mind the following definitions:  
 Work: Includes all persons who work for pay or salary, "in cash" or "in kind," for "tip or commission" or for "themselves." Also if they work, without remuneration, for a family business.  
 Does not work, but has a job: Includes all persons who have a job or business, but who in the week being asked about, did not work for reasons of illness, vacation, machine malfunction, lack of work material, bad weather, accidents, etc.  
 Seeking work having worked before: This refers to persons who, having worked before, in the week before the Census did not work and spent their time seeking another job.  
 Seeking their first job: Includes the people who, not having worked before, desire to do so, and have made an effort to find work, personally offering themselves to possible employers or registering themselves at job placement offices, putting notices in the newspaper, etc.  
 Living from their retirement or pension: Includes the persons who did not have a paid occupation the week before the census, and maintained themselves solely from what they received by way of retirement or pension.  
 Lived from their investments: Includes persons who received income solely from the product of their holdings or capital.  
 Studied: Refers to persons who dedicated themselves exclusively to studying, without having done any paid work.  
 Work in one's own home: Includes persons who dedicated themselves to domestic labors in their

own home, such as homemakers, and other relatives who do domestic chores without pay. If the enumerated does work in someone else's home, and is paid "in cash," make an X in the box corresponding to "work."   
 [P. 50]  
 [A drawing of people working is omitted here.]  
 Disabled: Includes those people who cannot work or seek work because of their advanced age, physical disability, or chronic illness.  
 Other situation: Includes any other reason for why they neither work for pay nor seek paid work.   
 [A drawing of man in jail and old man is omitted here.]

## INTERVIEWER INSTRUCTIONS

Question 10

[A depiction of question 10 to the right of the preceding text is omitted here.]

If the answer is no or do not know, annul the rest of the questions in this box. If the answer is yes, ask the following questions.

How many children born alive have you had in total?

On the corresponding line write the total number of children born alive; the number of men and women, including those who are absent or who have died.

[A depiction of the question to the right of the preceding text and a drawing below the text are omitted here.]

How many of them currently live in Paraguay?

Write down the total number of men and women children who currently live in Paraguay, be it in the place of enumeration or in another district.

[A depiction of question to the right of the preceding text and a drawing below the text is omitted here.]

[P. 43]

How many of them currently live outside of the country?

Write down the total number of men and women children who currently reside outside of the country. Do not include those who are outside of the country on a visit or for business.

[A depiction of question and a drawing to the right of the preceding text is omitted here.]

How many children have died?

[A depiction of question below the preceding text and a drawing to the left of the text is omitted here.]

Write down the total number of children, men and/or women, who have died. Do not include those born dead.

On what date was your last child born? Is that child still alive?

On the corresponding line write the day, month, and year of birth of the last child born alive.  
Make an X in the corresponding box, indicating if this child is alive or dead.

[A depiction of question to the right of the preceding text is omitted here.]

## INTERVIEWER INSTRUCTIONS

III. For people 12 years old and older. Economic characteristics.

Question 20. What category or position do you hold in your occupation?   
 Read each of the options and make an X in the corresponding box.   
 [A depiction of question 19 to the right of the preceding text is omitted here.]   
 Keep in mind the following definitions:   
 Public or private employee: A person whose occupation involves intellectual effort more than physical effort, who works for a set pay, salary or commission, for an owner or employer (be they public or private). Managers, directors, secretary, office personnel, etc. are all employees.   
 [Drawings of employment status categories are omitted here.]   
 Worker, journeyman, domestic servant: A person who's occupation involves mainly physical work, and is paid daily, monthly, weekly, or by contract, "by tips" or "in kind." This group includes construction workers, foremen, estate or yard workers, domestic employees, milkmen, drivers, etc.   
 Employer or owner: A person who runs their own economic company or exercises a profession or office, having one or more paid employees (employees or workers), not including domestic servants.   
 [P. 53]   
 Self-employed: A person who runs their own company or business and who exercises a profession or office on their own, without having any paid employees under them.   
 Unpaid family worker: A person who works 15 hours or more during the week in a company or business run by a member of their family, without receiving any pay for their work.

**description**

## DEFINITION

This variable indicates the status of an economically active person with respect to his or her employment. For example, whether the person is self-employed, works for someone else, or is an unpaid family worker.

## UNIVERSE

Paraguay 1982: Economically active persons age 12+ excluding those who looked for their first job [discrepancies: none]

## LITERAL QUESTION

III. Economic characteristics

For those 12 years of age and older

Ask questions 18 through 20 only if you marked 1, 2 or 3 above.

a="all" v="PY82A439">18. What occupation, position, or profession did you hold during the last week (or in the last job you had)? i1Examples: Driver, dressmaker, farmer, etc. If you had more than one occupation, write the one that provided the greatest income.

## CATEGORIES

Value	Category
00	Professionals, technicians, and related workers
01	Managers, administrators, and officials
02	Clerical, office, and related workers
03	Salesmen and related workers
04	Farmers, fishermen, hunters, forestry workers, and related workers
05	Workers in operating transport occupations
06	Craftsmen and operators in textiles, leather, carpentry, construction, and mechanics
07	Other craftsmen and operators
08	Laborers not elsewhere classified
09	Service and related workers
98	Unknown
99	NIU (not in universe)

## INTERVIEWER INSTRUCTIONS

III. For people 12 years old and older. Economic characteristics.

a="all" v="PY82A439">Question 18. What occupation, office, or profession did you do last week (or in the last job that you held)? Write the name of the specific occupation, office, or profession that the informant declares to have executed in the last week or the last time they worked in the corresponding box. [A depiction of question 18 to the right of the preceding text is omitted here.] Do not forget that this question is only for those people who, in question 17, declared options 1, 2, or 3. Following are given some examples that permit one to appreciate the correct way to write down the information: Incorrect annotation: Professional Employee [P. 51] Merchant Worker Mechanic Construction worker Correct Annotation: (Annotate, depending on the case) Civil Engineer, dentist, pharmacist, lawyer, school teacher, etc. Typist, secretary, personnel director, manager, administrator, etc. Wholesaler, small-items seller, fruit vendor, etc. Iron worker, welder, bread maker, restaurant chef, etc. Automobile mechanic, typewriter mechanic, etc. Mixer [hormigonero], tile setter [azulejista], floor installer [pisero], caster

[<span class="lang">encofrador</span>], etc. <br /><br />Enumerator: <br /><br />a) If the informant has two or more occupations, write down the one that provides him with the greatest income. If they both provide him with the same income, write down the one which he spends more time doing. If he receives the same income and spends the same amount of time on both, write down the one that he considers the most important. <br /><br />b) If, for example, the informant is a lawyer working as a school director, he should be annotated as being a school director. <br /></svar>

604	Weavers in factories
605	Weavers who do not work in factories (Ñanduti weaving)
607	Hand weavers (crochet) (hand-embroidered clothing, lace trim)
611	Weavers of carpets, ponchos, blankets, hammocks, etc. and other persons in the manufacture of similar goods
612	Persons in occupations related to textile production not elsewhere classified
613	Tailors

616	Dressmakers
617	Seamstresses, embroiderers, and sewing assistants
621	Shirt makers
622	Upholsterers (cloth and similar materials), mattress makers, umbrella makers and workers in related occupations (curtains)
623	Ahó poí embroiderers
626	Shoemakers and shoe repairers
627	Cutters, formers, and other persons in occupations related to the factory production of footwear
628	Leather workers and trimmers and other persons in related occupations
629	Other persons in occupations related to the production of leather goods (e.g. briefcases, purses, bags, suitcases, bottle holders, etc.) except footwear, gloves and clothing
632	Carpenters and floor assemblers (board layers), wood sealers, carriage makers
633	Cabinetmakers, wood carvers, spindle makers, finishers, and persons in similar occupations
634	Operators in the manufacture of furniture and wood articles; adjusters
635	Other wood artisans and operators such as those that manufacture wooden shoes, trunks and barrels, frames, boxes and other articles and equipment made of wood
641	Concrete and cement refinishers and finishers
646	Other artisans and operators in related occupations not listed elsewhere
651	Construction and maintenance painters
652	Other painters and workers in related occupations not elsewhere classified
654	Pipe fitters, pipe adjustors, plumbers
655	Riveters, assemblers of metal structures and assemblers in naval construction
656	Tinsmiths, sheet metal workers, boilermakers and other person that work with metal sheeting
657	Oxifuel cutters; welders, soldering by hand or machine, electric welders, and blowtorch welding
658	Other persons in related occupations not elsewhere classified (plumbers' assistants, iron painters, etc.)
661	Electricians and electrical repairmen
662	Linemen and telephone, telegraph, electrical and telecommunications repairmen
663	Electronic technicians who repair radio and television receptors
664	Electronics repairmen of refrigerators and other appliances
666	Installers of electrical equipment; lighted signs
668	Other electricians and persons in related occupations
671	Adjusters, assemblers, and installers of machinery
672	Mechanics and repairmen of automobiles, buses, trucks, and motorcycles
673	Mechanics and repairmen of airplanes and ships
675	Mechanics and repairmen of agricultural and industrial machinery
678	Adjuster-operators of tooling machines, milling machines, polishers, lathes, drills, shapers, sanders, metal saws and similar machinery
679	Machinery greasers and lubricators except on ships
680	Other artisans and related operators not elsewhere classified; locksmiths, mechanics of gas stoves, kerosene stoves, wood burning stoves, gas lamps, kerosene lamps
681	Watchmakers

683	Dental prosthesis makers or orthopedic mechanics
687	Jewelers and goldsmiths
693	Operators of construction machinery; dredgers
694	Operators of thermal chemical treatment plants
699	Craftsmen and operators in textiles, leather, carpentry, construction, and mechanics, not further specified
700	Typographers, typesetters, electrotypists, and stereotypists
708	Other persons in occupations related to graphic arts not elsewhere classified
715	Quarry workers
723	Blacksmiths, forge and hammer workers
726	Other operators in the metallic industry not elsewhere classified
731	Fired ceramic makers
734	Artisans and operators in the manufacture of clay, cement, clay slabs, and similar products
735	Other artisans and operators in the glass and ceramic industries
742	Distillers and operators of appliances used in the distilling process; operators in alcohol factories
745	Lumber cutters, planers, and other operators in occupations related to wood treatment
748	Other operators in occupations related to the manufacture of paper not elsewhere classified
750	Slaughterers, butchers and operators in slaughterhouses and meat processing plants
751	Flavorers, smokers, and preparers of meat and fish; food dehydrators and other persons in similar occupations; operator in grease factories
752	Millers and operators in mills
753	Bakers, pastry chefs, chip makers, candy makers, persons in the manufacture of pastas; confectionary
755	Operators in the preparation of caramels, jams, and honey
756	Tasters of tea and coffee, coffee selectors, mixers, and roasters; workers in the manufacture of palmetto, spice, condiments, cacao, salt, yeast, etc.
757	Operators and day laborers in vegetable oil factories
758	Operators in the manufacture of cane beverages, wine, beer, non-alcoholic beverages, and ice
759	Operators in sugar manufacture and refining
760	Selectors, mixers, and other operators in tobacco preparation
761	Cigarette makers (hand processing of cigars and cigarettes) and operators in the manufacture of tobacco products; tobacco processors
770	Meat trimmers, skinners, tanners (sow) and other operators in related occupations
799	Other craftsmen and operators, not further specified
802	Workers and laborers in quarries; sand operators; stone crushers
803	Workers and laborers in other solid non-metal mineral deposits
807	Workers in limestone, cement, and chalk factories
810	Tape men, day laborers, stake preparers, and other topography assistants and other workers in related occupations, measure takers
811	Workers and laborers in occupations related to the construction of bridges, roads, tunnels, dams, and other special projects; group workers
812	Carpenter assistants, construction worker assistants, and other artisan assistants related to the construction industry

813	Other workers, laborers and employees in occupations related to the construction industry not elsewhere classified; gang overseers, well workers
820	Cargo handlers
821	Packers, stevedores, dock-workers, markers, and labellers

961	Beauty stylists, hair stylists, manicurists and make up artists
975	Other workers in services not elsewhere classified
994	Members of the armed forces
998	Unknown
999	NIU (not in universe)

## INTERVIEWER INSTRUCTIONS

<span class="h3">III. For people 12 years old and older. Economic characteristics.</span></p>

<p><sva a="all" v="PY82A439"><span class="em">Question 18. What occupation, office, or profession did you do last week (or in the last job that you held)?</span><br /><br />Write the name of the specific occupation, office, or profession that the informant declares to have executed in the last week or the last time they worked in the corresponding box. <br /><br />[A depiction of question 18 to the right of the preceding text is omitted here.]<br /><br />Do not forget that this question is only for those people who, in question 17, declared options 1, 2, or 3.<br /><br />Following are given some examples that permit one to appreciate the correct way to write down the information: <br /><br />Incorrect annotation:<br /><br />Professional<br />Employee<br /><span class="pg">[P. 51]</span><br />Merchant<br />Worker<br />Mechanic<br />Construction worker<br /><br />Correct Annotation:<br />(Annotate, depending on the case)<br /><br />Civil Engineer, dentist, pharmacist, lawyer, school teacher, etc.<br />Typist, secretary, personnel director, manager, administrator, etc.<br />Wholesaler, small-items seller, fruit vendor, etc.<br />Iron worker, welder, bread maker, restaurant chef, etc.<br />Automobile mechanic, typewriter mechanic, etc.<br />Mixer [<span class="lang">hormigonero</span>], tile setter [azulejista], floor installer [<span class="lang">pisero</span>], caster

[<span class="lang">encofrador</span>], etc. <br /><br />Enumerator:<br /><br />a) If the informant has two or more occupations, write down the one that provides him with the greatest income. If they both provide him with the same income, write down the one which he spends more time doing. If he receives the same income and spends the same amount of time on both, write down the one that he considers the most important. <br /><br />b) If, for example, the informant is a lawyer working as a school director, he should be annotated as being a school director. <br /></svar>

## description

### DEFINITION

This variable identifies the person's occupation (3 digits).

### UNIVERSE

Paraguay 1982: Economically active persons age 12+ excluding those who looked for their first job [discrepancies: none]
